1 Shot Clear Cuervo Tequila 7-Up

In an old fashioned glass put 3 ice cubes and your alcohol then fill the rest of the glass with the 7-Up.

[NOTE: This is a less-powerful version of the "official" PPC]

### PPC (The Official Version)

4 Shots Everclear

1 shot of:

Peppermint Schnapps(Steiner)

Sake(Kurita)

Ouzo(Marik)

Plum Wine(Liao)  
Bourbon(Davion)-tequila if in Capellan March

Inferno SRM-2

1 Shot Sambuca  
1 Shot Amaretto  
2 Shots Goldschlager  
2 Coffee Beans

Combine ingredients in a cordial glass (a wineglass will work if you don't have one of these). Light 'er up and let 'er burn for six turns (1 minute) before extinguishing. Enjoy. You can also double or triple the amount if you want an Inferno-4 or Inferno-6. In that case, the burn time increases as follows:

Inferno-4: 9 turns (minute and a half)

Inferno-6: 12 turns (two minutes)

If you go for the 4 or 6, I suggest a pilsner glass (tall glass that looks like an inverted cone). In any case, let the drink sit for a few moments before drinking unless you want scalded tongue.
