

# Turbolaser Towers

3-D model for use with Ground Assault rules for WoTC's Starship Battles\*

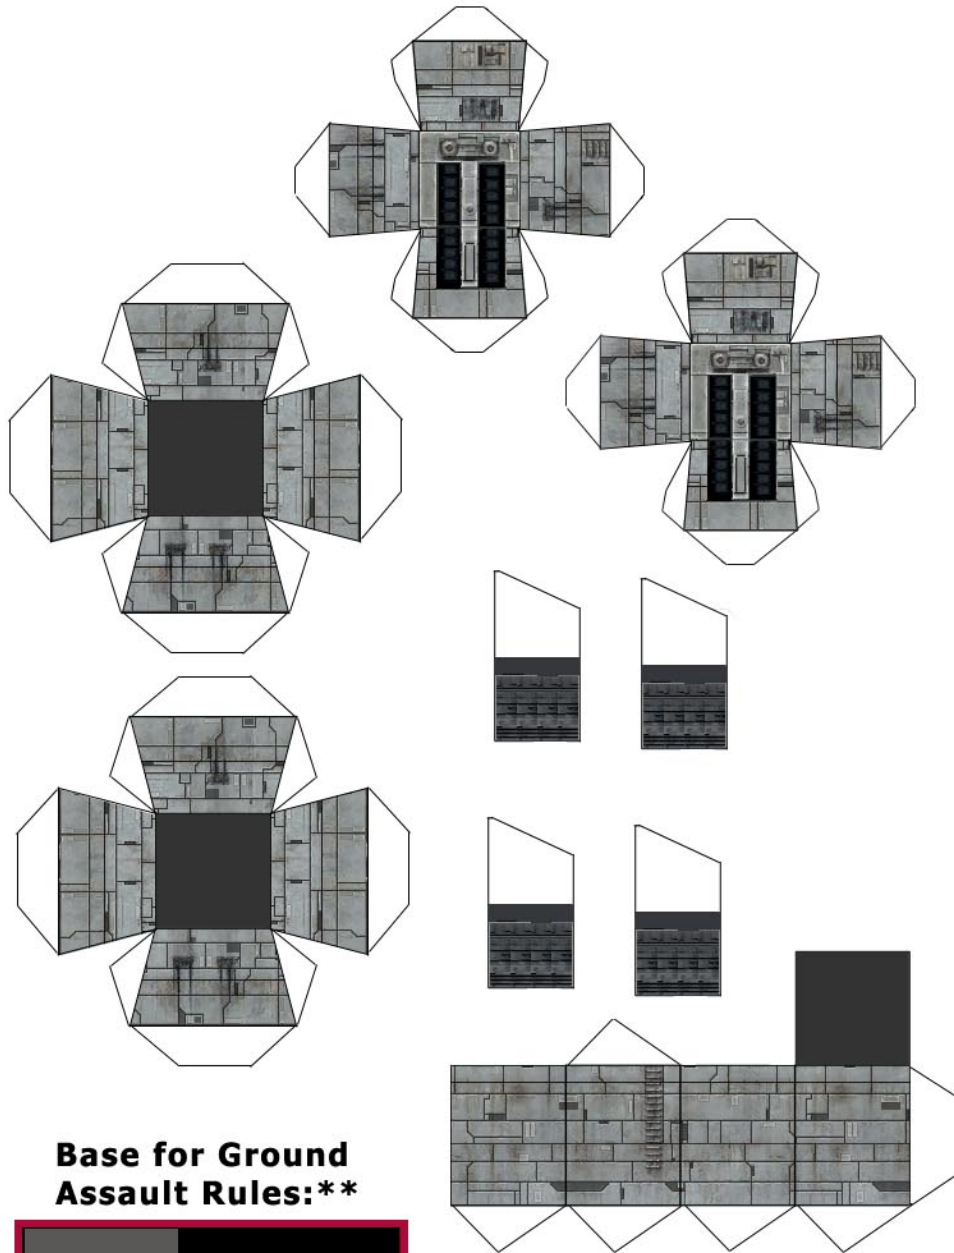

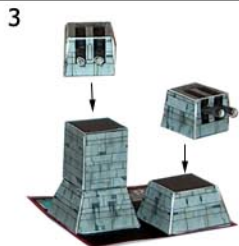

Model by Momir Farooq, textures taken from LucasArt's Empire at War.

## Instructions

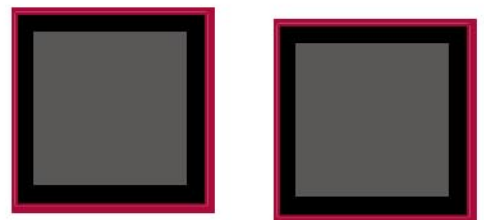

Use a hobby knife to poke two small holes in the Turret. Take the laser barrels, and roll them up from small end to long end. Unroll them, and then roll them the other way (long end to short). Insert the rolled barrels into the turret holes.

## Base for Ground Assault Rules:\*\*

## Bases for RPG / Scenarios:

\* Don't ask me when the rules will be posted- there's a lot of game-testing that still needs to be done.

\*\*Also, don't pay too much attention to the stats- they'll probably be changed after testing.
