

OPTIONAL RULE: SIMPLIFIED ENCUMBRANCE

SIMPLIFIED CARRYING CAPACITY

Your carrying capacity is equivalent to your Strength ability score. If you are carrying more weight than your carrying capacity you are **encumbered**. If you are carrying more weight than twice your carrying capacity you are **heavily encumbered**.

SIZE & SIMPLIFIED CARRYING CAPACITY

Tiny creatures halve their Strength ability score to determine their carrying capacity. Large creatures double their Strength ability score to determine their carrying capacity. The DM may rule that sizes below tiny have further reduced carrying capacities and sizes above large have further increased carrying capacities.

ENCUMBERED AND HEAVILY

ENCUMBERED

While you are encumbered your movement speed is halved and you have disadvantage on all ability checks, attack rolls, and saving throws that use Strength or Dexterity. While you are heavily encumbered your movement speed is further reduced to 0 and you fail all ability checks, attack rolls, and saving throws that use Strength or Dexterity.
