		-

Maintenance Policies and Procedures The BCP and DRP will drive this process! Organize, manage, and coordinate effects of the changes via Change Control Management and Software. Establish standards to incorporate change on the routine schedule. Embed the BCM concept into the operation. Reduce negotiations on who, how, when, why, and where maintenance is done. Normal activity fully supports maintenance.

	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,			

Software Tools for Maintenance

Customized internal or commercial applications

Important responsibilities to be assigned

- Person(s) to maintain the plan documents
- People that will use the plan documents
- Reviewers and maintenance of the plan documents
- Software maintenance and support options

		_

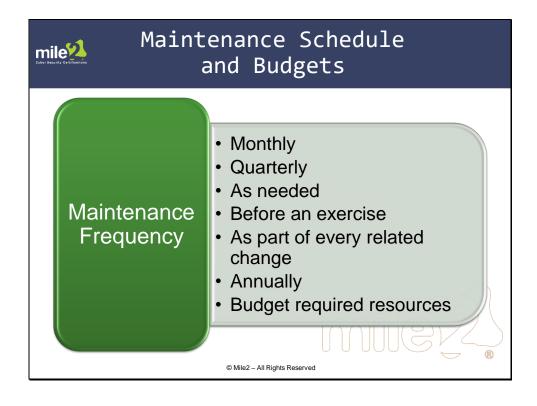

Plan Maintenance

Keep the Plan up-to-date

- Use a Change Management process
- · Revise: Go back through the planning process
- Update: Ensure all plans are changed & approved
- · Distribute: Ensure every registered recipient gets current copy

Things to watch for

- Added/discontinued business functions
 - Could change priorities
 - · Reallocation of assets
- Resource Changes
 - Facilities: New building, lost lease, etc.
 - People: DR / BC people leaving the organization
 - · Hardware: Check backup strategy for coverage
 - · Software: Check restart procedures for patches & updates

Sources of change information

- Test results
- · Corporate directives, announcements,
- Strategic business decisions, HR/turnover, etc.
- Decisions from team DR/BC meetings
- CCB Change Control Board
 - New applications, systems, processes
 - Upgrades
 - Resource Capacity expansion
 - Data location and integration changes
 - Priority changes

Changes in Business

- Strategic business direction (mission statement, annual report)
- Personnel / contact or numbers
- Mergers / Acquisitions
- Outsourcing
- New Business Partners

Changes in Information Technology

- IT systems
- Secure design and architecture
- Hardware
- Software / Applications

Changes in Information System Security

- Access Controls
- Security Architecture
- Network Security Perimeter
- Communications Security

Reviews of BC / DR Program Deliverables

- BC Program
 - Current BCP Policy
 - New Members and tasks assigned to BCP Process
 - Departmental Change
 - Change in contracts with service providers (SLA)

Reviews of BIA Deliverable

- BIA
 - · Current critical services or new services
 - Retired services
 - Review of MTD, RTO, and RPO of critical services
 - Review of dependencies

Review of Continuity Strategy

- Continuity Strategies
 - New networks, systems, assets, or hardware
 - Changes in security procedures
 - Changes in hardware and software communications requirements
 - New hardware and software needed to support the new critical services
 - Removal of services no longer requiring hardware or software

Reviews of BCP and DRP

- BC Plan and/or DR Plan results
 - Review of response, recovery, resumption, restoration, and return to home site procedures
 - BC Teams
 - Members
 - Roles and Responsibilities
 - Action Items
 - Notification Lists
 - Alternate Sites
 - · List of critical services

Reviews of other BCP Deliverables

- Testing and drills exercise program
- Awareness and training program
- Audit program
- · Lessons learned from a real incident
- Lessons learned from any exercises
- Lessons learned from a real incident from a similar organization

Should address at minimum:

- Personnel and assigned recovery tasks
- Recovery procedure changes
- Backup and what is included
- · Periodic review with known deadlines
- Anywhere input can be found or created during the review process

Plan Distribution and Security

Establish Procedures for plan document control (implement records management)

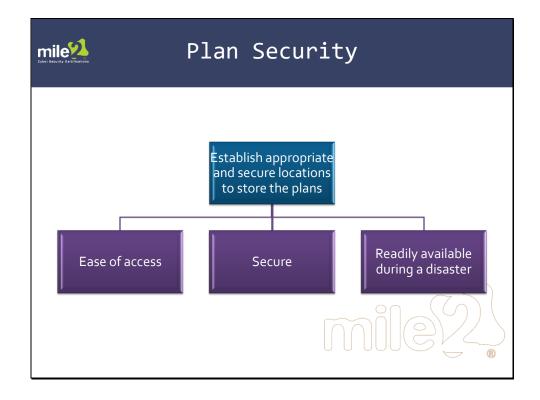

- Assign numbers (Name and versioning) to each plan document
- Assign each numbered document to a specific team member
- Assign page numbers to document
- Replace old pages with updated pages
- Destroy old pages

Plan Distribution

BCP Plans are highly sensitive documents that MUST be carefully controlled:

- Each version of a completed plan is distributed BY SERIAL NUMBER to relevant registered recipients.
- Obsolete plans are disposed of according to the BCP policy and possible need to revert back one issue.
- Team leads and critical business leaders are on this distribution list
- Avoid storing the plans in the danger zone at ground zero.

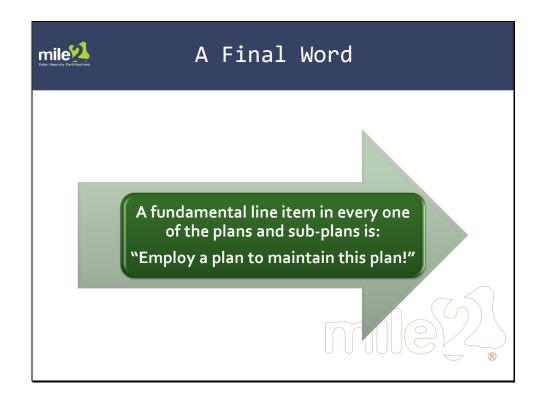

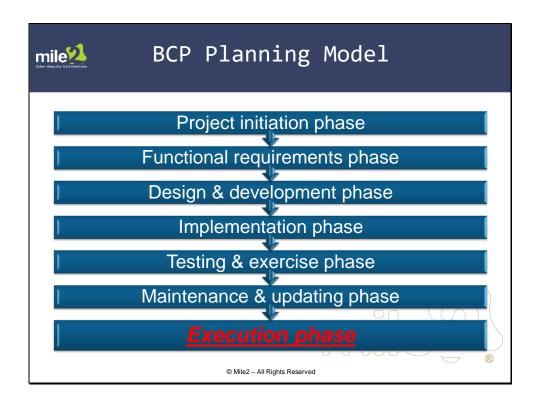

Maintenance Summary

BC / DR planners must manage the effects of change to successfully maintain the current recovery plan

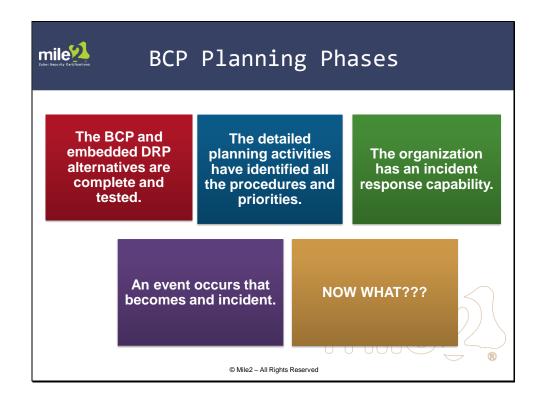

Keys to success

- Create a formal business process for plan maintenance
- Establish and update policies, systems, and procedures
- Coordinate and communicate change information between dependent organizational units

Executing the Plan

Remember the fundamental recovery timing consideration:

- LEAP FORWARD
 - No need to accredit the systems at the DR site but do certify that nothing has changed.
- CRAWL BACK
 - To the primary site with the least mission critical systems to be used as a validation of the primary site readiness.

Accreditation is needed!

Execution Phase

Escalation Procedure

- · Problem Identification
 - Define categories of potential problems
 - Describe when and how a problem will be escalated and to whom
- Disaster Declaration Criteria
 - · Determine when a problem becomes a disaster
 - Identify who is authorized to declare a disaster
- Contact list (call tree)
 - Identify who will be called
 - · Identify who will make the calls
 - · List names and contact numbers
- · Initial response actions

Execution Phase

Primary Notification

- Focal point: BC coordinator, senior management, BC teams, vendors
- Damage assessment
- Declare disaster
- · Mobilize teams brief, assign tasks, debrief
- · Compile information from available sources

Secondary Notification

- · Other employees
- Customers
- · Public & suppliers
- Local authorities

Sources of Information

Damage assessment team (Primary)

- Physical and IT Security (what happened)
- Human resources (injuries)
- Facilities (structure report)
- Business units (level of damage)
- Risk management and insurance (cost estimates)

Sources of Information

Secondary Sources

- Emergency Services (experience)
- Media (similar incidents)
- Insurers (cost estimates)
- Business Units (updates)
- Risk management and insurance (cost estimates)

Escalation Procedures

Major Action Items

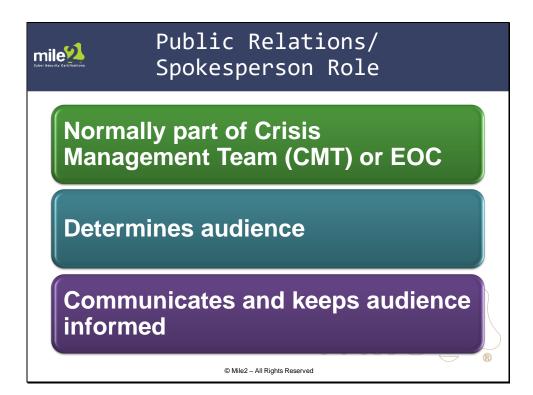

- Prepare declaration statement
- Activate emergency operations center (EOC)
- Activate recovery teams
- Activate recovery support vendors
- Compare status of disaster with recovery procedures in the plan
- Begin crisis communications (PR)

Disaster <u>Declaration</u> Procedures

Activate Public Relations Coordination – Plan

- Use pre-arranged PR program or delegate to an expert / firm
- Update prepared press releases
- Develop schedule for press conferences and interviews
- Communicate name of spokesperson
- Prepare to address all of the necessary audiences

Typical Audiences

External

- Media
 - Newspapers, radio, TV, internet sites, social media
- Public
- Local, State, and Federal Emergency services, civil defense, etc.
- Government Agencies
 - State and local fire authorities, law enforcement, Emergency Medical Services (EMS), and transportation

© Mile2 - All Rights Reserved

Typical Audiences

Internal Organizational Groups

- Corporate or agency level
- Business unit or department level

Essential or affiliated groups

- Employees and their families
- Customers
- · Owners, stockholders, stakeholders
- Vendors

© Mile2 – All Rights Reserved

Execution Phase

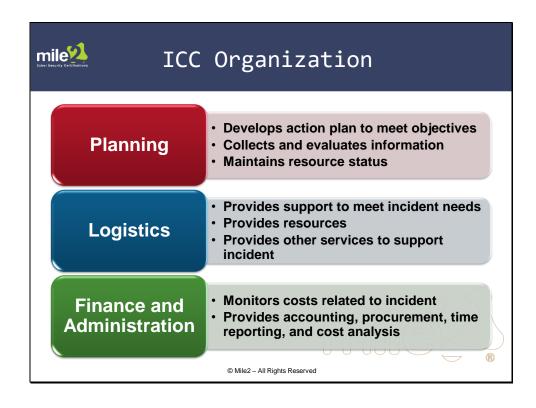

Public Relations

- Proactive public relationships program
- Necessary crisis coordination with external agencies
- Essential crisis communications with stakeholders (employees and their families, key customers, key suppliers, corporate management)

Components of a Proactive Public Relations Program

- Internal groups (senior management, corp comm, employees, customers, owners, stockholders)
- External group (Red Cross, media, civil defense, weather reporting, government services)

ICC - In government and military parlance it is an Incident Command Center. ICC provides control and monitoring of the recovery process. Primary role is to provide LOGISTICS SUPPORT EOC: Emergency Operations Center EOC orchestrates the conduct of the recovery process Often the two terms are synonymous depending upon the type of organization in play.

Be Prepared to Work with Public Authorities Identify sources of information on applicable laws and regulations Identify applicable regulations and laws concerning environmental issues Identify statutory industry requirements Ensure your plans meet all regulatory and statutory requirements Meet and work with local authorities

	_	

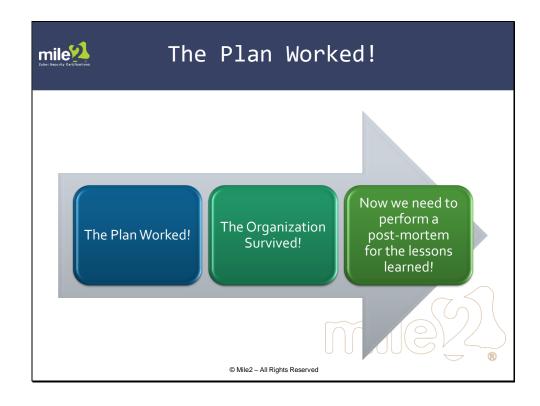

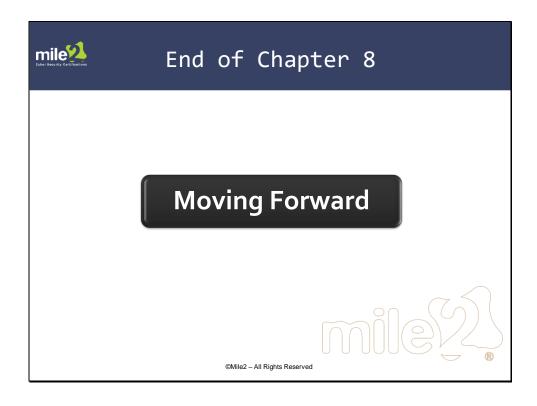

Executing the Plan

Essential components for activating the plan include well documented procedures:

- · Identify a disaster
- Communicate the nature of disaster to recovery team members
- Manage information
- · Return to business as usual

Questions and Answers

Review Questions:

- 1. If system and application changes occur outside of the Change Control program, the greatest concern is that:
 - A. The BCP becomes obsolete
 - B. The time for implementation will increase
 - C. These changes will be identified after implementation
 - D. Version control of the changes will be a challenge to maintain consistency
- 2. BCP plan maintenance and updates should be done:
 - A. Annually
 - B. Quarterly
 - C. After every change
 - D. It depends on what is appropriate for the environment based on the BC Policy

Answer Key:

1. A

If system and application changes occur outside of the change control program, the greatest concern is that the BCP becomes obsolete.

2. D

BCP plan maintenance and updates depend on what is appropriate for the environment based on the BC Policy.
