

# Dungeoneering Presents

## Stone Kingdom: Wall Pack I

Everything you need to start building walls (including corners). Page 2 contains shorter (8-inch) walls, where Page 3 has longer (10-inch) walls. Page 4 contains corners.

### **Using Pieces**

To use the straight walls, just cut along the grid line between walls. Then cut to shorten as needed.

To use the Corners and T-junctions, cut them into 2x2 inch squares, then use them individually to join walls.

### **Create!**

Don't be afraid to experiment with different cuts and sizes. It's your dungeon after all!
