## TENTS

- Cut, score and fold where noted.
- As an option you may wish to remove the black area at the entrance of the tent.
- Glue the main side tent tabs together forming a pyramid like box
- Glue the tent topper together. You will notice that the extra piece is a very tight fit. Pinch the corners of your tent topper to create a slight bend on each side. This gives the model a realistic fabric like depression (See photo below).
- Glue the remaining tabs from the main tent to your tent topper.
- Sandwich the flag and glue in place. You can glue the tent flag anywhere you desire!
