

The Renewed Psionic

A dark, hooded figure stands in a dark, cavernous setting. The figure is wearing ornate, dark armor with glowing blue energy swirling around them. The figure's right hand is raised, and a bright blue energy sphere is visible. The background is dark and textured, suggesting a cave or a dungeon.

PSION

A human clad in simple robes walks along a forest path. A gang of goblins emerges from the brush, arrows trained on him, their smiles wide at their good fortune of finding such easy prey for the legion's slave pens. Their smiles turn to shrieks of terror as the traveler grows to giant size and leaps at them, his staff now a deadly cudgel.

The militia forms in ranks to prepare for the orcs' charge. The growling brutes howl their battle cries and surge forward. To their surprise, the human rabble holds its ground and fights with surprising ferocity. Suddenly, mindless fear clings to the orcs' minds and they, despite facing a far inferior foe, turn and run, never noticing the calm half-elf standing amid the militia and directing its efforts.

Psionic energy is an artifact created from the power of the mind, or psionics, rather than magic. It is harnessed by psions to create amazing feats. Often colloquially referred to as "mind mages," practitioners of most races draw their powers from their own consciousness. Psionic powers can range from devastating mental attacks that dominate an opponent, to physical ectoplasm constructs and a fate link that can inflict damage linked between individuals.

Manifesting psionic energy can take a great toll. Innate practitioners grow weary and unfocused if they over-extend themselves, and practitioners of other races can deplete their store of power in short order, rushing to rest and replenish it.

PSYCHIC HERITAGE

Although it is not fully known, this gift is a genetically inherited trait. For some, psionics can be innate, as in illithid and drow practitioners. That being the case, it is rare to find a psion in races where psionic powers are not the norm.

Despite their rarity, a master psion can be quite powerful. Without the need for gestures or spell components, and with abilities that only rely on the power within the psion's mind, a psion can often exploit the element of surprise, and thus often holds an advantage over a magic user.

UNNATURAL CONSEQUENCES

Because psionics creates incredible effects and changes the world in ways similar to magic, psions and other users of psionics may easily be confused for spellcasters. However, psionics does not harness an energy inherent in nature, but rather bends the fabric of reality itself to suit the user's needs. This forceful method brings consequences, and as such, manifestation of psionic power usually leads to a secondary display of unusual effects in the world. These displays may include visual artifacts, auditory stimulus and olfactory senses being emitted. These displays can be difficult to observe, however.

As an example, if a psion manifests a simple charm, or mind reading power, a low droning sound may be heard. Similarly, a polymorphic manifestation may leave the odor of saffron and ginger.

CREATING A PSION

Although the rigorous path of the psion most commonly appeals to those who seek order and answers in their lives, your motivations are entirely your own. Did you start down this path for the knowledge and power it would bring? Did you have a natural talent that you could never fully master until you stumbled on the legends and teachings of the psions who came before you? Were you training your mind for some other purpose, only to discover that your efforts tapped a wellspring of power you never knew you possessed?

Some are drawn to the art of the psion because it fits their personality, aptitudes, and ambitions. You may have heard tales of psion sects while engaged in other scholarly pursuits and become intrigued by this mysterious path. You might have been actively learning the techniques of wizardry or some other class, discovering in the process that you carried the rare psionics potential within you.

Regardless of your background, one thing you almost certainly shared with other psions even before you began your instruction is a strong sense of order and logic. Such a mind set is a must to master the rigid disciplines of the psion.

QUICK BUILD

You can make a psion quickly using these choices. First, put your highest ability score in Intelligence, followed by Constitution. Second, choose the far traveler background.

Tools: None

Saving Throws: Intelligence, Wisdom

Skills: Choose any two

EQUIPMENT

You start 5d4 x 10 gp, or with both the following equipment and the equipment granted by your background:

- (a) two daggers or (b) a quarterstaff
- (a) a scholar's pack or (b) an explorer's pack
- Leather armor, a light crossbow and 20 bolts

INNATE SPELLCASTING

As you conjure and shape your abilities with psionic energy generated from within your mind, you have several innate talents available to you, and you can manifest your power in ever growing ways.

PSIONICS

You use a method of spellcasting known as psionics, which harnesses your mental energy to warp reality into wondrous effects. Due to the nature of psionics, you ignore the components of any psion spells you have prepared, except material components that are consumed by the spell. Spells cast using psionics are unaffected by effects that negate magic, such as *counterspell*, *dispel magic*, and *anti-magic field*.

PSIONIC POWER

Psionic power is a measure of a psion's available mental energy. A psion can only exert so much of their mental energy before becoming completely exhausted. You have an amount of psionic power equal to the number shown in the Psionic Power column of the psion table. Expended psionic power is replenished when you finish a long rest.

TALENTS

At 1st level, you know four talents of your choice from the psion spell list. You learn additional psion talents of your choice at higher levels, shown in the Talents Known column of the Psion table.

Psionic talents are manifestations of your mind, a reflex so natural that you can produce the effect repeatedly with little effort. A talent is a spell that you can cast at will, without expending psionic power and without preparing it in advance. You can also focus on a talent when you cast it, which adds costs and effects to the talent, as specified in its description. A talent's spell level is always 0. Talents gain potency as you gain levels in this class, shown in the talent's description.

ON PREPARED VERSUS KNOWN

The 3.5e Psion knew the same amount of powers as a Sorcerer knew spells. However, 5e's UA Mystic took a different approach - you learned disciplines of psionics and had access to all of their powers. This creates a rather large rift in the amount of usable psionics you could have. I decided to take a different approach with my Psion, but you could feasibly convert its prepared spells to known ones, using the same progression as a Sorcerer.

PREPARING AND CASTING SPELLS

At the end of each long rest you take, you prepare the psion spells available to you. Choose a number of spells equal to your Intelligence modifier + your psion level from the psion spell list. You can only prepare a spell if its level is no greater than the number shown in the Psionic Power Limit column of the psion table for your level.

To cast your psion spells, you must expend psionic power equal to the spell's level to create the effects in its description. You can expend more of your available psionic power to cast the spell at a higher level. For example, casting a 7th level spell costs 7 psionic power, while casting a 5th level spell at 6th level costs 6 psionic power. The most psionic power you can expend on a spell is equal to the number in the Psionic Power Limit column of the psion table for your level.

SPELLCASTING ABILITY

Intelligence is the ability you use for your spellcasting, since your spells are created from psionic energy and shaped by your mind. You use your Intelligence whenever a spell refers to your spellcasting ability. You also use your Intelligence modifier when setting the saving throw DC for a spell you cast and when making an attack roll with one.

Spell save DC = 8 + your proficiency bonus + your Intelligence modifier

Spell attack modifier = your proficiency bonus + your Intelligence modifier

MENTAL DISCIPLINE

Each psion focuses on a certain discipline of psionics, becoming a disciple of that discipline. This allows them to control and improve their psionic abilities, and with enough training, grants unique powers.

Your choice of discipline determines which kind of disciple you become: **Disciple of the Egoist**, **Disciple of the Kineticist**, **Disciple of the Nomad**, **Disciple of the Seer**, **Disciple of the Shaper**, or **Disciple of the Telepath**, detailed at the end of the class description. Your discipline gives you features when you choose it at 1st level and additional features at 6th, 10th, 14th, and 18th level.

Some of your mental discipline features require an attack roll or saving throw. Use your Innate Spellcasting feature to set the attack modifier and save DC for those rolls.

INNATE SPELLS

Due to your focus on a specific discipline, you can learn specialized psionic spells as well as general ones. You can choose from the spell list specified by your discipline when preparing your psion spells and learning talents. You also train with a select few spells from your discipline's spell list, permanently fixing them into your mind.

TELEPATHIC LINK

You can establish direct links with the minds of others, allowing you to communicate intrinsically.

You can speak telepathically with any creature you can see within 60 feet of you. It automatically understands you and can respond in a way you understand as long as it speaks at least one language.

PSYCHE SHARD

At 2nd level, you become able to create a fragment of your psyche, which contains a small amount of psionic energy and an imprint of personality. You choose the form that this shard takes, choosing from a mark on your body (such as a rune or tattoo), or that of a *psicrystal* (see Appendix A: Monsters), a quasi-living crystal. You can affix a *psicrystal* onto a piece of equipment, clothing, or trinket with 1 hour of work. You can't have more than one psyche shard at a time.

If your psyche shard is destroyed, you can create a new one with 8 hours of uninterrupted work. You can communicate with your psyche shard telepathically as long as it is within 100 feet of you.

Your psyche shard has a unique personality and its own subset of knowledge, determined by rolling a d20 (reroll 19 and 20) or choosing one of the options from the Shard Personalities table. Your psyche shard relays its knowledge to you telepathically while it is within 100 feet of you, allowing you to add your proficiency bonus (or twice your proficiency bonus if you are already proficient) to ability checks using the skill associated with its personality.

SHARD PERSONALITIES

d20	Personality	Skill	d20	Personality	Skill
1	Artiste	Performance	9	Mystical	Arcana
2	Bully	Intimidation	10	Nimble	Acrobatics
3	Caring	Animal Handling	11	Observant	Perception
4	Coward	Sleight of Hand	12	Poised	Survival
5	Friendly	Persuasion	13	Precise	Medicine
6	Heroic	Athletics	14	Resolute	Religion
7	Liar	Deception	15	Sage	History
8	Meticulous	Investigation	16	Studious	Nature
			17	Sneaky	Stealth
			18	Sympathetic	Insight

If you choose a *psicrystal*, the crystal acts during your turn in combat, following your unspoken direction. The *psicrystal* can only take the action listed in its stat block.

As an action while you are on the same plane of existence, you can destroy your psyche shard, or you can teleport it to an unoccupied space within 10 feet of you if it isn't on your person.

CONSUMPTIVE POWER

Starting at 3rd level, you gain the ability to sacrifice your physical durability in exchange for psionic power.

When you cast a psion spell, you can pay its psionic power cost with your hit points instead. Your current and maximum hit points are both reduced by twice the psionic power cost of the spell. This reduction can't be lessened in any way, and the reduction to your hit point maximum lasts until you finish a long rest.

Once you use this feature, you can't use it again until you finish a short or long rest.

PSIONIC BODY

At 18th level, the sheer extent of psionic energy within you causes it to suffuse your entire body. You no longer age naturally, and you are immune to disease, poison damage, and the poisoned condition.

PSIONIC ENLIGHTENMENT

At 20th level, your honed psionics have enlightened your mind, reaching heights unimaginable by others.

Your Intelligence score increases by 4. Your maximum Intelligence score is now 24.

MENTAL DISCIPLINES

Mental disciplines are a regiment of training that psions undertake in order to develop and nurture their power. These disciplines often require personal sacrifice from a psion, changing their behaviors in small, but noticeable ways. A psion's choice of mental discipline shapes that psion's abilities, based on their personality.

DISCIPLE OF THE EGOIST

Disciples of the egoist see physical forms as nothing more than putty housing the mind and soul, and they can manifest abilities which allow them to easily alter those forms. Psychometabolic powers change the physical properties of creatures. Life force is essential to psychometabolism, and those who choose this discipline know that the essence of life provides the basis of every conceivable power.

EGOIST INNATE SPELLS

You can choose from the egoist spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the egoist spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional egoist spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

INNATE SPELLS

ARMOR TRAINING

At 1st level, you gain proficiency with medium armor and shields.

BESTIAL FURY

Also at 1st level, you can manifest psionic claws which drain foes' mental energy and invigorate you with bestial fervor.

As an action, you manifest long claws in a free hand. You are proficient with these claws, which are a melee weapon that deals 1d8 slashing damage. The claws remain until you are incapacitated or you use your bonus action to dismiss them. As part of the action, make a melee weapon attack with the claws against one creature within your reach. This initial attack deals extra damage when you reach certain levels in this class: 1d8 at 5th level, 2d8 at 11th level, and 3d8 at 17th level. At 6th level, your claws become magical and they score a critical hit on a roll of 19 or 20 on the d20.

ENERGY BARRIER

Starting at 6th level, you automatically absorb and convert natural energies into psionic power for yourself.

Once per turn, when you take acid, cold, fire, lightning, or poison damage, you can reduce that damage by up to 3, to a minimum of 0, and regain the same amount of psionic power.

You can regain a total amount of psionic power equal to your psion level with this feature. This limit resets when you finish a long rest.

ADAPTIVE BODY

Starting at 10th level, your psionics have permanently replaced some of your biological processes.

You don't need to eat, breathe, or sleep. To benefit from a long rest, you can spend 8 hours engaged in light activity instead of sleeping.

FISSION

At 14th level, you can create a copy of yourself out of psionic energy.

As an action, you shape an illusory duplicate of yourself in an unoccupied space within 5 feet of you. Your duplicate thinks and acts exactly as you do and follows your orders, although it will not do anything you wouldn't do yourself. After 1 hour or when the duplicate reaches 0 hit points, it crumbles away. Your duplicate has statistics matching yours and duplicates of your equipment, but duplicated equipment loses any magical properties its original has. If your duplicate ever loses physical contact with a duplicated piece of equipment, it crumbles and disappears. In combat, you roll initiative for the duplicate and control it on its turns.

Your duplicate has half of your hit points, the same amount of psionic power as you and other physical traits you had at the time it was created. The duplicate does not preserve spells and other effects active on you when you create it.

Once you have used this feature, you can't use it again until you finish a long rest.

ENERGY CONVERSION

Starting at 18th level, you can convert energy absorbed by your barrier into offensive power.

When your Energy Barrier absorbs damage, the same amount of points are added to your energy conversion pool. The pool has a maximum of 30 points, and you can use your bonus action and expend all the points in the pool to cause your next attack that hits before the end of your turn to deal extra cold, fire or lightning damage (your choice) equal to the number of points spent.

PERFECT TRANSFORMATION

At 20th level, you can use psionic energy to transform yourself into other creatures.

You can cast the *shapechange* spell as a 9th-level psion spell, without requiring concentration.

DISCIPLE OF THE KINETICIST

Destructive minds tend to focus their powers into the shape of the kineticist, an explosive user of kinetic force. Psychokinesis powers manipulate energy or tap the power of the mind to produce a desired end. Many of these powers produce interesting visual effects above and beyond the standard secondary display, such as moving, melting, transforming, or blasting a target.

KINETICIST INNATE SPELLS

You can choose from the kineticist spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the kineticist spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional kineticist spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

TELEKINETIC MIND

At 1st level, you can use your mind to move and manipulate objects as if you were touching them.

You can attack with kinetic energy as an action, at a range of 60 feet. Make a ranged psionic attack against a creature or object within range that you can see. On a hit, it takes force damage equal to 1d8 plus your Intelligence modifier, and you can move it up to 10 feet in a straight line if it is Huge or smaller. This damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

You also learn the *mage hand* cantrip, or one psion cantrip of your choice if you already know it. If you focus when you cast *mage hand*, you can affect a willing creature with the hand. If the creature that you're manipulating with *mage hand* is pushed or pulled, the creature instead remains in place if you succeed an Intelligence saving throw (DC equals the amount of feet the creature would be pushed or pulled).

INERTIAL SHIELD

Also at 1st level, your kinetic abilities allow you to interrupt and deflect blows against you.

While at least one of your hands are free and you are not wearing a shield, you can use your reaction when you are attacked to gain a +2 bonus to your AC until the start of your next turn. You can use this feature after the attack roll is made, but before determining if the attack hits or misses.

KINETIC FIELD

Starting at 6th level, you can form a kinetic field around yourself which catches and deflects projectiles.

As a reaction, you can deflect a missile when you're hit by a ranged attack. When you do so, the damage you take is reduced by 10 + your Intelligence modifier + your Psion level.

If the damage is reduced to 0 by this feature, you can catch the missile in the air. If caught this way, you can make a ranged psionic attack with it as part of the same reaction. You make this attack with proficiency. The type and damage are the same as the original attack.

INVISIBLE MIGHT

Starting at 10th level, your telekinesis acts as an augment to your physical strength.

You gain proficiency in Strength saving throws, and when a Strength check or saving throw is required, you can add your Intelligence modifier to the result.

TELEKINETIC FLIGHT

Starting at 14th level, your telekinetic control has become precise enough to allow you to carry yourself through the air.

You can use your action to grant yourself a flying speed of 30 feet for 1 hour, as long as the combined weight of you and everything you're carrying doesn't exceed 15 lbs x your Intelligence score.

Once you have used this feature, you can't use it again until you finish a long rest.

SAFE FALL

Starting at 18th level, your mind instinctively activates your telekinetic powers, even when you are in danger.

If you are falling, even while unconscious, you safely descend at a rate of 60 feet per round.

UNFETTERED MIND

At 20th level, your telekinetic power has become so great that it has become second nature.

Your Telekinetic Mind no longer requires concentration, and its weight limit is doubled. Additionally, your Telekinetic Flight's speed is now 60 feet, and it has a duration of 8 hours.

DISCIPLE OF THE NOMAD

Disciples of the nomad are an avidly curious subset of psions, who derive discipline from the journeys they take in life. Psychoportation powers move the manifester, an object, or another creature through space and time. At its heart, this discipline requires a succinct, gut-level understanding of the structure of reality. Those who become disciples of the nomad try the impossible, and sometimes succeed.

NOMAD INNATE SPELLS

You can choose from the nomad spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the nomad spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional nomad spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

7th	4th-level
9th	5th-level
11th	6th-level
13th	7th-level

PHASING STRIKE

At 1st level, you can strike an enemy with psionic energy, which surges into their body and mind.

As an action, you hurl an orb of sonic energy. Make a ranged psionic attack against a creature within 60 feet of you that you can see. On a hit, you deal thunder damage equal 1d8 plus your Intelligence modifier, as the orb bursts on contact. This damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

If you hit a creature, you can spend 1 psionic power to force it to make a Charisma saving throw. On a failure, the creature's next attack or effect that targets you before the end of your next turn is partially phased out, dampening the effect. It makes its first attack roll against you with disadvantage, or if you must make a saving throw against one of its effects, you make the first one with advantage.

SKATE

Also at 1st level, you and those around you can slide along solid ground as if on ice.

As an action, you and willing creatures you designate within 30 feet of you can start or stop psionically skating. You maintain equilibrium by mental will alone, allowing graceful turning and stopping with ease. A skating creature ignores difficult terrain, attack rolls have advantage against it, and when it takes the Dash action, it can move an additional amount of feet equal to half its speed without costing its movement.

THERE AND BACK AGAIN

Starting at 6th level, you can instinctively dodge out of the way of certain area effects, such as a red dragon's fiery breath or an Ice Storm spell, by partially phasing your body to a different location. When you are subjected to an effect that allows you to make a Dexterity saving throw to take only half damage, you instead take no damage if you succeed on the saving throw, and only half damage if you fail.

AGILE DEFENSE

Starting at 10th level, you have learned a teleportation trick that allows you to appear as if you are in two places at once.

You can use your bonus action to take the Dodge action.

PHASE DOOR

Starting at 14th level, you can create an ethereal passage through most walls, allowing you to phase through them.

As an action, you touch a wall of wooden, plaster, or stone material and use psionic energy to create a phase door. A phase door can only penetrate walls that are 5 feet deep or less. The phase door is invisible and usually inaccessible to all creatures except you. The door does not allow light, sound, psionic effects, or spell effects through it, nor can you see through it without using it. True seeing psionics or magical effects reveal a phase door but do not allow its use.

Creatures other than you can only use the phase door if they meet one or more triggering conditions, which you set when you create the door. The conditions can be based on a creature's name, identity, or alignment, but otherwise must be based on observable, tangible actions or qualities. A creature using a phase door disappears when it enters and appears when it exits, but it can stop inside the passage if there is room. A phase door takes a straight path through a wall, exiting at the closest 5-foot-by-5-foot space available.

A phase door can be used six times before its psionic energy disperses and fades, ending the effect. A creature consumes one use of the door each time it passes through. Anything within the passage when its effect ends is harmlessly ejected back to its original entrance.

Once you have used this feature, you can't use it again until you finish a long rest.

EFFORTLESS JOURNEY

Starting at 18th level, teleportation has become so natural to you that you can do it with little effort.

You can teleport instead of walking; each foot that you teleport costs 1 foot of your movement speed. If you attempt to teleport into an occupied space, you are instead shunted to the nearest unoccupied space, and your speed becomes 0 until the start of your next turn.

PHASE PASSAGE

At 20th level, the effects of your phase door become permanent, and you can pierce almost any material with it.

When you use your Phase Door, it can penetrate any non-magical material, and it can be used an unlimited amount of times. If you wish to dispel a Phase Door you created, you can use your action and touch it to end the effect.

DISCIPLE OF THE SEER

Seers are psions who master clairsentience - the power to learn secrets long forgotten, to glimpse the immediate future and predict the far future, and to know what is normally unknowable.

SEER INNATE SPELLS

You can choose from the seer spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the seer spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional seer spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

PSIONIC ANCHOR

At 1st level, you can pierce an enemy's mind with a psionic anchor, allowing you to know their general location.

As an action, choose a creature you can see within 60 feet of you. A white-hot halo of psionic energy appears around its head, causing it immense pain. The target must make a Wisdom saving throw, taking psychic damage equal to 1d8 plus your Intelligence modifier on a failure, or half on a success. This damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

If a creature fails the save, you can spend 1 psionic power to cast a psionic talent as a bonus action, targeting the same creature. The talent must be one that deals no damage, and the target automatically fails its saving throw against the talent, if any.

OBJECT READING

Also at 1st level, you can use psionics to investigate an object that you touch, showing you a vision of its past.

As an action, you touch an object and maintain contact with it. After 1 minute of remaining in contact with it, you learn certain details pertaining to the object's previous owner. You learn their race, gender, age, alignment, how they came to possess the object, and how they lost it. An object without any previous owners reveals no information.

COMBAT PRECOGNITION

Starting at 6th level, you have a precognitive sense of danger, allowing you to react quickly to its presence.

You can add your Intelligence modifier to initiative rolls, and you can't be surprised while you are conscious. You can use your reaction when you roll initiative to telepathically alert one creature within range of your telepathy to the danger, making them unable to be surprised for this combat.

MIND'S EYE

Starting at 10th level, you mentally sense the presence of matter around you, allowing you to feel others' presence.

You gain blindsight out to a range of 20 feet.

BOOK OF KNOWLEDGE

Starting at 14th level, you obtain the technique necessary to form the Book of Knowledge - a ledger of cosmic knowledge both discovered and undiscovered.

As a bonus action, you can form the Book of Knowledge in one of your free hands. The book's pages are filled with indecipherable writing, even when observed with magic. No matter how many pages are turned, there always seem to be more pages. The cover appears as its observer imagines, within reason. For example, the cover can resemble an animated reflection of the night sky, a furry hide, or perhaps even made of ice or dripping water. These elements fail to hold up to physical inspection - the book feels like a normal book. The book crumbles to cosmic dust and disappears after 10 minutes.

You can telepathically pose up to 10 questions to the book each time you form it. When asked an appropriate question, some of the markings rearrange to form a truthful answer, written in a language only you understand. You can ask for statistics of a creature if you know its true name - in which case, you learn its alignment, languages, type, and one of each of its immunities, resistances, and vulnerabilities - or for the properties of an object - in which case, you learn what materials it is made of, and the effects and mechanisms of any curses, enchantments or traps.

Answers remain forever written in the book, and you can accurately recall the question posed when you read the answer. If you desire to see a certain page or a question that you previously posed, the next page you turn to will be the relevant page.

Once you have used this feature, you can't use it again until you finish a long rest.

SHAPE REALITY

Starting at 18th level, you gain an instinctive, limited ability to shape reality around you in response to threats.

In response to an attack hitting you or when you fail a saving throw, you can use your reaction to roll an additional d20 and choose which result to use.

You can use this feature twice, and expended uses are replenished when you finish a long rest.

GLIMPSE OF OMNISCIENCE

At 20th level, you obtain a fragment of universal knowledge, enlightening your mind. This grants you certain benefits.

- You are unaffected by *clairsentience* and *divination* spells unless you choose to be.
- You make Intelligence checks with advantage.
- You can ask the Book of Knowledge to describe a specific event that happened within the last 1,000 years, which it will describe on up to 1 page. This provides up to 10 useful facts about the event.

DISCIPLE OF THE SHAPER

Psions with particularly creative minds tend to gravitate towards the discipline of the shaper, a discipline which manifests powers of metacreativity. Metacreativity creates objects, creatures, or other forms of matter. Creatures created through metacreativity prove unstable; they will usually, but do not always, obey your commands.

SHAPER INNATE SPELLS

You can choose from the shaper spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the shaper spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional shaper spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

ENERGY WEAPON

At 1st level, you can create weapons out of psionic energy.

Using your bonus action, or your reaction when you roll initiative, you create a weapon with a faint sky-blue aura, which takes the form of any simple or martial weapon and persists for 1 hour. If you create a one-handed weapon, you can create one in each hand. If you create a ranged weapon, you can also create 20 non-magical pieces of the weapon's appropriate type of ammunition. You are proficient with the weapon, and its properties are the same as its mundane counterpart.

You can spend up to 3 psionic power whenever you make an attack with one of your energy weapons, granting the amount spent as a bonus to your attack and damage rolls.

The maximum number of energy weapons that can exist at the same time is equal to your Intelligence modifier (minimum one).

CREATE TOOLS

Also at 1st level, you can create tools out of psionic energy.

Using your action, you can create any piece of non-magical adventuring gear worth 5 gp or less. Items created by this feature cannot be used as food. Otherwise, an item created by this feature has the same properties as its physical counterpart. After 10 minutes, the psionic energy comprising the item can no longer hold its form and disappears. Once you have created a particular item, you cannot create the same item again for 10 minutes.

PSIONIC DRONE

Starting at 6th level, you use a small amount of psionic energy to create a protective construct.

Over the course of a long rest, you can create a psionic drone. It has the statistics of a *homunculus*, except it doesn't have its Bite attack. You can only have one psionic drone at a time. It is inexorably devoted to you, obeying your every order even if it requires sacrifice.

You can use your action to temporarily sequester it away in a harmless pocket dimension where it awaits your summons. As an action while it is temporarily dismissed, you can cause it to reappear in any unoccupied space within 30 feet of you.

While your psionic drone is within 30 feet of you, you can use your reaction when you are hit with an attack to psionically redirect the blow to it. The psionic drone takes the attack and its effects instead of you.

SURGE OF WIND

Starting at 10th level, your psionic powers create a windy surge around you, momentarily protecting and guiding you.

When you cast a spell of 1st level or higher, you gain two benefits until the end of your turn: your movement doesn't provoke opportunity attacks, and you have a climbing speed equal to your walking speed.

MICROBIOME

Starting at 14th level, you can create a microbiome around yourself, mimicking life with psionic energy.

As an action, you project psionic energy out to a distance of 20 feet. The area bursts with psionically constructed moss, fungi, vines and other plant matter, and plant-like pods sprout from the ground. Some of this plant life converges into a *shambling mound* under the control of the DM. At the start of each of the creature's turns, you must make a DC 15 Intelligence check. On a success, the *shambling mound* is friendly to you and your allies until the start of your next turn. On a failure, it is hostile to all creatures instead.

This effect lasts while you are concentrating (as if on a spell) for up to 10 minutes, after which the microbiome wilts and crumbles, vanishing as the psionic energy is expended.

Once you have used this feature, you can't use it again until you finish a long rest.

OBEDIENT MANIFESTATION

At 18th level, you tame some of the unpredictable nature of psionically-created creatures.

The DC for your Microbiome becomes 10. Additionally, you can use your bonus action to command a creature created by a spell or feature of yours to take a specific action, which it uses its reaction to carry out. A creature cannot use its multiattack, if it has one, via this command.

FLOURISHING CREATION

At 20th level, you have become exceptionally efficient at using your psionic energy to create matter.

When you create a creature or an object with either a spell or one of your features, you can choose one of the creatures or objects to create a duplicate of it, which appears in an unoccupied space within 5 feet of the original and has the same statistics as the original.

DISCIPLE OF THE TELEPATH

Psion disciples of the telepath shed nearly all pretenses from themselves, focused on the machinery at work within the mind. Telepathy powers can spy on and affect the minds of others, influencing or controlling their behavior. All telepathic powers are mind-affecting, and types such as charms and compulsions grant influence over a subjected creature.

TELEPATH INNATE SPELLS

You can choose from the telepath spell list, as well as the psion spell list, when you prepare your psion spells. Also, choose a 1st-level spell from the telepath spell list. You always have the spell prepared, and it doesn't count against the number of spells you can prepare. You can cast the chosen spell once without expending psionic power, and you must finish a long rest before you can do so again.

You can choose an additional telepath spell for this feature at each of the psion levels shown in the Innate Spells table. The spells you choose must also be of a level no greater than the spell level shown in the Innate Spells table.

PSYCHIC PRESSURE

At 1st level, you can telepathically assault the mind of a creature, bending it to your will.

As an action, you can overpower the mind of a creature within range of your telepathy. The target makes an Intelligence saving throw against your discipline save DC, taking psychic damage equal to 1d10 plus your Intelligence modifier on a failure, or half on a success. This damage increases by 1d8 when you reach 5th level (2d10), 11th level (3d10), and 17th level (4d10).

If the target fails its save, you can then spend 1 psionic power to haze the target's mind, imposing disadvantage on its attack rolls until the start of your next turn.

SEEPING THOUGHT

Also at 1st level, when you are in close proximity with a creature, inklings of its thought leak out of its mind, which you can sense.

After each full minute you spend actively talking to a creature within range of your telepathy, the DM gives a one-word summary of its most prevalent thought.

SEIZE MIND

Starting at 6th level, you can telepathically subvert an assailant's focus when it attempts to affect your mind, guarding against the effect.

When a creature you can see within range of your telepathy forces you to make an Intelligence, Wisdom, or Charisma saving throw, you can use your reaction to add your Intelligence modifier to the result.

MIND-LINK

Starting at 10th level, you can create a telepathic link that persists over great distances.

You can use your action to link your mind with a creature you can see within range, allowing your telepathy to reach it across any distance. An unwilling creature can make an Intelligence saving throw to resist the effect. This link persists until you use your action to break it or until you are on a different plane of existence than the creature.

You can have a maximum number of creatures equal to half your psion level linked with you at a time via this feature.

DOMINATE MIND

Starting at 14th level, you can embed a portion of your will into another creature's mind, allowing you to control it.

As an action, you can force a creature that you can see within range of your telepathy to make an Intelligence saving throw. On a failure, you gain an overwhelming influence over it while you concentrate (as if on a spell) for up to 10 minutes. You can only have one creature under this effect at any time.

While a creature is under this effect and within range of your telepathy, you can use your action to command it to take any action, general or specific, which it must follow. If you issue a command that is directly harmful to it, it ignores the command. If a target is not commanded on a turn, it will behave normally.

Each time the target receives a command from you, it makes a new Intelligence saving throw after following the command, breaking free of your influence on a success. Telepathic creatures have advantage on the saving throw.

Once you have used this feature, you can't use it again until you finish a long rest.

TELEPATHIC FIELD

At 18th level, your telepathic powers project even further, allowing you to reach distant minds.

The range of your telepathy increases to 120 feet.

UNBREAKABLE WILL

At 20th level, your focus is so keen that you can have multiple creatures bend to your will at the same time.

Your Dominate Mind feature gains the following properties:

- It lasts until the creature is killed or succeeds a saving throw against its effects, without requiring concentration.
- You can command any number of creatures under your control, instead of just one.
- You can have any number of creatures under the effect of Dominate Mind, but while more than one creature is affected, the total CR of all affected creatures must be 20 or lower. If you try to use Dominate Mind on a creature that raises the total CR above 20, it fails, and all creatures currently affected by Dominate Mind can make an Intelligence saving throw to break free of your influence.

ARCANE TRADITIONS

At 2nd level, a wizard gains the Arcane Tradition feature. Below is a new option for the feature: Metapsionics.

METAPSIONICS

Metapsionics is the study of understanding and emulating the unusual abilities of psionics through magic. Wizards who master this arcane tradition gain a glimpse into the world of psychic creatures - often a humbling and enlightening experience which teaches them something fundamentally important about the makeup of magic and psionics alike.

PSIONICS STUDY

At 2nd level, you can choose from the psion spell list, in addition to the wizard spell list, when you learn a new wizard spell. Spells you learn in this way count as wizard spells for you, and you don't need to provide verbal and somatic components to cast them.

Additionally, when a psionic spell is cast within 60 feet of you, you can make an Intelligence (Arcana) check against DC 10 + the spell's level. On a success, you know the name of the spell that was cast, and you know its mental discipline (if any).

EXTENSION OF MIND

Also at 2nd level, your technique of marrying spellcasting and psionics creates a temporary area of psionic influence around you while you concentrate.

While you concentrate on a wizard spell, an aura of influence extends outward from you to a distance of 30 feet, ignoring cover, which moves with you. You can communicate telepathically with any creature inside the aura. A creature understands your telepathic speech if it speaks at least one language, and it can deliver telepathic replies in a way you understand. Creatures within this aura also have disadvantage on Wisdom saving throws against your wizard spells.

FOCUS REINFORCEMENT

At 6th level, your mental focus has increased, allowing you to remain concentrated through greater pain. When you fail a concentration check, you can choose to succeed instead.

Once you've used this feature, you can't use it again until you finish a short or long rest.

SHARPENED MIND

At 10th level, your study of psionics subtly alters your mind such that you can easily perceive slight fluctuations in the minds of others.

You can add your Intelligence modifier to Wisdom (Insight) checks you make against creatures that can't use psionics. Also, whenever you successfully discern that a creature is lying to you, that creature takes psychic damage equal to your Intelligence modifier.

CONDUIT MANIPULATION

At 14th level, you can briefly focus on using psionics to reshape effects as they occur around you.

Whenever you see a spell being cast by another creature within 120 feet of you that affects an area, you can use your reaction to increase or decrease the area's size. An area can't be reduced below 5 feet with this feature. You can modify an area in one of the following ways:

- If the area is a cone, you can modify it by up to 20 feet.
- If the area is a radius, you can modify it by up to 10 feet.
- If the area is a cube or a cylinder, you can modify one of the dimensions, other than the radius, by up to 30 feet.
- If the area is a line, you can modify its length by up to 60 feet.

DIVINE DOMAINS

At 1st level, a cleric gains the Divine Domain feature. Below is a new option for the feature: Mind.

MIND

Clerics of the mind domain channel the powers of the divine through psionic power, granted to them by their faith. These practitioners can call upon the magic of the divine, as well as project the authority of their faith's domain using their mind, rather than channeling their power for themselves. Deities such as Auppenser, Deneir and even those like Ilsensine and Sseth call upon clerics of this domain.

MIND DOMAIN SPELLS

Cleric Level	Spells
1st	<i>dissonant whispers, Tenser's floating disk</i>
3rd	<i>detect thoughts, mind spike</i> ^{XGtE}
5th	<i>hypnotic pattern, tongues</i>
7th	<i>hallucinatory terrain, phantasmal killer</i>
9th	<i>Rary's telepathic bond, synaptic static</i> ^{XGtE}

BONUS PROFICIENCIES

At 1st level, you are proficient with heavy armor and martial weapons.

PSYCHIC AURA

Also at 1st level, the psionic energy channeling through you manifests as an aura, which bolsters you and your allies' abilities. This aura projects outward in a 10-foot radius around you, ignoring cover, and moves with you. The aura is disabled while you are unconscious. You and creatures of your choice within the aura can add your Wisdom modifier to their initiative rolls.

Also, when a creature within the aura other than you makes a Wisdom (Perception) check, you can use your reaction to grant a +4 bonus to the check. You can do so before or after rolling the d20, but before the GM determines the outcome of the check. You can use this reaction a number of times equal to your Wisdom modifier, and expended uses are replenished when you finish a long rest.

At 17th level, the radius of this aura increases to 30 feet and creatures of your choice within the aura can add a +2 bonus to their attack and damage rolls, as well as to their AC.

CHANNEL DIVINITY: DEITY'S MANTLE

At 2nd level, you can use your Channel Divinity to create a psionic mantle around yourself, infused with your prayers that beseech your deity for aid.

As an action, you don a mantle of flowing, intangible psionic energy for 10 minutes. This mantle grants one of the following benefits of your choice when you use this Channel Divinity option:

- You have advantage on saving throws against effects imposed by celestials, fiends, and fey.
- You have a +5 bonus to Strength and Dexterity checks you make.
- You can communicate telepathically with up to 5 willing allies of your choice while you are on the same plane of existence. Chosen allies understand your telepathic speech regardless of whether you share a language, and you understand their telepathic replies.
- Your weapon attacks become magical, and you can deal psychic damage with them, instead of their normal damage type.
- You gain temporary hit points equal to 5 + 2 per each of your cleric levels, which last until this effect ends.

DIVINE GRACE

At 6th level, your deity's mantle provides you with divine protection.

While your Deity's Mantle is active, you can add your Wisdom modifier to all saving throws you make.

DIVINE STRIKE

At 8th level, you gain the ability to infuse your weapon strikes with divine energy. Once on each of your turns when you hit a creature with a weapon attack, you can cause the attack to deal an extra 1d8 psychic damage to the target. When you reach 14th level, the extra damage increases to 2d8.

MARTIAL ARCHETYPES

At 3rd level, a fighter gains the Martial Archetype feature. Below is a new option for the feature: Ardent.

ARDENT

Ardents are fiercely driven psionic fighters that center their personalities around certain inevitable philosophies, rather than honing the discipline of their minds. Universal truths afford power to these psionically talented warriors, who train their mind and body in accordance with a lifetime of understanding and personal experiences. Ardents are driven by emotion towards goals that align with their philosophies, as their conviction leads them to ever greater understanding and, subsequently, power.

ARDENT INEVITABILITY

At 3rd level, your dedication towards embracing an inevitable facet of the universe begins to manifest as psionic power. You embrace two of the options listed under "Ardent Inevitabilities" below. You embrace another option at 10th and 18th level in this class.

Your first choice of ardent inevitability becomes your focus. While you are focused on an inevitability, you have the benefits listed under that option. You can only focus on one inevitability at a time, and you can change your focus to another inevitability option that you know when you finish a long rest.

ARDENT INEVITABILITIES

The inevitabilities are listed in alphabetical order.

Conflict and Justice. You can deal extra damage equal to your Intelligence modifier when you score a critical hit, and when you are hit with a melee attack, your attacker takes psychic damage equal to your Intelligence modifier.

Creation and Destruction. You can add your Intelligence modifier to the total amount healed whenever you roll a hit die during a short rest, and your weapon attacks deal maximum damage against objects, rather than rolling.

Death and Life. You can add your Intelligence modifier to your death saving throws, and you have advantage on Wisdom (Medicine) checks to stabilize others.

Fate and Freedom. When you finish a long rest, roll a d20 and record the result (you can't have more than one result recorded at a time.) When you roll initiative, you can choose to replace the d20 result with the recorded number. Also, you have advantage on Strength and Dexterity checks made to escape effects that grapple or restrain you.

Light and Darkness. You gain darkvision to a distance of 60 feet. If you already have darkvision, its range increases by 30 feet instead.

Law and Chaos. You have advantage on saving throws against being charmed or frightened.

INNATE SPELLCASTING

Also at 3rd level, you draw from your psionic well of power through your focus on philosophy, which allows you to learn psionic spells.

PSIONICS

You use a method of spellcasting known as psionics, which harnesses your mental energy to warp reality into wondrous effects. Due to the nature of psionics, you ignore the components of any psion spells you have prepared, except material components that are consumed by the spell. Spells cast using psionics are unaffected by effects that negate magic, such as counterspell, dispel magic, and anti-magic field.

PSIONIC TALENTS

You learn three talents of your choice from the psion spell list. You learn another psion talent of your choice at 10th level in this class.

LEARNING SPELLS

You know two psion spells of your choice, and one spell of your choice from any psion discipline's spell list. The Ardent Innate Spellcasting table shows when you learn more spells of 1st level or higher. Each spell must be chosen from the psion spell list, and must be of a level no greater than the number shown in the Psionic Power Limit column for your fighter level.

At 8th, 14th, and 20th levels in this class, the spells you choose can come from any discipline's spell list.

Whenever you gain a level in this class, you can replace one of the spells you know with another spell of your choice. The new spell must be of a level no greater than the number shown in the Psionic Power Limit column for your fighter level, and it must be a psion spell, unless you're replacing the spell you gained at 3rd, 8th, 14th, or 20th level from any discipline's spell list.

ARDENT INNATE SPELLCASTING

Fighter Level	Talents Known	Spells Known	Psionic Power	Psionic Power Limit
3rd	3	3	2	1
4th	3	4	3	1
5th	3	4	3	1
6th	3	4	3	1

10th	4	7	10	2

19th	4	12	23	4
20th	4	13	23	4

PSIONIC POWER

The Ardent Innate Spellcasting table shows how much psionic power you have to cast your spells of 1st level and higher. To cast one of these spells, you must expend psionic power equal to the spell's level when you cast it. You regain all expended psionic power when you finish a long rest.

For example, if you are a level 8 fighter and you know the 1st-level spell *magic missile*, you can spend 1 psionic power to cast it at 1st level or 2 psionic power to cast it at 2nd level. There is a limit to the amount of psionic power you can sustain at a time; you can't cast a spell if its psionic power cost is greater than your Psionic Power Limit.

SPELLCASTING ABILITY

Intelligence is your ability for your psionic spells, since they are created out of psionic energy and shaped by your mind. You use your Intelligence whenever a spell refers to your spellcasting ability. In addition, you use your Intelligence modifier when setting the saving throw DC for a psionic spell you cast and when making an attack roll with one.

Spell save DC = 8 + your proficiency bonus + your Intelligence modifier

Spell attack modifier = your proficiency bonus + your Intelligence modifier

PSI-STRIKE

At 7th level, you learn to concentrate your psionic energy into a single, powerful strike.

As a bonus action, you can spend an amount of psionic power up to your psionic power limit in order to add extra psychic damage equal to two times the amount of psionic power spent to your next weapon attack that hits. This bonus is wasted if you don't use it before the end of your turn.

BASTILLE OF EMOTION

At 15th level, you have developed such a strong connection with the philosophies of the universe that you can touch the emotions of those around you.

As an action, you open your senses to read the emotional state of all creatures within 60 feet of you. You learn the basic emotional states of each creature within range that you can see - these can be states such as happy, sad, excited, distressed, brave, fearful, loved, hated, angry, or calm, for example.

When you use this action, you can also force one affected creature to make a Wisdom saving throw against your spell save DC. On a failed save, you can change that creature's basic emotional state. When you do, you can cause it to stop feeling one of its current emotions of your choice and to start feeling another one of your choice. The creature is not aware that you attempted to manipulate its emotions in this way. A creature that succeeds its saving throw becomes immune to this effect for 1 hour.

MONASTIC TRADITIONS

At 3rd level, a monk gains the Monastic Tradition feature. Below is a new option for the feature: the Way of the Lurker.

WAY OF THE LURKER

Monks of the way of the lurker, also known as lurks, combine their spiritual abilities with their innate psionic talents. Due to the exceptional level of control lurks enact over themselves, these monks most often display an unearthly serenity. Their talents lend well to becoming assassins or envoys, as they are exceptionally suited to thwarting both magic and psionics alike. However, lurks usually have a strong moral code; as such, while their abilities are exceptionally desirable, their services may be hard sought as they will generally only fight for a cause they believe is right.

LURK AUGMENT

When you choose this tradition at 3rd level, you combine psionics and ki to draw energy from others, sapping their abilities and wracking their bodies with pain.

You gain one augmentation from the list of Lurk Augmentations below, which are methods of producing psionics-laden ki abilities. You gain one more as you gain levels in this class: 6th level, 11th level, and 17th level. Some augmentations require you to reach a certain level before you can learn them. If an augmentation lists a level as a prerequisite, it refers to your level in this class.

Whenever you gain a new augmentation, you can also replace one augmentation you know with another one. You must meet the prerequisites, if any, for your new choice.

LURK AUGMENTATIONS

The augmentations are listed in alphabetical order.

Deceptive Strike (11th Level). When you make a melee weapon attack with advantage, you can reroll each of the damage dice for the attack once and use the new roll. Additionally, you can spend 2 ki points when you attack a creature to treat the target's AC as though it were 10 + its Dexterity modifier for that attack. You must do so before making the attack roll.

Ghostly Touch (6th Level). Your unarmed strikes ignore half and three-quarters cover. Additionally, you can spend 1 ki point when you make an unarmed strike to increase your reach by 5 feet and ignore full cover for that attack.

Mental Assault (11th Level). When a creature fails its saving throw for your stunning strike, it takes psychic damage equal to your Wisdom modifier. Additionally, you can spend 2 ki points when you hit a creature with a weapon attack to waste one of the target's spell slots of the lowest level available (if it has spell slots) and waste 3 points of its psionic power (if it is psionic).

Psionic Thrust. You can choose to deal piercing damage with your unarmed strikes, instead of bludgeoning damage. Additionally, when you hit with a melee weapon attack, you can spend a number ki points no greater than half your monk level (rounded up) to cause the attack to deal 1d10 extra psychic damage for every ki point spent.

Solid Strike (6th Level). Your unarmed strikes ignore resistance to bludgeoning, piercing and slashing damage. Additionally, you can spend 1 ki point when you use your Flurry of Blows to gain a +1 bonus to your attack and damage rolls with your unarmed strikes until the end of your turn.

Synaptic Disconnect (17th Level). When you score a critical hit with a melee weapon attack against a creature, that creature's speed is halved and it can't take reactions until the start of your next turn. If you also spend 2 ki points, the target can take its action or bonus action, not both, until the start of your next turn.

Unhinging Strike. When you take the Attack action - attacking only one creature with the entire action - and you hit at least once, that creature can't concentrate until the end of your next turn. You can also spend 1 ki point when you force a creature to make concentration check; if you do, the creature makes its check with disadvantage.

SUPERNATURAL SENSE

Also at 3rd level, your senses are keen to the use of magic and psionics, allowing you to detect their use at a moment's notice.

You know whenever a spell is cast within 120 feet of you. This feature doesn't reveal any other information about the spell.

PRECOGNITIVE FOCUS

At 6th level, whenever you roll initiative, you can add your Wisdom modifier to the result. Additionally, the first attack roll made against you during each combat is rolled with disadvantage.

FLOW INTERRUPTION

At 11th level, your strikes cut off the flow of both magic and psionics in your target. Once per turn when you hit with a melee weapon attack, you can spend 3 ki points to choose one spell affecting the target. Make a Wisdom check (DC 10 + spell's level); on a successful check, the spell ends.

STYGIAN SHOCK

At 17th level, your strikes temporarily banish your foes, shredding their essence as your ki rips them apart from within.

You can use your bonus action and expend 3 ki points to choose one of the creatures you hit with a melee weapon attack this turn. That creature must succeed on a Charisma saving throw or take 4d10 force damage and be banished to the border ethereal for 1 minute. While banished in this way, a creature takes 2d10 force damage at the start of each of its turns.

An affected creature can repeat the saving throw at the end of each of its turns, returning to the location that it departed from on a successful save.

PRIMAL PATHS

At 3rd level, a barbarian gains the Primal Path feature. Below is a new option for the feature: the Path of the Psychic Warrior.

PATH OF THE PSYCHIC WARRIOR

Psychic warriors are naturally talented psionic barbarians who forego any mental training in favor of letting their psionics run wild. These warriors are as unpredictable as they are powerful, for even with a low level of mastery, they can channel limited, but powerful effects while simultaneously posing great physical threat.

UNREFINED PSIONICS

At 3rd level, your latent psionic abilities begin to express themselves in unrefined ways, becoming particularly volatile while you rage.

You know two talents of your choice from the psion spell list. You learn one additional psion talent of your choice at 10th level. Your spellcasting ability for these talents is Constitution.

While you are raging, you can cast a psionic talent as a bonus action. If you use this feature to cast a talent that deals damage, you take half the damage dealt by the talent; otherwise, you take psychic damage equal to half your barbarian level.

RAGING MINDSTORM

At 6th level, you unleash wild psionic energy while raging, which rotates around you like frenzied blades.

While raging, ranged attacks against you have disadvantage, and any creature that touches you takes psychic damage equal to your Constitution modifier.

SEEDS OF RAGE

At 10th level, you can convert your rage into a mental wave that draws rage out of others and inhibits their ability to focus.

As an action while you're raging, you can end your rage early to force any amount of creatures of your choice within 30 feet of you to make a Wisdom saving throw (DC equal to 8 + your proficiency bonus + your Constitution modifier). On a failed save, an affected creature takes 4d8 psychic damage, and it can't concentrate on spells or other effects for 1 minute, as a growing rage inhibits its ability to focus.

Once you've used this feature, you can't use it again until you finish a long rest.

METABOLIC INSTABILITY

At 14th level, your unstable psionic ability has grown to a point where it affects your physical form.

When you start raging, roll a d4 and consult the table below. You gain the effects of the spell for the number you rolled until your rage ends. Your spellcasting ability is Constitution when it is required for these spells.

d4 Result	Spell
1	<i>iron durability</i>
2	<i>giant limbs</i>
3	<i>corrosive metabolism</i>
4	<i>bestial transformation</i>

RANGER ARCHETYPES

At 3rd level, a ranger gains the Ranger Archetype feature. Below is a new option for the feature: the Mindstalker.

MINDSTALKER

Never faltering in their task, the mindstalker is a fierce hunter of psionic aberrations. Armed with the same psionic ability that many of these aberrations use to take advantage of their prey, these rangers relentlessly seek their targets, turning a careless predator into unsuspecting quarry. Those wary enough to know of a mindstalker's existence and skill set wisely respect them, and often fear them.

MINDSTALKER MAGIC

Starting at 3rd level, you learn an additional spell when you reach certain levels in this class, as shown in the Mindstalker Spells table. The spell counts as a ranger spell for you, but it doesn't count against the number of ranger spells you know.

MINDSTALKER SPELLS

Ranger Level	Spell
3rd	<i>command</i>
5th	<i>mind spike</i> ^{XGtE}
9th	<i>sending</i>
13th	<i>confusion</i>
17th	<i>geas</i>

EGO PIERCER

At 3rd level, you can imbue your strikes with psionic energy that seeps through wounds and strikes at the mind.

You can use your bonus action to cause your next weapon attack that hits before the end of the turn to deal an extra 1d8 psychic damage. If a creature capable of telepathy takes this damage, it must succeed on a Wisdom saving throw against your spell save DC or be frightened of you until the start of your next turn.

EMPATH SENSE

Also at 3rd level, your mind is keenly tuned to detect the presence of other psionic beings.

You know whenever a creature speaks via telepathy while within 60 feet of you. Also, you can use your action to attempt to weed out the presence of telepathic creatures within 300 feet of you. Any creature within range that is capable of telepathy must succeed on a Charisma saving throw against your spell save DC or you become aware of its presence and its distance away from you. Once you've used this action, you must finish a short or long rest before you can use it again.

LUCID BUFFER

At 7th level, your consciousness is firmly rooted, making it difficult to control you. You have advantage on saving throws against being charmed, frightened, and stunned.

CEREBRAL BLIND

At 11th level, you slip into the blind spot of minds attempting to divine you, becoming an undetectable presence.

When any spell or other effect attempts to divine information about you or your location - such as the *arcane eye*, *locate creature*, *scrying*, *view aura*, or *unwavering eye* spells - the attempt fails if you are the target, and you are invisible to sensors created by these effects.

BLAST FEEDBACK

At 15th level, afflictions of the mind have little effect on you, and you can even turn certain effects back onto your attackers.

You have resistance to psychic damage, and whenever a creature forces you to make an Intelligence saving throw, you can partially reflect the assault, forcing the originating creature to also make the saving throw or suffer the same effects it is attempting to inflict upon you.

ROGUE ARCHETYPES

At 3rd level, a rogue gains the Roguish Archetype feature. Below is a new option for the feature: the Soulknife.

SOULKNIFE

Armed with a mind as sharp as it is deadly, the soulknife is a violent force of psionic lethality. These psionic rogues craft beautiful blades from their mental energy, preferring to hone their natural abilities into a sharp, killing edge, rather than study the inner workings of the universe. A soulknife takes great pride in the design and perfection of their psionic weaponry, often crafting a personal, signature aesthetic into any weapons they create.

MIND BLADE

At 3rd level, you can create a semisolid blade of psychic energy, distilled from your mind.

As a bonus action, you can create a weapon that flows with mental energy, a mind blade, in one of your free hands. This weapon takes the form of a dagger, a longsword, a rapier or a shortsword (your choice), using the same statistics as the chosen weapon except that it has the finesse and thrown (30/120) properties. You can never be disarmed of your mind blade unless you choose to be, and it functions even in a *null psionics* field. If you let go of your mind blade, it disappears at the end of the turn.

When you Sneak Attack a creature with your mind blade, you can choose to deal psychic damage with the Sneak Attack.

Your mind blade gains a +1 bonus to its attack and damage rolls at 9th level in this class, and this bonus becomes a +2 at 17th level.

INNATE SPELLCASTING

Also at 3rd level, your psionic power, honed by your focus on perfecting your psionic weaponry, allows you to learn certain psionic spells.

PSIONICS

You use a method of spellcasting known as psionics, which harnesses your mental energy to warp reality into wondrous effects. Due to the nature of psionics, you ignore the components of any psion spells you have prepared, except material components that are consumed by the spell. Spells cast using psionics are unaffected by effects that negate magic, such as counterspell, dispel magic, and anti-magic field.

PSIONIC TALENTS

You learn three talents of your choice from the psion spell list. You learn another psion talent of your choice at 10th level in this class.

LEARNING SPELLS

You know two psion spells of your choice, and one nomad spell of your choice. The Soulknife Innate Spellcasting table shows when you learn more spells of 1st level or higher. Each spell must be chosen from the psion spell list, and must be of a level no greater than the number shown in the Psionic Power Limit column for your rogue level.

At 8th, 14th, and 20th levels in this class, the spells you choose can come from the nomad spell list.

Whenever you gain a level in this class, you can replace one of the spells you know with another spell of your choice. The new spell must be of a level no greater than the number shown in the Psionic Power Limit column for your rogue level, and it must be a psion spell, unless you're replacing the spell you gained at 3rd, 8th, 14th, or 20th level from the nomad spell list.

PSIONIC POWER

The Soulknife Innate Spellcasting table shows how much psionic power you have to cast your spells of 1st level and higher. To cast one of these spells, you must expend psionic power equal to the spell's level when you cast it. You regain all expended psionic power when you finish a long rest.

For example, if you are a level 8 rogue and you know the 1st-level spell *magic missile*, you can spend 1 psionic power to cast it at 1st level or 2 psionic power to cast it at 2nd level. There is a limit to the amount of psionic power you can sustain at a time; you can't cast a spell if its psionic power cost is greater than your Psionic Power Limit.

SPELLCASTING ABILITY

Intelligence is your ability for your psionic spells, since they are created out of psionic energy and shaped by your mind. You use your Intelligence whenever a spell refers to your spellcasting ability. In addition, you use your Intelligence modifier when setting the saving throw DC for a psionic spell you cast and when making an attack roll with one.

Spell save DC = 8 + your proficiency bonus + your Intelligence modifier

Spell attack modifier = your proficiency bonus + your Intelligence modifier

SPEED OF THOUGHT

At 9th level, your sharp focus hastens your body's responses and heightens your mental acuity. Your speed increases by 10 feet, and you have advantage on ability checks to recall information you've learned.

BLADEWIND

Starting at 13th level, you can fragment your mind blade into multiple smaller weapons, each striking at a creature near you.

As an action while you're wielding your mind blade, you can split the blade into multiple weapons, using them to make a melee psionic attack against each creature within 5 feet of you. On a hit, a creature takes 1d6 psychic damage, and you can add an extra number of d6s to the damage; each d6 you add in this way subtracts from your total Sneak Attack damage, and you can distribute these d6s among each of the creatures you hit until you've spent the total number of d6s you have for your Sneak Attack.

KNIFE TO THE SOUL

Starting at 17th level, when you Sneak Attack a creature with your mind blade, you can choose to forego any number of d6s from your Sneak Attack's damage in order to deal Intelligence, Wisdom, or Charisma damage to the creature (your choice). The target must succeed on a Constitution saving throw or have the chosen ability score reduced by 1 for each d6 you forfeited, which lasts until the creature finishes a long rest.

This feature can't reduce a creature's ability scores by more than the total number of d6s you have for your Sneak Attack.

SORCEROUS ORIGINS

At 1st level, a sorcerer chooses its Sorcerous Origin. Below is an additional option for the feature: Wilder.

WILDER

A stark contrast to the psion, the wilder draws upon raw emotion to fuel both psionic and magical abilities. These unique creatures command a mixture of powerful abilities, often in an overwhelming and confusing capacity. As such, wilders can glimpse power far beyond their normal means, if only for a brief moment, and at perilous risk. Wilders seek adventure, as it is an opportunity for them to hone their emotion-shaped powers, as well as to put their skills to the test. For a wilder, every surge of emotion is both a euphoria and an epiphany.

VARIANT: WILDER ORIGIN SPELLS

You learn an additional spell when you reach certain levels in this class. These spells count as a sorcerer spells for you, but don't count against the number of sorcerer spells you know.

Sorcerer Level	Spell
1st	<i>heroism</i>
3rd	<i>calm emotions</i>
5th	<i>enemies abound</i> ^{XGtE}
7th	<i>compulsion</i>
9th	<i>dream</i>
11th	<i>otto's irresistible dance</i>

NATURAL KINSHIP

At 1st level, psionic energy naturally flows out of you, subtly influencing the behavior of others you meet.

If you are within 10 feet of a creature when you speak to it for the first time, that creature feels an implacable bond of kinship with you. This bond makes the creature treat you as a friend, rather than an acquaintance. The GM decides the extent of this benefit, and while it typically doesn't mean the creature will afford you special favors, it becomes easier for you to befriend the creature. This feature has no effect on a creature that is already hostile to you before you meet it.

WILDER PSIONICS

Also at 1st level, you can choose from the telepath spell list, in addition to the sorcerer spell list, when you learn a new sorcerer spell. Spells you learn in this way count as sorcerer spells for you, and you don't need to provide verbal and somatic components when you cast them.

EMOTION SURGE

At 6th level, embracing a heightened emotional state allows your spells to flare with additional power.

When you cast a sorcerer spell of 1st level or higher, you can spend any number of sorcery points to surge with emotion, empowering the spell. If you do, the spell's level increases by the same number of levels as the amount of sorcery points you spent, up to the maximum level spell slot available for your sorcerer level. After augmenting a spell in this way, you must succeed on a Constitution saving throw (DC 8 + the spell's level) or be stunned until the start of your next turn.

ELUSIVE INTUITION

At 14th level, your emotional surges enhance your intuition, turning the emotional state of others into a clear indicator of their actions.

After you use your Emotion Surge, attacks against you have disadvantage until the end of your next turn, as long as you can see the attacker.

SURGING EUPHORIA

At 18th level, your surges of emotion trigger a euphoric state within you, boosting your endurance and your spells.

When you use your Emotion Surge, you can spend 3 additional sorcery points to gain the following benefits for 1 minute:

- You have a +2 bonus to your spell attack rolls and your damage rolls for spell attacks, and your spell save DC increases by 2.
- You gain temporary hit points equal to twice your sorcerer level, which disappear after 1 minute.

MULTICLASSING

Multiclassing allows you to gain levels in multiple classes. Doing so lets you mix the abilities of those classes to realize a character concept that might not be reflected in one of the standard class options. Refer to page 163 of the *Player's Handbook* for the full details of Multiclassing.

PREREQUISITES

To qualify for a new class, you must meet the ability score prerequisites for both your current class and your new one, as shown in the Multiclassing Prerequisites table. The Psion is added to this table.

MULTICLASSING PREREQUISITES

Class	Ability Score Minimum
Psion	Intelligence 13

PROFICIENCIES

When you gain a level in a class other than your first, you gain only some of that class's starting proficiencies, as shown in the Multiclassing Proficiencies table.

MULTICLASSING PROFICIENCIES

Class	Proficiencies Gained
Psion	Light armor

CLASS FEATURES

When you gain a new level in a class, you get its features for that level. You gain the starting equipment of your first class only. A few features, however, have additional rules when you're multiclassing: Channel Divinity, Extra Attack, Unarmored Defense, Psionics, and Spellcasting.

INNATE SPELLCASTING

Your capacity for psionics depends partly on your combined levels in all your psionic classes and partly on your individual levels in those classes. Once you have the Innate Spellcasting feature from more than one class, use the rules below. If you multiclass but have the Innate Spellcasting feature from only one class, you follow the rules as described in that class.

Psionic Power. You determine your available psionic power by adding together any pools of psionic power that you have. For example, a psion 5/ardent 7 has a total of 18 psionic power.

Psionic Power Limit. The highest amount of psionic power you can sustain at once is determined by adding together all of your levels in the psion class, and a third of your fighter or rogue levels (rounded down) if you have the Ardent or the Soulnife feature. Use this total to determine your psionic power limit by consulting the Multiclass Psionic table.

SPELL DESCRIPTIONS

The psionic spells are grouped by their spell level and listed within each group in alphabetical order. You can also find the secondary displays listed here for each psionic spell, which are subtle effects that occur just prior to casting the spell. Lastly, the changes incurred when a psion focuses on a psionic talent are listed under each talent's description. Note that spells which appear in other books, like the *Player's Handbook*, only have additional mechanics listed.

TALENTS (O LEVEL)

The spells are listed in alphabetical order below.

ACID SPLASH

Display: Your hand drips with deep yellow psionic energy

Focus. If you focus when you cast this spell, it lasts for up to 1 minute, while you concentrate on it. For the duration, a target hit by the spell has a -1 penalty to its AC.

If you also expend 1-5 psionic power when you cast the spell, the spell's initial damage increases by 1d6 per point spent, and the distance between the spell's targets increases by 5 feet per point spent.

BLADE MELD

Psionics (psychometabolism) talent

Casting Time: 1 bonus action

Range: Self

Display: The weapon melds with your form

Duration: 1 hour

A one-handed melee weapon you hold becomes infused with psionic energy, fusing with your hand. For the duration, you can't let go of the weapon, nor can it be forced from your grasp. You can end this spell early by using your bonus action.

Focus. If you focus when you cast this spell, you must concentrate on it, and your reach with the weapon is 5 feet further for the duration.

If you also expend 1 psionic power when you cast the spell, the weapon counts as magical for the purposes of bypassing resistance and immunity to non-magical damage for the duration.

CROWNED IN SORROW

Psionics (telepathy) talent

Casting Time: 1 action

Range: 60 feet

Display: The air around the target takes on a blue tint

Duration: Instantaneous

One creature you can see within range must make a Charisma saving throw. On a failed save, it takes 1d8 psychic damage, and it can't take reactions until the start of its next turn.

The talent's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Focus. If you focus when you cast this spell, it lasts for up to 1 minute, while you concentrate on it. For the duration, an affected target can't take reactions.

If you also expend 1-5 psionic power when you cast the spell, if the target fails its save, its psyche is crushed with sorrow; it takes extra psychic damage equal to the amount of points you spent now and each time it takes psychic damage thereafter for the duration.

DESICCATE

Psionics (psychometabolism) talent

Casting Time: 1 action

Range: 30 feet

Display: The target's skin shrivels somewhat

Duration: Instantaneous

Choose one creature you can see within range. The target must make a Constitution saving throw, taking 1d10 necrotic damage on a failed save.

The talent's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Focus. If you focus when you cast this spell, it lasts for up to 1 minute, while you concentrate on it. If the target fails its saving throw, it has disadvantage on the Strength, Dexterity, and Constitution ability checks for the duration. This spell ends early if the target drinks water.

If you also expend 1-5 psionic power when you cast the spell, an affected target that takes any action that requires use of its body takes 1d10 necrotic damage for each point spent, and the spell ends.

EYE OF HORROR

Psionics (telepathy) talent

Casting Time: 1 action

Range: 60 feet

Display: The target perceives your face as one horrific, alien eye

Duration: 1 round

Choose one creature you can see within range. The target must make a Wisdom saving throw. On a failed save, it takes 1d6 psychic damage and can't willingly move closer to you for the duration unless it succeeds on a Wisdom saving throw. A creature can only be forced to make this saving throw once per turn.

The talent's damage increases by 1d6 when you reach 5th level (2d6), 11th level (3d6), and 17th level (4d6).

Focus. If you focus when you cast this spell, you must concentrate on it, and the spell lasts for up to 1 minute.

If you also expend 1-5 psionic power when you cast the spell, if the target fails its saving throw, it must roll a d4 each time it makes an ability check or saving throw and subtract the result from its total for the duration, and you can select one additional target for the spell for each point spent.

FIRE BOLT

Display: The scent of smoke can be detected around the target

Focus. If you focus when you cast this spell, it lasts for up to 1 minute, while you concentrate on it, and the target lights ablaze on a hit, taking 1d10 fire damage at the end of each of its turns for the duration or until it or a creature within 5 feet of it extinguishes the flames with an action.

For the duration, you can expend 1 psionic power as a bonus action to force each creature within 5 feet of an affected target to succeed on a Dexterity saving throw or be lit ablaze in the same way.

FRIENDS

Display: The target's jaw involuntarily slacks and hangs for a moment

Focus. When you cast this spell, the target treats you as it would a friend for the duration.

If you also expend 1 psionic power when you cast the spell, the creature doesn't become hostile toward you when the spell ends, but it is still aware you used magic to influence its mood.

GUIDANCE

Display: The target's gaze appears unfocused to others

Focus. If you focus when you cast this spell, you must remain within range of the target for the duration, or the spell ends, and the target can roll the d4 for the spell again and use the second result if it rolls less than half your spellcasting ability modifier, rounded up.

If you also expend 1-5 psionic power when you cast the spell, the spell's effects can occur an additional number of times equal to the amount of points spent before the spell ends, and the spell's duration becomes 1 hour.

HAMMER OF INQUISITION

Psionics (telepathy) talent

Casting Time: 1 action

Range: 60 feet

Display: A blue ring of energy circles your wrist

Duration: Instantaneous

Choose one creature you can see within range. The target must make an Intelligence saving throw. On a failed save, the target takes 1d10 psychic damage.

The talent's damage increases by 1d10 when you reach 5th level (2d10), 11th level (3d10), and 17th level (4d10).

Focus. If you focus when you cast this spell, the spell lasts for 1 minute, while you concentrate on it, and an affected target has disadvantage on Wisdom and Charisma checks against you for the duration.

You can also expend 1 psionic power when you cast the spell to ask the target a single question of no more than 5 words, which it must answer. The answer must be truthful if the creature failed its saving throw against the spell.

KNOCK BACK

Psionics (psychokinesis) talent

Casting Time: 1 reaction, which you take when you hit a target with a melee attack

Range: Reach

Display: The area struck by the attack fluxes with psionic force

Duration: Instantaneous

The target must succeed on a Strength saving throw or be knocked 10 feet in a straight line away from you. If it hits an object, this movement immediately ends and the target takes 1d6 bludgeoning damage for every 10 feet it traveled.

The talent's push distance increases by 10 feet when you reach 5th level (20 feet), 11th level (30 feet), and 17th level (40 feet).

Focus. If you focus when you cast this spell, the spell lasts for 1 round, while you concentrate on it, and when you successfully push the target, the ground in a 10-foot radius where the target stops becomes difficult terrain for the duration.

If you also expend 1 psionic power when you cast the spell, any creature in the area of the difficult terrain must succeed on a Strength saving throw or be knocked prone. The pushed creature automatically fails its save.

LETHAL STRIKE

Psionics (psychometabolism) talent

Casting Time: 1 action

Range: Reach

Display: Fissures of orange psionic energy run across the weapon, which spread through the wound on impact

Duration: Instantaneous

As part of the action used to cast this spell, you must make an attack with a melee weapon you're holding against one creature within the weapon's reach, otherwise the spell fails. On a hit, the target suffers the attack's normal effects, and the attack deals extra psychic damage equal to your spellcasting ability modifier.

The talent's extra damage increases by 1d8 when you reach 5th level (1d8), 11th level (2d8), and 17th level (3d8).

Focus. If you focus when you cast this spell, the spell lasts for up to 10 minutes, while you concentrate on it, and you can deal psychic damage when you hit with a weapon attack, instead of the attack's normal damage type.

For the duration, you can expend 1-5 psionic power as a bonus action to deal an extra 1d8 psychic damage, plus 1d8 per point spent, with your next weapon attack that hits before the end of the turn.

LIGHT

Display: A light layer of glowing dust coats your hands

Focus. If you focus when you cast this spell, you must concentrate on it, and you can expend at least 1 psionic power to increase the radius of the light by 5 feet per point spent for its duration. Any invisible creature that is within the area of bright light can't benefit from being invisible unless it succeeds on a Charisma saving throw. If the creature succeeds its saving throw, it must repeat the saving throw at the start of each of its turns until it leaves the area of bright light.

MAGE HAND

Display: Air around your hands is displaced for the duration

Focus. If you focus when you cast this spell, you must concentrate on it, and the hand is invisible.

If you also expend 1-5 psionic power when you cast the spell, the weight that the hand can carry increases by 100 pounds for each point spent, and for the duration, you can use your action to move the hand up to 30 feet and then make a melee spell attack against a creature within 5 feet of the hand, dealing 1d6 force damage plus 1d6 per point spent on a hit.

MIGHTY LEAP

Psionics (psychometabolism) talent

Casting Time: 1 bonus action

Range: Self

Display: Tiny wings made of psionic energy appear behind your legs, which flap once and disappear

Duration: Instantaneous

Without requiring a running start, you jump up to 10 feet in any direction.

The talent's distance increases by 5 feet when you reach 5th level (15 feet), 11th level (20 feet), and 17th level (25 feet).

Focus. If you focus when you cast this spell, the spell lasts for up to 10 minutes, while you concentrate on it. For the duration, you can repeat the jump as a bonus action, and jumping in this way doesn't cost you any movement.

If you expend 1-5 psionic power when you jump in this way, each creature in a 10-foot radius around you when you land must make a Dexterity saving throw, taking 1d10 force damage, plus 1d10 per point spent on a failed save, or half as much on a successful one.

MESSAGE

Display: Creatures in the area between you and the target briefly experience the taste of iron

Focus. If you focus when you cast this spell, the spell's range becomes 90 feet, and the creature need not share a language with you to understand your message, which you deliver telepathically.

If you also expend 1 psionic power when you cast the spell, you gain access to one memory of the target's choice, gaining perfect recall of one thing it saw or did. The memory must be 10 seconds or less in duration, and you remember it as if you were observing it, rather than experiencing it yourself. If the target is unwilling, it can make a Charisma saving throw to resist the effect. On a success, you can't access its memory, and it is aware you tried to read its mind.

MIND THRUST

Psionics (telepathy) talent

Casting Time: 1 action

Range: 120 feet

Display: The target sweats profusely for a moment

Duration: Instantaneous

Choose one creature you can see within range. The target must make an Intelligence saving throw, taking 1d10 psychic damage on a failed save.

The talent's damage increases by 1d10 when you reach 5th level (2d10), 11th level (3d10), and 17th level (4d10).

Focus. If you focus when you cast this spell, the spell lasts for 1 round, while you concentrate on it. On a failed save, the target is deafened and its movement speed is reduced by 10 feet for the duration.

If you also spend 1-5 psionic power when you cast the spell, the target takes an additional 1d10 psychic damage per point spent on a failed save.

MINOR ILLUSION

Display: A purple glow surrounds the target's irises

Focus. If you focus when you cast this spell, you must concentrate on it, and you can choose to make the illusion imperceptible to all creatures except one of your choice within range.

If you also expend 1 psionic power when you cast the spell, you can create both a sound and an image, and the illusion is impossible to discern through inspection, but physically touching it will cause it to disappear and end the spell.

NOMADIC ANCHOR

Psionics (psychoportation) talent

Casting Time: 1 action

Range: 120 feet

Display: A chain link made of psionic energy appears, attached to one of your ears

Duration: 8 hours

You create an invisible, intangible teleportation anchor in a 5-foot cube you can see within range. For the next 8 hours, whenever you teleport, you can instead teleport to the anchor's space if you are within this spell's range. You can teleport in this way even if you can't see the anchor. You can only have one nomadic anchor active at a time; using this talent again causes the previous one to disappear.

Focus. If you focus when you cast this spell, you must concentrate on it, and you can use your bonus action to move the anchor to another location within range as long as you are within range of it.

For the duration, you can also expend 1-5 psionic power as a bonus action to teleport to the anchor's space as long as you are no further away from it than 20 feet times the amount of points spent.

NOMADIC STEP

Psionics (psychoportation) talent

Casting Time: 1 action

Range: Self

Display: A red band of energy appears around your forehead

Duration: Instantaneous

Your walking speed increases by 10 feet until the end of your turn. If you teleport before the end of your turn, you can immediately use your reaction to make one weapon attack.

The talent increases your speed by an additional 5 feet when you reach 5th level (15 feet), 11th level (20 feet), and 17th level (25 feet).

Focus. If you focus when you cast this spell, you must select a creature within 60 feet of you instead of yourself as the target of this spell, and the spell lasts until the end of your next turn, while you concentrate on it.

If you also expend 1-5 psionic power when you hit with the spell's reaction, you can deal an extra 1d8 damage for each point spent.

POISON SPRAY

Display: Your tongue becomes forked momentarily

Focus. If you focus when you cast this spell, it lasts for up to 1 minute, while you concentrate on it, and on a failed save, the target is poisoned for the duration. A poisoned target can repeat its saving throw at the end of each of its turns, ending the spell on a success.

You can also expend 1 psionic power when you cast the spell to increase its range to 30 feet and cause the poisoned target to take 1d12 poison damage at the end of each of its turns.

PSYCHIC HAMMER

Psionics (psychokinesis) talent

Casting Time: 1 action

Range: 120 feet

Display: An invisible impact collides with the target

Duration: Instantaneous

You surge one creature you can see within range with psychokinetic force. The target must succeed on a Strength saving throw or take 1d8 bludgeoning damage. This damage increases to 1d12 if its size is Medium or smaller.

The talent's damage increases by one die when you reach 5th level (2d8 or 2d12), 11th level (3d8 or 3d12), and 17th level (4d8 or 4d12).

Focus. If you focus when you cast this spell, your concentration ends if you're concentrating on a spell, and you can add your spellcasting ability modifier to the damage the creature takes.

If you also expend 1 psionic power when you cast the spell, the target is incapacitated until the end of your next turn on a failed save, and you can move the target up to 10 feet in a direction of your choice if it is Medium or smaller. You can't lift a target that is on the ground into the air in this way.

SCRAMBLE

Psionics (psychoportation) talent

Casting Time: 1 action

Range: 60 feet

Display: Your body visually warps around the projectile

Duration: Instantaneous

You create a writhing mass of scrambling energy in your hand, hurling it at a creature. Make a ranged psionic attack against one creature within range that you can see. On a hit, the target takes 1d8 force damage, and you can teleport it to an unoccupied space that you can see within 5 feet of its current location.

The talent's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Focus. If you focus when you cast this spell, the spell lasts for up to 1 minute, while you concentrate on it, and you can use your bonus action on each of your turns for the duration to force the target to succeed on a Charisma saving throw or be teleported again in the same way.

If you also expend 1-5 psionic power, you can teleport the target 5 feet further for each point spent whenever you teleport it with this spell.

SHOCKING GRASP

Display: Your palm crackles with lightning

Focus. If you focus when you cast the spell, the spell lasts for 1 minute, while you concentrate on it.

If you also expend at least 1 psionic power, you can choose a creature within 30 feet of the target for each point spent to create an electric link between it and the target. The first time that one of the linked creatures moves, all of the linked creatures must succeed on a Constitution saving throw or be stunned for the duration. A stunned creature can repeat the saving throw at the end of each of its turns, or whenever it takes damage, ending the effect on itself on a success.

SPARE THE DYING

Display: Red threads of psionic energy weave through the target's wounds

Focus. If you focus when you cast this spell, the spell lasts for up to 1 round, while you concentrate on it, and at the end of your next turn, the creature regains 1 hit point and is no longer unconscious.

You can also expend 1-5 psionic power when you cast the spell to grant the creature 5 temporary hit points for each point spent.

SPIKE OF LETHARGY

Psionics (psychometabolism) talent

Casting Time: 1 action

Range: 120 feet

Display: A mote of deep purple energy appears in front of your face

The spell ends when the target succeeds on a saving throw.

If you also expend 1-5 psionic power when you cast the spell, the target takes 1d8 psychic damage, plus 1d8 for each point spent, whenever it fails its save against the spell.

Focus. If you focus when you cast this spell, you must concentrate on it, and the target must instead spend 2 extra feet of movement for every foot that it moves towards you for the duration.

Display: Psionic energy resembling ectoplasm exudes from your body

Duration: Concentration, up to 1 minute

This spell creates one *astral construct* of solidified ectoplasm that attacks your enemies. It appears in an unoccupied space of your choice that you can see within range, and it disappears at the end of the duration or if its hit points drop to 0. It acts immediately after you. On your turn, you can verbally command the construct where to move (no action required by you). When you create the construct, and as an action on each of your turns, you can verbally command it to take an action. If it is not given a command, the *astral construct* will defend you by interposing itself between you and enemies, but will do nothing else.

The *astral construct* adds your proficiency bonus multiplied by your psion level to its hit points, and you can spend additional psionic power when you cast this spell to bolster its abilities. It accumulates certain benefits for each additional point you spend:

It must succeed on a Wisdom saving throw, or have its senses linked with yours. A willing creature can choose to fail the save.

You cannot influence the creature's behavior with this spell. However, you can emulate its senses freely as if you were in its body, but only from its point of view. This allows you to make ability checks while benefitting from a creature's unique features, among other things. For example, you can smell through the nose of a wolf that is hiding in a bush, and you would smell the bush as well as yourself, as the wolf would. You can also see through the eyes of a hawk in flight, allowing you to get a bird's eye view with its exceptional vision.

Duration: Concentration, up to 1 minute

You telekinetically control a flame, making it bigger, smaller, hotter or colder, and even making it move around as if it were a living creature.

Choose a source of non-magical fire that you can see within range. When you cast this spell, and as an action on each of your turns for the duration, you can move the fire up to 30 feet and manipulate it in one of the following ways:

- A fire's size can be increased up to double or reduced down by up to half of its original size.
- By increasing its heat, you cause a non-damaging fire to deal damage as if it were a torch, and by reducing it, you cause a damaging fire to become harmless.

If you cause a fire to engulf a creature, that creature must make a Dexterity saving throw, taking 3d8 fire damage on a failure, or half on a success. On a failure, the creature is also set on fire, as this psionically shaped fire sticks to them. A creature takes 1d8 fire damage at the end of each of its turns or until it or a creature within 5 feet of it uses its action to extinguish the flames.

You form psionic energy into malleable crystals, which you launch at a creature. Make a ranged psionic attack against a creature you can see within range. On a hit, the target takes 4d8 piercing damage, and if it is Large or smaller, it must succeed on a Strength saving throw or be encased in crystal.

An encased creature can still breath but is otherwise helpless, being unable to see or take any physical actions. The subject cannot speak because the crystals distort sounds. While a creature is encased in a crystal cocoon, it cannot be targeted with attacks, spells, or other effects, and it cannot be damaged by sources outside of the cocoon.

As an action, the target can make a Strength(Athletics) check against your spell save DC to break free. The crystal cocoon can also be damaged from the outside; it has 16 AC and 30 hit points. From a subject's point of view, no time has passed at all. This spell fails and is wasted if any creature or object is only partially within the cube. While this spell is active, nothing can pass through the affected 5-foot cube - it is completely filled by impenetrable silver energy.

At the start of each of your turns for the duration, you must succeed on a Charisma ability check (DC 10 + the number of rounds that have passed since this spell was cast), or the spell ends.

You can also restrain it until the start of its next turn.

Physical actions which require internal muscular control, such as speaking, are impossible with this spell. You cannot force the target to use any mental abilities, such as casting a spell or using any special ability that is not a function of just its body movements. However, if the creature can perform these actions without muscular control of its body, it can still do so of its own accord.

At the end, the creature must succeed on a Wisdom saving throw to resist feeling violent urges against one creature you describe to it or name. The save automatically succeeds if the target is immune to being charmed.

On a failed save, the target attacks the chosen creature if it sees that creature for the duration, using weapons or spells against a creature it's already hostile toward or unarmed strikes otherwise. Once the creature starts fighting, it continues to attack for 1 minute before this spell ends. Duration: Concentration, up to 10 minutes

Motes of light swirl to form a crystalline prism in the air, sharpening your senses and extending your presence on the battlefield. Choose an unoccupied space that you can see within range. You conjure a Tiny intellect prism in that space, which lasts for the duration or until you dismiss it as a bonus action. You can see and target creatures and objects as if you were in the prism's space, and while the prism is within 5 feet of you, you have advantage on Wisdom (Perception) and Intelligence (Investigation) checks. Once on each of your turns, you can move the prism up to 30 feet.

The prism has hit points equal to half your hit point maximum and AC 15. It can be targeted with attacks and other damaging effects, but it is immune to all conditions. If the prism drops to 0 hit points, it is destroyed, and you are stunned until the end of your next turn. The spell then ends.

The target must succeed on a Charisma saving throw or become affected by this spell for the duration. A creature under the effects of a *personality parasite* must make a Charisma saving throw each time it attempts to perform an action. On a failed save, the DM rolls a d20. QUINTESSENCE

4th-level psionics (psychoportation)

Casting Time: 1 action

Range: Self

Display: The area near the quintessence seems to move more slowly when observed

Duration: Instantaneous

You collapse a bit of time from the continuum, forming a dollop of thick, goeey material called quintessence that weighs 0.1 lb. The substance shimmers like a silver mirror. Psionic creatures can handle quintessence by shielding itself with a small amount of psionic energy when touching it. However, they must do so with care, as quintessence inhibits psionics. A psionic creature within 5 feet of at least 1 lb of quintessence cannot use its psionic abilities, and it can only properly handle the quintessence if it succeeds on an Intelligence check of DC 10 plus 1 per lb of quintessence.

You can use your action to smooth a dollop of quintessence around any extremely small object, such as a key, a ring, a seal, or an insignia. Objects sealed with quintessence are protected from the effects of time, entering a state of stasis. Large quantities of quintessence can be gathered to preserve large items or structures, or even a complete living creature.

You can also use your action to apply a dollop of quintessence to a small amount of a creature's living flesh, partially pulling it out of the time stream. Make a ranged psionic attack against one creature you can see within 5 feet of you. On a hit, the target is affected by quintessence, which forces it to take 1d4 force damage at the end of each of its turns for 1 minute, at which point the quintessence is too disrupted to be effective.

Each dollop of quintessence can be used only once. Quintessence can be manually scraped away from a protected object, freeing it to rejoin the time stream. When you do this, the quintessence is not recovered.

Any of the Equipment created by the spell vanishes in a puff of smoke if it's carried more than 10 feet away from the wolf.

For the duration, you or a creature you choose when you cast this spell can ride the wolf as an intelligent mount. In combat, the wolf rolls initiative and acts independently of you. While not being ridden, the wolf remains in place and takes no actions, and any attempts to interact with it pass through it harmlessly. The creature uses the statistics for a Winter Wolf, except it has a speed of 100 feet and can travel 10 miles in an hour, or 13 miles at a fast pace. When the spell ends, the wolf gradually fades, giving the rider 1 minute to dismount. The spell ends if you use an action to dismiss it or if the wolf is reduced to 0 hit points.

While the target is trapped, its speed is halved, it suffers disadvantage on attack rolls, it can't breathe, and it can't see anything more than 10 feet away from it. However, attack rolls against it also suffer disadvantage. The target can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success.

To cast this spell, you must touch at least one willing creature and maintain contact with it for the entire casting time. When you do, you synchronize your psionic energy with its abilities, improving both participants. You can be in *metaconcert* with up to three creatures at once. When you cast this spell, each of you gain one of the following benefits based on both of your capabilities:

Psionic. If at least one of you is psionic, any psionic creature that is part of a *metaconcert* gains a +1 bonus to its psionic attack rolls and spell save DC for the duration.

Spellcaster. If at least one of you has the ability to cast a spell, any spellcaster that is part of a *metaconcert* gains a +1 bonus to its spell attack rolls and spell save DC for the duration.

Mundane. Any creature can be considered mundane for the purposes of this spell. Any mundane creature that is part of a *metaconcert* gains a +1 bonus to its weapon attack rolls and AC for the duration.

You choose the benefit if a creature qualifies for more than one. The link created by *metaconcert* persists over any distance, but this spell ends if an affected creature is on another plane of existence.

In addition, its melee weapon attacks deal an extra 1d8 damage on a hit, and its reach increases by 10 feet. If it is smaller than Large, it also becomes Large for the duration.

5th-level psionics (psychometabolism)

Casting Time: 1 minute

Range: Touch

Display: Green tendrils of energy weave through the stump

Duration: Instantaneous

You touch a creature and maintain contact for the casting time. At the end of casting, you restore a severed extremity to the creature, such as a lost digit, hand, arm, leg, or even its head. This spell does not restore life, but it returns a lost extremity to a living or dead creature if the creature is otherwise mostly intact. The original extremity need not be present when this spell is cast; a new extremity is created by it. If a head is restored to a body, the original head (if not already destroyed) crumbles to dust.

ROLLING FLAME

5th-level psionics (psychokinesis)

Casting Time: 1 action

Range: Self

Display: Trails of harmless fire swirl in the air around you

Casting Time: 1 action

Range: 60 feet

Display: A booming sound is emitted from the target for the duration

Duration: Concentration, up to 1 minute

On a failure, it is deafened, and on each of your turns for the duration, you can use your action to deal 3d10 thunder damage to the target automatically.

The spell ends if you use your action to do anything else. The spell also ends if the target is ever outside the spell's range or if it has total cover from you.

At Higher Levels. If cast at 6th level or higher, the initial damage increases by 1d10 for each slot level above 5th. At 7th level or higher, the automatic thunder damage increases by 1d10.

TELEKINETIC GRASP

5th-level psionics (psychokinesis)

Casting Time: 1 action

Range: 60 feet

Display: The area around the target distorts with invisible waves of psionic energy

Duration: Concentration, up to 1 minute

You attempt to grasp a creature in telekinetic energy and hold it captive. As an action, choose one creature you can see within range. The target must succeed on a Strength saving throw or be grappled by you until your concentration ends or if the target is more than 90 feet away from you.

The grappled target can escape by succeeding on a Strength (Athletics) or Dexterity (Acrobatics) check contested by your Strength (Athletics) check. When a target attempts to escape in this way, you can spend additional psionic power to gain a +1 bonus your roll per point spent. You can gain up to a +5 bonus this way. You can add this bonus after making the roll.

While a target is grappled in this manner, you can create one of the following effects as an action:

Crush. The target takes 5d6 bludgeoning damage.

You attempt to send one creature that you can see within range to a random place of existence. The target must succeed on a Charisma saving throw or be banished with a faint popping noise to a random plane of existence.

If the target is native to the plane of existence you're on, it gains the effects of the *resilient sphere* spell while banished. It reappears in its original space or the nearest unoccupied space if that space is occupied when the spell ends.

If the target is native to a different plane of existence than the one you're on and the spell ends before 1 minute has passed, the target reappears in its original space or the nearest unoccupied space if that space is occupied. Otherwise, it doesn't return.

On a failed save, each time that the target is hit with an attack while it is within range, you can use your reaction to make a ranged psionic attack against it. On a hit, the target takes psychic damage equal to 3d6 plus your spellcasting ability modifier, and you can move it up to 20 feet in a direction of your choice.

At Higher Levels. If cast at 7th level or higher, this spell's initial damage increases by 1d6 per spell level above 6th.

On a failed save, a target takes 7d8 thunder damage and is deafened for 1 minute. A creature may repeat its saving throw at the end of each of its turns, ending this effect on itself on a success. On a success, a creature takes half as much damage and isn't deafened.

A nonmagical object that isn't being worn or carried also takes the damage if it's in the spell's area.

At Higher Levels. If cast at 7th level or higher, this spell's damage increases by 1d8 per spell level above 6th.

DETONATION

Range: Self

Display: Your hair ignites and burns away whether you succeed or not

Duration: Instantaneous

You harness psionic energy to cheat death. Make a Constitution saving throw (DC 5 + the damage dealt by the triggering attack). If you succeed, you break apart into dozens of flitting tongues of flame and vanish, along with all your gear and anything you are holding or carrying. One day later, you reappear in an unoccupied space of your choice within 5 feet of the open flame nearest to where you were incorporated, materializing from the flame. While incorporated, you essentially do not exist - you can do nothing, nor can any other creature or object interact with you.

INDUCED VISION

6th-level psionics (clairsentience)

Casting Time: 1 minute

Range: Touch

Display: Your irises become white while casting

Duration: 30 days

You touch a creature's temples and maintain contact with them for the casting time. At the end of casting, you grant it a mental vision of something it desires, while simultaneously placing a mental binding on it, which forces it to carry out some service or refrain from some action or course of activity as you decide, as it believes this will lead it to its goal.

If the creature can understand you, it must succeed on a Wisdom saving throw or become charmed by you for the duration. While the creature is charmed by you, it must make a Charisma saving throw each time it acts in a manner directly counter to your instructions, but no more than once each day. On a failure, the creature is compelled to follow your instruction, and its Intelligence score is reduced by 1, which cannot be restored except by ending the *induced vision* on them. A creature with 0 Intelligence falls unconscious until its Intelligence is restored to at least 1.

You can issue any command you choose, short of an activity that would result in certain death. Should you issue a suicidal command, the spell ends. You can end the spell early by using an action to dismiss it.

A *negate psionics* spell, or either the *greater restoration* or *wish* spells also ends it.

At Higher Levels. If cast at 7th or 8th-level, the duration is 1 year. If cast at 9th-level, the spell lasts until it is ended by one of the spells mentioned above.

MASS FABRICATION

6th-level psionics (metacreativity)

You convert raw materials into products of the same material. For example, you can fabricate a wooden bridge from a clump of trees, a rope from a patch of hemp, and clothes from flax or wool.

Choose raw materials that you can see within range. You can fabricate up to 6 huge or smaller objects, as long as the resulting objects must be contained within a 15-foot cube, or twelve connected 5-foot cubes, given a sufficient quantity of raw material. If you are working with metal, stone, or another mineral substance, however, you can fabricate up to 4 large or smaller objects, and the resulting objects must be contained within a 10-foot cube, or eight connected 5-foot cubes. The quality of objects made by the spell is commensurate with the quality of the raw materials.

Creatures or magic items can't be created or transmuted by this spell. You also can't use it to create items that require a high degree of craftsmanship, such as jewelry, weapons, glass, or armor, unless you are proficient with the type of artisan's tools used to craft such objects.

METAMORPHOSIS

6th-level psionics (psychometabolism)

Casting Time: 1 action

Range: Self

Display: The smell of saffron and ginger permeates the area within 30 feet of the target

Duration: Concentration, up to 1 hour

You assume the form of a creature of the same type as your normal form, or any other type except aberration, celestial, construct, elemental, fiend, or undead. The assumed form can be of a CR no greater than 8.

You can't choose a creature with a size larger than Huge, or one with an incorporeal, ectoplasmic, or gaseous form. Your game statistics, including mental ability scores, are replaced by the statistics of the chosen creature. You retain your alignment and personality.

You assume the hit points of your new form. When you revert to your normal form, you return to the number of hit points you had before you transformed. If you revert as a result of dropping to 0 hit points, any excess damage carries over to your normal form. As long as the excess damage doesn't reduce your normal form to 0 hit points, you aren't knocked unconscious.

You are limited in the actions you can perform by the nature of your new form, and you can't speak, cast spells, or take any other action that requires hands or speech unless your new form is capable of it.

Your gear melds into the new form. You can't activate, use, wield, or otherwise benefit from any of your equipment.

Duration: Instantaneous

At Higher Levels. If cast at 7th level or higher, this spell's damage increases by 1d10 for each spell level above 6th.

PSYCHIC LEECH

6th-level psionics (psychometabolism)

Casting Time: 1 action

Range: Touch

Display: Your hand is shrouded in darkness momentarily

Duration: 10 minutes

You touch a creature and infect it with leeching psionic energy. Make a melee psionic attack against the target. On a hit, leeching energy is attached to the target, and you can choose to deal 7d8 psychic damage to the target. The target must make a Charisma saving throw. On a failure, its Intelligence score is reduced by 1, which lasts for the duration. A creature with 0 Intelligence becomes unconscious until it is restored to at least 1 Intelligence.

An affected creature must repeat the saving throw after each minute that it is affected by this energy. Each time it fails, its Intelligence score is reduced. On a success, this spell ends and the target's Intelligence score is restored.

The save automatically succeeds if the target is immune to being charmed.

On a failed save, a target's speed is reduced to 0 for the duration.

As an action, a target that has its speed reduced can end the effect early if it succeeds on a Strength (Athletics) check with a DC equal to this effect's save DC.

HAZY SHIFT

Choose one creature you can see within range. It must make a Constitution saving throw. RANSACK MIND

7th-level psionics (telepathy)

Casting Time: 1 hour

Range: 30 feet

Display: The target's fingers tremble slightly during casting

Duration: Instantaneous

You probe a creature's mind. The creature must remain within range and in your sight for the casting. At the end of the casting time, the target must make three Intelligence saving throws, and you learn an amount of the creature's key memories based on the number of saving throws it fails. If it fails one, you learn the past 12 hours. If it fails 2, you learn the past 24 hours. If it fails all 3, you learn the past 48 hours.

REDDOPSI

7th-level psionics (telepathy)

Casting Time: 1 action

Range: Self

Display: A faint field of oscillating color appears around you, which creates a high pitched ring when struck

Duration: Concentration, up to 10 minutes

When you cast *reddopsi*, psionics targeted against you may rebound to the original caster. This effect reverses psionics that only have you as the target, but cannot reverse spells such as *negate psionics* which would negate or suppress it. The creature targeting you must make an Intelligence saving throw. On a failure, its target changes to itself. If the creature is also protected by *reddopsi*, the spell fails instead.

SHADOW BODY

7th-level psionics (psychometabolism)

Casting Time: 1 action

Range: Self

Display: None

Duration: Concentration, up to 1 hour

Your body and all of your equipment are subsumed by your shadow. As a living shadow, you blend perfectly into any other shadow and vanish in darkness. You appear as an unattached shadow in areas of full light. You can walk safely on any surface, including liquids such as water or a waterfall. You still occupy your space, so you can't move into locations that you would normally not fit into. Effects that reveal the true form of creatures, such as the *true seeing* spell, reveal your true form.

While in your *shadow body*, you gain the following benefits:

- You gain a climb speed equal to your walking speed.
- You have resistance to all damage except psychic.
- Critical hits against you become normal hits instead.
- Effects of diseases and poisons are suspended for the duration.
- You do not need to breathe.
- You have advantage on ability checks made to hide, and you can add your Intelligence modifier to such checks.

You can only use your action while under this effect to take the Hide action, or to return to your normal form and end this spell. You cannot use bonus actions or reactions during this effect.

8TH LEVEL

The spells are listed in alphabetical order below.

ASTRAL REGENERATION

8th-level psionics (metacreativity)

Casting Time: 10 minutes

Range: Self

Display: Tendrils of astral ectoplasm connect you and the crystal

Duration: Until negated

You draw and weave strands of astral ectoplasm into a gem worth at least 5,000 gp, inhabiting it with the seed of your living mind. You can only have one gem in existence affected by this spell at any given time. The appearance of the gem does not change after casting this spell.

If you die, your physical body crumbles to dust, leaving all of your equipment, and your soul transfers into the storage gem as long as it is on the same plane of existence. The gem begins to glow, and any attempt to bring your soul back to life fails while you inhabit it. Once this effect occurs, you can hear and see as if you were in the gem's space, but you cannot move or interact in any way that the gem couldn't. You may remain in this form for up to 30 days, after which your soul disengages from the gem and passes on.

You can slowly generate a new clone of your living body over the course of 10 days, during which time you must be completely undisturbed; even hearing the slightest noise will break your concentration and ruin the clone, making it uninhabitable and leaving you no way to continue regenerating it. Your original body's constituent parts are pulled as ectoplasm through the astral plane, then slowly molded and transformed into a living, breathing body that is an exact duplicate of your body at the time you manifested *astral regeneration*. If the developing body takes any kind of damage while forming, it becomes ruined and uninhabitable. When the tenth day ends, the crystal crumbles and merges with your new body, and you completely and totally inhabit it.

ICE BARRIER

8th-level psionics (metacreativity)

Casting Time: 1 action

Range: 60 feet

Display: Your body is covered in a thin layer of deep blue frost

Duration: Concentration, up to 10 minutes

You create a barrier of ice, at least one portion of which must be within range. The wall is 60 feet long, 15 feet high, and 1 foot thick. You can place the barrier in 10-foot long segments, each of which must be connected on at least 1 side. Each 10-foot wide section of the wall has AC 15 and 50 hit points, and is vulnerable to fire damage. Breaking one section removes that section from the wall, but the wall otherwise remains intact. A creature that damages the wall with a melee attack takes cold damage equal to the damage the creature dealt to the wall.

IRON RESISTANCE

8th-level psionics (metacreativity)

Casting Time: 1 action

Range: 60 feet

Display: Each creature gains a metallic shell made of psionic energy for the duration

Duration: Concentration, up to 1 minute

Choose up to two creatures that you can see within range. The targets gain resistance to bludgeoning, piercing, and slashing damage for the duration.

MASS TIME SUSPENSION

8th-level psionics (psychoportation)

Casting Time: 1 minute

Range: 30 feet

Display: Your face appears far younger for a moment, then returns to normal

Duration: Instantaneous

Choose any number of willing creatures within range that you can see, who must remain in range for the casting time. When you finish casting this spell, you suspend each target in a pocket of time, allowing them a brief respite. Affected creatures seem to disappear in a shimmer of silver energy. This suspension lasts for 1 hour.

When creatures reappear, they are in the exact same space, or the nearest unoccupied space, in exactly the same orientation and condition as before. Each affected creature gains the benefits of a short rest. From an affected creature's point of view, no time has passed at all.

At Higher Levels. If cast at 9th level, this spell's casting time becomes 1 action.

MICROSCOPIC FORM

8th-level psionics (psychometabolism)

Casting Time: 1 bonus action

Range: Self

Display: Your shadow casts as far as it would if you were normal size

Duration: Concentration, up to 10 minutes

You become smaller than Tiny for the duration. While under this effect, you gain a +10 bonus to Dexterity (Stealth) checks and a +5 bonus to AC, you can move through gaps up to 1 inch across without squeezing, and you can't make weapon attacks.

NULLIFY PSIONICS

8th-level psionics (clairsentience)

Casting Time: 1 action

Range: Self

Display: Psionic energy flakes off of everything within the area and disappears

Duration: Concentration, up to 1 hour

A 10-foot-radius invisible sphere of deadening influence surrounds you, nullifying psionics. In this area, psionic energy is immediately discharged, becoming inert. Within the sphere, spells can't be cast by using psionics, and psionically summoned creatures and objects disappear. For the duration, the sphere moves with you, centered on you.

Psionic spells and other psionic effects, except those created by an artifact or a deity, are suppressed in the sphere and can't protrude into it. Psionic power expended to cast a suppressed spell is consumed. While an effect is suppressed, it doesn't function, but the time it spends suppressed counts against its duration.

Targeted Effects. Psionic spells and other psionic effects, such as *magic missile* and *cause fear*, that target a creature or an object in the sphere have no effect on that target.

Areas of Psionics. The area of another psionic effect, such as *detonation*, can't extend into the sphere. If the sphere overlaps an area of psionics, the part of the area that is covered by the sphere is suppressed. For example, the wood created by a *wall of wood* is suppressed within the sphere, creating a gap in the wall if the overlap is large enough.

Psionics. Any active psionic effect or spell on a creature or an object in the sphere is suppressed while the creature or object is in it.

Psionic Travel. Teleportation and planar travel caused by psionics fail to work in the sphere, whether the sphere is the destination or the departure point for such travel. A portal to another location, world, or plane of existence, as well as an opening to an extradimensional space such as that created by the *rope trick* spell, temporarily closes while in the sphere.

Creatures and Objects. A creature or object summoned or created by psionics temporarily winks out of existence in the sphere. Such a creature instantly reappears once the space the creature occupied is no longer within the sphere.

Negate Psionics. Spells such as *negate psionics* have no effect on the sphere. Likewise, different *nullify psionics* spells don't nullify each other.

OAKEN BODY

8th-level psionics (metacreativity)

Casting Time: 1 action

Range: Touch

Display: The target's body covered in bark and leaves

Duration: Concentration, up to 10 minutes

You touch a creature and alter its body to a hybrid of its natural form and living oak. The target gains the following effects:

- It is resistant to bludgeoning, piercing, slashing and cold damage.
- Its size becomes Large, if it is not already Huge or larger.
- It is vulnerable to fire damage.
- It is immune to the blinded, deafened, diseased, poisoned, and stunned conditions.
- Its unarmed strikes deal 2d8 damage, and deal double damage to objects and structures.
- Any creature that damages it must succeed on a Dexterity saving throw or take 3d10 piercing damage, as shards of hardened bark splinter off in its direction.

While under this effect, a creature can use its action to become nearly indistinguishable from an oak tree; until the end of its next turn, other creatures who were not previously aware of it must succeed on an Intelligence (Investigation) check with disadvantage against your psionics save DC to discern the creature's true form. This illusion is dispelled if the creature moves or takes any other action.

PERCEIVE THE UNSEEN

8th-level psionics (clairsentience)

Casting Time: 1 bonus action

Range: 30 feet

Display: A web of crackling, gold psionic energy spreads below you

Duration: Concentration, up to 1 minute

You create a field around yourself that prohibits hiding. Creatures within range have a -10 penalty to Dexterity (Stealth) checks, and they can't benefit from being invisible. You have a +5 bonus to Intelligence and Wisdom checks to detect objects or creatures within range. You can choose any number of creatures to be unaffected by this spell.

PHANTOM RICHES

8th-level psionics (telepathy)

Casting Time: 1 action

Range: 60 feet

Display: A gold choker of psionic energy surrounds the target's neck

Duration: Concentration, up to 1 minute

You plant the phantom of a greatly desired object in a creature's mind. Choose one creature you can see within range. The target must make an Intelligence saving throw. On a failed save, you gain partial control over the target's behavior for the duration. The target can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success.

The target moves as you wish on each of its turns, as it thinks it pursues the phantom object it desires. If it hasn't taken damage since its last turn, it can use its action only to admire the object you created in its perception.

PSYCHIC REDOUBT

8th-level psionics (clairsentience)

Casting Time: 1 action

Range: 30 feet

Display: Rippling, orange psionic energy surrounds the targets

This transformation lasts for the duration, until you die, or until you end it as a bonus action. You can use your action on your turn to choose a different effect, gaining its benefits and losing your previously chosen benefits.

Metabolism. You appear younger and more spry. You regenerate 1 hit point every round, and if you have one of your severed body parts and hold it to the stump, the limb instantly knits to the stump.

Casting Time: 1 bonus action

Range: 60 feet

Display: Shadows within range become darker for the duration

Duration: Concentration, up to 10 minutes

You cloak yourself in unsettling psychic energy. For the duration, any creature within range that can see you must spend 1 extra foot of movement for every foot it moves toward you. You can designate any number of creatures to ignore this effect when you cast it.

WALL OF THUNDER

8th-level psionics (metacreativity)

Casting Time: 1 action

Range: 60 feet

Display: Thunderous energy travels between your fingers

Duration: Concentration, up to 10 minutes

You create a wall of thunder, at least one portion of which must be within range. The wall is 60 feet long, 15 feet high, and 1 foot thick.

Every foot moved through the wall costs 1 extra foot of movement. When a creature moves into the wall's space for the first time on a turn or starts its turn there, that creature must succeed on a Strength saving throw, taking 9d6 thunder damage on a failure, or half on a success. On a failed save, a creature is pushed in a straight line 30 feet away from the wall, and is knocked prone. If it collides with an object, it takes 4d6 thunder damage as the shock wracks its body.

WONDROUS RECALL

8th-level psionics (clairsentience)

Casting Time: 1 action

Range: Touch

Display: Your hand glows a pulsing white, which transfers to the target when you touch it

Duration: Instantaneous

You touch a creature, allowing it to bring back to memory 2 spell slots of 5th-level or lower that it has expended. If no spell slots have been expended by the target, nothing happens.

Range: Self

Display: Dust floats upwards within the area for the duration

Duration: Concentration, up to 1 minute

Swirling psychic energy surrounds you and your allies, wiping your presence from others' minds. A 10-foot radius sphere of psionic energy surrounds you, moving with you. Creatures you designate in the sphere, including worn and carried items, are invisible to creatures outside the sphere.

Range: Touch

Display: Energy of the chosen type is repelled by the target

Duration: Concentration, up to 1 hour

One creature you touch gains immunity to acid, cold, fire, lightning, or thunder damage (your choice) for the duration.

FUSION

9th-level psionics (psychometabolism)

Casting Time: 1 action

Range: Touch

Display: Earrings made of psionic energy appear on your fused form's ears for the duration

Duration: Concentration, up to 1 minute

You and another willing, corporeal, living creature of no more than one size larger or smaller than you fuse into one being. As the caster, you control the actions of the fused being. However, you can give up this control to the other creature. Once you give up control, you cannot regain it unless the other creature relinquishes it.

The fused being has your hit points plus the other creature's hit points. The fused being knows all of the spells, has the same amount of psionic power, knows or has prepared the same spells, and has the same amount of spell slots as both creatures combined. Any spent psionic power or spell slots prior to the fusion are retained on the fused being. Likewise, all feats, racial abilities, and class features are pooled (if both creatures have the same ability, the fused being gains it only once.) For each of the six ability scores, the fused being's score is the higher of yours and the other creature's, its Hit Dice are those of both creatures combined, and the fused being has the higher level of the two creatures. The fused being gains all proficiencies and expertise of both beings.

You decide what equipment is absorbed into the fused being and what equipment remains available for use. These fused items are restored to their original owners once the spell ends.

When the spell ends, the fused being separates, both creatures appearing in the nearest unoccupied space. If separation occurs in a space without room for both creatures, both creatures are shunted to the nearest unoccupied space, take 12d6 force damage and are stunned for 1 minute.

Damage taken by the fused being is discarded when the spell ends. Each constituent creature of the fusion is returned with exactly the same amount of hit points it had before it entered the fusion. However, any resources spent by the fused being are transferred to the original creatures when *fusion* ends. Any debilitating effects are split between you and the other creature. If any effects cannot be evenly split, you determine who receives the additional loss.

If a fused being is killed, it separates into its constituent creatures, both of which are also dead. You cannot use *fusion* on a being already fused by this spell.

INCITE AWE

9th-level psionics (telepathy)

Casting Time: 1 action

Range: 60 feet

Display: The targets' eyes are surrounded with a faint, white aura

Duration: Concentration, up to 10 minutes

Each target must succeed on an Intelligence saving throw or be charmed by you until your concentration ends. While charmed, a target obeys all your verbal commands to the best of its ability and without doing anything obviously self-destructive. The charmed target will attack only creatures that it has seen attack you since it was charmed or that it was already hostile toward. At the end of each of its turns, it can repeat the saving throw, ending the effect on itself on a success.

INCITE PANIC

9th-level psionics (telepathy)

Range: 90 feet

Display: Silver chains made of psionic energy appear around the necks of affected creatures, constricting them

On a failed save, the target is frightened until the start of its next turn, and you roll a die. If you roll an odd number, the frightened target moves half its speed in a random direction and takes no action on that turn, other than to scream in terror. If you roll an even number, the frightened target makes one melee attack against a random target within its reach. If there is no such target, it moves half its speed in a random direction and takes no action on that turn.

IRRATIONAL PHOBIA

9th-level psionics (telepathy)

Casting Time: 1 action

Duration: Instantaneous

You deeply seat a phobia in up to 6 creatures that you can see, paralyzing them out of primal terror.

Each target must make a Wisdom saving throw. On a failed save, a target takes 11d6 psychic damage and is paralyzed. On a successful save, a target takes half as much damage and isn't paralyzed.

A paralyzed target can make a Wisdom saving throw at the end of each of its turns. On a successful save, the paralyzing effect ends.

PHANTOM BETRAYAL

9th-level psionics (telepathy)

Casting Time: 1 action

Range: 60 feet

Display: Deep bruises appear under the target's eyes

Duration: Concentration, up to 1 minute

You plant delusional paranoia in a creature's mind. Choose one creature you can see within range. The target must make an Intelligence saving throw. On a failure, it must target its allies with attacks and other effects for the duration. The target can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success. A creature is immune to this ability if it is immune to being charmed.

PSYCHIC CRUSH

9th-level psionics (psychokinesis)

Casting Time: 1 action

Range: 120 feet

Display: The air seems to crack visually and audibly in the area

Duration: Instantaneous

You create a 35-foot cube of dense psychic energy within range. Each creature in that area must make an Intelligence saving throw, taking 11d8 force damage on a failed save, or half on a success. On a failed save, a target is paralyzed for 1 minute. A paralyzed target can repeat the saving throw at the end of each of its turns, ending this effect on a success.

TEMPORAL VELOCITY

9th-level psionics (psychoportation)

Casting Time: 1 bonus action

Range: Self

Components: Your irises change to form dials of a clock, which make one rotation over the duration before reverting

Duration: Varies

You enter another time frame, speeding up so greatly that all other creatures seem frozen, though they are actually still moving at their normal speeds. You are free to act for 1d4+1 rounds of apparent time, including your current turn.

While *temporal velocity* is in effect, normal and magical energy still harms you, and other creatures are invulnerable to your attacks and damage. However, you can cast spells and leave their effects to appear when the *temporal velocity* ends. The spells' durations start when the *temporal velocity* ends.

You can't move or harm items held, carried or worn by a creature stuck in standard time, but you can affect any item that is unattended.

You are undetectable while *temporal velocity* lasts. You cannot enter an area protected by *nullify psionics* or by psionics or spells that neutralize high-level psionics or spells.

When *temporal velocity* lapses, you are disoriented on your return to the standard time frame. You suffer disadvantage on all attack rolls, saving throws, and ability checks until the end of your next turn.

THOUGHT OF UNMAKING

9th-level psionics (psychoportation)

Casting Time: 1 action

Range: 60 feet

Display: The target sees you as if you were ink bleeding on paper

Duration: Instantaneous

You rip a creature's very existence from the fabric of reality. A creature of your choice within range must make a Charisma saving throw. On a failure, it takes 30 necrotic damage immediately, and again at the start of each of its turns. On a success, it takes 15 necrotic damage instead and the spell ends. A target with 150 hit points or less automatically fails its saving throw, and each time it takes damage from this effect, it takes 60 necrotic damage instead.

The creature can repeat the saving throw at the end of each of its turns, ending this effect on itself on a success.

VEIL OF PRESSURE

9th-level psionics (psychokinesis)

Casting Time: 1 action

Range: Self

Display: Pulses of translucent, violet kinetic energy emit from you

Duration: 1 hour

You weave a field of kinetic pressure around you to form a protective veil. For the duration, attack rolls against you have disadvantage, and when a creature you can see misses you with an attack, you can force the creature to repeat the attack roll against itself.

Immutable Form. The astral construct is immune to any spell or effect that would alter its form.

ACTIONS

Claw. Melee Weapon Attack: +5 to hit, reach 5 ft., one target. *Hit:* 6 (1d6 + 3) slashing damage

ASTRAL CONSTRUCTS

Astral constructs are brought into being by the metacreativity spell *astral construct*. They are formed from raw ectoplasm (a portion of the astral medium drawn into the Material Plane). The psionic power spent by the construct's creator during the casting of the spell determines the statistics of the astral construct. Thus, astral constructs can vary somewhat from each other, depending on the whims of their creators. An astral construct generally appears as an animate clump of ectoplasm with a vaguely humanoid shape, but the caster can mold or sculpt one according to his or her whim, with some limits.

Special Abilities: Every time an astral construct is created, the caster can choose to apply one special ability to the construct by spending additional psionic power. When the caster casts the *astral construct* spell, he chooses one or more special abilities from a menu of abilities appropriate to the amount of psionic power spent.

CREATING AN ASTRAL CONSTRUCT

When casting the *astral construct* spell at higher levels, the caster assembles the desired creature from a menu of choices, as specified in the construct's statistics block. Multiple selections of the same menu choice do not stack unless the ability specifically notes that stacking is allowed.

ASTRAL CONSTRUCT MENU A

A caster spending 3 extra psionic power when creating an astral construct can choose one trait from this menu.

Bull Rush: The astral construct has advantage on attacks against a creature if it moves 20 feet in a straight line towards it on the same turn.

Celerity: The astral construct's speed increases by 10 feet.

Cleave: When the astral construct attacks a creature, it can make one attack as a bonus action against another creature within 5 feet of the first and within the astral construct's range.

Fly: The astral construct has wings that grant it a 30 foot fly speed.

Sharp Claws: The astral construct deals an additional 2 slashing damage with its Claw.

Power Attack: When the astral construct attacks with its Claw, it can choose to take a -5 penalty to the attack roll. If the attack hits, it adds +10 to the attack's damage.

Resistance: Choose one of the following damage types: acid, cold, fire, lightning, or thunder. The astral construct gains resistance against the chosen damage type.

Shove: If the astral construct hits a creature with its Claw on one of its turns, it can attempt to shove the creature it hit as a bonus action.

Swim: The astral construct is streamlined and shark-like. It has a swim speed of 30 feet.

ASTRAL CONSTRUCT MENU B

A caster spending 4 extra psionic power when creating an astral construct can choose one trait from this menu. Alternatively, the construct can have two additional special abilities from Menu A.

Energy Touch: The astral construct's Claw attacks are wreathed in an energy type you choose (acid, cold, fire or lightning), dealing an extra 1d6 damage of the chosen type.

Extra Attack: The astral construct gains the following action: **Multiattack.** The astral construct makes two attacks with its claw.

Fast Healing: The astral construct regains 2 hit points at the start of its turn if it has at least 1 hit point.

Improved Critical: The astral construct scores a critical hit with weapon attacks on a roll of 19 or 20 on the d20.

Muscle: The astral construct's Strength score increases by 4.

Poison Touch: If the astral construct hits with its Claw, the target must succeed on a DC 14 Constitution saving throw or be poisoned until the end of the construct's next turn.

Smite: Once per day, the astral construct can make one attack that deals extra damage equal to its creator's level.

ASTRAL CONSTRUCT MENU C

A caster spending 5 extra psionic power when creating an astral construct can choose one trait from this menu. Alternatively, the construct can have two additional special abilities from Menu B. One or both of the Menu B choices made in this way can also be swapped; each time you do, make two additional choices from Menu A.

Barrage: The astral construct gains the following action: **Barrage.** The astral construct makes an attack with its claw against creatures of its choice within 5 feet of it, with a separate attack roll for each target.

Blindsight: The astral construct has blindsight to a range of 60 feet.

Constrict: The astral construct now grapples the target when it hits with its Claw (escape DC 16). While the target is grappled in this way, it is also restrained. The astral construct can only have one creature grappled at a time.

Dimension Slip: The astral construct can teleport instead of moving. It must be able to see its destination to teleport to it, and each foot that it teleports costs 1 foot of movement. If it teleports into an occupied space, it is shunted to the nearest unoccupied space and stunned until the end of its next turn.

Natural Invisibility: The astral construct is invisible. If it attacks or casts a spell, it becomes visible until the start of its next turn.

Rend: The astral construct deals an extra 2d6 slashing damage to a creature that it hits twice with its Claw during a single round.

PSYCHE SHARDS

A psyche shard is a fragment of a psionic character's personality, brought into physical form and a semblance of life. Because it is an extension of its creator's personality, a psyche shard is in some ways a part of its creator.

The *psicrystal*, a crystalline construct about the size of a human hand, is a particularly convenient form of a psyche shard. It contains the greatest amount of psionic power of all known shards, granting it special properties and allowing the psion to cast spells through it.

IMPRINTED PERSONALITY

Each psicrystal has a distinct personality, chosen by its creator at the time of its creation. It is not uncommon for a psicrystal to constantly ply its owner with observations and advice, often severely slanted towards the psicrystal's particular worldview. The creator almost always sees a bit of his or herself in a psicrystal, even if magnified and therefore distorted. A psicrystal's personality often takes on one of the archetypes detailed below.

PSICRYSTAL

Tiny construct, unaligned

Armor Class 12 (natural armor)

Hit Points 3 (1d4 + 1)

Speed 30 ft. fly (hover)

STR	DEX	CON	INT	WIS	CHA
3 (-4)	13 (+1)	12 (+1)	11 (+0)	13 (+1)	14 (+2)

Damage Immunities poison, psychic

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses passive Perception 11

Languages Speaks the languages of its creator

Challenge 1/8 (0 XP)

Evasion. When the psicrystal is subjected to an effect that allows it to make a Dexterity saving throw to take only half damage, it instead take no damage if it succeeds on the saving throw, and only half damage if it fails.

Psionic Conduit. When its creator casts a spell, the psicrystal can deliver the spell as if it had cast the spell. The psicrystal must be within 30 feet of its creator, and it must use its reaction to deliver the spell when its creator casts it. If the spell requires an attack roll or save DC, use its creator's attack modifier or save DC where necessary.

Immutable Form. The psicrystal is immune to any spell or effect that would alter its form.

ACTIONS

Optical Illusion. The psicrystal blends its color with its surroundings, becoming invisible until it takes any action.

ARTISTE

This splinter personality notes without humility that it is wonderfully talented in almost any “cultured” occupation, be it dancing, opera, or cooking. Equal parts truth and pretension make up this claim.

BULLY

Sometimes bad seeds are still good for something. The bully splinter personality's overbearing harangues and constant insistence on getting its way can be trying, but its influence is sometimes handy for the owner.

CARING

A shard that embodies our nurturing, altruistic side, the caring personality seeks to provide aid and to calm those around it. It finds that which others seek, grants it, and remains always a reliable friend.

COWARD

Buried deep in everyone is a healthy dose of self-preservation. When captured and magnified, the essence of cowardliness aids the owner in finding safe harbor in dangerous situations. However, this personality is far too eager to urge the owner to run and hide, even in not seriously dangerous situations.

FRIENDLY

This splinter personality is disposed to promote the well-being of others – even of reviled enemies. The owner puts up with lectures on his hard-hearted ways, but in return he is better able to deal with creatures in a nonviolent manner.

HEROIC

We all want to be heroes, and the splinter personality is that desire personified. Given to urging the owner into dangerous situations, it pays back its owner with fortitude in moments of difficulty.

LIAR

This personality just can't help telling falsehoods – although its owner knows all too well when it is prevaricating and when it is communicating truthfully. This inability to mislead its owner doesn't stop the liar from lying anyway – and its lying ways can serve its owner in good stead when he is forced to stretch the truth himself.

METICULOUS

A meticulous personality has a hard time discerning between important details and those that are irrelevant. In describing itself, it could say it is “punctilious in its attention to the rules of etiquette, and furthermore marked by extreme care in the treatment of details.” Sometimes maddening, this trait is at other times useful to the owner who attempts a precise study of his environment.

MYSTICAL

The mystical personality sees beyond the surface of a topic of discussion, preferring to find the intricate details behind its existence. It often speaks in riddles and proverbs. This personality often proves insightful when you are looking to understand the forces behind a thing's creation, but its insights can be little more than a distraction at other times.

NIMBLE

Quick and dexterous, a nimble personality is the perfect companion in any situation where reaction must follow on the heels of action. If anything, this splinter personality is a little too prone toward seeing potential danger in every shadow.

OBSERVANT

“Did you see that?” is the most common communication between an observant personality and its owner. Sometimes this personality enables its owner to note details they might have otherwise passed by.

POISED

The ability to be constantly aware of your body and how it interacts with your surroundings is something often lost in the welter of more important thoughts. Not so for this personality, which is perfectly poised and sure of itself – if not its owner. It often preaches the importance of equilibrium and readiness for action.

PRECISE

Precision is a quality often sought for when looking for productive people, and this personality has it in spades. It will often become lost in the minute details when processing information or pondering its thoughts, but this behavior can sometimes prove surprisingly useful when you need to get something done that requires a high degree of accuracy and attention to detail.

RESOLUTE

Resoluteness is a quality everyone wishes he or she had. It is firm in purpose and belief, and its advice and observations are characterized by fierce determination. Or, as its owner might say, it is a stubborn so-and-so. Still, this unshakable faith aids the owner in all contests of will.

SAGE

This splinter personality attempts to be a mentor to its owner, even though it is drawn from the owner's mind. Still, unfettered by any other personality type, the sage sees itself as the be-all, end-all master of all spiritual and philosophical topics (not to mention the area of knowledge in which it is especially skilled). Outside the scope of its particular area of expertise, the sage's advice is sometimes suspect.

STUDIOUS

A studious personality looks for the missing information between every nook and cranny, often missing the bigger picture. This personality loves to disassemble things into their baser components for closer examination, and will often point out ways that you can do just that.

SNEAKY

Why announce your presence with loud footfalls when you could just as easily glide in with less noise than a breath of air? Or so asks the sneaky personality, who believes wholeheartedly in the adage that silence is golden. It is given to hushing its owner – and its owner's companions. Still, its expertise in the area of quiet locomotion can't be denied.

SYMPATHETIC

This personality sees into the hearts of other living things by putting itself in their shoes. Unfortunately, it also spends a lot of time analyzing its owner and companions, commenting on their mental states, and making pronouncements about the fitness of their actions. This personality can be useful, though, when the owner wants to determine the motives of a potential enemy.

CHANGELOG

This section contains a record of changes made over time to this document. I sadly did not record changes I've made prior to V3.000, but older PDFs are available upon request.

VERSION 3.000

- Psionics now plugs into spellcasting in a fashion very similar to the Innate Spellcasting (Psionics) trait that monsters possess.
- All of the clones of spells that simply existed for filling in a balanced selection of psionics have been removed and replaced with their official spell counterparts.
- The spell descriptions have been grouped by level before being listed in alphabetical order.
- You can now focus on talents, which adds requirements to them (usually involving concentration) and grants them additional effects, as well as allowing you to spend psionic power to augment a talent you've focused on.
- The psionic power pool has been vastly reduced for ease of use.
- The mental fatigue system has been replaced with the innate spell system, which requires vastly less bookkeeping.
- The mental disciplines have been organized by alphabetical order.
- Psions now get telepathic speech at 1st level instead of 2nd level.
- Psicrystals have been slightly simplified.
- The Energy Weapon and Skate features have been modified to be more useful.
- Wording on many features and spells has been given another pass for clarity.
- Multiclassing rules for psionic characters have been updated.
- The precise psicrystal was missing its personality flavor text, which has been added.

VERSION 3.010

- Changed the psicrystal feature into the psyche shard, allowing you to do a few things: it can be emblazoned onto your body, and if you choose a psicrystal, you can attach it to a piece of gear instead of having it float freely. Reduced the distance that you can cast spells through the psicrystal as well.

VERSION 3.020

- Added 4 missing psionic power points at level 9 in the psion class.
- Updated Animate Weapon to work as it's intended with the new Talent focus system.
- Changed the cap for point expenditure to a maximum of 5 points when you focus on a talent.
- Properly alphabetized the discipline spell lists.
- Bug causing portions of spell lists to disappear from print fixed.
- Deleted Giant Form and added its benefits to upcasted Ogre Form.

VERSION 3.021

- Fixed the Ardent's formatting in the table of contents.
- Changed Psychic Hammer's focus to inflict the "incapacitated" condition rather than "stunned".

VERSION 3.030

- All headers have received a formatting update.
- Cleaned up some excessive text.
- Updated Telekinetic Mind to synergize with Mage Hand instead of clashing with it.

VERSION 3.040

- More minor formatting updates.
- Added Sickening Radiance and Symbol to the psion spell list.
- Replaced Radiant Beam with Sunbeam and added Wall of Light, Crown of Stars, and Divine Word to the Clairsentience spell list.
- Added Demiplane to the Nomad spell list.
- Added Maelstrom, Move Earth, and Prismatic Spray to the Shaper spell list.
- Added Crown of Madness and Power Word Pain to the Telepath spell list.
- Control Person spell changed to Control Body.

A Breed of Psychics Reborn

Psychic power has always been something that fascinates the imagination. The art of psionics is something that was largely lost to 5th edition fans, and attempts to revitalize it have been made in the form of the Mystic as well as certain spells and spell-like abilities. Although fun, I believe these implementations lacked both the identity and the impact that psionics previously had on the game. This supplement brings the Psion of old and the Mystic of new together, revisiting complex, but fun mechanics and imagining them in snappy, impactful ways. I hope you love playing it as much as I loved writing it.
