# Why Classic Monster Conversions?

As one of the authors involved in the Classic Modules Today series of Dungeons & Dragons 5th edition conversions of older edition modules, I've spent a lot of time converting monsters that made their debut, or only appearance, in those modules.

I thought it would be great to have a compilation of these monsters. That way DMs everywhere would have a chance to integrate them into their games without having to do the legwork of conversion. The conversions can be used as presented, or you can make changes to them as you see fit.

## What's in this product?

Since these are monsters that appeared in published adventure modules, supplements, and rulebooks, I can't provide all the original monster background information verbatim. What is included is:

- A brief description of the monster.
- Where the monster is likely to be encountered (underground, forest, desert, etc.).
- The publication the monster originally appeared in.
- The conversion stat block.

For more information, you can look up the monster on any number of online wiki websites or consult the original source.

As with my other "monster" product, [Classed NPC Quick Build Guide](#), if you want to modify any of the monsters here you should be familiar with the rules for creating and modifying monsters (**DMG pg. 273-283**).

The monsters are presented alphabetically by type:

- Aberration
- Beast
- Construct
- Elemental
- Fey
- Fiend
- Giant
- Humanoid
- Monstrosity
- Plant
- Undead

# Aberrations

## Deepspawn

The deepspawn is a roughly spherical creature with 6 tentacles, 3 of which end in fanged jaws. They have the unusual ability to create a copy, a spawn, of any creature they've eaten. They always have a force of spawn present to protect them.

Deepspawn are encountered underground. They first appeared in the supplement **Dwarves Deep**.

### Deepspawn

*Huge aberration, chaotic evil*

**Armor Class** 14 (natural armor)

**Hit Points** 157 (15d12 + 60)

**Speed** 15 ft., swim 15 ft.

STR	DEX	CON	INT	WIS	CHA
22 (+6)	9 (-1)	18 (+4)	17 (+3)	15 (+2)	12 (+1)

**Skills** Perception +6

**Damage Immunities** poison

**Condition Immunities** poisoned, prone

**Senses** tremorsense 30 ft., darkvision 120ft., passive Perception 16

**Languages** Telepathy 120ft. (only with its spawn), understands Common but can't speak

**Challenge** 9 (5000 XP)

**Create Spawn.** The deepspawn can create a spawn, a perfect copy, of any Large or smaller living creature it has consumed. A spawn generally takes 1d4 days to create, and emerges fully grown and functional. Spawn have exactly the same stats as the original creature, except they are unbreakably loyal to the deepspawn that created them, and so are immune to the charmed condition. Most deepspawn will have a force of spawn to protect them.

**Magic Resistance.** The deepspawn has advantage on saving throws against spells and other magical effects.

**Heal (1/day).** The deepspawn can spend an action to heal itself for 70 hit points. This also removes the blindness and deafness conditions, and cures all diseases.

### Actions

**Multiattack.** The deepspawn makes six tentacle attacks; three bites and three constricts.

**Bite.** *Melee Weapon Attack:* +10 to hit, reach 20 ft., one target. *Hit:* 13 (2d6 + 6) piercing damage.

**Constrict.** *Melee Weapon Attack:* +10 to hit, reach 20 ft., one target. *Hit:* 13 (2d6 + 6) bludgeoning damage and target is grappled (escape DC 16). A grappled target takes the listed damage automatically on the deepspawn's turn.

## Dharculus

Dharculus are ethereal plane predators that originated in the Far Realm. They prowl the border ethereal, using their ability to see into the prime material plane to locate prey. They can extend tentacle maws into the prime to grab prey and drag it back to the ethereal plane to consume.

Dharculus can be encountered anywhere. They first appeared in the module **The Gates of Firestorm Peak**.

### Dharculus

*Huge aberration, unaligned*

**Armor Class** 15 (natural armor)

**Hit Points** 126 (12d12 + 48)

**Skills** Perception +4

**Senses** truesight 60 ft., passive Perception 14

**Languages** -

**Challenge** 7 (2900 XP)

**Ethereal Fishing.** As a bonus action, the dharculus can extend its tentacle maws to the prime material plane or retract them back to the ethereal plane. If it attempts to pull a target back with them, the target gets a DC 14 Wisdom saving throw. On a success the maws vanish without taking the target, on a failure the target is pulled into the ethereal plane with them.

#### Actions

**Multiattack.** The dharculus makes six tentacle maw attacks when its target is on the prime material plane. If the target is on the ethereal plane, it gains an additional attack with its main maw.

**Tentacle Maw.** *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 7 (1d6 + 4) piercing damage and target is grappled (escape DC 12). If the escape is successful, target takes 1d6 piercing damage for each maw pulled off. If 3 maws are attached to the same target, the dharculus may pull the target into the ethereal using **Ethereal Fishing**.

**Main Maw.** *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 15 (2d10 + 4) piercing damage.

## Gingwatzim

Gingwatzim are incorporeal beings from the Ethereal Plane. There are six known types, which normally appear as colored spheres of light, and range in intelligence from animal to highly intelligent sentient. They can also be bound into the form of an object to create magical items. When encountered on the prime material plane, it is usually because they have been summoned by a powerful spell caster.

They are typically encountered on the Ethereal Plane, or where summoned by a spell caster. They first appeared in

module **C3 The Lost Island of Castanamir**.

## Greater Gibbering Moulder

Greater gibbering moulthers are simply a larger versions of the normal ones, and can be encountered in the same places those are.

They first appeared in the module **The Gates of Firestorm Peak**.

### Greater Gibbering Moulder

*Large aberration, neutral*

**Armor Class** 9

**Hit Points** 136 (16d10 + 48)

**Speed** 10 ft., swim 10 ft.

STR	DEX	CON	INT	WIS	CHA
16 (+3)	8 (-1)	16 (+3)	3 (-4)	10 (+0)	6 (-2)

**Condition Immunities** prone

**Senses** darkvision 60ft., passive Perception 10

**Languages** -

**Challenge** 5 (1800 XP)

**Aberrant Ground.** The ground in a 10-foot radius around the moulder is dough-like difficult terrain. Each creature that starts its turn in that area must succeed on a DC 10 Strength saving throw or have its speed reduced to 0 until the start of its next turn.

**Gibbering.** The moulder babbles incoherently while it can see any creature and isn't incapacitated. Each creature that starts its turn within 20 feet of the moulder and can hear the gibbering must succeed on a DC 10 Wisdom saving throw. On a failure, the creature can't take reactions until the start of its next turn and rolls a d8 to determine what it does during its turn. On a 1 to 4, the creature does nothing. On a 5 or 6, the creature takes no action or bonus action and uses all its movement to move in a randomly determined direction. On a 7 or 8, the creature makes a melee attack against a randomly determined creature within its reach or does nothing if it can't make such an attack.

### Actions

**Multiattack.** The greater gibbering moulder makes one bite attack and Blinding Spittle (if available).

**Bite.** *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 31 (8d6 + 3) piercing damage. If the target is Large or smaller, it must succeed on a DC 13 Strength saving throw or be knocked prone. If the target is killed by this damage, it is absorbed into the moulder.

**Blinding Spittle (Recharge 5-6).** The moulder spits a glob at a point it can see within 15 feet, creating a flash of blinding light. All creatures within 5 feet of the flash must succeed on a DC 14 Dexterity saving throw or be blinded until the end of the moulder's next turn.

## Living Wall

The living wall is an amalgamation of creatures that have fused together. Creatures killed by the wall are absorbed into, and strengthen, the wall. Any spell casters absorbed by the wall grant those spell abilities as well. The wall below has absorbed gibberlings, duergar, trolls, and a 5th level wizard.

A living wall is usually encountered in dark, tainted places, almost always underground. It first appeared in the **Book of Crypts**.

### Living Wall

*Huge aberration, lawful evil*

**Armor Class** 12 (natural armor)

**Hit Points** 207 (18d12 + 90)

**Speed** 0 ft.

STR	DEX	CON	INT	WIS	CHA
18 (+4)	1 (-5)	20 (+5)	17 (+3)	14 (+2)	1 (-5)

**Condition Immunities** charmed, frightened, grappled, prone, restrained

**Senses** darkvision 120ft., passive Perception 12

**Languages** Common, Dwarvish, Giant, Undercommon

**Challenge** 8 (3900 XP)

**Regeneration.** The living wall regains 10 hit points at the start of its turn. If the living wall takes acid or fire damage, this trait doesn't function at the start of its next turn. The living wall dies only if it starts its turn with 0 hit points and doesn't regenerate.

**Spellcasting.** The living wall is a 5th level wizard. Its spellcasting ability is Intelligence (spell save DC 14, +6 to hit with spell attacks). It has the following wizard spells prepared.

Cantrips (at will): *fire bolt, light, mage hand, ray of frost*

1st level (4 slots): *burning hands, charm person, magic missile*

2nd level (3 slots): *cloud of daggers, flaming sphere, web*

3rd level (3 slots): *lightning bolt, slow*

### Actions

**Multiattack.** The living wall is 25 feet long. Each 5 foot section of wall can make four melee attacks: two with gibberling arms, one with a duergar arm, and one with a troll arm. Each section of wall has a 5 foot reach, so if a single creature approaches the wall 3 wall sections can attack (12 attacks).

**Gibberling arm with club.** *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 6 (1d4 + 4) bludgeoning damage.

**Duergar arm with battle axe.** *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 8 (1d8 + 4) slashing damage.

**Troll arm.** *Melee Weapon Attack:* +7 to hit, reach 5 ft., one target. *Hit:* 11 (2d6 + 4) slashing damage.

## Neh-thalggu

Neh-thalggu, or brain collectors, are creatures of the Far Realm that make their way to the prime material plane. They collect the brains of humanoids, which they store in their bodies to enhance their spell casting ability.

Neh-thalggu can be encountered anywhere. They first appeared (as brain collectors) in module **X2 Castle Amber**.

### Neh-thalggu

**Senses** darkvision 60ft., passive Perception 11

**Languages** Common, Dwarvish, Giant, Undercommon

**Challenge** 6 (2300 XP)

**Innate Spellcasting.** The neh-thalggu gains one cantrip and wizard spell slot of levels 1-3 for each brain it has stored. This particular one has 7 stored brains. Its spellcasting ability is Intelligence (spell save DC 15, +7 to hit with spell attacks). It has chosen the following slots and spells.

Cantrips (at will): *acid splash, blade ward, fire bolt, mage hand, ray of frost, shocking grasp, true strike*

Level 2 (7 slots): *Melf's acid arrow*

**Magic Resistance.** The neh-thalggu has advantage on saving throws against spells and other magical effects.

### Actions

**Bite.** *Melee Weapon Attack:* +7 to hit, reach 10 ft., one target. *Hit:* 15 (2d10 + 4) piercing damage plus 9 (2d8) acid damage.

## Vampire Mist

The vampire mist is a pale cloud that appears to be a patch of fog, but is really a predator that drains life from its prey.

The vampire mist can be encountered anywhere. It first appeared in module **I7 Baltron's Beacon**.

### Vampire Mist

**Condition Immunities** charmed, exhaustion, grappled, paralyzed, petrified, poisoned, prone, restrained, stunned

**Senses** darkvision 60 ft., passive Perception 10

**Languages** -

**Challenge** 3 (700 XP)

**Damage Transfer.** When the vampire mist has a target enveloped, any attacks against the mist that hit inflict half the damage to the mist, and half the damage to the enveloped target.

**Vaporous Form.** The vampire mist can pass through and occupy spaces occupied by other creatures.

### Actions

**Envelop.** *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 13 (2d8 + 4) necrotic damage, target is restrained, and vampire mist gains hit points equal to the damage inflicted, to a hit point maximum of 60. While the target is restrained, the mist automatically inflicts damage on its turn. The target can end the restrained condition and escape the mist by succeeding on a DC 14 Strength or Dexterity save.

## Xag-ya and Xeg-yi

Xag-ya and xeg-yi are spherical, tentacled creatures from another plane. The xag-ya appears as a silver sphere with golden eyespots, while the xeg-yi appears as a black sphere with metallic gray eyespots. They are usually summoned as guardians to protect valuables.

They can be encountered anywhere guarding treasure. They first appeared in module **S4 The Lost Caverns of Tsojcanth**.

### Xag-ya

**Opposing Forces.** If a xag-ya is ever in the presence of a xeg-yi, the two will rush together and destroy each other in an explosion. This explosion affects all creatures within 30 feet. Each creature must make a DC 14 Dexterity saving throw, taking 24 (7d6) radiant damage and 24 (7d6) necrotic damage on a failed save, or half as much on a successful save.

### Actions

# Beasts

## Aspis

Aspis are reclusive, insectoid creatures that rarely interact with other creatures except to prey upon them. Aspis have a hive structure very similar to ants, and often form a symbiotic relationship with giant ants.

Aspis drones can be encountered anywhere except the hottest and coldest climates, but the larvae and cow are always encountered in the underground nest. They first appeared in module **A1 Slave Pits of the Undercity**.

Soldiers guard the nest and are always aggressive. The queen lairs in the deepest part of the nest, surrounded by workers and soldiers.

Giant ants are encountered in any temperate or tropical area. They first appeared in the **D&D Basic Rulebook**.

Large or smaller creatures must succeed at a DC 20 Strength

saving throw or be carried in the whirlwind. While being carried, targets are restrained. Targets may make a DC 20 Strength saving throw at the end of their turn to exit the whirlwind. The djinni vizier can eject any carried creature or object at its leisure.

If touching the ground, the whirlwind throws up a debris cloud of diameter equal to half the whirlwind's height. Anyone caught in the debris cloud is lightly obscured.

- Lolth summons 4 giant spiders to serve her. They remain for 1 hour, until killed, or until she uses this action again.
- Lolth calls a swarm of spiders to fill a 20 foot radius area she can see. Any creature that is in the area when it appears, or ends its turn there, takes 10 (3d6) poison damage. The swarm remains until Lolth dismisses it, uses this action again, or dies.

**Bite.** *Melee Weapon Attack:* +5 to hit, reach 5 ft., one target. *Hit:* 6 (1d6 + 3) piercing damage and transfers gibberslug to target. Target must make a DC 13 Dexterity saving throw. On a success the gibberslug is brushed off, but on a failure the gibberslug begins to burrow into the target. The target may take its next action to burn or cut out the slug; doing so inflicts 1d8 damage on the target, but kills the gibberslug.

If the target ignores the slug it burrows to the target's brain over the course of 10 rounds, inflicting 1 piercing damage per round. When it reaches the brain, the target becomes unconscious until it receives a *lesser restoration*, *restoration*, or *heal* spell, or 20 hours passes. After 20 hours, the target is transformed into a gibberling and is unrecoverable short of a *wish*.

On a success, they may move normally, treating the sinkhole as difficult ground. On a failure, they become restrained.

### Actions

Whenever the hydra takes 25 or more damage in a single turn, one of its heads dies. If all of its heads die, the pyrohydra dies. At the end of its turn, it grows one head for each head that died since its last turn, unless it has taken acid damage since its last turn. The hydra regains 15 hit points for each head regrown.

## Giant Sundew

The giant sundew is a carnivorous plant that appears to be a 4 foot diameter pile of greenish, tar-covered rags or ropes. The area around the giant sundew will smell sickly sweet. It lashes out with tendrils to immobilize prey and slowly dissolve it with sticky, acidic secretions.

**Tendrils.** *Melee Weapon Attack:* +4 to hit, reach 10 ft., one target. *Hit:* 4 (1d4 + 2) bludgeoning damage plus 3 (1d6) acid damage and target is restrained. As an action, a restrained target can make a DC 12 Strength or Dexterity check to break loose from a tendril. The target can also use an action to pour alcohol or vinegar on the tendril, which automatically removes it. A restrained target takes 3 (1d6) acid damage for each attached tendril at the beginning of its turn. One creature can have a maximum of 6 tendrils attached at one time.

**Rotting Hooves. Melee Weapon Attack:** +6 to hit, reach 5 ft., one target. **Hit:** (2d6 + 4) bludgeoning damage plus 10 (3d6) necrotic damage. If the target is a creature, it must succeed on a DC 12 Constitution saving throw or be cursed with mummy rot. The cursed target can't regain hit points, and its hit point maximum decreases by 10 (3d6) for every 24 hours that elapse. If the curse reduces the target's hit point maximum to 0, the target dies, and its body turns to dust. The curse lasts until removed by the remove curse spell or other magic

**Dreadful Glare.** The centaur mummy targets one creature it can see within 60 ft. of it. If the target can see the mummy, it must succeed on a DC 11 Wisdom saving throw against this magic or become frightened until the end of the centaur mummy's next turn. If the target fails the saving throw by 5 or more, it is also paralyzed for the same duration. A target that succeeds on the saving throw is immune to the Dreadful Glare of all mummies (but not mummy lords) for the next 24

hours.

**Bound to the Circlet.** The skeleton warrior is bound to a control circlet. Anyone donning the circlet can attempt to control the warrior as an action. It must make a DC 15 Wisdom save to resist control, and may not use its Legendary Resistance to succeed. It remains controlled until the wearer moves more than 250 feet away from it, or takes off the circlet. If uncontrolled, it attempts to slay anyone holding the circlet. If it gains the circlet, it and the circlet turn to dust. It can always sense the location of its circlet regardless of distance.

**Legendary Resistance (1/day).** If the skeleton warrior fails a saving throw, it can choose to succeed instead.

**Magic Resistance.** The skeleton warrior has advantage on saving throws against spells and other magical effects.

**Turn Immunity.** The skeleton warrior is immune to effects that turn undead.

### Actions

**Greatsword.** *Melee Weapon Attack:* +10 to hit, reach 5 ft., one target. *Hit:* 13 (2d6 + 6) slashing damage. The skeleton warrior gains +2 to attack and damage rolls (already factored in).

**Frightful Presence.** As an action, the skeleton warrior can force all creatures it chooses within 60 feet to make a DC 14 Wisdom save. Creatures that fail the save are frightened for 1 minute. Creatures that succeed are immune to that skeleton warrior's Frightful Presence for 24 hours.
