HAS RECEIVED STORY AWARDS FROM:
(cross out those not received)

EAST2~1 ENDS AND MEANS

EAST16 The Haft Exposed

You have exposed the Haft, a secret group bent on reclaiming the city of Underhome and eradicating the drow who dwell beneath the East Rift, no matter the cost. By taking down at least one small part of their operation, you have drawn the organization's ire. They will no doubt keep a close eye on your future dealings, and who knows what allies they might have in high places in Eartheart?

However, you now know of the conspiracy's existence and will be able to keep watch for signs of their activities. The final confrontation between you and the leadership of the Haft may still be some ways off, but you can't help but feel that you have not seen the last of these "dwarven patriots."

If you are a drow, the Haft has marked you for special vengeance, and you will be a primary target in any future combat encounters with their agents.

This story award marks the beginning of a Major Quest that will be continued in future East Rift regional adventures dealing with the Haft and their machinations.

EAST17 Xylarian Infection

You were infected by the spores of a strange Underdark lichen known as Xylaria. As far as anyone can tell, you were cured before the infestation could spread. However, very little is known about this rare lichen, or its long-term effects on those who are exposed to it. Should you suffer any future exposure to Xylaria, the consequences could be both unpredictable and unpleasant.
