

GHOSTS OF SALTMARSH

# SALVAGE OPERATION

DM's Resources for Ghosts of Saltmarsh  
Chapter 4: Salvage Operation

# INTRODUCTION

*Salvage Operation* is the third adventure of seven in the *Ghosts of Saltmarsh* campaign book. It has the party seeking out a derelict ship lost at sea to retrieve a vast treasure, pitting them against fearsome arachnids, foul demons, decayed undead, an evil cultist – and finally has them racing for their lives to escape the clutches of a malevolent elder octopus!

*Salvage Operation* is a classic one-shot adventure that can be inserted into any campaign and run over the course of a single session. The focus is definitely on the combat encounters and the exciting escape at the end, which is handled really well.

In this document, we seek to make running *Salvage Operation* fun and manageable for you and your players, as well as giving you advice on how to fit *Salvage Operation* into a campaign and how to make sure the adventure also has a story to go along with the action. This document includes:

- **A guide to making *Salvage Operation* part of a *Ghosts of Saltmarsh*-campaign.**
- **3 new nautical magic items** that make sure your party will want to go salvage a ship!
- **Advice on changing the adventure's story** and making a proper villain out of Krell Grohlg.
- **DM's Notes** for quick and easy reference at the table.
- **Monster Stat Blocks** for every foe in the adventure, arranged for swift and easy use.

## RUNNING SO

In this section, you'll find advice on how to run *Salvage Operation*. We strongly recommend that you read Chapter 4 of *Ghosts of Saltmarsh* before reading these suggestions. As always, use only what makes sense to you – you know best, what works at your table.

## PART OF A CAMPAIGN

*Salvage Operation* comes fully equipped with a long background and adventure hook. It's a simple tale of a merchant prince who's lost a cache of valuable deeds and promissory notes on a ship that disappeared in a storm. The ship was since infested by dark cultists and has now been found adrift on the ocean, prompting the merchant prince to sponsor an operation to secure the ship's important cargo.

There's nothing wrong with neither the background or the hook given here, especially not if you're running salvage operation as a stand-alone adventure. But, if you're running *Salvage Operation* and the other *Ghosts of Saltmarsh*-adventures as larger campaign, there's some easy changes you can make to fit it into your campaign.

[On our blog](#), we have written a bit about making *Ghosts of Saltmarsh* into a single, sea-based campaign, but even if you don't follow the outline described there, you might want to tie *Salvage Operation* to the other early adventures in the book. Luckily, it's quite easy to tie *Salvage Operation* together with *The Sinister Secret of Saltmarsh* and *Danger at Dunwater*, simply by changing the contents of the Emperor's hold.

## A DANGEROUS CARGO

The smuggling uncovered by the party in *The Sinister Secret of Saltmarsh* wasn't the lizardfolk tribe's only effort to arm themselves against the sahuagin. They've also had magical items particularly effective against the sahuagin commissioned – but, unfortunately, the ship carrying the items, *Emperor of the Waves*, was lost in a storm several weeks ago. Recently, however, merfolk allies spotted the badly battered ship floundering in the waves, but a foul presence in the water surrounding the ship has deterred them from coming too close. Eager to retrieve the valuable items, the lizardfolk asks the town of Saltmarsh – and, thus, the characters – for aid in the salvage operation. In return, the lizardfolk offer to share the items with the characters.

If you use this hook, the strongbox in area 12 doesn't contain valuable documents, but instead holds 20 *thickblood potions*, 10 *sharkfin harpoons* and *Bane of Sekolah* (see 'Weapons Against the Sahuagin' on the following page). The lizardfolk agree to split the items with Saltmarsh, although they prefer to keep the *Bane of Sekolah* for themselves. A persuasive character might convince the lizardfolk to let them wield it before venturing into the sahuagin stronghold in *The Final Enemy* – perhaps even dueling a champion of the lizardfolk (**lizardfolk scaleshield**) for the right to do so.

## FORESHADOWING

If you are combining *Ghosts of Saltmarsh* into a single campaign, you'll likely have a more impressive foe than just sahuagin waiting at the end. As an extra touch, you can foreshadow this greater evil by changing a few minor things in this adventure.

**The Elder Octopus.** The first step is to re flavor the elder octopus to better fit your main villain. If it's Umberlee or another sea-based deity, it can remain as it is – a harbinger of destruction sent from the depths. If it's a deity like Tharizdun, consider describing it with pulsating veins of purple and green, and a pinkish light shining from its eyes, marks of the Elder Elemental Eye's aberrant energy. If your campaign's big bad evil is a deity like the Demon Prince of Undeath, Orcus, the elder octopus might be undead, pale and rotting, carrying the stink of decay as it attacks the ship.

**Lolth's Outcast.** You can also change the conflict that drives Krell Grohlg to seek refuge on the ship. Instead of an unexplained civil war, you can have Krell be the former shaman of a goblinoid tribe on the island, who had to flee because his tribesmen had begun worshiping a new deity in the wake of a visit by foreign cultists – which, of course, are followers of your campaign's greater evil.

**Captain's Log.** You can have the captain's log (area 2) reflect any of the above changes you introduce, as well as anything else you'd like, such as sightings of undead beings, a description of the magical maelstrom that caused the ship's destruction (perhaps caused by the Pit of Hatred found in *Tammerauts Fate*) and so on.

## Weapons Against the Sahuagin

It's up to you to decide where the magic items aboard *Emperor of the Waves* come from. It might be as simple as a merchant supplier in any coastal city, but it could also be a contribution from a tribe of sea elves, who are too far away to participate in the defense, yet still eager to give aid against their mortal foes.

If you're placing the adventure and the campaign in the Forgotten Realms, they could also be commissioned from the coastal druids of the Moonshae Isles, or even stolen wares sent by a pirate lord from Luskan.

### Bane of Sekolah

*Weapon (trident), rare (requires attunement)*

Forged by the sea elves, the Bane of Sekolah is a silver trident engraved with the deity Deep Sashelas' dolphin symbol, and enchanted against the elves' greatest foe: the sahuagin.

You gain a +1 bonus to attack and damage rolls made with this magic weapon.

**Shark's Bane.** When you hit a creature that has the Blood Frenzy feature with this trident, it must make a DC 13 Intelligence saving throw. On a failure, the creature is consumed by lust for its own blood, and is incapacitated until the end of its next turn.

**Dolphin's Charge.** When you move at least 15 feet straight toward a target on your turn, it takes an extra 1d8 piercing damage the next time you hit it with this trident before the end of your turn.

### Sharkfin Harpoon

*Weapon (javelin), uncommon*

This coral-studded harpoon is designed specifically for hunting sharks.

When you hit a creature with this magic weapon, the harpoon remains embedded in the creature (if the attack was a melee attack, you can choose to immediately pull the harpoon free instead of leaving it embedded in the creature). Until removed, the creature's move speed is reduced by 10 (this can't reduce the creature's move speed to less than 10) and it doesn't gain the benefit of the Blood Frenzy feature, if it has it. A creature can use an action and a DC 13 Strength (Athletics) check to shake or pull the harpoon free.

### Thickblood Potion

*Wondrous item, common*

This small, red potion is a favorite among sea elves and pearl divers, who use it to avoid minor cuts from attracting sharks and other underwater predators.

When you drink this potion, your blood thickens and becomes odorless for 1 hour. During this time, you are considered to have all your hit points when determining whether a creature with the Blood Frenzy feature has advantage on attacks against you.

## STORY AND BACKGROUND

The adventure comes outfitted with a rather long background, but much of the story is known only to the dead sailors and **Krell Grohlg**. Speaking of Krell, there's little chance the party will ever find out how what his part is. This is unfortunate, because the adventure – a bunch of spiders on a ship being attacked by an elder octopus – could use a good explanation to make sense and feel less contrived.

### CHANGING THE STORY

As mentioned earlier, you can change Krell's story and have him be a refuge from the island, cast out because his tribe took up worship of another deity, or because even his fellow goblinoids tired of his maniacal devotion to the Spider Queen.

In this story, Krell comes to the ship as a savior. The *Emperor's* captain and his crew are stuck between a rock and a hard place: the ship's stores are empty, but the island's inhabitants are far from welcoming. To make matters even worse, the sailors have spotted a large shadow in the water not far out from the coast; some sort of sea-monster waiting for them to pull anchor and sail into deeper waters.

Enter Krell. Dirty and bestial, covered in religious regalia, and with spiders crawling all over, he offers peace and salvation to the desperate seamen. Take him aboard, and he'll not only provide food and water, he'll also defend the ship from any sea monsters. Left without a choice, the captain accepts and, thus, seals the ship's fate.

At first, Krell keeps his promise. The **Elder Octopus** attacks, killing many and damaging the ship, but the half-orc calms it with his druidic magic. Soon, however, the injured and weakened seamen find themselves at Krell's mercy, depending on his healing and the provisions he doles out. Day by day, they are corrupted in both body and mind by the Spider Queen's insidious poison, and are soon turned into demons or left as food for Krell and his monstrous minions.

This both makes Krell a more devious and interesting villain, and also better explains why the elder octopus suddenly stopped attacking the *Emperor* – and, possibly, why it decides to attack again (see 'Speaking With Krell' below).

### GETTING THE STORY TO THE PLAYERS

Changing the story doesn't mean much, if we don't make sure the players have an opportunity to learn it.

**Captain's Log.** The captain's log allows you to relay the story from the captain's perspective, foreshadowing the dangers awaiting the party and explaining how spiders came to infest the ship. To make sure it is found, allow the party to find the log either in the debris in area 2 or on the table in area 3 – whichever place they look first. Or, if they miss it there, have them find it in area 10 after dealing with Krell.

**Speaking With Krell.** Although the adventure has Krell attacking the characters immediately, some maniacal boasting never hurts. Have the half-orc proclaim proudly that "the Emperor belongs to the Queen now!" and demand that the characters "give yourself to the Spider Queen as the sailors already have, and you shall live eternally as her servants". This gives the party a chance to speak with Krell and hear his remorseless account of how he made everyone aboard "servants to the Queen, willing or not". Additionally, this also allows you to explain the elder octopus' sudden appearance, as Krell either dies with a grin ("You fools... It was only the Queen's will that kept it away... Listen... It's coming now – can't you hear it?") or shouts maniacally at the party, after they've found the treasure in the hold ("You think yourself clever, ha'? I've called it now, haha. It comes now, to crush, to kill, to bring us all to the Queen's embrace!").

# DM's NOTES

## BACKGROUND

- Years ago, greedy Merchant Prince Aubreck Drallion converted most assets to deeds and promissory notes, and send wealth with ship to invest in southern jungle trades.
- *Emperor of the Waves* disappeared during storm. Was nearly sunk, and came ashore on uncharted island to find food and water. Savage creatures on island killed crew.

- Some days before characters arrive, hungry elder octopus attacked ship, destroying much and killing most on it.
- Half-orc druid Krell Grohlg and his arachnid monsters are only living creatures aboard.
- Fifteen days ago, Aubreck heard *Emperor of the Waves* was seen adrift and hires party to fetch his valuables, offering advance of 200gp and a promise of 10,000gp if they return a box of shiny blue metal packed inside a wooden crate with the letter A from the ship's hold.
