

Handout 2 – Cube Puzzle Answer Sheet

TABLE NUMBER:

TEAM NAME:

At the edge of the crater lake stands a stone altar. Its surface is flat, except for a perfectly square indentation in the center. The indentation is about twice the size of the small cubes that you have discovered.

Weathered carvings along the base of the altar spell out a message in Ancient Omuan, which translates as follows:

The trickster gods of Omu are vain and prideful. They are never happier than when they can gaze into their own eyes, forsaking all others. Only a holy object can distract them long enough for a seeker to learn their greatest secret.

First you must build the holy object in accordance with the wishes of the gods. Then you must learn its command phrase.

Instructions: You have been provided EIGHT (8) sheets of paper, each of which contains a representation of one of the cubes discovered in the ancient temples. You have also been provided with a roll of “sovereign glue” (tape) and some implements of destruction (scissors).

Using these smaller cubes, you must assemble the holy object and then decipher the command phrase inscribed upon it. The command phrase is multiple words with a total of 16 letters.

When you think you know the answer, write it (legibly!) in the space below. Your team captain **MUST** bring this sheet and your fully-assembled artifact to HQ (your DM will NOT take them).

IMPORTANT NOTE: The letters printed on the smaller cubes have been underlined strictly for your convenience in solving (so there is no confusion about whether an ‘M’ is a ‘W’ or vice versa). The underlines (and therefore the letters) do not all end up in the same orientation!

THE COMMAND PHRASE IS:
