Doors

for 5 foot wide exits and passageways

Standing Doors

"step"

base

"step"

Cut along the edges. Then fold at the base and "steps" then glue the backs of the doors together.

Strong card is recommended but paper still works well.

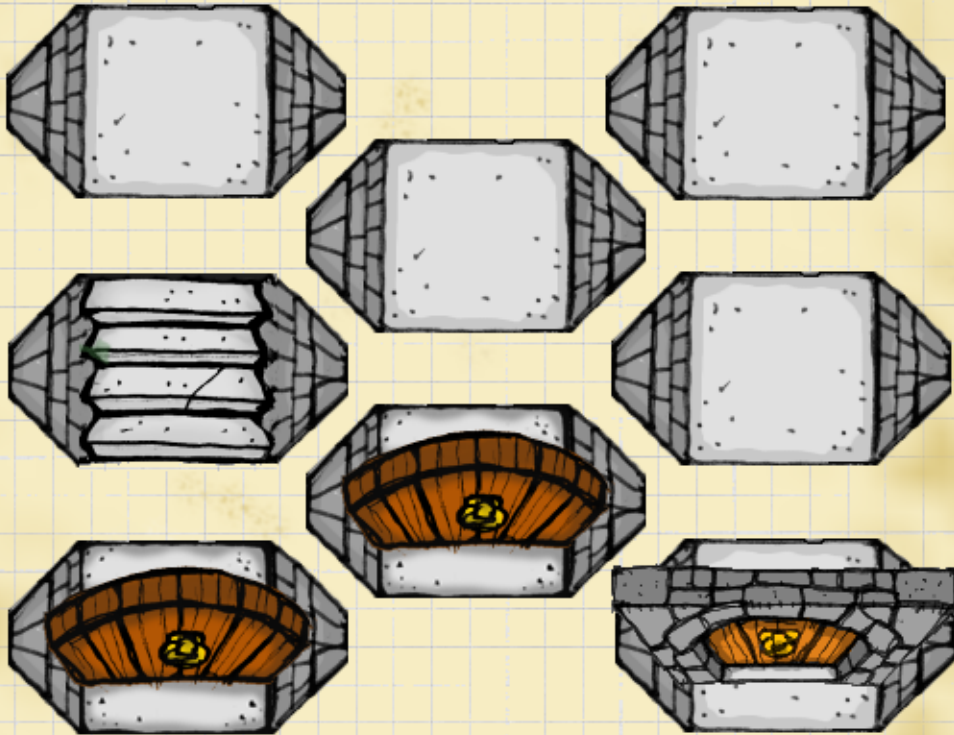

Taping a coin to the base can prevent doors being blown over during play.

Alternatively, the doors can be modified to slot into plastic figure bases.

Connectors

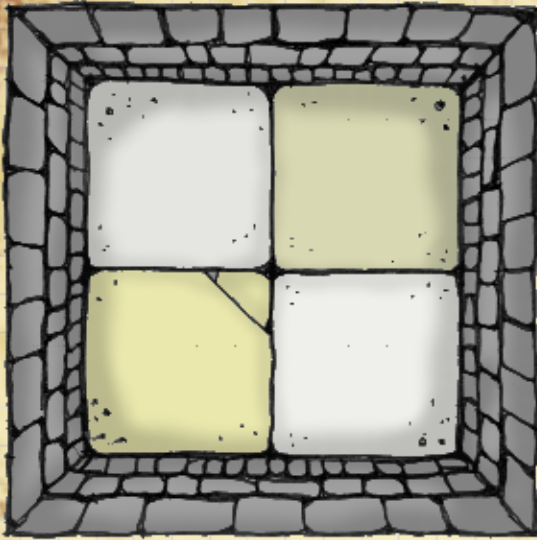

5 feet wide - misc
