

# THE LATEST AND GREATEST

Vehicle manufacturers from across the world meet at the National Fair of Texas to exhibit their latest designs at the Combat Showcase! Thousands of autoduellers saw the cutting edge of automotive technology in person at the National Fair, but folks who couldn't make the trip were out of luck — until now.

This commemorative book captures all the glamour, excitement, and most importantly, the vehicle designs of the 2037 Combat Showase. See —

- 103 new, innovative design ideas for cars, cycles, trikes, and trailers!
- Designs of the actual vehicles used in the AADA 2036 World Championship Tournament, plus comments from the participants and an interview with the World Champion!
- The Lone Star Limo — Texas President Duke Buchanan's personal vehicle!
- And each vehicle is presented in **schematic** form — ready for play, with all the information you need at your fingertips. Just pick a design, and go!

Austin, Texas  
13 September 2036

Howdy Friends!

Let me wish you a big Texas welcome to the Combat Showcase at the National Fair of Texas!

This year's exposition is exciting, believe you me! With our newly expanded facilities you'll be able not only to examine the new offerings up close, but also preview them *in action* at the Mandingo Memorial Arena and on the West Wall munitions range.

I know you're eager to see the vehicles on display from the 2036 World Championship, especially the Navigator, designed and driven by Mike Montgomery. Mike is from Texas' own River City ADA (of which I have the honor of being a member) and we're Texas-proud to present our home-grown reigning World Champion during this Bicentennial Exposition.

For your less fortunate friends who are unable to be here personally, pick up extra copies of this fact-filled commemorative program guide at one of the sales booths near the exits.

Enough talk, though. You're here for the cars, not a speech.

Duke Buchanan

President  
Republic of Texas

Ammo

For the most part, the vehicle diagrams in this guide are straightforward. Each vehicle type has its own distinctive outline. Most components with damage points (DPs) will have that many boxes in which to record damage. However, vehicular armor damage is marked opposite the appropriate armor location (T(28): III means that there were 28 points of top armor, of which 3 have been shot off); guard, hub, and component armor damage is recorded in the same box that lists its initial value.

There is a "weapon readout" in the corner of each diagram, listing each weapon, the amount of ammunition it has, its "To Hit" number, and the dice of damage it does. Thus, MG(a) (20\*7/1) indicates Machine Gun a, with 20 rounds, requiring a 7 to hit, and doing 1 die of damage. FOJ (25\*dr/1-2) is a Flaming Oil Jet, with 25 rounds, that is a dropped weapon, doing one die minus 2 of damage. All "To Hits" for laser-guided rockets are listed as "5" or "6"; without the guidance, these revert to an "11."

Extra magazines are indicated three ways: the weapon picture (or "icon") has an extra box, set off by a thicker line; also, the amount of ammunition listed for that weapon is twice the normal load, and there is one asterisk per extra magazine following the weapon description. In a few cases, weapons do not have complete ammunition loads, because of a cost or weight restriction; in each case, the correct ammunition load is given in the weapon readout.

Most links are shown by a distinctive dashed line; laser guidance links, however, are simply shown with an "LG" by the appropriate rocket. In a few very complicated cases, links are not shown in the diagram itself; instead, links are listed in the weapon readout. In those cases, each link is numbered; each weapon that has a particular link number listed next to it is part of that particular link.

**The Flap:** When preparing for combat, fold the flap extending from the cover over the sidebar text so that it is adjacent to the combat diagram you want to use. (If you've photocopied the diagram, be sure to include the flap in the photocopy.) On the flap, list the weapons available, assigning to each the appropriate amount of ammunition. Record the initial speed and handling status on the first line of each of those two sections.

During combat, each time you change speed or change (or recover) handling status, cross out the old speed or handling status and record the new number on the next line. And each time you fire a weapon that uses ammunition, mark off a shot. This will keep you completely up-to-date on the status of your fighting vehicle at any moment.

Only a few no-weight, no-space items are included in these designs, especially during the first half of the Guide. That leaves you the freedom to add what you want, without the complication of subtracting out what you don't want. The most commonly useful additions are listed in the description of each design.

Above: Use the flap to keep track of speed and handling changes, and ammunition expended. Right: Use the schematic to mark off damage as it is incurred.

## Republic

## LONE STAR LIMO

One of the few vehicles *not* for sale at this year's Combat Showcase, Texas President Duke Buchanan's Lone Star Limo is still likely to be the talk of the show. Designed by the Hexworld design team and custom-crafted by Texas' own Republic Motors, its weaponry is mainly defensive — but the twin gauss guns come in handy when the best defense is a good offense. And it's got the comfort, security, and luxury befitting the President of the world's proudest republic. *X-Hoy, Ch/Med, Truck PP/Sol, Tires/296 pts, FP & LR armor*

For those who think \$170,000 isn't enough, targeting electronics for the gunner is an obvious upgrade. And the cargo space could be used to hold an extra cache of hand weapons and medical equipment.

Mom and Dad! Looking for that all-important first cycle for your son or daughter? Introducing the Cannon, just right for that first big step in. Imp. Susp./Med. PP/HD Tires/130 pts. Norm. armor

Take care that your tyke doesn't grab a couple of grenades and slip this trike off to a Div. 5 arena. She might win!

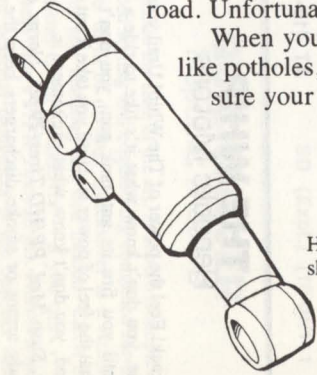

*Designed by Russell Timmerman.*

**FIRECRACKER**  
Indra Motors

Zesty! Spirited! Energetic! Fun! Sporty! Those are the words that come to mind when you drive our perky little Firecracker. You'll be laughing all the way to the winner's circle. X-Hvy. Ch/Hvy. Susp./Med. PP/PR Tires/95 pts. Norm. armor

Content and party whistles are all the Firecracker needs at Div. 5.

*Designed by Kurt Hoglund.*

Any little old lady can handle a car on a flat, smooth, wide road. Unfortunately, there aren't many roads like that around . . .

When you *have* to travel through dangerous road hazards like potholes, debris, road barriers, and fleeing pedestrians, be sure your vehicle is equipped with Brunt Industries' —

## Heavy Duty Shock Absorbers

HD Shock Absorbers — \$400, 5 lbs., no space per tire. HD shocks must be mounted on all tires of a vehicle to be effective. Reduces all road hazards (obstacles, debris, weapon fire, etc.) by one difficulty factor; no roll necessary for D0 hazards unless road conditions — oil, ice, and so on — result in a positive hazard.

## THE SABRE

Indra Motors

In days gone by, Russian nobles fought duels for personal honor and fame. Their weapon of choice? The sabre — swift, sleek, and easy to handle. Cycle: Hvy. Susp./Lg. PP/PR Rad. Tires/34 pts. Norm. armor

A single weapon computer and body armor are recommended. Also note that each FG has only 14 rounds of ammunition.

*Designed by Nighthawk Smyth.*

## '37 COMET

Nelson Cycles

Once again, Nelson Cycles shows its commitment to you, the duelling customer, in quality at a low, low price. Hvy. Susp./Lg. PP/Pr Rad. Tires/20 pts. Norm. armor/add. pow. 1100

Armor piercing rounds, improved body armor, a single weapon computer, and hand weapons are all good buys for the Comet cyclist in Div. 10.

*Designed by Scott Haring, RC.*

## CATAPULT

Crane Industries

Break down their defenses with the Catapult! The anti-tank gun on this baby is guaranteed to take out the biggest guys in the arena with ease. So, smash your way into the winner's circle. Use the Catapult. X-Hvy. Ch/Hvy. Susp./Sm. PP (HD Trans)/PR Tires/35 pts. Norm. armor, 36 pts. Metal armor

A single weapon computer, improved body armor, and personal weapons round the Catapult out for Div. 10 duelling.

Dangerous! Evil! Vicious when cornered! A fighter! All these and more describe the Rat, the new heavy cycle from Cycle Concepts. Available only in black, the Rat strikes terror into the hearts of man and beast. Beware of his teeth — two micro-missile launchers and a heavy rocket.  
**Cycle:** *Hvy. Susp/Lg. PP/PR Tires/30 pts. Norm. armor*  
**Sidecar:** *Imp. Susp/PR Tires/16 pts. Norm. armor*  
 A single weapon and targeting computer combination gives the Rat a more accurate bite, while body armor provides a tougher hide.  
*Designed by James Wilson.*

## HIGH NOON Republic Motors

This baby ain't for no Sunday drives in the park. When boys go home crying to mama, and it's time for some serious action. Just pull that trigger on the anti-tank guns and watch your troubles go blowing in the wind. High Noon.  
**Hvy. Susp./Sup. Tk. PP/HD Tires/30 pts. Metal armor**  
 A single weapon computer nicely rounds out the High Noon for Div. 10.

## QUETZALCOATL

Republic Motors

The mighty Aztec warrior was known for his speed and power. So, when Republic Motors designed their new medium class cycle, they designed it with the Aztec god of fire in mind. The Quetzalcoat has heavy suspension, an acceleration of 10, and rocket fire potential like you wouldn't believe: choose armor-piercing or incendiary rockets each time you pull the trigger.  
**Cycle:** *Hvy. Susp/Med. PP/PR Rad. Tires/39 pts. Norm. armor/add. pow. 700*  
**Sidcar:** *Imp. Susp/PR Rad. Tires/30 pts. Norm. armor*  
 Most cyclists take body armor and/or AP flechettes.

## USURPER

Linden Motors

When its time for the old order to fall and the young guys to take over, when you've got something to prove, or just when you're the new guy in town, you've got to have a car in the arena that you can trust. A car that's as confident, as proud, as good as you are. A car like... the Usurper. The Usurper's anti-tank gun and recoilless rifle can get you out of light places with ease. The Usurper will help you win, and keep, a place in the arena.  
**Imp. Ch/Hvy. Susp/Sm. PP (HD Trans)/PR Tires/ 125 pts. Norm. armor**  
**Body armor** is the best choice for Div. 10 arenas.  
*Designed by RC.*

## MARQUIS DE SADE

Excalibur

Climb aboard. Buckle in. Twist the key. Relish the power of the Vulcan machine gun. Enjoy the four rocket launchers. Know that you are in the one, the only, Marquis de Sade. By Excalibur. Of course.  
**X-Hvy. Ch/Hvy. Susp/Med. PP/PR Tires/200**

## VESUVIUS Crane Motors

Beware the blasting power of Vesuvius! Crane Motors suggests that only men and women that can handle this power drive the Vesuvius. We can't be responsible for the consequences otherwise. *Hyv. Ch/Hyv. Susp/Med. PP/PR Tires/172 pts. FP armor.* Body armor helps on defense, while AP flechettes provide inexpensive side power against pedestrians. Designed by Daniel O'Neil.

## ANNOUNCING THE BEGINNING OF THE END FOR LASER-GUIDED WEAPONS!

A military secret for years, the Laser Reactive Web is now available for the public. A fiber optic web molded into the armor protects your vehicle by automatically detecting where striking laser fire originates, triggering a linked weapon to strike back! Available only at authorized HITECH dealers.\*

## HITECH the future — today!

\*All sales outside North America are prohibited. Manufactured under license from the government of Canada.

### Laser Reactive Web components:

**Fiber Optic Web** — \$100/armor location protected (front, back, etc.), \$50/other location (hub, wheelguard, EWP, etc.); no weight or space. Fiber Optic Web is destroyed if half or more of the armor on that location is destroyed. Each Web requires a Photocell.

**Photocell** — \$500 each, no space or weight; one required per armor or other location protected. Photocell uses the Web to detect any laser fire which scores a direct hit on that specific component; it triggers return fire by linked non-aimed weapons (Smoke Dischargers, dropped weapons, etc.) or the Web Central Logic Unit. Fire is returned before subsequent laser-guided fire arrives, but after any laser damage is recorded. (If the laser is disrupted — by smoke, destruction, etc. — all laser-guided fire reverts to its unguided to hit number.) The photocell is destroyed if all armor on that location is destroyed.

**Web Central Logic Unit (WCLU)** — \$4500, no space or weight. Only one required per vehicle; WCLU is not necessary if only non-aimed weapons are reacting to laser fire. Aimed weapons linked to the WCLU may return fire at the striking laser (at the appropriate side or turret, if the laser is vehicle-mounted). Automatic firing modifiers apply. Aimed return fire does not occur if the linked weapon cannot bear on the laser. A weapon link is required for each weapon linked to the WCLU. Requires operating Power Plant to function; destroyed if Power Plant is destroyed.

### CHALLENGER

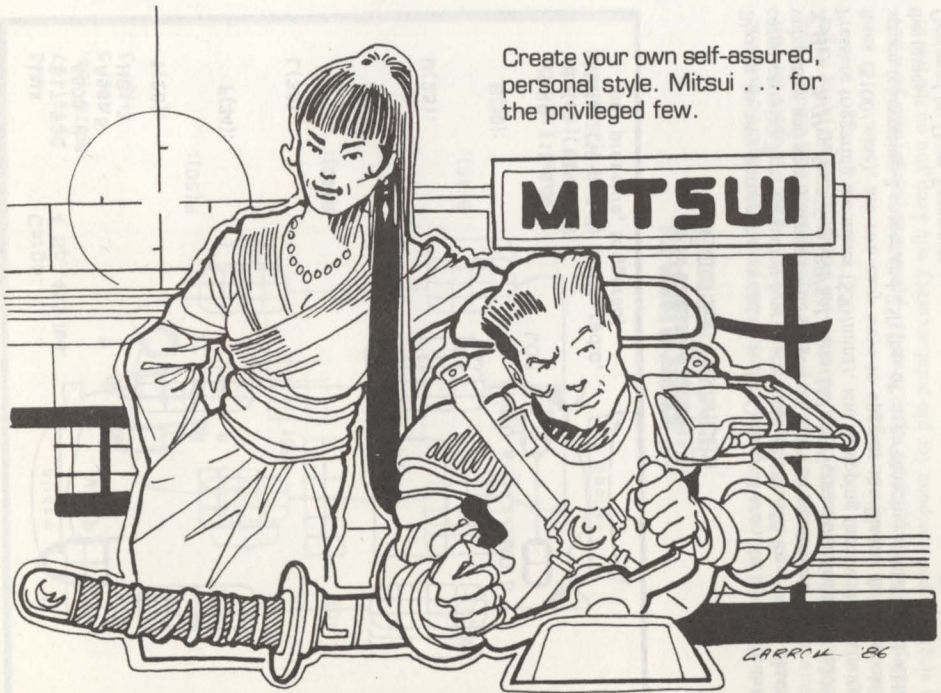

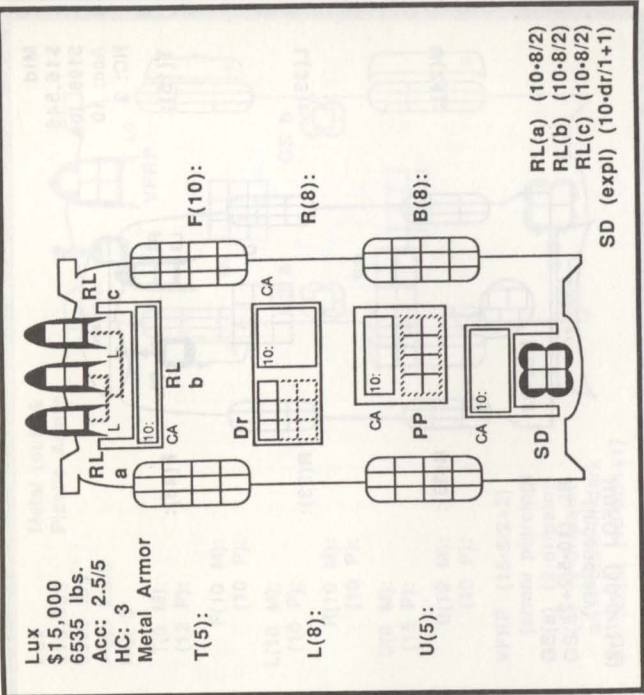

Tate Manufacturing

When you're ready to fight the best, when you're ready to push it to the limit, you need the top of the line — you need the Challenger. You need three rocket launchers for a devastating punch. You need heavy suspension and solid tires and a strong metal exterior. You need a heavy duty transmission. Because you're the new guy in town, and you've got something to prove.

**X-Hvy. Ch/Hvy. Susp/Med. PP (HD Trans)/Sol. Tires/44 pts. Metal armor/add. pow. 1865**

At \$15,000, there's not much to add to this finely tuned Div. 15 competitor.

*Designed by RC.*

Create your own self-assured, personal style. Mitsui . . . for the privileged few.

### '37 TOMAHAWK

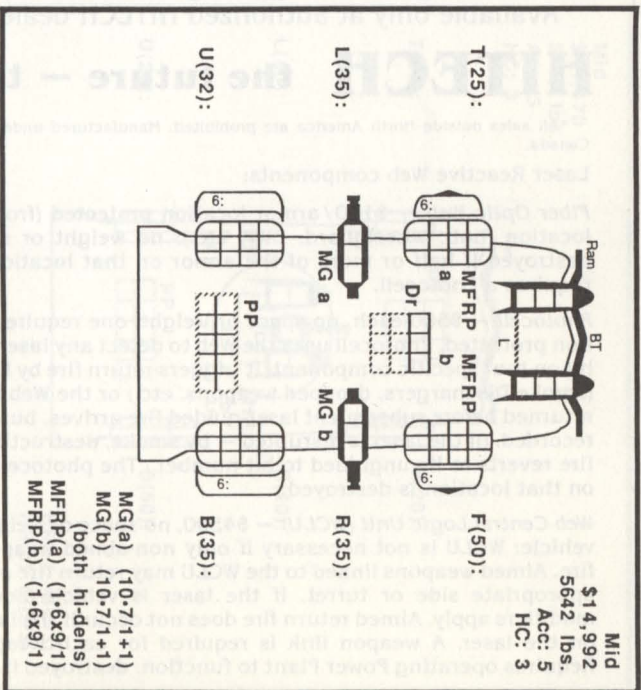

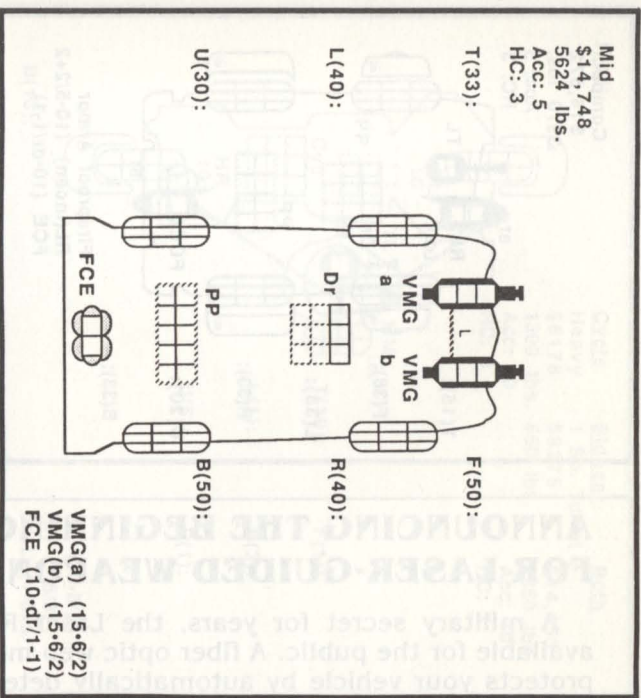

Republic Motors

The Tomahawk is back! The quick-moving, road-holding sport that's fun to be with has just gotten even sportier, even more fun! Featuring more armor and, as an extra bonus, we're replaced that oil jet with a flame cloud ejector!

**X-Hvy. Ch/Hvy. Susp/Lg. PP/PR Tires/243 pts. Norm. armor**

For Div. 15, take body armor. Also note that each VMG has only 15 rounds of ammunition. At Div. 20, add HD shocks, a single weapon computer, improved body armor, anti-lock brakes, personal fire extinguisher, a front bumper trigger, a link to the flame cloud ejector, and 4 smoke dischargers.

*Designed by RC.*

### ARES

Mystic Motors

King of the mountain, Ares rules the high road. So will you, with Mystic Motor's new Ares. This tough mid-size can butt heads with the best of them; aim its proud nose in to the toughest opponents and ram them into the wall. The machine gun and multi-fire rocket pod provide additional protection. Dominate the road with Ares. Latest in a long line of stellar vehicles from Mystic Motors.

**X-Hvy. Ch/Hvy. Susp/Lg. PP/Sol. Tires/212 pts. Norm. armor**

At \$14,992, Ares is optimized for Div. 15 duelling. Note each MG has only 10 rounds of ammunition.

*Designed by Tim Ray.*

Sound the war cry! Here comes the Cherokee! Just like the noble warrior of yesterday, the Cherokee is quick and deadly, with rocket launchers and flaming oil jets.

**Cherokee!** A glorious legend continues.

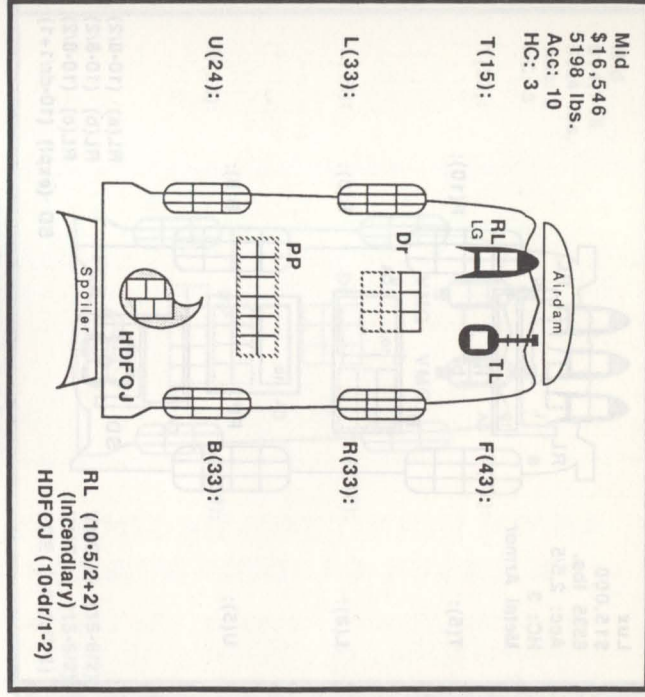

*Hvy. Ch/Hvy. Susp/Sup. PP/PR Tires/181 pts. Norm. armor/add. pow. 2602*

Add a single weapon computer, improved body armor, and a personal fire extinguisher for Div. 20.

*Designed by Tim Ray*

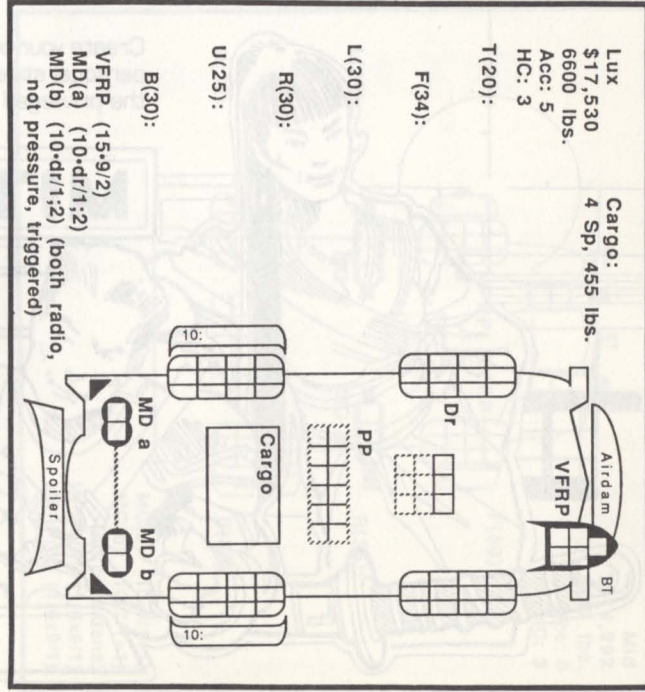

## CHEROKEE

Republic Motors

## BLAZER

Courier Services

Blazing its way across the continent is the Courier Blazer, the newest in the cargo-carrying line. Its roomy four spaces hold a hefty 455 lbs., yet the plush upholstery and sporty chassis will set you on fire with excitement.

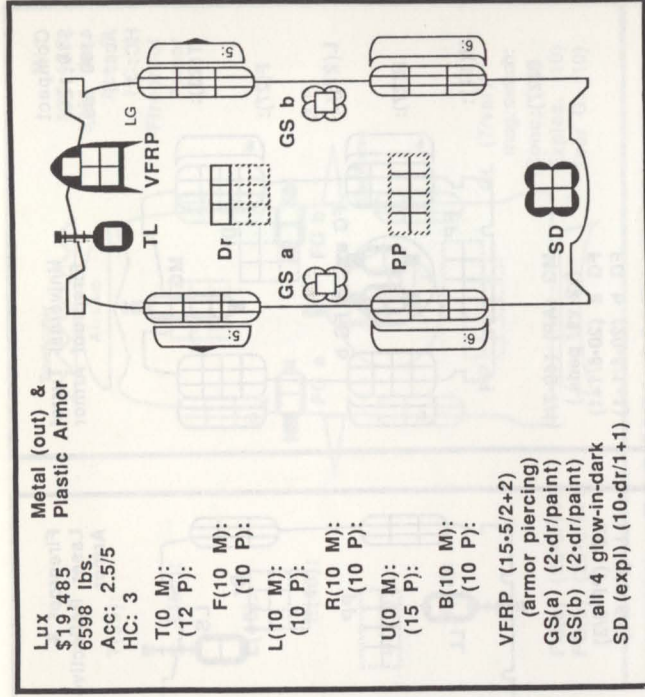

*X-Hvy. Ch/Hvy. Susp/Sup. PP/Sol. Tires/169 pts. Norm. armor/add. pow. 1200*

Pressure triggering the mines (\$50/mine), and equipping them with proximity fuses (\$100/mine), are two easy ways to upgrade the Blazer. A HD smoke screen (converting 2 spaces and 250 lbs. of cargo capacity) can be linked with the mines.

*Designed by Dave Seagraves.*

## TOLEDO

Rothschild Auto Works

Ah, we see the classic design and finely crafted metal edge of the Toledo has caught your eye. You are obviously a buyer of exquisite taste and refinement. But, please, stop admiring it long enough for us to tell you how practical it is. Like its tuned, variably-firing triple rockets. Its paint streamers, blinding and lighting the enemy at night. And its finely tempered metal armor. The Toledo.

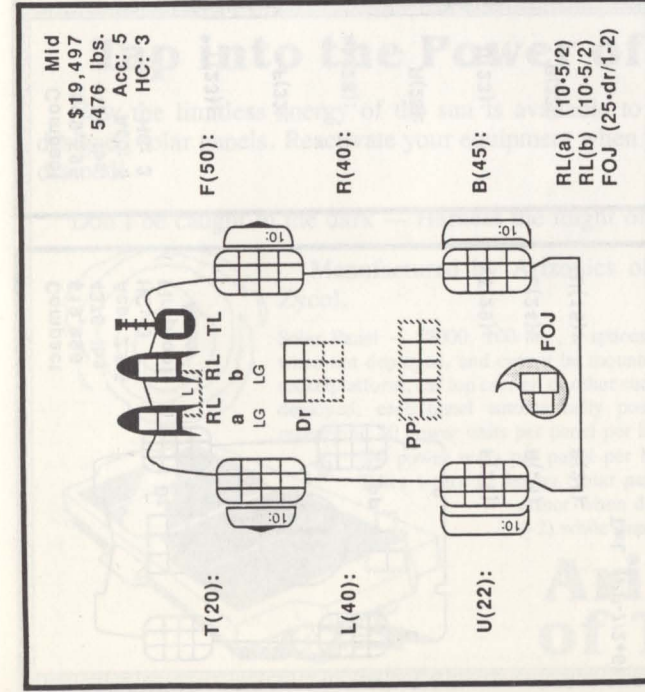

*X-Hvy. Ch/Hvy. Susp/Med. PP (HD Trans)/PR Tires/67 pts. Norm. +0 pts. Metal armor/add. pow. 1802*

A single weapon computer works well for Div. 20 duelling.

*Designed by Tim Ray.*

## MARKSMAN

Republic Motors

Texas has good reason to be proud of the last 200 years. And Republic has good reason to be proud of the Marksman. It's so roomy — plenty of space for your Stetson and boots. Accurate, with never-miss targeting laser. And deadly — that rocket launcher and flaming oil jet will show the world that Texans never forget the Alamo.

The Marksman. Always on target!

*X-Hvy. Ch/Hvy. Susp/Lg. PP/Sol. Tires/217 pts. Norm. armor/add. pow. 524*

A single weapon computer for pin-point accuracy will keep you on the mark.

*Designed by Tim Ray.*

A must for every university, city, town, and hotbed of insurrection. The Nightstick features two flechette guns and an anti-personnel machine gun, perfect for routing those pesky hoods, rebels, and bellyachers. X-Hvy. Ch/Hvy. Susp./Med. PP/Sol. Tires/148 pts. FP armor  
Amex recommends a hi-res computer and AP flechettes to keep the Nightstick in lawful hands.

**Tap into the Power of the Sun!**

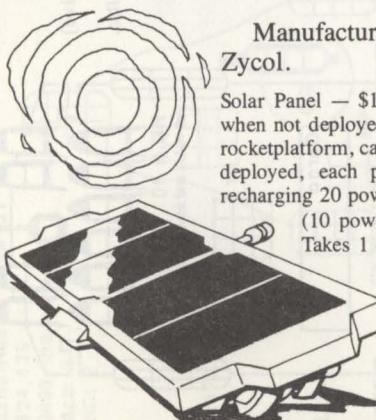

Now the limitless energy of the sun is available to you, with these specially designed solar panels. Reactivate your equipment when your power plant has been drained!

Don't be caught in the dark — Harness the might of solar energy!

Manufactured by Arizonics of Tuscon, a subsidiary of Zycol.

Solar Panel — \$1000, 100 lbs., 2 spaces, 1 DP. Protected by top armor when not deployed, and cannot be mounted on a vehicle that has a turret, rocketplatform, car top carrier, or other such item already on the roof. When deployed, each panel automatically positions itself for top efficiency, recharging 20 power units per panel per hour in daytime under clear skies (10 power units per panel per hour under partly cloudy skies).

Takes 1 turn to deploy (solar panels are *not* protected by the top armor when deployed), and can be targeted at (-2) while deployed.

**Arizonics  
of Tuscon**

When you've got precious cargo to get through a hot spot, you need the Salamander, from Delta. Made to slip through tight places, its gas streamer will leave your opponents gasping for breath while you zip away. **X-Hvy. Ch/Hvy. Susp/Lg. Pp/Sol. Tires/199 pts. LR armor.** Any of the standard long-haul options can be useful with the Salamander. *Designed by Dirck de Lim.*

Nothing strikes terror into the hearts of men like the sight of a coiled diamond-back rattler, ready to strike. Nothing, that is, until Trinity Motors came out with the Diamondback. Beautiful but deadly, the Diamondback is everything you ever wanted a cycle to be. Her gauss guns and mines deal their own particular type of venom.

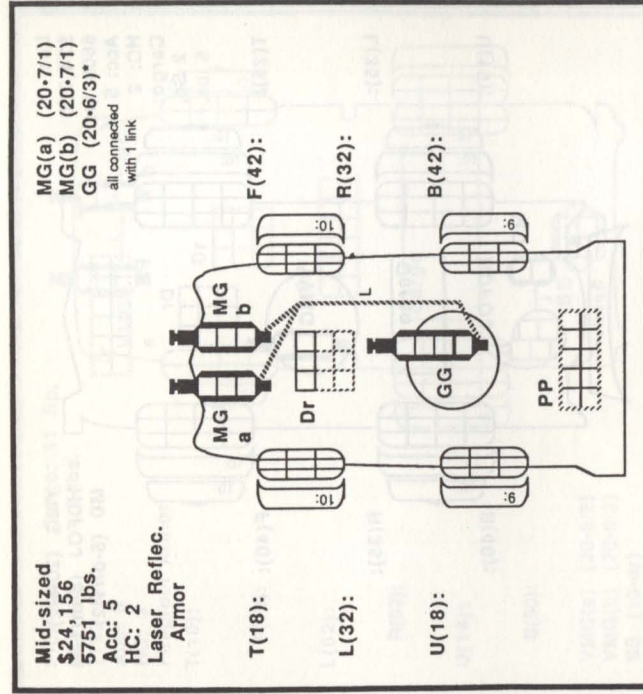

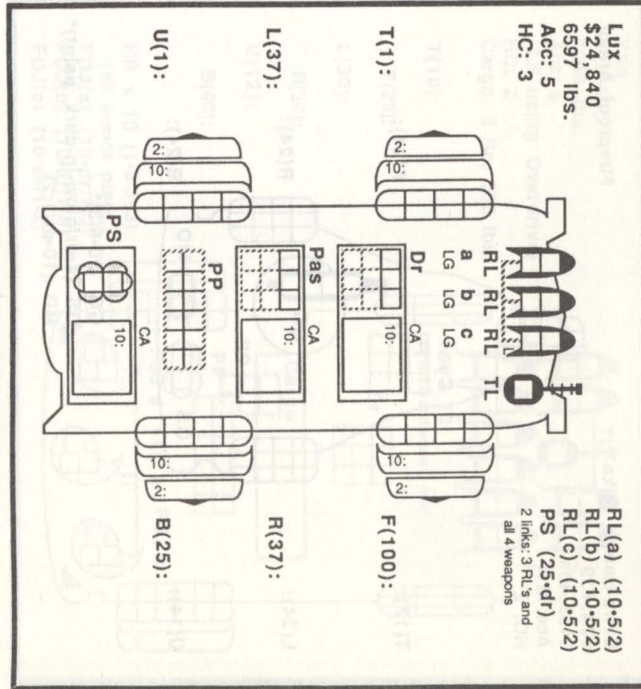

**Hvy. Susp/Sup. Tk. Pp/Sol. Tires/127 pts. FP armor.** A single weapon computer, adding radio control to your mines, or (at night) light intensifying goggles are potent choices for the Diamondback. *Designed by Rob McMillon.*

### The Best Defense is a Good Tank

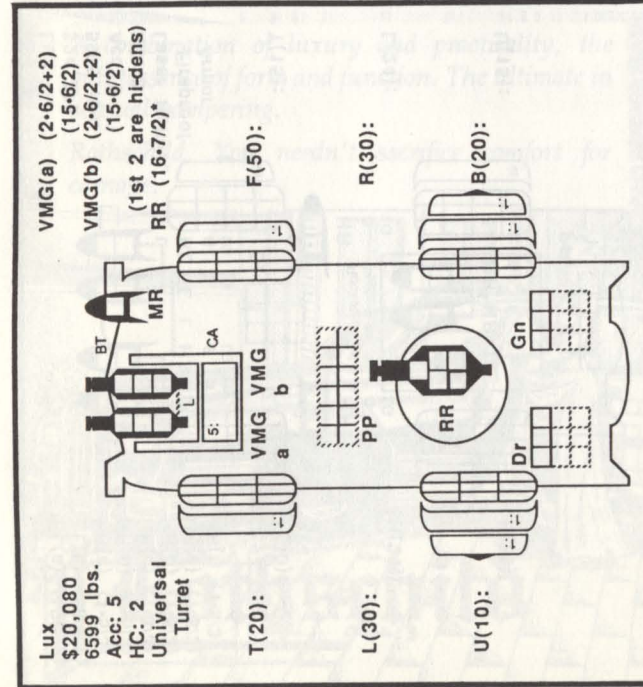

... failing that, though, take as much armor as you can. Mike Montgomery, winner of the 2036 World Autoduel Championship, armored his Navigator with 201 points, and it was barely enough. On the road to victory in the final round at Los Angeles, Mike lost *all* of his 100 points of front armor, his three front-mounted rocket launchers, and over half of his forward component armor. Victory came moments ahead of death. What other advice does he have for aspiring young designers and duellists?

**Armor:** "Since we all needed to cross specific points in the arena, I figured out sustained attacks would be coming at my front armor. Half went there. One on top, to keep folks honest, and 1 underbody for the same reason. I depended on my component armor to suck up underbody hits and anything else that penetrated. Guards all around, as I mentioned above, and dinky hubs, just to convince folks that tire shots weren't worthwhile against me."

**Weapon:** "Rocket launchers, especially with targeting lasers, are the lightest, most accurate weapon for the cost. I mounted them all up front, to avoid buying a turret and real top armor. I figured heavy rockets weigh too much for the one-shot return; if I had gone with VMGs, I would definitely have loaded them with incendiary or high-density ammo for the added damage. The paint spray on my tail gave me 25 shots for just 75 pounds, covered me while I was near, and didn't mess up the arena (and my laser!) with a lot of long-lasting smoke. Personal weaponry is important, too. I didn't need to spend the space on a gunner position; my passenger had a grenade launcher (for cars that are stopped and will still be standing by when the grenade explodes!) and a rifle with anti-vehicular ammo. A-V gives 3 hits/shot, 1/2 hit less than the average for a one die weapon, and costs and weighs a lot less. Definitely a worthy addition! Finally, both I and my passenger had portable fire extinguishers. They weigh less than a vehicular FE, take up no space, and, together, have a better chance of putting out a fire.

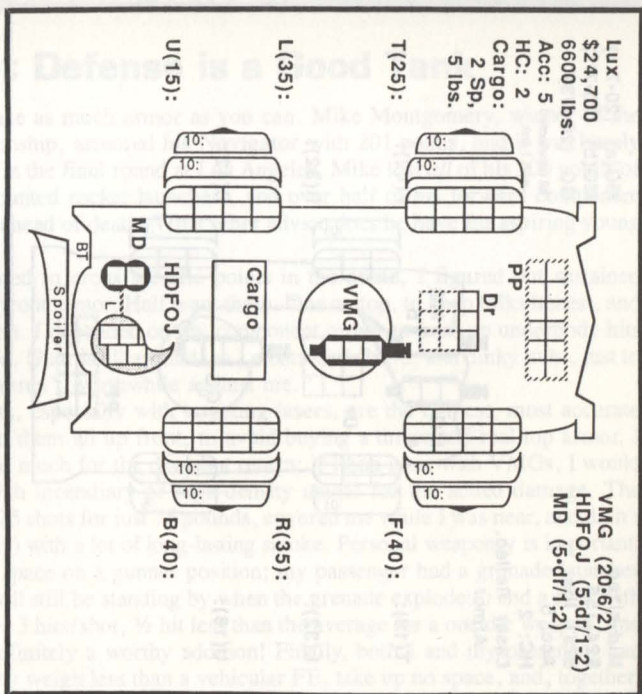

Hi-res computer, improved body armor, portable fire extinguisher (\$5650). . . . team NCCTA's best and most experienced driver. Won first midjet race at age 10. "It's in my blood — I won't stop till I run out of clones!" Sponsored by STB synthetic lubricants and Terradyne Weapons — "When it's him or you, you better be armed with the best: Terradyne Gauss Guns and ammo." Although more at home on the track than the arena, he'll be back in the championships no matter where they're held; "This time I have a score to settle. My guns are pointing at Texas and it's a big target!" X-Hvy. Ch/Hvy. Susp/Lg. PP/PR tires/184 pts. LR armor

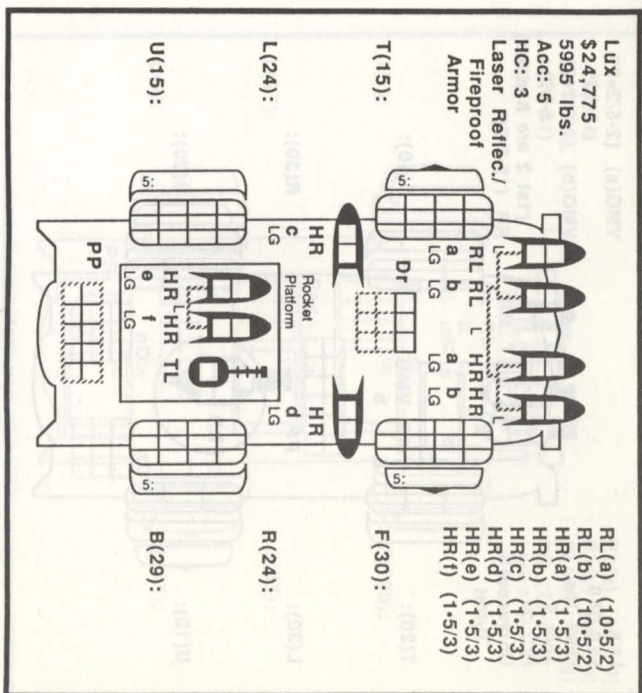

Hi-res computer, body armor, LAW, portable fire extinguisher, loaded heavy pistol, thermite limpet mine, crossbow and 10 bolts (= \$95) (\$5178). "... I traded in a gunner and rocket launcher for 40 more points of armor, and I wish I'd had more. In Division 30, you have to have enough armor to take a couple of 20 point hits, on all four sides!" X-Hvy. Ch/Hvy. Susp/Sup. PP/PR Tires/160 pts. Norm. armor

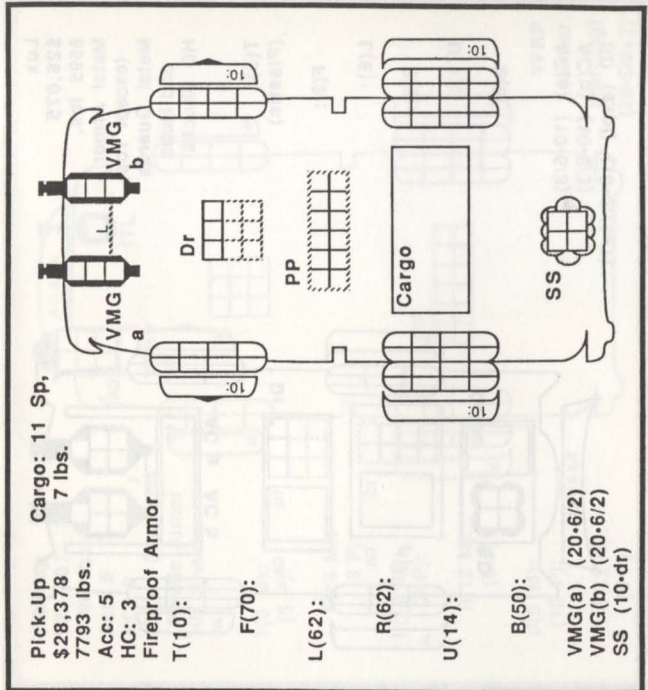

**AUSTRALIA V**  
Andrew Buttery

**PARADOX**  
Clive Henrick

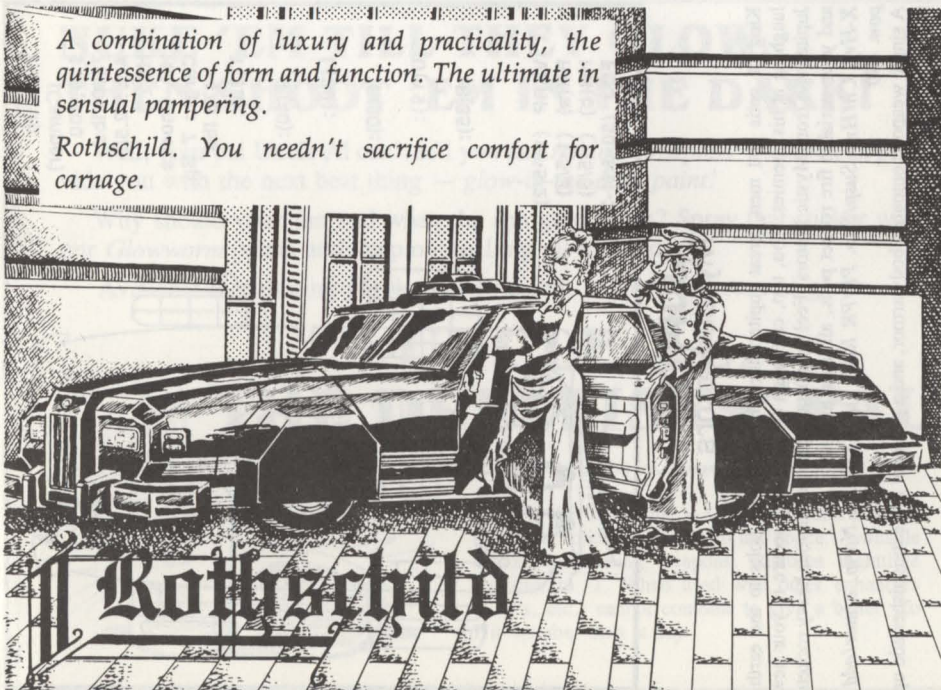

Hi-res computer, body armor, \$975 of personal armament (\$5225). ... been duelling since early teens, won first club championship at age 20, double ace ... Hvy. Ch/Hvy. Susp/Lg. PP/Sol. Tires/137 pts. LR & FP armor

**PHALANX 30**  
Chris Long

Targeting computer, 8 smoke dischargers, 4 explosive grenades, 2 paint grenades (\$1540). Phalanx 30 (the Soviet Choice in Autoduelling) emphasizes defense and endurance — "if you can outlast everyone else, you win!" It's simple and well-rounded; there are fewer things to go wrong, and ready for any arena. One of our few Russian competitors, he has a message for everyone: "I'm a World Class Autoduellist. I didn't get there by being stupid. I always wear body armor, I always watch my tail, and I never use drugs!" X-Hvy. Ch/Hvy. Susp/Sup. PP/PR Rad. Tires/268 pts. FP armor

Efficiency is the name of the game in business. And Tate Manufacturing is the name of the company that gets the job done. Like our new luxury model, the Enforcer. Stop worrying about those punks on the road. Ignore those roadblocks. Laugh at that ambush! Enforcer can take these minor annoyances in stride and still get you there on time.

**X-Hvy. Ch/Hvy. Susp./Med. PP (HD Trans)/PR Tires/5 pts. Norm. armor on top; 30 pts. Metal armor/add. pow. 1805**  
A hi-res computer slips into Div. 30 with \$5 to spare.

VFRP (armor piercing) (28-5/2+2)\*

With a sharp three-pronged attack, the Trident bursts upon the auto-duelling scene with style and flair, wreaking Neptunian revenge upon all that dare to cross its path. Variable fire rockets, laser-targeted rockets, and armor piercing rockets show the fury of the water god himself!

**X-Hvy. Ch/Hvy. Susp./Sup. PP/PR Rad. Tires/40 pts. Norm. armor; 49 pts. Metal armor**  
Add a Single Weapon Computer for Div. 30 duelling. Also note that the extra magazine only has 13 rounds of ammunition.  
Designed by Tim Ray.

**NUKE 'EM TILL THEY GLOW,  
THEN SHOOT 'EM IN THE DARK!**

Well, your pal Uncle Al can't sell you any nuclear weapons\*, but he can provide you with the next best thing — glow-in-the-dark paint!

Why should your fun end when the sun goes down? Spray that sucker with our *Glowworm* paints and keep on duelling all night long!

Available in pulsating purple, bordello red, and extra-terrestrial green.

**UNCLE AL,  
THE DUELLISTS' PAL**

\* Uncle Albert respects all federal ordinances regulating use, storage, and transportation of nuclear substances.

Glow-in-the-Dark Paint — Costs four times as much as regular loads, same weight and space. Available for all paint-using weapons. Reduces nighttime modifier to -1. When used with other enhancers (LIG's, etc.) cannot combine to give a better 'To Hit' number than at day.

**SHIVA**  
Panthreon Motors

Shiva, the Destroyer, devouring all about her. Only a powerful hand can control this cycle. Surrounded by a photocell trigger web and fireproof armor, she calls forth death through her two variable fire rocket pods (infrared laser tuned!) and flaming oil jet. An awesome cycle for an awesome cyclist.  
**Shiva, the Destroyer. Tame her, or stay out of her way.**  
**Hvy. Susp./Sup. Tk. PP/PR Rad. Tires/113 pts. FP armor**  
 A hi-res computer sharpens her claws, while an anti-theft system says you needn't be present for her to reap her harvest of death.  
*Designed by RC.*

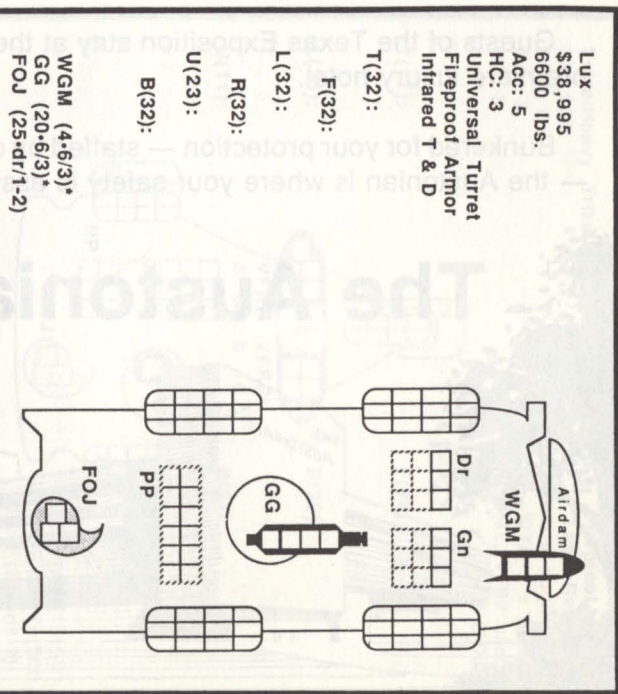

**BLACK DEATH**  
MacMillian Motors

Welcome to the state of the art. A superb example of advanced styling and engineering combined for the singular thrill of driving. This is a car to maneuver in, with a heavy-duty flamethrower thrown in just for fun. Delivery time is generally one month; how ever, there is an added delay of one week for a specific color and a one-month delay for non-standard armor placement.

**X-Hvy. Ch/Hvy. Susp/Sup. PP/Sol. Tires/156 pts. FP armor/add. pow. 1205**

A hi-res computer is always in demand with the Black Death, while tinted and no-paint windshields are also frequently ordered.

*Designed by Lawrence Mee.*

**PATHFINDER**  
Kane Motors

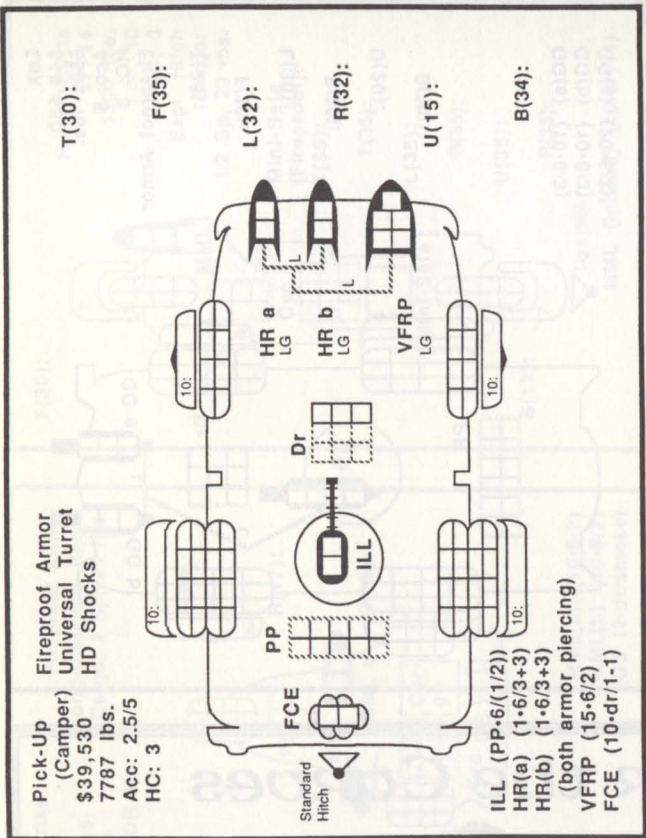

Slip silently through the night. Stalk your prey with the Pathfinder. Infrared turns night to day, and the range of the wire-guided rockets assures a victory before your prey knows what hit him.

The Pathfinder: A whole new path to adventure.

**X-Hvy. Ch/Hvy. Susp/Sup. PP/Sol. Tires/183 pts. FP armor/add pow. 1200**

A hi-res computer multiplies the Pathfinder's deadliness, and some choose to make their rockets armor-piercing.

*Designed by Adrian Quah.*

**NEMESIS**  
MacMillian Motors

Sooner or later they're going to come after you. Or you'll get into a tight spot on the open road. Or the arena's going to be a little tougher than you thought. That's when you'll want it, need it, Nemesis, from MacMillian. With fireproof armor and more weapons than anyone would suspect just from looking at it. Nemesis, the pickup you want when your back is up against the wall.

**X-Hvy. Ch/Hvy. Susp/Lg. PP (HD Trans)/178 pts. FP armor add. pow. 4213**

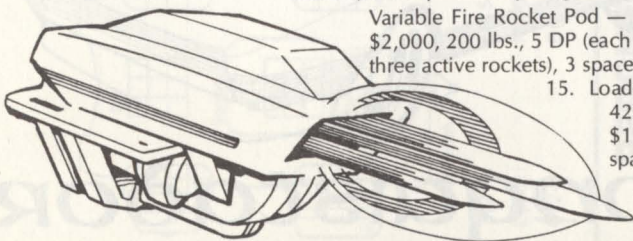

This is such a versatile machine that MacMillian lets the choice of options depend on the job at hand.

*Designed by Ray Morriss.*

**ONE TWO THREE STRIKES!**

and he's out with your Variable Fire Rocket Pod. Now YOU have the option of firing one, two, or three rockets per turn, so you can tailor your firepower to meet the demand.

Don't be forced into extra innings. Run, don't walk, to your Safeteepro dealer, and you'll rip a grand slam every time!

Variable Fire Rocket Pod — To hit 9, 2 dice damage, \$2,000, 200 lbs., 5 DP (each point of damage destroys three active rockets), 3 spaces, 15 shots, CPS 70, WPS 15. Loaded cost \$3,050, weight 425 lbs. Magazine costs \$1100, weighs 240 lbs., 1 space. Can fire 1, 2, or 3 rockets/turn; roll separately to hit with each rocket.

The 2036 Moon Beam, from Rothschild. Stylish, tasteful; a powerful motor tucked inside a sleek exterior. The admiring glances simply acknowledge what you already know: that a luxury car should, first and foremost, look like one.

Moon Beam. The first thing you'll notice is that everyone else does.

X-Hvy. Ch/Hvy. Susp/Sup. PP/Sol. Tires/165 pts. FP armor/add. pow. 1205 Rothschild recommends a high resolution computer and a universal turret if you don't want to just look threatening.

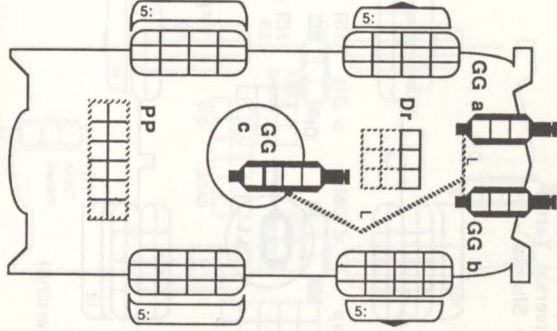

Designed by Greg Kaurik.

**DESPERADO**  
Conquistador

You don't take nothin' from nobody. You can take care of yourself, and you're not above taking the law into your own hands. For those who'd rather take than give, there's the Desperado — vicious, cruel, a truck that makes you sit up and take notice. Even better, take it with the Aztec trailer!  
X-Hvy. Ch/Hvy. Susp/Sup. PP (HD Trans)/Sol. Tires/155 pts. FP armor/add. pow. 8005  
Computers, long distance radio, a no-paint, tinted windshield, radar, and an anti-theft system make the Desperado a force to be avoided.  
Designed by Stephen Beeman.

**Billy Bob's Algae Emporium**

After the Texas-OU game, come by for burgers at Billy Bob's Algae Emporium

Super Special: \$3.00  
Algaeburger, reconstituted  
"fresher than potatoes" French  
Fries, and a medium soft drink

All our algae 100% guaranteed fresh!  
Finest Tanks in town!  
After Texas wins, first beer is "on the house"

Named the Beer Blaster, this baby features a refrigerated mini-safe, just the right size for a keg of . . . well, we know it ain't milk you're thirsty for! A spikedtopper and 190 lbs. of armor weigh help ensure you don't have to share it, either!  
**Hvy. Ch/PR Tires/38 pts. Norm. armor**  
 What can we say? A keg of your finest is the only way to go!  
 Designed by Peter Dosik.

# Cycle

# Concepts

Cycle Concepts introduces the Cerebus series, triple-threat thoroughbreds guaranteed to get your adrenaline pumping! The Greyhound, Doberman, Dalmatian, Bull-

dog, Foxhound, and Hellhound are interchangeable so you can get exactly what you want. All from Cycle Concepts. Not just a cycle — a rite of passage.

Nothing is as beautiful as the sight of a Dalmatian in full run.  
*Hvy. Susp/Sup. PP/PR Rad. Tires/25 pts. Norm. armor/add. pow. 1900*  
 As a hauler, the Dalmatian has few equals. If forced into combat, take a 0-space passenger and 12 more GE's of personal firepower (1 space, 50 lbs.).

## HELLHOUND Cycle Concepts

Straight from their blackest nightmare comes the Hellhound. With a 15 acceleration and a light laser, they'll pray never to cross your path again.  
*Hvy. Susp/Sup. Tk. PP/ PR Rad. Tires/23 pts. Norm. armor/add. pow. 2402*  
 A single weapon computer and body armor are useful options.

## BULLDOG Cycle Concepts

Specially designed to be easily pulled by the Greyhound, Dalmatian, or Hellhound is the tough Bulldog mini-van. With room for one handgunner and all the weapons he can use, the Bulldog is a trusty rearguard for any action you have in mind.  
*Imp. Ch/PR Tires/38 pts. Norm. armor*

## DOBERMAN Cycle Concepts

The Doberman sidecar is a match for any cycle. It features three one-space mini-safes, to help insure that what you're carrying gets there — fast.  
*Imp. Susp/PR Rad. Tires/6 pts. Norm. armor*

## FOXHOUND Cycle Concepts

The Foxhound is as crafty as a fox. Besides being a cargo sidecar (with a one-space mini-safe), it also is a tough little fighter, featuring a turreted light laser. Don't be left behind in the hunt; check out the Foxhound today.  
*Imp. Susp/PR Rad. Tires/6 pts. Norm. armor*

This is the first in a line of three very special trailers in the Man-of-War shipping line. The Intrepid features a two-space mini-safe and three flaming oil jets. It also has a false gauss gun that is guaranteed to fool the closest observer! While indistinguishable from the Defiance or the Dreadnought, it has a massive ¼ ton cargo capacity.  
**X-Hvy. Ch/Sol. Tires/180 pts. Norm. armor**  
 Designed by RC.

T(30):	F(30):
L(30):	R(30):
U(30):	B(30):

The Defiance looks exactly like the Intrepid, with a crucial internal difference. It, too, has a two-space mini-safe. It, too, has three flaming oil jets and a turreted gauss gun. The difference is that the Defiance's turreted gun is real! No false weapons here! When you combine that with eight spaces for a half ton of cargo, you have a lot of room and protection for that cargo at a very low price.  
**X-Hvy. Ch/Sol. Tires/180 pts. Norm. armor**  
 Designed by RC.

**DREADNOUGHT**

GG (10-6/3)

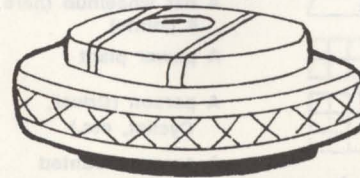

For the raiders who need a powerful ram car, the Gate-Crasher is for you! Mounting an incredibly heavy ram plate and a gauss gun, this baby can plow through anything! Get one and watch your troubles (and enemies) all fall down!  
*X-Hvy. Ch/Hvy. Susp/Sup. PP/Sol. Tires/237 pts. Norm. armor*  
 Designed by Javier Ramirez.

**Stay one step ahead of the enemy — with Spear Munitions.**

You're going after the big one — a truck with metal armor. Obviously you want to drop a few mines in his path, but just as obviously regular mines won't do more than tickle him. Even your trusty Spear 1000 shaped-charge mine will have trouble penetrating. What to do?

**Think TDX 1000!**

Now, thanks to the latest developments from Spear Munitions, you can have the best of both worlds — the efficiency of a shaped charge mine, and maximum tire damage without interference from wheelguards or hubs.

TDX Mines — May only be used in a Spear 1000 Mine-dropper. When detonated, the TDX 1000 mine does 1d+3 damage to the tires, but only 1d-2 to the underbody armor of the triggering vehicle. CPS 100, WPS 10.

**SPEAR MUNITIONS**
