INTRODUCTION

Armor and shield, blade and bow, stealth and cunning, tactics and command—all of these are the tools of a warrior. One warrior might favor some of these assets over others, depending on training and inclination. All legendary warriors develop martial power to such an extent that their abilities are the equal of magical abilities. Such warriors are always looking for an edge or a technique that exemplifies their manner of fighting.

That's what you'll find in this book.

It's a manual of mighty deeds and wily tricks. In its pages are new ways to build a martial character, along with new options to fill out your role as a fighter, a ranger, a rogue, or a warlord. Members of nonmartial classes might find an appropriate multiclass feat in these pages, but everything else is for martial characters. It is intended to expand your martial horizons in the game.

USING THIS BOOK

As you can see by the table of contents, *Martial Power* is organized by class. Whether you have a character of a certain class or you want to make a character of that class, all you have to do is consult the proper chapter for new builds, class features, powers, and paragon paths. The final chapter of the book contains nearly two hundred new feats to hone your

martial talents and ten new epic destinies for martial characters.

Use the *Martial Power*[™] supplement to start playing a new character with a new build, to pick powers that better define your existing character, or to evolve your character with specific feats, such as those that have racial and class prerequisites. The paragon paths introduced here might allow you to fully express the style you always intended your character to have.

REIMAGINING YOUR CHARACTER

It happens. You've played your martial character a while, and suddenly *Martial Power* shows up, offering many new possibilities—options you might have picked if you had known about them earlier.

Don't despair; you have a few choices. Retraining rules (see page 28 of the *Player's Handbook*[®]) make tapping into *Martial Power* easy. If retraining won't do the trick quickly enough, talk to your DM and your fellow players about reworking your character along the lines *Martial Power* provides. Chances are you can overhaul your PC to match your desires without doing any harm to the campaign. Your DM might even have a way to make the change a part of the story. If doing that ultimately proves too difficult, a dramatic exit for the older character could make way for a new one.

FIGHTER

“Battle line? Formation? Listen—I came here to kill whatever comes at us, not to march in a parade. I’ll keep you alive by makin’ the bad guys dead. Got me?”

A **FIGHTER** can use training and talent to be a good defender. Doing so is the typical soldier’s path. But not all fighters follow that path. Maybe you channel your indignation and bloodlust such that you defy your adversaries despite blows that land solidly. Or maybe you take up two weapons and focus on audacious assaults. In these ways, a good offense makes for solid defense.

Specialized techniques aren’t the sole purview of unorthodox fighters, however. Combat systems are as numerous as weapons and the individual warriors who use them. Concentration on a weapon or a style can make your path clear, since certain exploits lend themselves to particular ways of fighting.

Whether you’re a scale-clad, sword-and-board trooper; a tattooed, axe-wielding savage; a dual-wielding warrior who moves the battle line from moment to moment; or another sort of fighter, this chapter is for you. It contains the following material.

- ◆ **New Fighter Builds:** The battlerager and the tempest present different styles of combat that protect your allies while laying your enemies low.
- ◆ **New Class Features:** Two alternative choices give you the opportunity to focus your fighter even more sharply on one of the new builds.
- ◆ **New Fighter Powers:** Bring fear of your weapon prowess to your foes in new ways, including exploits that make your basic attacks and charges more dangerous.
- ◆ **New Paragon Paths:** Your particular road to glory can be represented by one of a dozen new paragon paths, each with its own flair.

NEW FIGHTER BUILDS

To supplement the fighter builds described in the *Player's Handbook*, this chapter presents two additional groups of fighters who use different styles of melee combat: the battlerager and the tempest.

BATTLERAGER FIGHTER

You're an unpredictable warrior who trusts the adrenaline rush of battle to pull you through as much as heavy armor does. Few aspects of life give you the charge that being in the heat of battle does, and you build up a fury when your enemies manage to hurt you. You thrive on taking it to those foes by wielding highly damaging weapons such as axes, maces, hammers, and picks. Strength is your focus, allowing you to make powerful attacks. You rely on Constitution to give weight to your attacks and to keep you in the fight. Like any other soldier, you count on brutal instinct to help you win the day, so Wisdom is important to you as well. The Battlerager Vigor class feature is designed to complement this build.

Suggested Feat: Power Attack (Human feat: Durable)

Suggested Skills: Athletics, Endurance, Intimidate

Suggested At-Will Powers: *brash strike*,* *crushing surge**

Suggested Encounter Power: *bell ringer**

Suggested Daily Power: *knee breaker**

*New option presented in this book

TEMPEST FIGHTER

Rather than a shield or a big weapon, you have specialized in fighting using a weapon in each hand. You see it as the best of both worlds—given the right training, you can deliver good damage and make up for the lack of a shield with deft parrying. Strength remains any soldier's bread and butter, and good battlefield awareness—Wisdom—is a must. You also rely on speed, maneuverability, and agility—Dexterity—to get your dirty work done. Constitution is a tertiary ability for you, granting useful staying power against foes not so easily fooled by your fancy footwork and feints. The Tempest Technique class feature is designed to complement this build.

Suggested Feat: Two-Weapon Fighting (Human feat: Human Perseverance)

Suggested Skills: Athletics, Intimidate, Streetwise

Suggested At-Will Powers: *dual strike*,* *footwork lure**

Suggested Encounter Power: *funneling flurry**

Suggested Daily Power: *tempest dance**

*New option presented in this book

NEW CLASS FEATURES

These fighter class features are available to any fighter who wishes to explore a different area of expertise. You can select one of the following features in place of the Fighter Weapon Talent class feature.

BATTLERAGER VIGOR

Each time an enemy hits you with a melee or a close attack, you gain temporary hit points equal to your Constitution modifier (after the attack is resolved).

When you gain temporary hit points by hitting with an attack that has the invigorating keyword, those temporary hit points stack with any other temporary hit points you already have.

When wearing light armor or chainmail, you gain a +1 bonus to damage rolls with melee and close weapon attacks whenever you have temporary hit points. This bonus increases to +2 if you're wielding an axe, a hammer, a mace, or a pick.

TEMPEST TECHNIQUE

When you wield two melee weapons, you gain a +1 bonus to attack rolls with weapons that have the off-hand property.

You gain Two-Weapon Defense as a bonus feat, even if you don't meet the prerequisites.

When wearing light armor or chainmail, you gain a +1 bonus to damage rolls with melee and close weapon attacks when you are wielding two weapons. This bonus increases to +2 with weapons that have the off-hand property.

NEW FIGHTER POWERS

The tempest fighter and the battlerager fighter center on these powers. Fighters of any stripe can find powers here to their liking, however.

NEW KEYWORDS

Some of the powers in this chapter use these new keywords.

Invigorating: If you are trained in the Endurance skill, you gain temporary hit points equal to your Constitution modifier when you hit with a power that has this keyword. No invigorating power grants temporary hit points more than once per turn, even if you hit more than once with the power or use more than one power with the invigorating keyword in a round.

Rattling: If you are trained in Intimidate and you deal damage with an attack that has this keyword, the target takes a -2 penalty to attack rolls until the end of your next turn. A creature immune to fear is not subject to this penalty.

Weapon: If you're wielding an axe, a hammer, or a mace, the attack deals damage equal to your Constitution modifier.

BUILD AND ATTITUDE

How does your fighter character's build affect his or her personality? It's easy to imagine a guardian fighter as a disciplined soldier, focused on tactics that keep his companions safe. A battlerager fighter, though, might be more like a rampaging juggernaut, rushing at the foe with little thought for anyone's safety. Tempest fighters and great weapon fighters might fall between those two extremes.

Distracting Spate

Fighter Attack 1

Your flurry of feints and strikes leaves your foe's defenses unsteady.

Encounter ♦ Martial, Weapon

Standard Action Melee weapon

Target: One creature

Attack: Strength vs. AC

Hit: 2[W] + Strength modifier damage, and the target grants combat advantage to you until the end of your next turn.

Weapon: If you're wielding two melee weapons, the attack deals extra damage equal to your Dexterity modifier.

Funneling Flurry

Fighter Attack 1

With snakelike strikes, you force two of your enemies to move where you want them.

Encounter ♦ Martial, Weapon

Standard Action Melee weapon

Targets: Two creatures

Attack: Strength vs. AC (main weapon and off-hand weapon), one attack per target

Hit: 1[W] + Strength modifier damage, and you slide the target 1 square.

Insightful Strike

Fighter Attack 1

Your opponent is showing weakness, and your shrewdness allows you to exploit it.

Encounter ♦ Martial, Weapon

Standard Action Melee weapon

Target: One creature

Attack: Strength vs. AC

Hit: 2[W] + Strength modifier damage. If the target is bloodied, the attack deals extra damage equal to your Wisdom modifier.

Lunging Strike

Fighter Attack 1

You lunge at a foe that thought it was beyond your reach.

Encounter ♦ Martial, Weapon

Standard Action Melee weapon + 1 reach

Target: One creature

Attack: Strength - 1 vs. AC

Hit: 2[W] + Strength modifier damage.

DRAGONBORN FIGHTERS

With their naturally high Strength, dragonborn make excellent great weapon fighters or battleragers, putting that physical power to good use with two-handed swords or axes. Like Harann (described in the *Player's Handbook*), many dragonborn fighters strive to achieve mastery of a weapon as they seek the perfection of their spirits. The inner dragon paragon path (page 29) represents a dragonborn fighter who taps into the power of the dragon within.

Shield Bash

Fighter Attack 1

You knock your adversary off balance with your shield and follow up with a strike.

Encounter ♦ Martial

Standard Action Melee 1

Requirement: You must be using a shield.

Target: One creature

Attack: Strength + 2 vs. Reflex

Hit: 1d10 + Strength modifier damage, and you push the target 1 square and knock it prone.

Special: If you are a dwarf, the attack deals extra damage equal to your Wisdom modifier.

Special: When charging, you can use this power in place of a melee basic attack.

LEVEL 1 DAILY EXPLOITS

Flanking Assault

Fighter Attack 1

The presence of so many enemies overwhelms your foe, giving you the opportunity to land a vicious attack.

Daily ♦ Martial, Weapon

Standard Action Melee weapon

Target: One creature you're flanking

Attack: Strength vs. AC

Hit: 3[W] + Strength modifier damage. For each ally adjacent to the target, the attack deals extra damage equal to your Dexterity modifier.

Miss: Half damage.

Harrier's Ploy

Fighter Attack 1

Your forceful attack promises your foe a pursuit that can end only when one of you is victorious.

Daily ♦ Martial, Weapon

Standard Action Melee weapon

Target: One creature

Attack: Strength vs. AC

Hit: 3[W] + Strength modifier damage.

Effect: Until the end of the encounter, if the target moves, you can shift a number of squares equal to your Dexterity modifier as an immediate reaction.

DWARF FIGHTERS

Although they're not as strong as dragonborn, dwarves combine high Constitution and high Wisdom to make excellent fighters. Like most dwarves, dwarf fighters favor axes and hammers—partly for cultural reasons and partly because those weapons let them put their Constitution to good use for extra damage. Dwarves have a strong tradition of guardian fighters, and the dwarven defender paragon path (page 27) is the pinnacle of that tradition.

Knee Breaker Fighter Attack 1

By smashing into your opponent's legs, you make even the thought of moving painful for him.

Daily ♦ **Invigorating, Martial, Weapon**

Standard Action **Melee weapon**

Daily ♦ **Martial, Weapon**

Standard Action **Melee weapon**

Target: One creature

Attack: Strength vs. AC

Effect: You can shift 1 square and repeat the attack against a second target. You can then shift 1 square and repeat the attack against a third target.

LEVEL 2 UTILITY EXPLOITS

Create Opening Fighter Utility 2

You draw your enemy's attention, allowing an ally to slip away.

Encounter ♦ **Martial**

Minor Action **Melee 1**

Target: One creature

Effect: The target is marked until the end of your next turn.

The target can then make a melee basic attack against you as a free action, with a -2 penalty to the attack roll.

One ally adjacent to the target can shift its speed as a free action.

Defensive Stance

Fighter Utility 2

Dropping into a cautious stance, you maneuver around your opponent's attacks to get into position.

Daily ♦ **Martial, Stance**

Bahamut and Kord are popular deities among fighters because of their influence over matters of war, while many fighters turn to Avandra as the god of adventure. Fighters who believe in the virtues of conquest often worship Bane, even if they're not actually evil. Beyond these four gods, all the deities in the pantheon count some fighters among their worshipers. Fighters who view their martial skill as an art form, including many elf and eladrin fighters, worship Corellon. Erathis is a popular civic god, often revered by soldiers. As a god of knowledge, Ioun holds appeal for fighters who study the history of warfare and strategy. Some battlerager fighters seek to mimic the fury of nature that Melora represents. Moradin is commonly revered by dwarves and any fighter who seeks to protect a community. Pelor is popular among good-aligned fighters, while the Raven Queen is a common patron for grim, bitter soldiers and mercenaries. Sehanine's doctrine of seeking one's own destiny appeals to many fighters as well.

FIGHTERS AND COMBAT

One might assume that characters who use powers called *brute strike* and *ruthless slaughter* revel in combat, delighting in the violence and mayhem they spread, but that doesn't have to be true of your fighter character. For many of the iconic fighters of literature, war and combat are a burden they hope to be able to lay down someday. These heroes find no joy in killing, just a weariness that grows

greater as the cycle of violence expands to swallow more and more of their friends and loved ones. How does your fighter feel about facing combat encounters? The need for violence is plain to see, but do you hope for an end to such violent times? Or are you numb to it—at least until the death of someone you care about awakens you to the grim reality?

Small but nimble, halfling fighters make up in agility what they might lack in strength. When peaceful halfling communities face danger they can't avoid or deflect, they rely on skilled warriors who use hit-and-run tactics, quick wits, and quicker blades to drive off foes. The halfling boulder paragon path (page 28) is the consummate example of the halfling fighter's tradition.

TIEFLING FIGHTERS

Tiefling is the only race in the *Player's Handbook* that doesn't gain a +2 bonus to one of the ability scores most commonly used by fighters. Even so, tiefling fighters manage to put their innate powers and proclivities to good use as fighters. The tiefling warfiend paragon path (page 35) represents the highest achievements of an infernal tradition dating from ancient Bael Turath, but even tiefling fighters who don't adopt that path channel their *infernal wrath* to good effect on the field of battle.

**Ruthless Slaughter**

Fighter Attack 25

Without pity, you butcher a foe already at a disadvantage, provoking your other enemies.

SIGNATURE WEAPON

Great fighters are often known by the weapons they wield. Your fighter character might use many different weapons over the course of his or her adventuring career, but there's no reason any of those weapons has to be just a mundane +3 *flaming greatsword*. From the first weapon you use at the start of the campaign to the mighty +6 artifact that deals the death blow to the campaign's ultimate villain, each weapon can be the stuff of legends.

Special weapons are often distinguished by their makers. A blade crafted in the infernal forges of Bael Turath, a spear hardened with white dragon breath by the smiths of Arkhosia, or a hammer crafted by an exarch of Moradin in the vaults of Celestia are weapons worthy of a hero. A weapon that you made yourself might be the greatest of all.

Other weapons are noteworthy because other heroes—or villains—wielded them in the past. Did your sword belong to an eladrin general of Cendriane? Was your axe used to hew the head of the mighty fire titan Kurthmaug from his shoulders? Was your flail the favored weapon of a gnoll chieftain you killed?

Finally, a weapon's construction or appearance can make it distinctive. Perhaps your sword is crafted from a single piece of strange metal, carved rather than forged, but still terribly effective. Your spear might be tipped with the tooth or claw of an ancient dragon. Or the haft of your mace might be the bone of a giant, bound with silver bands engraved with Dwarven script.

LAST STAND

Brandis stood in the doorway and waited. A slow breath did nothing to calm his pounding heart, and he emptied his lungs with a whispered prayer to the Raven Queen: "Not today, Dark Lady. Please."

He listened to the pounding of the demon's hooves drawing near and to the frantic rhythm of his companions' feet as they fled behind him. If he could buy them a little time, maybe they could get to safety. Maybe Verna wouldn't die.

The demon rounded the corner and bellowed in triumph. Its roar assaulted his ears, shook the stone beneath his feet, and blasted at his face, but Brandis held his

ground. Lowering its head, the demon charged.

With a roar of his own, Brandis ran to meet the onrushing demon. He let his fury and his despair carry him forward like a crashing wave of steel. He threw himself down under the demon's curving horn, then with all his strength brought his blade over his head to slash across its neck. Acrid blood sprayed over him, but the demon didn't fall. Howling, it swatted at Brandis with a massive fist, sending him staggering backward.

"At least I know I got your attention," Brandis muttered, gripping his sword more tightly. He couldn't hear his friends anymore, just the pounding of blood in his ears.

NEW PARAGON PATHS

Note: The giantslayer, a paragon path open to fighters as well as rangers, is described on page 62.

AVENGING SLAYER

"Justice is hard to come by. I'm here to make sure you pay for your crimes!"

Prerequisite: Fighter

Beyond a few safe havens, the world is an unforgiving land filled with cruelty, terror, and profound evil. The blameless are slaughtered and the works of civilization are torn down, sometimes in a bid for conquest, but just as often out of sheer brutality. Destructive monsters regularly leave behind survivors, and a few of these take up the sword or the axe. These brave souls seek not to put past wrongs right, but to prevent others from suffering as they have, and to slake a thirst for vengeance. In this way, heroism is often forged in darkness.

At some point in your life, your course was set, your path laid before you. Maybe your career as a grim hero began the moment you or those close to you fell victim to a fate you were powerless to prevent—your life forever changed by one act of depravity. Perhaps instead, as you have adventured, you've witnessed too many appalling acts, seen too many innocents buried, or found wickedness in too many shadows. Whatever the case, you now see yourself as the only one who can stand between the helpless few and the predatory hordes. You know no respite exists for those who would protect the weak. Even so, you willingly take on that task.

As an avenging slayer, your brutal efficiency makes you a menacing figure no enemy can safely ignore. You strike fear into your enemies to protect your allies and those who have less power than you. You punish corruption with merciless retribution, defining yourself as a righteous executioner.

DREADNOUGHT

"You can't slow me down, much less stop me."

Prerequisite: Fighter

World-shaking battles were fought between the tieflings of Bael Turath and the dragonborn of Arkhosia. The deeds and exploits of those conflicts resound still in epic story and song. One such anthem is *Lament of the Dreadnought*, a somber song that recounts the final march of Jagannash the Unstoppable, a great dragonborn hero.

A doughty warrior famed for his ability to fight on no matter the injuries he sustained, Jagannash accumulated a number of legends. He withstood the full fury of an angry blue dragon, shrugged off the lashes of a pit fiend's whip, and even killed a tiefling warlock who had hurled him through Hell. The *Lament*, though, speaks of his final battle and all he achieved in the last offensive against the tiefling empire. Jagannash felled a full legion of devils, strangled their succubus sorceress commander with his bare hands, and hammered his way through the walls of a fortress. He was climbing the tower that housed the tiefling war room when the earth rebelled and swallowed the citadel and all within it. It is whispered that Jagannash fights there still, despite the centuries. Such is his resilience.

It is from Jagannash's example that other fighters who follow a similar creed take inspiration. The mind-body practices of these warriors are kept and taught by a few masters, dragonborn and otherwise. Some even develop these talents without formal training.

As a dreadnought, you are an inexorable force of destruction. You turn aside weapons with nothing more than your force of will. Fire cannot touch you; lightning cannot blind you. The core of your might grows from your ability to detach your mind from your body, to disassociate yourself from the pain of your wounds and press onward to keep fighting when others would succumb. You attain this state through discipline and a commitment. All who attempt to stand against you are bound to fall.

DREADNOUGHT PATH FEATURES

Dreadnought Action (11th level): When you spend an action point to make an attack, you gain resist 10 to all damage until the start of your next turn.

DREAD REAPER

“All things die, friend. It’s my job to make sure you do, too.”

Prerequisite: Fighter

Countless fighting styles issue from dedicated masters—unimpeachable figures who devote their lives to perfecting combat maneuvers that are carried onto the battlefield by their disciples. But not all techniques evolve from the teachings of these paragons of the warrior’s art. Some methods come from origins far less noble. The path of the dread reaper is one such shadowy road.

According to legend, the first dread reaper was Gulkanon, a human paladin of the Raven Queen, stripped of his station and power for offending his god. Even without the connection to the deity he had long revered, Gulkanon was unwilling surrender his place as her champion. He turned to a new avenue of military study, building upon the techniques of savage and fell races in the world—orcs, goblins, ogres, and trolls. He took the crude strokes of these brutish creatures and refined them, developing a range of exploits that focused his strength into a vehicle of appalling carnage. As he grew more confident in his newfound skills, he took the title “dread reaper.” He set out to send souls to his estranged patron in hopes of rekindling the bond that had been broken. Whether he succeeded is lost to time, but his legacy remains.

Some dread reapers serve the Raven Queen, and small cults of such warriors can be found who are willing to train promising candidates. Others who have this training, however, lack the will or discipline to find true favor with the god. A few stretch her tenets to accommodate their own excesses. The Raven Queen’s vigilant servants have been known to hunt and slay the worst of those offenders.

Whether you had an affinity for death-dealing or found inspiration in the actions of another, you turned to the techniques of the dread reaper. The training offers you a special array of fighting maneuvers that emphasize your already impressive proficiency with two-handed weapons. Your training transformed you from a competent warrior to a terrifying force of destruction. Rather than minding your defenses, you favor wreaking havoc in combat. Enemies can’t help but notice your destructive potential and ignore you at their peril. You can perform astonishing attacks, sweeping through your foes and laying them open with your steel.

DREAD REAPER PATH FEATURES

Reaper’s Action (11th level): When you spend an action point to make an attack with a two-handed weapon, each enemy adjacent to you takes damage equal to your Strength modifier.

DWARVEN DEFENDER

“The wrath of Hell can’t move me, but I can hammer you into place!”

Prerequisites: Dwarf, fighter

Your people defied the titans and giants. Unity has sustained them, and tenaciousness has upheld them; traditions preserving these values serve them well. They stand unmoved and unconquered, like the mountains, against orcs and goblins and dragons.

Dwarf soldiers are unmatched in their fighting prowess and loyalty to one another. War stories hold that a single dwarf foot soldier is the match of any two warriors of another race and the same skill. Two such soldiers are worth five similarly skilled enemies. When the enemy forces are composed of little more than savages, dwarven armies break them like stone channels water.

All the institutions of dwarven society have soldiers loyal to the cause. Doughty fighters serve king or lord, guild or business, deity or church, or a simple creed. A few serve the almighty coin, selling their time and axes for wealth. Time-honored fighting techniques teach a dwarf warrior to use his or her racial abilities to the fullest and to use fine weapons and heavy armor. When the dogs of war are loosed, dwarf soldiers hold the line.

You are a master of dwarven fighting arts, relying on loyal allies as much as your own courage and resilience. Your expertise lies in defensive maneuvers and battle-line tactics. You know how to take advantage of holes in enemy lines. Allies come to rely on you as the center of the squad. They take heart in your steadfastness and your ability to break the defenses of your enemies.

DWARVEN DEFENDER FEATURES

Defensive Action (11th level): Whenever you spend an action point to take an extra action, you gain a +2 bonus to your AC and Fortitude until the end of your next turn.

Stalwart Defender (11th level): Whenever you are adjacent to at least one ally, you and adjacent allies gain a +1 bonus to AC, and all adjacent allies can reduce the distance they are moved by any pull, push, or slide by 1 square.

HALFLING BOUNDER

“Let my size fool you, and that’ll be your last mistake.”

Prerequisites: Halfling, fighter

The world is wide and wild, and the nomadic halflings are small folk. Deftness and quick wits have allowed them to survive nonetheless. As they have done so, they have come to rely on wily and daring warriors to protect them. Even settled halflings maintain a soldierly class to see to their interests among other, and larger, civilized folk.

The fighting tradition of the halfling bouncer favors halfling traits. Bouncers are practiced in hit-and-run strategies and pack tactics. They spring about the battlefield, avoiding the attacks of their bigger enemies, striking from unexpected angles, and making harrying assaults. Bouncers willingly lay down their lives to allow those they care for to survive and escape danger.

Most wandering halfling clans have a number of bouncers who serve as scouts. These warriors help keep the traveling band carefree—they put down dangers before the threat becomes dire. Able and willing halflings can easily learn the techniques of the bouncer. More than a few put this expertise to use outside halfling communities, satisfying their natural curiosity while protecting friends and common folk.

You are one such champion of the halfling people. A flashing blade in hand, you leap about, laughing as stumbling, oversized fools trip over themselves trying

to stop you. You’ve learned to use your small size to see the battle from a different angle, enabling you to easily spot openings others miss, hounding your enemies and taking every advantage the battle offers. If your skill comes up short for some reason, your luck more than makes up for it.

HALFLING BOUNDER FEATURES

Shifty Action (11th level): You can spend an action point to shift a number of squares equal to your Dexterity modifier, instead of taking an extra action.

Chance Retaliation (11th level): If you use your *second chance* racial power and the result of the second roll is a miss, you can make a melee basic attack against the attacker as a free action.

Move the Battle (16th level): Whenever you make an attack because of the Combat Challenge class feature and hit, you can slide the target 1 square and then shift 1 square.

INNER DRAGON

"The fury of the dragon seethes in my blood!"

Prerequisites: Dragonborn, fighter

Dragonborn issue from the same spiritual line as mighty dragons. Since the earliest days, dragonborn have nurtured their raw fury into a fighting spirit and a proud martial tradition. The empire of Arkhosia formed from these roots, and it expanded at times based as much on the power of its military force as on its civilizing influence.

In Arkhosia, dragonborn served dragons in numerous capacities, from vizier to archmage, oracle to valet. The most important roles performed by dragonborn, however, were as agents in a dangerous world or as defenders of the homeland. Soldierly ways passed through the generations, as did the ability to tap one's inner draconic nature.

Particular dragonborn masters hone body, mind, and spirit through martial practice to perfectly tap into the inner dragon. Some come to this knowledge on their own; others gain it from teachers eager to train younger dragonborn in ancient traditions. Only a few master the techniques well enough to become legendary heroes or villains.

BRIAN HAGAN

Whatever your personal history, the untamed blood of dragons flows in your veins. Your veneration of your warrior ancestors has manifested as a supernatural tie to this heritage. You hear the call of the dragon within. Its ferocity courses through you. Woe to those who harm you, for the shedding of your blood rouses the ire of your draconic heart.

KNIGHT PROTECTOR

“Nerath might have fallen, but the need for just warriors who abide by a code of honor remains still.”

Prerequisite: Fighter

In this age of darkness, covered by the shadow of fallen empires, never has there been a greater need for those who champion the causes of the innocent. Not since the fall of Nerath has a coherent force of warriors been guided by honor and justice in all that they do. Bold knights who fought for King Elidyr of Nerath are long lost, and the honor code to which they adhered is a curiosity of history to most. However, some see the need for such nobility today, and they try to live up to the standards set by righteous soldiers long dead. These modern fighters name themselves the knight protectors.

Some of those who call themselves knights could equal Nerath’s storied fighters in might and zeal. Without a code, though, who can say with certainty if the new knights can match bygone honor? Without a fellowship, how can like-minded individuals work toward similar ends and police their own? Indeed, a number of those who claim to be knights—and even a few who call themselves knight protectors—are anything but counterparts to the admirable warriors of old. Far too many use their self-claimed title for profligate or brutal gain.

A loose confederation of knight protectors acts as an organization for those who claim this path. Its members are pledged to look out for one another and to keep the principles of the order. Courage, industriousness, respect, courtesy, and the glory of battle are all guiding principles. Those who fail to uphold these standards quickly find themselves at odds with other knight protectors.

Taking up the sword and cloak of a knight protector, you see it as your task to emulate the knights of old. A warrior and something of a leader, you abide by the knight protector code for personal glory and out of respect for the past. In life, you strive to be noble, honest, and fair. When you and your comrades come under attack, you are at the forefront, testing and displaying your courage. Even if smaller minds mock you as an idealist, you know you fight with dignity and purpose.

POLEARM MASTER

“Victory is easier to achieve when your reach is longer.”

Prerequisite: Fighter

The versatile polearm is easier to manufacture than a sword, and often easier to use effectively. In its simplest form, the polearm is a long spear—a short blade on the end of a long shaft. Since reach is an advantage, even the humble long spear is an effective weapon in unpracticed hands. In the hands of a master, its deadliness can be unparalleled.

More complex polearms offer even greater rewards on the battlefield and off. They combine the best aspects of spear and blade or axe, allowing the user control and damage unmatched by other weapons. It's little wonder that whole units of soldiers use polearms in war, and that city watches use these weapons to protect citizens, as well as keep them in line.

Because polearms are so common and easily crafted, learning to use one is part of most basic military instruction. Advanced skill isn't so easy to obtain, but the trials of regular combat serve as well as, if not better than, the training ground. The ability to use a polearm against a variety of foes can seldom be learned through the rigors of soldierly education.

ADAM GILLESPIE

Through your adventures, you have mastered the polearm. You prefer a weapon that extends your options and your reach, understanding that it's better to keep monsters at a distance. With such a weapon at your disposal, you not only deal wounding blows to your adversaries and cut wide arcs through multiple foes, you also better protect your allies by commanding more of your surroundings.

POLEARM MASTER FEATURES

Lunging Action (11th level): You can spend an action point to increase the reach of your reach weapons by 1 square until the start of your next turn, instead of taking an extra action.

Forceful Reach (11th level): If you use a reach weapon to deliver a weapon power that pushes, pulls, or slides a target, you increase the distance of the forced movement by 1 square.

Longarm Grasp (16th level): If you're wielding a reach weapon, whenever an enemy within 2 squares of you and marked by you shifts or makes an attack that doesn't include you as a target, you can make a melee basic attack against that enemy as an immediate interrupt.

RAVAGER

“For Kord!”

Prerequisites: Fighter, Battlerager Vigor class feature

A ravager is the quintessential battlerager, a savage and fearless fighter. Such a warrior thrives on rage and bloodlust, literally chewing on a shield’s rim or weapon’s haft to diffuse wild energy when a promised clash is too long in coming. When combat is joined, a ravager rushes headlong into the fray, leaving a trail of bleeding foes and twitching corpses behind.

You scoff at disciplined practice, romantic devotion to a code, and effete arms such as rapiers. A dedicated killer, you rely on the force of your weapon and the rush that battle gives you. Some might describe you as an uncultured lout, but you laugh at them as well. When they cower before the horrors of the night and the wild places, you stand fast, ready to whet your weapon on your enemies.

Being a ravager means that every skirmish is a chance for blood and glory. It’s an opportunity to win

fame, the favor of the gods, and maybe more than one form of immortality. You throw yourself into every fight as if it were your last, leaping fearlessly among your foes where you can wreak the most havoc. With your reckless bravery, you bring fame and honor to yourself, your people, your ancestors, and the gods who watch over you. And if the gods can’t be bothered—to Hell with them too.

RAVAGER PATH FEATURES

SHIELD ADEPT

“The shield in my left hand speaks of my survival. With my sword, it whispers of your defeat.”

Prerequisite: Fighter

Storied history follows the shield, a warrior’s best friend and an implement of honor and identity in a fighter’s panoply. A stout shield can turn aside mundane swords and arrows, as well as monstrous venom sprays and dragon fire. Only a steadfast ally is better for covering the flank while you’re taking it to the enemy. Nothing is better to protect that ally.

Throughout time, the use of the shield has defined military tactics. In phalanx formations, common among many folk, one soldier stands alongside another, each relying on a comrade’s shield for added protection. During a charge, a shield aids in pushing the enemy back or even down. Warriors in a unit of skilled shield bearers can place their shields together in an overarching arrangement, completely protecting all within the shield shell from outside attack. This is said to have originally been a dwarven trick, a “boulder formation.”

The Arkhosian warrior-philosopher Khomagar said, “The shield is the law of the battlefield, protecting the soldier as lordly and righteous edicts protect the empire.” Phalanx fighters from many cultures suffer dishonor or worse for losing their shields in battle, since such a loss weakens the unit as a whole. Numerous peoples maintain a tradition of bringing dead warriors home on their shields, and burying a shield with its owner. Especially among dwarves, a broken shield is seen as a symbol of loss or corruption.

The shield is even more important to a small-unit fighter who relies upon it to protect his or her few allies. To the wise soldier who fulfills such duties, a shield is as much a weapon as a defensive item.

You know these facts well. Through your countless skirmishes, you have mastered the use of your one-handed weapon and shield. Such is your skill that those who pay too much attention to one of your armaments inevitably suffer punishment from the other.

SHIELD ADEPT FEATURES

Covering Action (11th level): While using a shield, you can spend an action point to gain superior cover against ranged and area attacks until the end of your next turn, instead of gaining an extra action.

Shield Bearer’s Payback (11th level): Each time an enemy adjacent to you attacks an ally with a melee attack, you gain a cumulative +2 bonus to your next melee damage roll.

SHOCK TROOPER

“Move fast, people! And hit them hard!”

Prerequisite: Fighter

Nerath was a just nation, it is said, but it would be a lie to say that it was built solely through negotiation, the spread of knowledge, and cultural influence. No, as any historian can tell you, Nerath rose on the splintered shields and shattered blades of its soldiers. When an object of conquest doesn't bend, it must be made to bow.

That was the job of Nerath's legions. Those armies consisted primarily of highly trained heavy infantry supplemented by heavy cavalry—the famed knight protectors. Nerath's military traditions were derived from older sources. In what any dragonborn would claim to be fine dragonborn style, a special auxiliary force of devastating light infantry led many of Nerath's assaults. These were the empire's shock troopers. Military historians liken them to similar troops among other cultures and peoples, especially elves and dragonborn.

The typical shock trooper wore chainmail over leather, and carried a longsword and short sword, or dual short swords. The trooper was trained to break the line of an enemy force, moving quickly to kill and wound as many enemy soldiers as possible. If a trooper broke through the enemy line, the job then became direct assault on enemy command positions.

Although Nerath no longer exists as an empire, more than a few of its traditions linger. Numerous fighters and schools of soldiery carry on shock trooper traditions. This is to say nothing of the similar soldiers among other peoples, such as dwarf assault fighters. Any warrior who wants training in this brutal and mobile assault style can readily find it.

You are part of this sudden strike tradition of fighting. Unlike those warriors who form battle lines, you move among your enemies, defying them to strike you down and forcing them to pursue you. Your daring onslaughts confuse and astonish your adversaries. Even so, your guard is never down, especially in your favorite place: the center of a throng of foes.

SHOCK TROOPER PATH FEATURES

Footwork Action (11th level): When you spend an action point to take an extra action, you gain a +2 bonus to AC and Reflex until the end of your next turn. If a melee attack misses you while this bonus applies, you can shift 1 square as a free action.

Deadly Soldier (11th level): When you wield an off-hand weapon, increase the weapon's damage die by one size.

Quicker Death (16th level): Once per round, when you have combat advantage against a target, you can add your Dexterity modifier to a melee damage roll against that target.

TIEFLING WARFIEND

"My rage might be justified, but it still burns within the heart of a devil."

Prerequisites: Tiefling, fighter

The mixing of devils and mortals created the tieflings, infusing them forever with tainted fiendish blood. But in that corruption is power. Like any power, it can be tapped for good or ill.

Long have tieflings used the devilish energy burning in their spirits. In its most basic form, this infernal might allows the tiefling to channel anger and a desire for vengeance into attacks more vehement than normal. In ages past, however, tiefling warriors learned to channel their negative emotions into tools for war.

Fallen Bael Turath had whole cadres of mighty fighters who could funnel fiendish fury into their military maneuvers. Despite the loss of the empire, some of these devilish fighters survived. Their fighting customs were passed on, lasting through the centuries. Today, a few tiefling soldiers offer training that allows would-be warfiends to control the devil inside. Others, who must do without such guidance, find that the inner fiend is best directed into violence lest it pollute other aspects of life.

ADAM GILLESPIE

So many of your kind fear the taint lurking in their soul, but you realize it is merely a tool at your disposal. Without needing to embrace evil, you nurtured your infernal aspect and mastered it. You've coupled deadly skill at arms with the dread power of your heritage, helping you to defend your allies and to make your foes pay for daring to stand against you. Now the corruption within you serves your aims, coating your weapon in baleful fire and allowing you to consume the fleeting energy of dying foes.

TIEFLING WARFIEND FEATURES

Infernal Action (11th level): When you spend an action point to take an extra action, you regain the use of the *infernal wrath* racial power if you have used it during this encounter.

Hellfire Retribution (11th level): Whenever an enemy marked by you makes an attack that doesn't include you as a target, that enemy takes fire damage equal to 3 + your Constitution modifier.

Burning Opportunism (16th level): Whenever you make an attack because of the Combat Challenge class feature or an opportunity attack, you deal fire damage equal to 3 + your Constitution modifier if you hit.

RANGER

“Keeping a pet lets me bring the wild with me wherever I go. I like it. Keeps me warm inside. Oh, and the wild packs one hell of a bite.”

RANGERS ARE people of the wild frontier. They are bold wanderers who face the dangers that keep common folk living within walled cities and traveling along well-used roads. Every ranger is also a killer who uses terrain, keen senses, and hunt-honed strikes to end threats quickly. Where rangers differ is in their execution.

Blade and bow are typical ranger tools, but a few rangers forge a deeper alliance with the wilderness. Such a ranger calls a beast as a friend and a weapon. The affinity for a beast might grow from one of many roots. Legend speaks of those raised among wild animals, as well as of those with a supernatural affinity for wild creatures. For enigmatic reasons, Melora blesses a few with such a connection to animals. More often, however, a young would-be ranger befriends a beast or raises it from pup to warrior.

This chapter presents and supports such rangers. It also provides other sorts of rangers with ways to shape their capabilities. In it, you’ll find the following:

- ◆ **New Ranger Build:** The beastmaster ranger build lets you bring to life the fantasy archetype of hero and pet as a fighting unit.
- ◆ **New Class Feature:** Every beastmaster needs, well, a beast to master, and that’s what the Beast Mastery class feature is all about. You can choose a beast companion from one of eight categories designed to fit the style of your character.
- ◆ **New Ranger Powers:** With a specialized build such as the beastmaster, a whole new assortment of exploits is required. Rangers who favor the blade or the bow have new power options in this chapter, too.
- ◆ **New Paragon Paths:** Focus your training in one of a dozen ways, even shoring up quirky ranger techniques such as throwing or using a crossbow. Focus on slaying a particular sort of enemy, absorb the magic of the lands you walk, or run with the pack.

NEW RANGER BUILD

To supplement the ranger builds described in the *Player's Handbook*, this chapter presents one new ranger build: the beastmaster.

BEASTMASTER RANGER

A deadly hunter, you specialize in double-teaming your enemies with the aid of a beast companion. Your beast is an extension of you, and thereby it is an invaluable member of your group. No other is needed to help you flank your quarry. Melee combat with the aid of your beast is your focus, so you favor Strength. You count on Dexterity for your AC and occasional ranged attacks, so your secondary focus is on that ability score. Wisdom, your tertiary ability score, makes you better at the Perception skill and gives you an edge with many ranger powers. The Beast Mastery class feature is designed to complement this build.

Suggested Feat: Lethal Hunter (Human feat: Improved Initiative)

Suggested Skills: Athletics, Heal, Nature, Perception, Stealth

Suggested At-Will Powers: *circling strike*,* *predator strike**

Suggested Encounter Power: *synchronized strike**

Suggested Daily Power: *partnered savaging**

*New option presented in this book

NEW CLASS FEATURE

The Beast Mastery class feature is available to any ranger who wishes to gain a loyal beast companion. To select this class feature, you must give up the Prime Shot class feature, and you do not select either the Archer Fighting Style or the Two-Blade Fighting Style.

Beast Mastery: You gain a beast companion, chosen from one of these categories: bear, boar, cat, lizard, raptor, serpent, spider, or wolf. These cat-

egories do not describe specific animals, but rather groups of similarly themed creatures in the D&D world. You decide the creature's relevant details—its species, physical details, and so forth—making sure they are appropriate for its category and the campaign.

For example, if your character hails from a swampy region, your lizard companion might be a crocodile. The lizard companion of a ranger from a different region might be a giant monitor lizard or a drake. A beast companion's species doesn't affect its game statistics, which are based on its category and level.

You and your beast companion work so well together that the creature is almost an extension of you. Using your actions in combat, you control your beast companion by issuing it commands (see “Commanding a Beast Companion,” page 41).

Beast Mastery also alters your Hunter's Quarry class feature. When you use Hunter's Quarry, your quarry can be either the enemy nearest to you that you can see or the enemy nearest to your beast companion that you can see. You or your beast companion can deal the extra damage from Hunter's Quarry, but only one of you can deal this extra damage per round.

Your beast companion is considered a creature and an ally and can be affected by powers. A cleric can heal it with *healing word*, a warlord can give it a melee basic attack with *commander's strike*, and so forth. You and your beast companion are treated as separate creatures.

You can have only one beast companion at a time. You can dismiss your beast companion at any time, but gaining a new one isn't a simple task (see “Gaining a New Companion,” page 42). The link between a ranger and his or her beast companion is not one of master and servant but of two close friends.

As part of the training you underwent that allowed you to form a close bond with a beast, you learned the Raise Beast Companion ritual, which allows you to raise your companion from the dead, even if you are otherwise unable to master and perform rituals. (This ritual is described on page 41.)

BEAST COMPANION STATISTICS

A beast companion's category determines most of its game statistics, although all beast companions share a few characteristics.

Level: Your beast companion's level is always equal to yours. The beast's defenses, hit points, and attack bonus improve with level.

Ability Scores: Your beast companion's category determines its ability scores, which go up with level.

Add 1 to two of your beast companion's ability scores at 4th, 8th, 14th, 18th, 24th, and 28th level. All of your beast companion's ability scores improve by 1 at 11th and 21st level.

Healing Surges: Your beast companion has two healing surges. The beast's healing surge value is equal to a quarter of its maximum hit points, as normal.

Vision: Your beast companion has low-light vision.

BEAST CATEGORIES

Choose one of the following categories for your beast companion. Once you choose a category, such as wolf, you can then describe the beast's appearance, such as timber wolf, mastiff, or hyena.

- ◆ You rescued the animal from a cruel trap or a menagerie and nursed it back to health.
- ◆ You captured the beast when it was young and trained it rigorously as it grew.
- ◆ You retreated into the wilderness, fasting and praying to Melora, until she found you worthy and sent you a companion.

- ◆ You performed a secret ritual to bind your spirit with your companion's.
- ◆ You were raised as part of a pack of these animals, and your companion is almost like a brother or sister to you.
- ◆ When you were nearly killed in a wilderness ambush, the animal found you and cared for you.

GODS AND RANGERS

Melora, the god of the wilderness, is revered by many rangers, as are Kord and the Raven Queen, who both hold some influence over the field of battle where rangers demonstrate their prowess. As a patron of adventurers and travelers, Avandra is revered by many rangers as well.

A significant number of rangers don't worship any gods, or revere them while also offering sacrifices to and striving to live their lives in harmony with the primal spirits of nature. Some of these rangers believe that the gods are interlopers in the world, which properly belongs to these primal spirits. Some of them even multiclass into primal classes such as druid or barbarian (described in *Player's Handbook 2*), calling on nature spirits to enhance their martial prowess.

RAISE BEAST COMPANION

You call out to your beast companion. Though death separates you, the ties of faith and friendship between you can cross any gulf.

Level: 1

Category: Restoration

Time: 4 hours

Duration: Instantaneous

Component Cost: 50 gp

Market Price: None

Key Skill: Nature (no check)

This ritual allows you to restore life to your slain beast companion. This ritual works only for rangers who have the Beast Mastery class feature.

The ritual functions as the Raise Dead ritual, with the following exceptions:

- ◆ You need not have any part of your beast companion's corpse.
- ◆ The death penalty lasts until you have reached three milestones.
- ◆ A paragon tier beast companion costs 500 gp to raise, and an epic tier beast companion costs 5,000 gp to raise.

COMMANDING A BEAST COMPANION

Your beast companion doesn't usually take its own actions during combat. It acts on your turn as you direct it, using the options below. To command your beast companion, you take the action specified for a command, and the beast must be able to see or hear you. If you don't command your beast companion, it remains where it is, as long as you are conscious and present in the encounter. If you are unconscious or aren't present, your beast companion can act independently (see "Beast Companion Independent Actions" below).

Attack (Standard Action): Your beast companion makes a melee basic attack against an enemy of your choice.

Defend (Standard Action): Your beast companion or both of you go on total defense. If you are adjacent to each other, the bonus to defenses is +3 rather than +2.

Move (Move Action): Your beast companion or both of you take a move action. The move actions need not be the same.

Opportunity Attack (Immediate Interrupt): When a creature provokes an opportunity attack from your beast companion, you spend an immediate interrupt to command the beast to make the attack.

Other Action: For any other action, you spend the required action and your beast companion completes it. For example, picking up an object requires a minor action, so you can spend a minor action to order your beast companion to grab a bag of coins in its jaws.

If your beast companion is incapable of completing an action, your action is wasted and the beast does nothing. Your beast companion cannot use your powers, and the DM is the final judge on whether a beast is capable of completing an action.

BEAST COMPANION INDEPENDENT ACTIONS

In situations where you can't command your beast companion, it can act independently. For example, if you're unconscious or dead or if you aren't present in an encounter, your beast companion doesn't necessarily sit around waiting for you to show up, unless that's what you want it to do.

A beast companion acting independently can take a standard action, a move action, and a minor action on each of its turns, as a character can. You choose the beast's actions, with one restriction: If your character is present in the encounter but incapable of commanding the beast, it must move as far as it can toward you each round on its turn, choosing the safest route possible. Once adjacent to you, the beast companion can act in any manner you wish.

BEAST COMPANIONS AND HEALING

Your beast companion can spend healing surges as any character can, and it can receive the benefits of healing abilities, such as a cleric's *healing word*.

Second Wind: When you use your second wind, your beast companion can use second wind as well.

Other Healing: When you are adjacent to your beast companion, you can spend a minor action and one of your healing surges to heal the beast companion as if it had spent a healing surge.

Death and Dying: A beast companion follows the same rules as a character for death and dying (*Player's Handbook*, page 295). If your beast companion dies, you can use the Raise Beast Companion ritual to restore it to life.

GAINING A NEW COMPANION

If you wish to switch to a new beast companion, you can use the retraining rules in the *Player's Handbook* (page 28) to select a different beast when you level up. Instead of changing a feat, a power, or a skill selection when you retrain, you can change your beast companion selection.

You keep your current beast companion until you have the opportunity to spend a few hours seeking its replacement in an environment where the new beast can be found. If your beast companion dies and you choose to replace it rather than raise it, you follow the same rules.

The DM can choose to run a short adventure that involves you finding a companion, perhaps rescuing it from captivity or overcoming a foe together. Otherwise, the DM can allow you to create the story of how you found your new companion.

NEW RANGER POWERS

A ranger exists at a nexus of disparate capabilities, all embodying the bold tracker and fearless hunter. As a beastmaster ranger, you have exploits that allow you to expertly guide and work with your beast companion. In many ways, the beast is like a weapon under your skilled control. Such specialty means that you favor powers that other rangers can't even use, and you often eschew exploits other rangers prefer. Those other rangers are far from forgotten. Even if you aren't a beastmaster ranger, you'll still find powers in this chapter that are to your taste.

Some powers in this chapter use the new beast keyword, while others use a special range or damage notation.

BEAST

A power that has this keyword can be used only while your beast companion is conscious and present in an encounter.

RANGE

The following range designations appear in some powers.

Melee beast 1: The attack's target must be adjacent to your beast companion.

Melee weapon (beast 1): The attack's target must be within the reach of the weapon you're wielding and must be adjacent to your beast companion.

Close burst (beast): The burst originates from your beast companion.

BEAST ATTACKS AND DAMAGE NOTATION

Powers that rely on your beast companion to attack use the beast's attack bonus and use [B] to denote the beast's damage die. A number before [B] tells you the number of times you roll the die. For example, a wolf companion's damage die is 1d8. If you use *partnered savaging*, which deals 2[B] + beast's Strength modifier damage, a wolf companion would deal 2d8 + its Strength modifier damage.

ELADRIN RANGERS

Because of their naturally high Dexterity, eladrin are fine archer rangers, and the mobility provided by their *fey step* power serves them well in that role. As a race, they also have a long tradition of melee-focused rangers, who wield twin longswords in a deadly keening dance of steel. The pinnacle of this tradition is the blade banshee paragon path (page 59). Eladrin beastmaster rangers naturally choose beast companions of fey origin and learn to teleport side by side with their companions (see the Feyborn Companion feat, page 136).

HUNTER'S QUARRY

Stripped to its core, your Hunter's Quarry class feature is nothing more than a way to designate a single target and let you do massive amounts of damage to that target. It represents your focus on that target and your single-minded dedication to getting rid of that foe. But what do you do when you use Hunter's Quarry?

Take a moment, a focusing breath, and study your foe—the way it moves, its speed, its patterns. When you understand how it moves, you can predict where it will be when your sword or arrow reaches it.

Search out its weaknesses: Where does its armor not protect it? Where are the scales of its hide not as thick? How might an eye or a mouth offer access to its vulnerable organs?

Put yourself in its place. What does it see? How does it defend itself? Who does it attack, and why? What surprises it? Hunter and prey are one, linked in the cycles of nature.

Find your range. Learn exactly how far you must pull back the string, how much to angle your bow, exactly how to line up your shot against this particular target. Feel it in your muscles, force them to remember, and duplicate the perfect shot time after time.

MELEE OR RANGED?

More than perhaps any other class, the different builds of the ranger play very differently. The two-blade ranger is a melee-focused character who is similar in many ways to a rogue, relying on high mobility and devastating melee attacks to face foes in direct combat without the high defenses or hit points of a defender class. The archer

ranger is more like a warlock, attacking from a relatively safe distance while circling around the thick of melee to get the best shots. The beastmaster build is a different approach to building a melee-focused ranger, one that stands out from other classes of any role as something unique.

NIGHT WATCH

Varis settled into place on the thick branch, and his panther, Shara, settled beside him. Together they watched the road below, claws and fingers clutching bark. Only their eyes moved, scanning the forest, catching every movement—every autumn leaf drifting to the ground, every squirrel scurrying across the forest floor or among the branches around them.

As the sun's last light drained from the sky and Varis's friends drifted to sleep beneath him, he closed his eyes and drank in the forest's sounds: the lonely call of an owl, the chirping of crickets and tiny tree frogs, the distant rustling of a bear in the fallen leaves. He could hear the bear snuffling as it rooted through the leaves for food.

He felt Shara stiffen ever so slightly, and he opened his

eyes. The moon bathed the trees in silver light, enough for his elf eyes to see. He glanced at Shara and followed her gaze, then saw what had alarmed her: a dark shape flitting between the shadows of the trees, stalking toward the camp. He saw a second one, then a third, then beyond them a great many more, creeping in perfect silence, trusting in the cover of the dark.

Shara's breath was almost a growl, and he lifted a finger to silence her. Whether it was his movement or the panther's sound, the nearest creature below held up a hand and froze. Varis could just make out beady goblin eyes searching the forest. It was too late. Roaring as one, Varis and Shara leaped from the tree, and the goblin was dead before their feet touched the ground.

RANGERS OF MANY RACES

Their high Strength makes dragonborn excellent two-blade or beastmaster rangers. Dragonborn rangers commonly have drake beast companions.

Dwarf rangers aren't particularly common, but their high Wisdom and their natural tenacity lead some dwarf heroes to become rangers. Most dwarf rangers choose the two-blade fighting style and wield twin axes, picks, or hammers.

Halfling rangers are rare. Because their size prevents them from using longbows, most halfling rangers choose

beast mastery rather than a fighting style, with a preference for raptor companions.

Not many tiefling heroes become rangers, but those who do generally favor wielding two sharp blades in melee combat. A few tiefling rangers learn ancient infernal secrets to imbue their attacks with hellfire—see the hellborn shadow paragon path (page 63).

See also “Eladrin Rangers” and “Elf Rangers,” page 44.

NEW PARAGON PATHS

Note: The borderlands marshal, a paragon path described on page 119, is open to a character who is both a ranger and a warlord (having multiclassed into the second class).

AVALANCHE HURLER

“Go ahead, keep making fun of me. I don’t need a bow to hit you from down here.”

Prerequisite: Ranger

The first avalanche hurlers were dwarf slaves in the ancient realms of the giants. Tempered by suffering and endless labor, and without access to soldierly methods, these dwarves tailored their ways of fighting to their work tools. They developed martial techniques that allowed them to be flexible in combat. A rebel needs ranged capability to kill in ambushes and slay retreating adversaries. Skill in melee is required to stand up to larger and quicker foes.

Revolutionary dwarves took up their hammers and axes. They threw these tools into the faces of their oppressors. Then, hammering and hewing from underfoot, the first avalanche hurlers brought their outsized masters down and escaped to the wilderness. They settled in underground halls they cut for themselves, places too small for their enemies to invade. Dwarves then made war on giants in Moradin’s name.

Dwarf clans have maintained the avalanche hurler fighting style across the generations. They preserve their earliest original combat style, but they never held it so sacred that they failed to give it to allies among all sorts of folk. Further, the avalanche hurler might have been originally recorded in dwarven folklore, but other races developed similar military methods independently.

As an ever resourceful avalanche hurler, you are effective both in close combat and at range. Rather than mastering one ranger fighting style, you embrace both, using thrown melee weapons as your chosen instruments of death. What you lose in range and damage, you make up for with your versatility, being able to make attacks against adjacent enemies and then send your weapons flying against those beyond your reach.

AVALANCHE HURLER PATH FEATURES

BLADE BANSHEE

“That hum is the sound of your death approaching.”

Prerequisites: Eladrin, ranger

The Feywild sings with eldritch energy. It is infused with magic from its twilight sky to its sparkling depths. Fey creatures, its children, are bathed in its supernatural flow. Even the simplest among them have powers beyond those of worldly mortals, bestowing simple tasks with an other-worldly enchantment.

Eladrin are among the heritors of the Feywild's nature. As humans and other races tamed portions of the world, so too did the eladrin subdue parts of the Feywild according to their fey temperament. They evolved a complex society, rich in crafts and traditions that also sing in concordance with the Feywild. As followers of mores inspired in elder days by the god Corellon, eladrin treat life and all its aspects as an art. Everything they do, wonderful or wicked, reflects this ideal.

Like their counterparts in the world, eladrin have had to fight and die to defend their way of life. Each eladrin learns to wield the longsword, the traditional weapon of the eladrin people. They have martial disciplines that teach an eladrin to channel the innate magic in his or her spirit, as well as that stored within the elements.

A blade from the Feywild or crafted by eladrin hands has a special beauty. The metal vibrates with bizarre potential. Some eladrin learn to make steel shaped into such a blade sing its heart's song. That song is a fey cry that portends loss of life, and those who wield it are known across the cosmos as blade banshees.

Over the years, you've developed a terrifying synergy with your blades. You understand the secret heart of fey-crafted steel. Its unmistakable, dread voice announces your displeasure. As you fight, your blades buzz and keen, unleashing rending vibrations against your foes. But when your soul is bent to friendship or mercy, your swords hum with your own gentleness, briefly bringing a bit of peace to others before shrieking into battle once again.

BLADE DANCER

“Clashing blades create the rhythm for our final dance.”

Prerequisite: Ranger

Halflings have long used music and a sense of fun to enliven physical labor and various dull tasks. When the race was young, they created dancelike movements that mimicked martial skills—and translated into deadliness in melee. Halflings learned that bladed weapons lent themselves easily to such a refined use. As their battle dances evolved, halflings began to consider the nimble use of a pair of bladed weapons a refinement of the style.

Halflings came to call skilled practitioners of this dual-weapon method blade dancers. The mingling of itinerant halflings with other peoples eventually made the blade dance famous. The blade-dancer way spread far and wide, and other folk adapted it to new weapon types. Today, numerous people know and teach the essentials of the method. The strictest masters require the student to show proficiency in combat as well as a love of life and wandering like that of halflings.

Halfling or not, you have put your body through a grueling regimen to attain mastery of the blade dance. Twin blades swirl about you like deadly veils. Intricate footwork allows you to dance in and out of danger with ease. Your weapons, like good dance partners, know where you want them to go almost before you do. One day, you and your weapons might dance your way into legend.

FERAL SPIRIT

"He doesn't like you. I don't like you either. Watch yourself—we both bite."

Prerequisites: Ranger, Beast Mastery class feature

To most mortals, an animal is a pet or a tool, a companion or a means to an end. Such creatures provide food, labor, protection, and even company. Only in rare cases does the relationship between master and beast transcend these mundane trappings. Every beastmaster is an exception to this generality, learning to become one formidable unit with an animal that is at once a friend, a guardian, and a weapon. Beastmasters know that, after the bond is formed, the capabilities and fate of master and beast are linked.

Beastmasters among many races have nurtured the mystical connection between master and pet. They cultivated communication that transcends speech and approaches telepathy. As such a beastmaster grew in power, the magic of the world infused the relationship. It bound the animal and mortal closer together, driven to do so by the devotion, ritual connection, and common cause the two shared. Contact among peoples spread this technique, which some claim originated with elves.

Elf or not, you've managed to foster such a transcendent relationship with your beast companion. Although each of you is fiercely independent and deadly, you share emotions and thoughts. Each knows when the other is in need. You work in unison to fell your foes, and even your allies swear you act to support each other more quickly than any communication could possibly allow. In time, you might grow

STEPHEN TAPPIN

so close as to seem like one incredible being sharing two bodies (see the Beastlord epic destiny, page 151).

GIANTSLAYER

“Don’t like being hit in the shins? Then bring your face down here!”

Prerequisite: Fighter or ranger

When the deities first called upon their mortal followers to take up arms against the primordials, the first giantslayers were among the heroes who joined the angelic legions. Not all who fought giants were deemed slayers, but a tough corps of warriors faced giants successfully time and again, thus earning the moniker their descendants use with pride to this day. They developed a battle style that proved effective against creatures larger than human size, as numerous monstrous beings are.

The giantslayer is, then, an intrepid warrior prepared to face enormous foes. Although plenty of other martial paths have more mundane applications, only the gutsy and the venturesome bother to train as giantslayers. Skill in a broad range of weaponry makes taking out big foes easier. Ranged attacks can hit the eyes or other hard-to-reach areas; melee weapons can be used to take out the legs, cutting a gigantic creature down to manageable size. Such a warrior is ever resourceful.

A giantslayer must also acknowledge that gruesome death is a possible end to his or her vocation. This fact, combined with the sheer audacity required for the job, means that most giantslayers are larger-than-life figures. Those who claim the title of giantslayer have a reputation for fighting hard and playing hard. Those who share the calling respect each other. Legitimate slayers police the ranks for charlatans, following up on rumors of fake giantslayers.

When it comes to being a giantslayer, you are the genuine article. Maybe you learned the trade from a mentor. Although some military organizations incorporate such techniques, no formalized tradition of giant slaying exists. The lessons learned on your past adventures might have been all the instruction you need. Fast, tough, and courageous, you know what it takes to cut down big opponents—even if that means going for a ride on one.

GIANTSLAYER PATH FEATURES

Giant-Slaying Action (11th level): When you spend an action point to take an extra action, you gain a +2 bonus to attack rolls and AC until the start of your next turn. Against Large or larger enemies, the bonus to AC is +4.

Through the Fingers (11th level): If a creature grabs you, you can make a melee basic attack against it as an opportunity action. If this attack hits, you can

make an escape attempt as a free action, with a bonus to the Acrobatics or the Athletics check equal to the damage dealt by the basic attack.

Small Target (16th level): You gain a +4 bonus to AC against opportunity attacks from Large or larger enemies and a +2 bonus to AC against opportunity attacks from Medium and smaller enemies.

Until you leave the target’s space, the target grants combat advantage to you and your allies and takes a -2 penalty to attack rolls, and you grant combat advantage to other enemies. Any attack that damages you also deals half the attack’s damage to the target. When the target moves, you move with it, staying in the same portion of the target’s space.

If the target hits you with a melee attack, it can slide you to a square adjacent to its space unless you succeed on a saving throw.

Special: If you’re trained in Athletics, you don’t grant combat advantage to other enemies because of being in the target’s space, and you can make a saving throw to negate any pull, push, or slide that would move you out of the target’s space.

HELLBORN SHADOW

“My ancestors gave much to learn the secrets of the Nine Hells. Why shouldn’t I benefit from their sacrifice?”

Prerequisites: Tiefling, ranger

Although you’re a being of this world, you’re cursed to carry the mark of an infernal pact made by your mortal ancestors. The weight of that heritage rests heavy on your soul. Yours has been the life of one apart—a life marred by the prejudice of others and of battle against foul creatures spawned from darkness.

You have long seen similar darkness within yourself, hiding it to avoid the hate of bigots or revealing it to evoke horror in your enemies. You have sought the ancient secrets of your people. You have overcome evil dreams and vile impulses to master your inner nature. Finally, you have tapped sinister knowledge of your immortal forebears to aid you in your quests.

It’s irrelevant whether you obtained these secrets in catacombs once lost to the ravages of time, within your own being, or from tormenting visions. The point is that you’ve learned to unleash some of your hidden potential by speaking words of power that few mortals know. With the baleful utterances you have learned, you can unleash pain, fire, and shadow. You can transform yourself momentarily into a form like that of your greatest ancestors and take to the air.

The darkness you have allowed to creep into your being now colors your exploits. Your heroic acts and your reputation, as well as those of your comrades, are tainted by the devilish legacy you have willingly tapped. HORIZON WALKER

"In time, these eyes will see all realms."

Prerequisite: Ranger

The world is vast, with few mapped places. It begs exploration, instilling wanderlust in brave hearts. Roving it is a test of skill and stamina, an ordeal that rewards the intrepid with amazing sights, exciting encounters, and more. Still, the world is only one place in the broader cosmos. Other planes also beckon to the curious wanderer. The trials and experiences they offer can defy the worldly imagination and force adaptation beyond mortal ken.

Horizon walker is the traditional name for a ceaseless roamer who seeks the unexplored regions of the universe. The appellation applies to members of a loose confederation of warriors who recognize one another as comrades on life's wondrous journey. Such travelers go from place to place, from plane to plane, developing their skills and a mystic connection with the environment. They return changed by their contact with other realms, and with knowledge to better protect the world most mortals know.

Then you fearlessly set out into the wider universe, using your skills and the magical nature of your tie to the world to develop similar bonds with the far reaches of creation.

PACK RUNNER

“To run with the pack is to be one with the pack.”

Prerequisites: Ranger, Beast Mastery class feature, beast companion (wolf)

Humanoids have taken clever beasts as companions since the beginning of time. The most prevalent among such animals are those from the canine family. Like humanoids, canines have a cooperative mentality and an established social order. It's not surprising that nearly every humanoid race that has the option to do so—from humans to goblins, eladrin to gnolls—keeps hounds or doglike beasts as pets.

Myth holds that, just as humanoids have adopted canines, so too have canines adopted humanoids. One such story is the tale of Kurngarl, or Kurn the Hunter. Soon enough after the fall of the tiefling empire that the hatred of that race was still widespread, unnamed human parents bore a tiefling child. The parents left the babe in an enchanted wood to die of exposure. By some twist of destiny—or, certain versions say, by Melora's fickle mercies—wolves found the infant instead. Yunulf, “the Lady of the Wolves,” added the human child to her litter, naming him Horned Man.

Kurngarl developed uncanny skills with nature while living with his wolf family, learning from a variety of other animals as well. Eventually, a dwarf explorer named Fargrim found Kurngarl and took the tiefling child to the ancient dwarven hold of Durigirn. The young tiefling then became a citizen of the dwarven hold and roamed the wilderness surrounding it. Even so, he acknowledged no dwarven name in place of the one his wolf mother had given him. That he translated literally into Dwarven, accepting only the nickname Kurn as an alternative.

Kurngarl had many adventures, almost all with his wolf brother Grabor by his side. Kurn and Grabor were renowned as hunters and trackers among the dwarves of Durigirn. They are also mentioned in the legends of other races, enjoying a heroic reputation for battling monsters, especially gnolls and giants. Kurn the Hunter is reputed to have turned the animals of the wilderness against unjust people in civilized areas. As such, he is held as an example by Melora's followers.

Despite differences in your life's history, like Kurn, you have a preternatural connection with a canine beast. You and your companion function as a deadly unit among the larger pack made up of your other allies. For its part, your companion has taken cues from you, developing a level of competence and guile rivaling that of some humanoids. You have taken the wildness of the wolf into your spirit. Those who observe the two of you together find it hard to tell where the line between humanoid and beast is drawn.

RUTHLESS PUNISHER

“The most dangerous foes are those who know the difference between right and wrong yet choose to do evil. They also understand what dying really means.”

Prerequisite: Ranger

For a mundane hunter or a common would-be hero, ordinary animals and beastlike monsters are worthy prey. Regardless of what such a creature is physically capable of, or the wrongs it's responsible for, it has only raw instinct or brutish cunning to use against its antagonist. Reaction is its only course. The beast lacks the abilities to reason and to plan, which are required for any but the most mindless of evil acts.

Humanoid creatures seldom suffer from this lack, this banality. Even a semblance of human intelligence, combined with the ability to use weapons and other skills, makes an adversary that much more dangerous. From common goblins to demon lords and deities, the most numerous wicked creatures in the cosmos live inside various humanoid frames. The form is similar enough in each instance that knowledge of one is a help against another, no matter how different the seeming. Malevolent or not, few creatures offer the challenge that a humanoid quarry does.

Long ago, whether for vengeance, righteousness, or pure gamesmanship, you chose to specialize in facing and taking out humanoid foes. You excel at tracking and opposing such canny foes, slaying the many who deserve death and retrieving a few for reward, profit, or justice. For you, the understanding of anatomy, the inflicting of pain, and the invoking of fear are weapons as effective as sword or bow.

You've been so successful that you have developed a merciless reputation. The mention of your name inspires terror among those who know they must face you. One day, you're sure, a humanoid adversary of mythic scope will tremble at your approach.

RUTHLESS PUNISHER PATH FEATURES

Ruthless Action (11th level): You can spend an action point to reroll any attack roll against a humanoid target designated as your quarry, instead of taking an extra action.

Most Dangerous Prey (11th level): Against any humanoid target designated as your quarry, you gain a bonus to damage rolls equal to your Wisdom modifier.

Ongoing Punishment (16th level): You gain a bonus to the ongoing damage you deal equal to your Wisdom modifier. You also gain combat advantage against humanoid enemies that are taking ongoing damage.

RUTHLESS PUNISHER EXPLOITS

SHARPSHOOTER

"The faster they come, the sooner I shoot 'em down."

Prerequisite: Ranger

Mastery of a chosen armament is a long-standing tradition among many peoples. Legends are full of examples: the fighter who is one with his sword or the assassin who can't miss with knives. Fables also tell of those who have consummate proficiency with the bow or the crossbow.

Some warriors acquire skill with the bow to avoid close combat. Others do so because ability and purpose lead them that way. Archers work for all sorts of causes, military to mercenary, noble to malevolent. One example is the battlefield archer (*Player's Handbook*), a tactical shooter that works well in the chaos of small-unit combat.

Unlike other archers, the sharpshooter's purpose is to become legendary for accuracy and skill, as well as for the number and sorts of foes defeated. Quick shooting, accuracy, and deadliness are the sharpshooter's trademarks, along with the ability to use a bow or a crossbow in ways that few others can. Some who would become the ultimate sharpshooter look for other archers to challenge in contests of skill or even in duels to the death.

You have honed your bow or crossbow skills with a desire to become the best of the best. You fire faster than most folk would think possible. When enemies try to move in close and shut you down, you shoot on without compromising defense. Those who watch you work could swear your arrows are alive. One day, you'll be targeting that one enemy whose defeat will make you a legend.

SYLVAN ARCHER

“Drawing the bowstring is a spiritual oath. The flight of the arrow is its fulfillment.”

Prerequisites: Elf, ranger

Like their eladrin cousins, elves have the time and the will to give everything they do a complex expression. To them, something worth doing at all is worth doing better than well—it’s worth total dedication of body, mind, and soul. Any task merits mastering to the extent that the very process of doing it, even in training, is beautiful. Further, to the fey mind, combining seemingly disparate arts and joys into one form creates something more beautiful in the end. This is as true of archery as it is of any other activity.

Ages ago, after they entered the world and became separated from the eladrin, elves found it necessary to survive in the hostile wilds. Grace and awareness became their strengths. The bow became their chosen weapon for hunting and stealthy warfare.

The magic flowing in the fey soul has enabled more than one elf to forge a spiritual tie with the bow. Such archers are practiced at engaging targets in dense forests and areas fraught with cover. The sound of an enemy bowstring being drawn or the hint of movement in the undergrowth is enough to draw a reactive shot faster than any intended attack can come. A master of elven archery easily deals with multiple foes, and in time develops the uncanny ability to make arrows literally track their targets. Elven arrows can be said literally to have an enemy’s name on them.

You carry on this glorious tradition. Stalking in untamed and dangerous places armed with only quiver and bow, you have become an exemplar of elven marksmanship. Your finely honed senses are second to none, and your aim is ever true. Among the most formidable of hunters, you have a shooting expertise that transcends the mundane skill of other archers. Your spirit reaches out to inform you of the unseen. If your skill and your amazing deeds carry you farther, elves who come to the way of the bow after you will hold you as the example that guides them.

WILDCAT STALKER

"This cat is subtle and fierce, just like its master."

Prerequisites: Ranger, Beast Mastery class feature, beast companion (cat)

Independence, courage, and quickness of mind and body—the cat symbolizes all of these traits. It prefers to watch the world carefully from a good vantage before acting decisively. Normally calm and fastidiously clean, a feline loves to play but fights fearlessly when it must. It is a stealthy hunter that specializes in ambushes and deadly rushes, finishing its prey as quickly as possible. When surrounded by friends, the cat is industrious and protective, sharing what it has.

You see yourself in the cat, or a little of the cat in yourself. You too are a careful and swift hunter, with catlike grace and bravery. Surprise and swift attacks are your specialty, and few compare to you in your self-sufficiency.

Maybe that's why you chose a wild cat as a companion (or perhaps it was the cat that picked you). You have developed your feline qualities, growing in awareness, slyness, and sneakiness. Your beast companion has become a strong warrior at your side, using its predatory skills to bring down your common adversaries as if they were game.

As word of your deeds spreads, your cat's fame grows with yours. It has become an emblem that identifies you among those you meet, affect, and oppose. When your story is done, your cat will stand beside you in mythic chronicles, as if you and it were one.

ROGUE

“Many learn to break legs; a few learn to break wills. Some master deception, others agility. Me? I’ve got it all. Just tell me what you need done.”

THE WORD “rogue” has many meanings, and those who fall into this class are as varied. Plenty of rogues grow up on the street, honing their talents to become hard-nosed toughs or sharp grifters. Others—foppish nobles or venturesome rakes with more cunning with a blade and the tongue than scruples—come from the opposite end of the social ladder. Many rogues grow up connected to the underworld and absorb those values. Some come from noncriminal backgrounds, developing skills that serve well in risky ventures. A few are or were spies or scouts for other powerful people or creatures.

You could be a rogue who relies on brute force or deception to get your way. Or you might possess great skill and fighting prowess. Perhaps you or your circumstances shaped you into someone who knows how to coerce others through threats, implied or direct.

This chapter supports the rogue builds presented in the *Player’s Handbook*. It’s also intended to support other sorts of rogue builds. It contains the following information.

- ◆ **New Rogue Builds:** The aerialist and the cut-throat offer two new ways to fulfill your function, which, of course, is to quickly finish off your enemies.
- ◆ **New Class Feature:** You now have three rogue tactics options to choose from, including the new Ruthless Ruffian.
- ◆ **New Rogue Powers:** Be cruel, be fast, or be both with a new array of exploits that reward one of numerous combat styles. Powers that have the rattling keyword leave your foes shaking in their boots.
- ◆ **New Paragon Paths:** Perfect your sort of skulduggery by choosing one of twelve new roguish paths. Be the lethal shot in the dark, teach your knives to take wing, swashbuckle, or deal death as an agent of the Raven Queen.

This book introduces two rogue builds: the aerialist and the cutthroat. The aerialist is a mobile striker who relies on the Acrobatics skill for an edge in attacks and maneuvers, whereas the cutthroat is a charming killer, using training in Intimidate to rattle foes.

AERIALIST ROGUE

All rogues are known for their agility and daring, but you take both to the next level. Ducking under a giant's club isn't enough; you leap over it and cartwheel to safety. You're a masterful mover and an expert top-story burglar, using your abilities to tumble into the fray, into high openings, and out of all sorts of tight spots. Dexterity is your primary ability score, because you rely on it for your attacks and acrobatic stunts. Charisma is secondary for you, useful in avoiding opportunity attacks if you employ the Artful Dodger tactic. Strength serves you well as a tertiary ability, helping your Athletics checks in particular.

Suggested Feat: Defensive Mobility (Human feat: Sure Climber)

Suggested Skills: Acrobatics, Athletics, Bluff, Perception, Stealth, Thievery

Suggested At-Will Powers: *deft strike*, *riposte strike*

Suggested Encounter Power: *fox's gambit**

Suggested Daily Power: *handspring assault**

*New option presented in this book

CUTTHROAT ROGUE

Leave smiles and misdirection to the tricksters. Instead, you use your animal magnetism in a more beastly way, oozing menace and implying a willingness to allow those who cross you to linger in pain. A friendly manner is for the weak; you achieve your way through tough words, hard looks, and the ability to back up either. Your attacks use Dexterity, so that should be your highest ability score. Charisma follows as a close second, essential for getting your way by using Intimidate. Strength comes in third; it's useful in delivering brutal attacks if you employ the Ruthless Ruffian tactic.

Suggested Feat: Press the Advantage (Human feat: Backstabber)

Suggested Skills: Bluff, Insight, Intimidate, Stealth, Streetwise, Thievery

Suggested At-Will Powers: *disheartening strike**, *sly flourish*

Suggested Encounter Power: *termination threat**

Suggested Daily Power: *checking jab**

*New option presented in this book

NEW CLASS FEATURE

Instead of selecting either Artful Dodger or Brutal Scoundrel as your rogue tactic, you can select Ruthless Ruffian.

Ruthless Ruffian: You are proficient with the club and the mace, and you can use those weapons with Sneak Attack or any rogue power that normally requires a light blade. If you use a club or a mace to deliver an attack that has the rattling keyword, add your Strength modifier to the damage roll.

NEW ROGUE POWERS

A rogue thrives on audacious exploits that keep the enemy guessing. An aerialist rogue, perhaps even more than other sorts of rogues, relies on powers that focus on skill and movement. If you're a cutthroat, you like exploits that focus your dark personality, especially those that have the rattling keyword. Nothing stops any rogue from dabbling in the new powers here. In fact, if you're a rogue worth your salt, one or more of these powers is bound to be just the trick you need to round out your repertoire.

NEW KEYWORD

Some powers in this chapter use the new rattling keyword.

Rattling: If you are trained in Intimidate and you deal damage with an attack that has this keyword, the target takes a -2 penalty to attack rolls until the end of your next turn. A creature immune to fear is not subject to this penalty.

The swashbuckler's creed—"Luck favors the bold"—is part of Avandra's teachings. Daring rogues are more likely to thank her for good luck received than ask for it in advance. Through decisive action, they claim her luck as their own.

NEW PARAGON PATHS

CLOAKED SNIPER

“You tell me—is it better to win with a shot from the dark or to lose up close?”

Prerequisites: Rogue, trained in Stealth

The advantage of getting the drop on an enemy is acknowledged far and wide. Equally prized is the benefit of taking out important targets with little risk. No one is better at accomplishing either task than a trained sharpshooter, and the sharpshooter’s weapon of choice is the crossbow.

Nations and mercenary groups train specialized soldiers to use crossbows in this fashion. Underworld organizations do the same. Any such soldier is essentially an assassin who knows how to use a crossbow to slay from a distance without attracting notice. Dwarves in particular prize this exception to their normally straightforward battle tactics. That race produces fine snipers.

Such shooters don’t shy away from a normal fight. They understand that reconnaissance and a plan, along with the ability to strike unseen from a great distance, are great advantages in a combat situation. A good ambush leaves the enemy weakened and confused, giving any follow-up assault a better chance of working.

You have chosen to hone your skills along these lines. You prefer to strike from hiding with a well-placed shot and to remain unobserved during a confrontation, aiding your allies by picking off foes without ever drawing notice. The hand crossbow is your preferred weapon.

Sniping is the ultimate tactic for you. The sound of a bolt finding its target is the sweet toll of victory. A bolt you fire might take out a sentry in a single hit, as well as sending your enemies scurrying for cover. If you miss, no matter. You can slink back into the shadows until you have a chance to shoot again.

CLOAKED SNIPER PATH FEATURES

Crossbow Savant (11th level): You add 5 squares to the normal range of any crossbow you wield and 10 squares to the long range. Treat a hand crossbow as an off-hand weapon, and treat any crossbow that has the load minor property as having the load free property instead.

Sniper Action (11th level): When you spend an action point to make a ranged basic attack and you have combat advantage against the target of the attack, you can add your Sneak Attack damage even if you have already dealt Sneak Attack damage during this round. If the attack hits, you can shift 1 square.

Versatile Combatant (16th level): When you are armed with a melee weapon in your main hand and a hand crossbow in your off hand, you do not provoke opportunity attacks when attacking with your hand crossbow.

DARING ACROBAT

“Agile movement is as much offensive as it is defensive.”

Prerequisites: Rogue, trained in Acrobatics

Acrobatics is a widespread and popular talent. All people, from nobles to peasants, enjoy acrobatics shows, whether amid the finery of court or the debris of the street. A few venturesome religious rites, especially those that pay homage to Avandra or Kord, require the skill. Mastery of the body is part of numerous education philosophies, and acrobatics is unmatched in cultivating fitness and balance. Thieves and burglars use the skill to ply their trade. Training is easy to find and widely accepted. Some youngsters attain a level of mastery well before they reach adolescence.

Not to be underestimated is the value of such proficiency on the battlefield. A combatant who is adept at acrobatics can maneuver like no other. The adroit use of the skill opens up advantages that other warriors can't attain and allows the acrobat to avoid being pinned down. Movement becomes quicker and smoother as the acrobat uses the whole body as a tool, rather than just relying on the feet and the legs. It's obvious why some martial training includes instruction in acrobatics.

It's also clear that the adventurer has even more use for acrobatics than a warrior or a soldier does. Explorers routinely face perils that are best overcome with agility, poise, and a sense of one's body. More than one fortune seeker owes life and limb to his dedicated schooling in acrobatics.

To say that of you is a gross understatement, however. It doesn't matter if you came by your skill in a formal academy, from family tradition, or through the school of hard knocks. You have made acrobatics not only an art form, but also a martial style all your own.

You flabbergast friend and foe alike with your talent. Using it, you routinely accomplish tricks that seem beyond mortal capacity. With your flamboyant derring-do, you deliver terrible attacks and deftly capitalize on the smallest openings.

DEATH DEALER

“Killing’s my game.”

Prerequisite: Rogue

Some people are born killers. That penchant can be channeled in as many ways as there are reasons for slaughter. Some slay for religion or creed, others for power or influence, and still others for money, vengeance, glory, or just plain relief. Many who have a knack for murder take up violent professions, from soldier or town guard to gladiator or assassin. A few, whatever their reasons, make a career out of slaying monsters.

Killing is grim business, no matter who or what ends up dead. Nobody takes going to the grave lightly. Hands-off methods, such as poison, can sometimes work, as can stealthy techniques. Otherwise, direct and bloody conflict is the only way to go about butchery.

Strangely, a lot of would-be killers think that combat has rules. You know differently: In battle, fair play, honor, and mercy are for chumps. Fighting is all about dancing with death and being one of those still standing when the music ends. Maybe you came by your “philosophy” while being schooled as an assassin or hired sword. Of course, an adventurer’s life has plenty of object lessons along the same lines: Kill or be killed.

When you start a fight, you take a little time to size up the competition. After that, it’s all bloody business.

If someone has the nerve to attack you, you make that fool pay in such a way that anyone watching will think twice about facing you. Nobody escapes you unless they have the ability to take you out of the fight, or you want the story of your prowess to get around.

However you gained your skills, they are honed in accordance with your brutal creed. Those who go up against you risk everything. As proven by the boost you sometimes get from brutalizing our adversaries, you take at least a little pleasure in your work.

DEATH DEALER PATH FEATURES

DREAD FANG

“You’re caught in my web of shadows, poor little insect. Now it’s time to die.”

Prerequisites: Drow, rogue

Deceive your prey into a weak tactical position. Strike without being seen. Kill without allowing a counter-attack. Don’t sever a limb when you can cut off the head. Reward your enemies with death so horrifying that all others fear to oppose you. Live to fight again. All of these are drow rules of warfare, which young drow learn well just to get by in their treacherous society.

The drow are famous for slaughter, murdering all who get in their way. Countless folk have suffered the cruel kiss of a drow priestess’s whip or the vile magic of a drow warlock. Innumerable slaves have lived and died as the wicked and capricious whims of their drow masters demanded. From this world you have come, and like others before you, you have found sanctuary in the arts of death. You learned the rudiments of drow warfare among your school-age peers. You mastered the blade-and-crossbow fighting style of the drow warrior to improve your station among your people. Better to be a valued killer than a slave or a sacrifice.

Maybe you smelled the deceptions and half-truths in your society, put up with the lies of the Spider

BETH TROTT

Queen, until you could take no more. Perhaps the internecine warfare between drow houses left you without allies in the vast Underdark. You abandoned your past. Estranged from your homeland, you joined with other wanderers and continued your training. You have sought to become death incarnate and have succeeded well beyond the normal warriors of your people.

DREAD FANG PATH FEATURES

Spider Assassin (11th level): You deal one extra die of Sneak Attack damage against a target that could not see you at the start of your turn.

FLYING-BLADE ADEPT

“Any monkey can stab someone. Now, throwing to kill—that’s got style.”

Prerequisites: Rogue, Quick Draw feat

Among common folk, knife and shuriken throwing are forms of entertainment and sport. Competitors throw under calm conditions at stationary targets. At the extreme, carnival throwers toss blades at a moving mark, or sport throwers have to put up with rowdy onlookers and too much drink.

It takes a special breed of warrior to specialize in throwing blades in actual combat. The clash of steel, the rush of magical forces, and the screams of the wounded and dying are far more than tap-room distractions. Moreover, the idea of tossing away a weapon seems tantamount to suicide. Still, anyone who has mastered the technique of hurling blades in battle knows that doing so helps to keep one out of harm’s way.

Being such an expert takes guts, discernment, smarts, and quickness. The hurler must be brave enough to throw away a weapon, and to stand fast when the enemy recognizes the danger that he or she presents. The thrower’s senses must be accurate enough to discern when to move and where. Furthermore, perception is nothing without the good judgment to exploit opportunities and to carry the right array of blades. And all this means little if the wielder lacks the agility or speed to take advantage of whatever battle situation arises.

You are such an expert with light thrown blades. Swift enough to draw weapons in rapid succession and to knock an arrow out of the air, you have little to fear when you throw a blade. Your talent allows you to hit with terrifying accuracy, to bounce your blades off one target and into another, and even to punch holes in enemy armor. You have even been known to throw so quickly that you can hit every target in your field of vision.

FLYING-BLADE ADEPT PATH FEATURES

Deadeye Blade (11th level): When you throw a light blade, it has the high crit property.

Flying-Blade Action (11th level): When you spend an action point to take an extra action, you can also make a ranged basic attack with a light blade as a free action.

GUILDMASTER THIEF

“Me and my crew, we’ll get the job done. Top-story jobs to shakedown—we’re all in.”

Prerequisites: Rogue, trained in Thievery

Whoever says crime doesn’t pay just isn’t good enough to pull it off. For the organized and resourceful, there’s always an angle.

Thieves’ guilds are criminal gangs that crop up mostly in urban areas. A single guild might manage or influence illegal activities such as assassination, blackmail, burglary, espionage, fencing stolen goods, grifting, smuggling, loan sharking, pickpocketing, piracy, racketeering, robbery, thuggery, and so on. A guild might also direct legal enterprises as legitimate business ventures, as cover, or as a way to control the flow of information. For instance, many thieves’ guilds have their fingers in begging, bounty hunting, mercenary work, gambling, prostitution, shipping, and even street cleaning and lamp lighting.

Because a guild’s business can be so varied, and because it often has trouble with legal authorities and rival gangs, it must divide its profitable interests between various centers of control. Those centers have bosses, who report to those higher in the chain of command. Thus, guilds have complicated hierarchies, clear divisions of authority, and codes of behavior that can border on downright law-abiding in some respects. A guildmaster typically leads a portion of a guild, and some guilds have a grand master who oversees a guild’s entire operation.

You might be an actual guildmaster, or maybe you grew up in the criminal world and know what’s what on the street and in a brawl. Your experience has left you able to run a criminal crew on jobs and in fights. You’re a great skirmisher who knows how to get a job done right while helping out your pals with some “world-wise management.”

GUILDMASTER THIEF PATH FEATURES

Guildmaster’s Action (11th level): When you spend an action point to take an extra action, instead of deducting the action point from your total you can deduct it from the total of any willing ally you can see. Similarly, as long as you are willing and conscious, any ally who can see you can deduct an action point from your total instead of from his or her total when spending an action point to take an extra action. The normal limit of action points spent during an encounter still applies.

Whenever you spend an ally’s action point to take an extra action, you gain a +2 bonus to attack rolls until the start of your next turn.

Thieving Crew (11th level): Allies within 5 squares of you gain a +2 bonus to Stealth checks and Thievery checks.

HALFLING QUICKBLADE

"I told you once, mate. I'm the fastest blade there is. Ain't braggin' if it's true."

Prerequisites: Halfling, rogue

Halflings have a long tradition of using light blades with great skill. Whether a tool of survival or an implement of battle, the simple dagger has much to recommend it. Even one as small as a halfling can hide a dagger on the body for use in a tight spot. A small body coupled with a small weapon means greater mobility and deadliness enhanced by a better chance for stealthy attacks.

Halflings also have a history of using light blades in their art and performances. Carving, acrobatic blade tricks, knife juggling, dagger throwing, and even dances that incorporate blades are common among halflings. For them, such activities are a natural meeting of physical traits and handy tools.

As with almost every other aspect of their life, halflings have a variety of stories that explain their propensity for using blades. Such yarns include the daring tales of Barras Quickblade, whose surname is probably one of convenient fiction.

Barras's legend begins when he was a lad who provided for his clan by stalking game with nothing but a

knife and his wits. The legend grows into a spirited saga of an adventurous halfling who, along with a band of other intrepid characters, confronts ogres, yuan-ti, and worse with a tongue as pointed as his blade.

In the end, most stories have it that Barras sacrificed himself to save his comrades by leading a group of fomorians on a reckless chase through the Feywild. Darker versions say that Barras's spirit is still trapped, kept prisoner by the twisted fey. Halflings prefer to think that he passed from the world and that he stands at Avandra's side as her immortal companion.

You have the flair and the growing reputation to be a quickblade. Your fighting style is like that of your celebrated forebear. Perhaps, given time, your legend will be even greater.

HALFLING QUICKBLADE PATH FEATURES

First Cut (11th level): When you have combat advantage due to your First Strike class feature, add 1 to each die of Sneak Attack damage dealt by the attack.

Chancy Action (11th level): You can spend an action point to regain the use of the *second chance* racial power, instead of taking an extra action.

MASTER SPY

"I've seen the things you never intended me to see, heard whispers meant only for your conspirators. I know you well enough to take you down."

Prerequisite: Rogue

In halls of power, on the field of battle, and even among those who seek what is long lost, reliable information is king. Those in the know have an advantage over their allies and enemies and readily know the difference between the two. Thus have persons skilled in acquiring secrets always had ample work and reasons to hone their skills. Such agents learn how to conceal their true motives and cover their tracks while focusing on attaining their goals. Any lapse in precision can mean death.

Long ago, you learned how to sneak into places where you're not welcome. No secret is safe from your expertise and trickery. Subterfuge is your stock-in-trade. You know how best to peer into the intentions of your enemies, and you work undercover with the greatest of ease. Most of your enemies never know that you are in their midst, and you always manage to turn their ignorance against them.

MASTER SPY PATH FEATURES

Cover Action (11th level): Whenever you spend an action point to take an extra action, you gain concealment at the end of that action. Until the end of your next turn, you have concealment and take no

STEVE ELLIS

penalty to Stealth checks for moving more than 2 squares or for running.

Deadly Bluff (11th level): You can make a Bluff check to gain combat advantage against an adjacent enemy as a minor action instead of as a standard action (*Player's Handbook*, page 183). If your check beats the enemy's Insight check, the enemy grants combat advantage to you and your allies until the end of your next turn.

Double Agent (16th level): Once per encounter, when an enemy you can see targets one of its allies with a power or an ability, you can choose to gain the benefit of that power or ability as if you were one of its targets as well.

You slip your weapon past your enemy's defenses, using your knowledge of its tactics to stay one step ahead.

RAKISH SWASHBUCKLER

“With a face like that, it’s no wonder your mother loves me best!”

Prerequisite: Rogue

Life is too short to take seriously. Danger lurks in every shadow, and an enemy waits behind every door. Those who spend every waking moment thinking about all the bad things that could happen never leave the house.

Instead of wringing your hands, you throw away all your worries and take a devil-may-care attitude. Sure, some say you will end up raking the coals of the Nine Hells because of your decadent living. In the end, though, who’s the happier: you and your adventurous, libertine ways or the hidebound drudge shuddering under his covers?

On one hand, you’re a charmer. Others find your infectious wit and bravado winsome. But you’re also irreverent, irresponsible, and reckless. What’s worst is that sometimes you have the hardest time keeping your mouth shut. Whether cracking a joke in the middle of a solemn funeral or shouting a barrage of insults at a demon, you can’t help but stir up trouble. Deep down, you know life might be easier if you straightened up, but where’s the fun in that?

When you face a serious challenge, your skill with weapons comes to the fore. Your tongue and your body language become secondary instruments of derision. You seed your exploits with cutting insults and disdain, goading your enemies into overextending or making other mistakes. When an enemy gives you an opening, you press the advantage. In the end, you stand triumphantly over a fallen foe, showing once again who the greater fool is.

RAKISH SWASHBUCKLER PATH FEATURES

Incorrigible Action (11th level): Whenever you spend an action point to take an extra action, enemies take a –2 penalty to attack rolls against you until the start of your next turn.

Vexing Foe (11th level): Enemies marked by anyone other than you take a –2 penalty to attack rolls against you (this is in addition to the penalty from being marked). Enemies marked by you grant combat advantage to your allies.

Dastardly Opportunist (16th level): Whenever an ally scores a critical hit against an enemy adjacent to you, you can make a melee basic attack against that enemy as an immediate reaction.

RAKISH SWASHBUCKLER EXPLOITS

Mocking Footwork Rakish Swashbuckler Utility 12

A derisive combat style keeps foes off balance.

Daily ♦ **Martial, Stance**

Minor Action **Personal**

Effect: Until the stance ends, each time you hit an enemy that you have combat advantage against, you can either shift 1 square or slide the enemy 1 square.

Your scornful manner puts your foe on the defensive, allowing you to make a sharp follow-up.

Requirement: You must be wielding a light blade.

Target: One creature

Primary Attack: Charisma vs. Will

Hit: The target is weakened and slowed (save ends both).

Miss: The target is slowed until the end of its next turn.

Effect: Make a secondary attack against the target. The target is then marked until the end of the encounter, until you are knocked unconscious, or until another mark supersedes this one.

Secondary Attack: Dexterity vs. Reflex. If the primary attack hit, you have combat advantage against the target.

Hit: 2[W] + Dexterity modifier damage.

RAVEN HERALD

"All beings come to an end. Seeing to that is my task."

Prerequisites: Rogue, must worship the Raven Queen

The transition to death is a holy road on which all living things are pilgrims. Every creature steps onto that road at birth. When fate's appointed hour comes, every creature steps off into whatever waits beyond the finite and visible path. So it has been, and so it should be. These are the truths of the Raven Queen.

Yet some do not hold to the proper path. Brazen mortals defy the natural order by avoiding that righteous hour of ending. A few do so by magic or other means, the most common of which is to become undead.

Undead aren't, in and of themselves, offensive to the Raven Queen. Still, shambling dead brought back to a mockery of life through foul magic deserve to be destroyed. So do those undead that defy true death by serving other entities, such as Orcus or Vecna. A few bold souls manage to elude death without otherwise blaspheming the Raven Queen's edicts. Still, demise must come for them in time as well.

It is the duty of any who serve the Raven Queen to bring down the proud, showing them the equality that only death provides. Within temples where the Raven Queen is esteemed above all others, the clergy offers support and training for those who would be her instruments of death. Cults form around the ideal of righteous killing, of becoming heralds of death. Common folk know of the Raven Queen's heralds and

RON LEWEN

whisper of their mission when sudden loss of life visits the prideful, the wicked, or those cursed by undeath.

You have consciously devoted yourself to becoming a tool in the Raven Queen's wintry hands. Perhaps you came to this commitment on your own, or maybe you have an affiliation with the Raven Queen's hierarchy in the world. The origin of your connection to the mistress of winter makes little difference. As a harbinger of destiny, you know that every foe who falls before you has met its appropriate end.

RAVEN HERALD PATH FEATURES

Death Rites (11th level): You gain the Ritual Caster feat and training in Religion. You also gain a +4 bonus to death saving throws.

Slaying Action (11th level): When you spend an action point to make a melee basic attack against an adjacent enemy that is bloodied or has the undead keyword, you gain a +2 bonus to the attack roll.

STRONG-ARM ENFORCER

"This is going to hurt you a lot more than it hurts me."

Prerequisites: Rogue, trained in Intimidate

The world has no shortage of bullies. In every town and every neighborhood roams a lout with more muscle than sense, and more bravado than backbone. Every gang has an enforcer or a leg breaker. Yet it takes more than a mean streak and a hard head to rise above mere thuggery.

Unlike such roughnecks, who are so often craven at heart, you have cold iron beneath your hardened visage. You have the skill and the mettle to make good on threats you offer. Intimidation, to you, is just fair warning, an omen foretelling the cost of crossing you.

Like most of your kind, you might have started with a criminal outfit or learned how to get along in the harsh training ground of the streets. Such unsavory surroundings taught you to survive. A reputation for handing out grim rewards to your enemies slowly enabled you to avoid fights through the use of your bladed stare. For a few of you, formal training as an interrogator or operative taught you to use fear and pain as a principal means of getting the job done. In any case, fear is as useful in battle as it is outside it.

You have set your mind to this harsh fact and have realized that most interactions are all about getting in and getting out on top. If the other guy believes you can and will hurt him if you need to, dealings are much more likely to go in your favor.

Although stealth and subterfuge have uses, combat isn't a subtle solution. You favor techniques that keep your enemies shaken. A traumatized, fearful, or angry foe is more likely to make a mistake. Encouraging such missteps—gleefully at times—you make yourself a target through your brutality. Then you and your allies capitalize on those slip-ups to win the day.

STRONG-ARM ENFORCER PATH FEATURES

Promise of Pain (11th level): When you spend an action point to take an extra action, attacks you make until the start of your next turn gain the rattling keyword.

Vicious Courage (11th level): When you hit with a rattling attack and have combat advantage against the target, you gain temporary hit points equal to your Charisma modifier.

Strong-Arm Mark (16th level): When you hit with a rattling attack and have combat advantage against the target, you can choose to mark the target until the end of your next turn. Until the end of your next turn, you also gain a bonus to damage rolls against the target equal to your Charisma modifier.

Miss: Half damage, and no secondary attack.

TIEFLING HELLSTALKER

"Manifestations of the darkest flames of Hell cover me. You'll see the genuine article soon enough."

Prerequisites: Tiefling, rogue

Supernatural might comes naturally to a tiefling. Blood tied to the dark history of devils makes the reason for this obvious. In a vestigial form, this power lends vehemence to a tiefling's retaliation against attackers. History has shown that a tiefling who wishes to do so can reach inward for even more power, manifesting it in a variety of ways.

Those ways are mirrored in devils and their home. When mortals speak of the Nine Hells, they refer to fire, smoke, and the burning wrath of fiends. But the truth is more complex. The hells have ice, storms, and shadow. They even have combinations of these, the elements mixing in strange and unnatural ways to produce oddities such as lightless fire.

Some tieflings prefer to live up to expectations, displaying talent with anger and flame. They evoke terror by playing the devil's part. But they lack subtlety, which is a devil's best tool. They fail to acknowledge that mortals most fear what they can't see.

RON LEMEN

Drawing on the darkness within, a darkness that extends from the hells, a tiefling can gain uncanny advantages against enemies. Eyes can be dimmed, darkness and invisibility can be pierced, and flesh can be burned without light.

You know this, because you have learned to summon the darkness enshrouding your soul. By coupling it with your deadly martial skills, you become a terror in lightless halls under the earth, as well as on shadowed streets and in moonless wilds. Where light does find you, you snuff it in the sight of your foes. Eventually, the shadows you call up will be able to, at times, burn your enemies like extraplanar blackfire.

TIEFLING HELLSTALKER PATH FEATURES

Hell's Shadows (11th level): When you have concealment or total concealment, you gain a +1 bonus to all defenses.

Hellstalker Action (11th level): You can spend an action point to gain concealment until the end of your next turn, instead of taking an extra action.

Gloom Wrath (16th level): Your *infernal wrath* racial power also grants combat advantage to you for your next attack roll against an enemy that hit you since your last turn.

TIEFLING HELLSTALKER EXPLOITS

Dimming Blow Tiefling Hellstalker Attack 11

Daily ♦ **Martial**

Minor Action **Personal**

WARLORD

“Recklessness is still a tactical choice, and adaptability is an asset to any leader. If putting your own skin on the line saves your friends some pain, I say recklessness is more fun.”

WHETHER CALLED to lead by talent or fate, or trained to lead as a soldier or a noble, a warlord must always acknowledge the importance of the team. A warlord forms the core of a squad, using martial know-how to manipulate any battle toward a favorable outcome. The notion of martial leadership includes countless techniques of command. Raw charisma can push allies to new heights, and strategic genius can create triumph where none seems possible. However, those are only two possibilities among many.

You could be the kind of leader who likes hard-hitting tactics and living on the edge. Maybe you just prefer to risk yourself rather than your friends, knowing that you have the guile and strength to pull off your style of daring leadership. Instead, you might prefer to play it fast and loose, observing the tactical situation and solving the problem with astounding ingenuity.

Rouse your allies to wrath and determination, come up with incisive tactics on the fly, create openings with your headlong rushes, or mix and match your strategies. No matter how you prefer to lead your allies to victory, this chapter is for you. In it, you'll find the following information.

- ◆ **New Warlord Builds:** Charge into battle as an aggressive bravura warlord, or test your creativity and battle acumen as a resourceful warlord.
- ◆ **New Class Features:** Two alternative choices give you the opportunity to focus your warlord even more sharply on one of the new builds.
- ◆ **New Warlord Powers:** Trick your enemies into overextending, and then make them pay. If you prefer more subtle methods, the exploits in this section also have you and your allies covered.
- ◆ **New Paragon Paths:** Channel your knack for leading into one of twelve new paths. Lead by following the example of a deity, march to traditional methods set by legendary generals, or let the law of the frontier be your guide.

NEW WARLORD BUILDS

As alternatives to the warlord builds described in the *Player's Handbook*, this chapter presents two types of warlords and two groups of warlord powers that explore new leadership approaches. The bravura warlord centers on one set of these powers and the resourceful warlord on the other. These new powers can be useful to any warlord, however.

BRAVURA WARLORD

You lead through a combination of daring attacks and aggressive tactics. Using your powers is risky, but the rewards for success are great. You help your allies find the nerve to profit from bold maneuvers and punch into enemies head-on. Compared to other warlords, you're oriented more toward handling heavy fighting yourself, and your attack powers rely mainly on Strength. Charisma is your second priority, for it lets you get away with your audacious stunts yet maintain the respect of your comrades. Mental acuity and quick reflexes in battle are valuable to any warlord, so Intelligence is also important to you. The Bravura Presence class feature is designed to complement this build.

Suggested Feat: Improved Bravura* (Human feat: Action Surge)

Suggested Skills: Endurance, Heal, History, Intimidate

Suggested At-Will Powers: *brash assault*, **furious smash*

Suggested Encounter Power: *luring focus**

Suggested Daily Power: *fearless rescue**

*New option presented in this book

RESOURCEFUL WARLORD

You don't limit yourself to a particular set of tactics, instead adapting to the mistakes and openings your enemies provide and endeavoring to create opportunities. You lead through a diverse selection of shouted commands, ongoing stratagems, martial stances, and flexible plans. Allies can expect help in a wide variety of circumstances. As is typical for a warlord, Strength is your primary ability, but your powers make use of Intelligence and Charisma, encouraging you to pick and choose among the powers that other traditions have to offer. The Resourceful Presence class feature is designed to complement this build.

Suggested Feat: Improved Resources* (Human feat: Durable)

Suggested Skills: Athletics, Diplomacy, Endurance, Heal

Suggested At-Will Powers: *commander's strike*, *opening shove**

Suggested Encounter Power: *hammer formation**

Suggested Daily Power: *calculated assault**

*New option presented in this book

NEW CLASS FEATURES

These two variants of the Commanding Presence class feature are available to any warlord. You can pick one of them instead of another version, such as Inspiring Presence or Tactical Presence.

Bravura Presence: When an ally who can see you spends an action point to take an extra action and uses the action to make an attack, the ally can choose to take advantage of this feature before the attack roll. If the ally chooses to do so and the attack hits, the ally can either make a basic attack or take a move action after the attack as a free action. If the attack misses, the ally grants combat advantage to all enemies until the end of his or her next turn.

Resourceful Presence: When an ally who can see you spends an action point to take an extra action and uses the action to make an attack, that attack gains a bonus to damage equal to one-half your level + your Intelligence modifier. If the attack hits no target, the ally gains temporary hit points equal to one-half your level + your Charisma modifier.

NEW WARLORD POWERS

A warlord commands the field with a variety of powers that bolster allies and define the warlord as a warrior and leader. The bravura style of leadership is the ultimate lead-from-the-front method, complete with brash stunts that bait your enemies to give your comrades the upper hand. A resourceful warlord is the best at adaptability and can mold exploits designed for this leadership technique. This section also expands the abilities of all warlords, with some powers focused on other warlord builds and general exploits usable by any worthy commander.

MARTIAL HEALING

What explains your warlord's ability to heal your allies' wounds? It might seem almost magical—and certainly at the highest levels it is superhuman. But your *inspiring word* is fundamentally a reflection of your ability to get your allies to do their best. Under your leadership, they can draw on reserves they didn't know they had, perform heroic deeds they never thought they could, and keep fighting when the pain and terror would otherwise bring them down.

A tactical warlord might be more of a thinker, calculating odds, planning three rounds ahead in every fight, and mapping out each ally's best position. RALLYING CRY

"Steady," Anatrianna said. Cawing wildly, the shadowravens swarmed closer, and her allies shifted uneasily beside her. "Steady," she said again.

Suddenly, the ravens shot forward like swift arrows shot from a hellish bow. Behind them, their master, a tall sorrowsworn draped in black shrouds, strode forward, its baleful eyes fixed on Anatrianna. She cast her eyes around the barren field. Her friends clutched their weapons, waiting for her word.

"Now!" she cried. "In Corellon's name!"

She felt her own heart surge with elation as her friends leaped forward. She saw their faces refreshed, their courage strong, as each one cut into their enemies. The Raven Queen's minions would die this day, and Anatrianna herself would tell the tale as long as she lived.

NEW PARAGON PATHS

BATTLELORD OF KORD

"Fame find me or death take me, I'll storm any field in Kord's name."

Prerequisite: Warlord

Both Kord and Bane exult in battle. Bane sends his followers to conquer and pillage, using war for the sake of unjust gain, wanton violence, or sheer bloodlust. Kord's way is one of accepting challenges as they come and using mastered talents to overcome them. His dogma is one of bravery, strength, and skill. No test of mortal mettle is stronger than the crucible of battle. The glory and fame that Kord admonishes his followers to seek involves striving to win the respect of their fellows for upholding their duty and facing danger with their heads held high.

Warriors and warlords of all sorts esteem Kord. Those who know that fighting is sometimes necessary pray to Kord for favor, rather than to Bane. Such warriors know that it is the fate of a few to stand against senseless destruction and oppression. Kord's followers do so without flinching. They uphold the right to independence that Kord's wild nature demands. When battle is done, revelry, boasting, and toasting—celebrating life and health—are all that Kord requires as thanks.

Numerous schools of military thought use Kord's dogma as part of their philosophy. Leaders must be strong and courageous. They must hone their talents to assure victory and survival in bloody days. Renown should be earned through bold and decisive action that serves as an example to one's comrades. A valiant warlord protects his fellow soldiers by leading from the front and luring in the enemy, as Kord did in older days.

You are a leader who reveres Kord's ways. As such, you have shaped your skills by leading your comrades against many dangers. With a war cry, you fearlessly engage your enemies. You stride among your adversaries, seeking the greatest among them and challenging them with your amazing exploits. Your brashness inspires your allies to decisive action and helps create the opportunities in which triumph can be secured.

If the target's first attack during that time misses, the target grants combat advantage to attackers until the end of your next turn.

BORDERLANDS MARSHAL

"We are as wolves. Evil is our prey."

Prerequisites: Warlord and ranger

On the bloody frontier, no system of honorable engagement holds. Evil and savage creatures view adherence to principles as weakness, and have no patience for complex plans. Monstrous beasts eat anything they can catch, with no chance for reason or mercy. Indeed, the wilderness as a whole has no respect for the conventions of society. In the wild, you act or you die.

This situation has always been true, even when great empires made portions of the land safe. It is doubly true now that no vast empire holds sway. No unified army stands ready to secure the borders and push back monsters, and few are willing to defend strangers. On the borderlands, far even from independent towns and their militias, people have to make do against the gathering darkness. That darkness grows each passing year as creatures, malevolent or merely hungry, gnaw away at the edges of civilized lands.

You know the wilds. Your experience on the borderlands has pushed you to pragmatism that other leaders lack. You strike first when you can, taking any advantage possible. If your approach fails, you do what is necessary to survive, and then try another tactic. When you attack, you make sure that you and your comrades are as efficient as any pack of predators.

BORDERLANDS MARSHAL FEATURES

Reinforcing Action (11th level): When you spend an action point to take an extra action, each ally who can see and hear you gains a +4 bonus to his or her lowest defense until the start of your next turn. If multiple defenses are tied for lowest, the ally chooses which one gains the bonus.

COMMANDO CAPTAIN

“These roughnecks bow to no king, but they do follow me. Under my command, they can go anywhere and do anything. What do you need?”

Prerequisite: Warlord

Sometimes a small squad of specially trained or highly skilled people can do what an army can't. A precise strike or a cunning raid can turn the tide in many dangerous situations. Numerous nobles and mercantile interests keep or patronize assault teams such as these for situations that call for decisive offensive action. A unit of such specialists can instead become its own employer, attacking and looting monster lairs on the borderlands and becoming rich in the process. Another such group might itself become a menace, turning superior combat prowess toward banditry or tyranny.

The world is in a dark age. Desperate times favor resourceful people. But even bold and venturesome folk need wily leadership to thrive. Such a leader helps a team hit hard and stay mobile, avoiding obstacles, overcoming foes, and keeping one step ahead of the enemy. In fact, precision command and an eye

toward stealth can make all the difference in small-squad engagements.

You are such a leader, whether through formal training in elite unit command or as a result of direct experience, or both. Those who observe you might say you're the team's commander, but you see yourself as an expert facilitator among able peers. You know the skills of those with whom you work, and you always have the right trick to keep the whole party in fighting shape. The cohesion you have created among your comrades has seen you through much in the past, and it speaks of your future success.

COMMANDO CAPTAIN PATH FEATURES

CONCORDANT LEADER

“The elements blend together favorably within my soul and on any battlefield where I have command.”

Prerequisites: Genasi, warlord

Within the Elemental Chaos, disparate elements battle for supremacy. In numerous places, the land, sky, and sea roil in a never-ending clash of lightning and fire, poison gas and rolling earth, biting water and tearing wind. The chaos is much like a worldly battlefield on which no leader exerts control. Where one element dominates, the will of a mighty force of nature is often what makes it so.

The unrestrained chaos is much like a worldly battlefield on which no skilled leader exerts control. In such a combat zone, forces clash without clear direction. The tide of battle is all too often determined merely by fate. Clear advantage on one side or the other can rarely be overcome. One side overwhelms the other by happenstance or because of uneven odds. Victory is won at too heavy a cost.

A mythological genasi general of the ancient world, Vyn-kazi, knew the price of warfare's chaos all too well. She had witnessed it. Like the entropic realm from which they sprang, the great Primordials warred with the gods with no common purpose and no organization—no plan at all. Most of these mighty beings were fractious and grasping loners with armies of fierce slaves. They all but allowed the gods to coordinate against them. One by one, each and its armies succumbed to the gods and their legions.

Vyn-kazi survived a disastrous battle in which her master, Nekal of the Glowing Deep, fell against a host that included Pelor, Kord, Bane, Ioun, and Sehanine. The watersoul genasi went on to swear fealty to Pelor and to take on a fire-soul aspect in his name. She then led her people against other Primordials in service to the god of the sun, taking the calm blending of two elements in her spirit and what she had witnessed in Nekal's defeat as models for her command style.

Similar to celebrated Vyn-kazi, you have learned to mingle and control the elements that cavort in your body and spirit. Your military training has taught you how to guide a combat to triumph by blending the skills of your allies with the needs and variables of the challenge. You have applied your life's lessons to your teaching, acknowledging that every clash is a meeting of contrasting elements. By carefully mixing those forces, you need not rely on fortune for your success.

CONCORDANT LEADER PATH FEATURES

When you do, you also regain the use of the power associated with the new manifestation if you have used it during this encounter.

DUJUN OF ERATHIS

“When diplomacy and philosophy fail, war brings advancement to the benighted.”

Prerequisite: Warlord

Progress, taming of the wilds for the good of all, innovation, collaboration, and the rule of law—these are the values Erathis has set before mortals. Yet the nature of the world opposes her. Empires rise like beacons only to be shattered within a few centuries, leaving flickering shards of civilization behind. Still, in each age, a mighty and ambitious few rise to beat back the shadows and create a safe haven for common folk.

Those who follow Erathis's edicts range from plucky adventurers who rid the wilderness of dangers to would-be lords who subdue untamed lands to call their own. The god of civilization delights in the expansion of organized habitation. She blesses those who boldly make way for progress, as well as those who defend existing societies against fell beasts.

To truly and fully take Erathis's dogma to heart is to embrace both cooperation and leadership. You must be educated in the ways of governance and regulation, as well as be cognizant of the follies of history that ravaged the cultures of old. You must look outside the confines of secure walls and take Erathis's banner to new territory. To sit idly within the halls of established civilized edifices simply won't do.

So far, you have proven to be one of the few who can undertake this mission. You know that a true leader

must be an authority in combat and in peace, but also be a guide who elicits the help of capable collaborators. You cultivate camaraderie, planning a meaningful role for all in battle and outside it. You have polished your party into the perfect cohesive unit, proven by the extraordinary heights at which it performs under your guidance. Now, it's time to move onward to broader conquest and, perhaps, your own dominion.

DUJUN OF ERATHIS PATH FEATURES

Organizing Action (11th level): You can spend an action point to grant each ally who can see and hear you an extra move action on his or her next turn, instead of taking an extra action yourself.

Communal Aid (11th level): When you use *inspiring word*, the target can spend one of your healing surges instead of his or her own, but still using his or her healing surge value.

Solidarity's Virtue (16th level): You and allies within 10 squares of you gain an extra +1 bonus when flanking or aiding another.

If the first attack reduced the target to 0 hit points, you instead gain temporary hit points equal to 10 + your Intelligence modifier, and then you can shift 2 squares and make a melee basic attack against another target.

EARTHFAST BRIGADIER

“Like Bergrom Earthfast, I endure.”

Prerequisite: Warlord

A connection to the earth defines dwarves as a connection to woodlands defines elves. All dwarves intuitively heed the earth’s example, from the sustenance and riches it provides to the inexorable might of the landslide it spawns. Dwarf bodies are durable; more than once they’ve been compared to the dirt and stone that dwarves treasure. Any would-be dwarf hero does well to take advantage of this natural sturdiness.

Innate toughness is a hallmark of dwarf soldiers and their leaders. Vigor makes for a soldier who can outlast the enemy by withstanding hardship and injury. A robust officer pushes troops onward not only with words, but also by determined example. Dwarf warriors are renowned for their endurance.

Bergrom Earthfast, a dwarf general of legend, exemplifies the ideal dwarf warlord. Mighty in body and mind, Bergrom led his troops against giants before dwarves became free from the slavery of the titans. He endured supernatural elements, fell magic, and the treacherous wilds of old to help bring freedom to his people. His legacy endures in a martial tradition that values a sturdy body and the ability to get one’s allies to make the most of their own endurance, as much as it does tactical acumen. Although Bergrom was a dwarf and relied on dwarven resilience, his techniques have spread to other peoples. Anyone who values toughness and spirit in a soldier might learn these ancient methods.

You are such a leader. Even if you didn’t acquire formal training in Bergrom’s leadership approach—or aren’t a dwarf—your talents have led you in a similar direction. Relying on a hardy constitution and heavy weapons as tools, you help your allies push the limits of mortal endurance. Your enemies are hard pressed to keep up.

EARTHFAST BRIGADIER FEATURES

Enduring Action (11th level): When you spend an action point to take an extra action, you and each ally within 5 squares of you can make a saving throw as a free action.

Earthfast Recovery (11th level): When you or any ally within 5 squares of you uses second wind while bloodied, that character regains additional hit points equal to one-half your level + your Constitution modifier.

Dwarven Payback (16th level): Whenever an enemy misses you with a melee or a ranged attack, you can choose one ally you can see as a free action. Until the end of the ally’s next turn, the ally gains a power bonus to damage rolls equal to your Constitution modifier against the triggering enemy.

FLAMEBROW COMMANDER

“You’ve awakened the dragon. Now you face the fire.”

Prerequisites: Warlord, Bravura Presence class feature

A dragon driven to wrath is a terrifying foe. It stops at nothing to quench its fury in the blood of those who wronged it. Only the desire to protect its young can drive a dragon to even greater heights of recklessness. A dragonborn warrior is little different, and a dragonborn officer displays parental loyalty to those alongside whom he fights. Such is the dragonborn warrior ideal.

An exemplar of this standard was Dhuryan Flamebrow, an audacious but beloved dragonborn mercenary from the fringes of the empire of Arkhosia. Dhuryan was noble born, but upon him fell the consequences of his father’s dark deeds. Without title or property in the empire, and living under the shadow of family history, he made his way as a soldier and leader. He made a habit of leading from the front with a brashness born of being indifferent to death. Glory and the erasing of the past was his overriding aim, yet he was unwilling to sacrifice his fellow fighters for his own gain.

Dhuryan succeeded in reshaping the armies of a border province known for its barbarism and monster problems. Eventually, that province and its dragon lord became the most prominent in Arkhosia, although only Dhuryan’s name is widely remembered to this day. At long last, Dhuryan had cleansed his family name. He rose then to prominence as a military advisor and became a general in the wars that eventually destroyed Arkhosia. During this time, he penned the military manifesto titled *Flamebrow*, in honor of his clan. Myths from many cultures say that Dhuryan fought in numerous wars in this world and beyond, and that he fell but returned to life more than once. Tales say that he stands now beyond the touch of time, alongside other legendary generals, awaiting the world’s need.

Flamebrow still exists, copied into many languages. It is a treatise for the commander who wishes to defeat enemies head-on. Although it speaks of deceptive planning and long-term strategies, it also talks of brutal efficiency and courageous leadership when battle is joined.

Whether through influence, reading and practice, or direct training, your path has been influenced by *Flamebrow*. Boldness of action fails to fully describe your methods. You act decisively, willing to lay your own survival on the line to get the job done and protect your allies.

INFERNAL STRATEGIST

"No pact binds me to a single strategy."

Prerequisites: Warlord, Resourceful Presence class feature

Bael Turath's armies were warlike beyond mortal measure. Backed by the power of the Nine Hells, the leaders of the tiefling empire thought their forces could overcome any challenge. And in fact the legions of Bael Turath were often victorious, a testament to their officers as much as their supernatural might.

The most infamous of Bael Turath's generals was a tiefling known today as Malachi. As a lower-ranking officer in campaigns of conquest, Malachi proved to be a disciplined and innovative commander, renowned for being able to adapt to any situation. He watched and learned from his enemies, changed tactics at pivotal moments, and regularly used what he knew of his enemies against them. Malachi never knew defeat until he faced forces under the command of Dhuryan Flamebrow of Arkhosia.

Stories differ on what happened next. Some say Arkhosia's leaders put Malachi to death. Others claim that he retired alongside Dhuryan, whom he befriended. A few claim that Malachi now marshals the forces of the Nine Hells.

Whatever his fate, Malachi's brilliance is the root of a tradition of battlefield leadership that has spread across the world. A collection of writings from Bael Turath known as *The Hellpath Tome* supposedly preserves a portion of Malachi's own writings. You might

LUCIO PARRILLO

have benefited from such education. Perhaps your leanings led you on a crafty path much like Malachi's. Whatever your background, you know how to conjure victory from situations most dire.

LONGARM MARSHAL

"I prefer my foes on the end of a spear."

Prerequisite: Warlord

The spear and its cousins have existed almost as long as creation. It was the first weapon ever made, and it and its variants are still the most common arms in use. Simple spears are designed heavy for melee or light for throwing. A melee spear can be used with one hand or two. Specialized variations of the spear such as the longspear, the tratnyr (described in *Adventurer's Vault*), and various polearms were specifically designed for war. Such weapons provide a huge boon in the form of reach, allowing a wielder to strike from relative safety and to control the melee. Others, the tratnyr in particular, are multipurpose.

Spears are the perfect weapon choice for small-unit commanders who like flexibility. Javelins and other thrown spears enable their wielders to loose volleys at a closing enemy, or make a viable option against a foe that prefers to stay at a distance. With a single spear, a warrior can choose to fight with a shield or without. Longspears and polearms allow an officer to contribute to combat while leading from behind the front line, where the clash can be better observed and directed.

Cognizant of the benefits of the spear, you chose to specialize in this multifaceted weapon. You trained to make long lunges and quick jabs with your weapon. A spear's haft is a defensive tool for you, and you have learned how to hedge in your foes or open deep wounds. Your skill is a blessing to your allies, who have seen that your mastery makes you a more reliable leader.

LONGARM MARSHAL PATH FEATURES

Accurate Thrust (11th level): You gain a +1 bonus to attack rolls when wielding a spear.

PLATINUM WARLORD

“Those who favor peace at all costs are noble, but misguided. Sometimes battle is the only righteous choice.”

Prerequisites: Warlord, good or lawful good

Bahamut requires his devotees to protect the innocent and the weak. Those who revere the Platinum Dragon are ever watchful for the rise of evil, and in particular the followers of Tiamat. Negotiation with Tiamat’s forces is rarely useful and often fatal. The tenets of justice also require adherents of Bahamut’s faith to oppose injustice and despotism. Although the metallic dragon god is a lover of peace, his laws regularly require battles and crusades.

Many valiant folk who serve Bahamut are paladins or clerics. But Bahamut spurns no noble soul’s offer of service. Even those without divine investiture have a place in the effort to bring Bahamut’s light to the world’s gloomy places. Secular leaders who venerate Bahamut lend power to the Platinum Dragon’s cause by ensuring order, honor, and justice in worldly institutions.

Temples dedicated to honorable battle invariably include Bahamut among the gods respected. Such places teach techniques and values aimed at bringing virtue to the world by example rather than by exhortation. Those sent to learn are often warriors or nobles bound for a nation’s military.

Perhaps you came to Bahamut through such schooling. Other good-hearted people find the Platinum Dragon’s ways through personal devotion or study, or even providence. Bahamut willingly instills a small measure of divine grace in those who show true commitment. Your heroic deeds and pure heart have proven you to be worthy of Bahamut’s blessing. So you carry Bahamut’s mark, using his minor gifts to protect, heal, and shine forth as a model of justice.

PLATINUM WARLORD PATH FEATURES

Protector’s Action (11th level): When you spend an action point to take an extra action, each ally who can see and hear you gains a +1 bonus to all defenses until the start of your next turn. If that ally is bloodied, the bonus is +2 instead.

SPIRAL TACTICIAN

“The circle of my fey steps encompasses one center—victory.”

Prerequisites: Eladrin, warlord, Tactical Presence class feature

The Feywild, home of the eladrin, is a wondrous reflection of the world. Within that plane, beauty thrives that defies the worldly mind, but so too does evil. Eladrin are as prone to wickedness as humans are, and in a bygone age, the drow were also natives of the Feywild.

In a time long before other great empires, eladrin faithful to Corellon fought bitter wars within the Feywild against the followers of Lolth and other evil fey. These wars culminated in what came to be known as the Last Battle of the Spiral Tower. During that clash, the Corellon loyalists finally turned the tide and a hero was born.

Ossandrya was an eladrin squad commander when the Last Battle of the Spiral Tower began. Drow and demons had taken the mythic site during a protracted battle that saw the eladrin fighting on many fronts. Several fruitless assaults on the enemy-held tower cost Ossandrya's superiors their lives. With reinforcements unavailable, the eladrin commander was forced to lead the remaining troops against the drow. She devised a multipronged attack that utilized the eladrin's *fey step*, taking the biggest risks on herself and having no regard for the tower's ultimate fate. In the end, Ossandrya's efforts proved successful. Although the Spiral Tower was reduced to a blackened spindle bereft of magic, the eladrin drove the drow out for good.

In time, the Spiral Tower was rebuilt. Ossandrya, who survived other campaigns that drove the drow out of the Feywild, eventually passed from the mortal realm. She is counted among legendary warlords. Within the ruins of the Spiral Tower, her story is recorded. Eladrin warriors across the Feywild study her brilliant strategies and tactics, many of which require fey powers.

You have studied Ossandrya's story and schemes, or you have intuited similar ploys thanks to your fey nature. It could be that some combination of these possibilities influenced your course in life. You have a strongly tactical mind, a sharp sense of space and timing, and the ability to adapt your powers to tactical needs. These aptitudes serve you well in your battles, leading you toward the acclaim Ossandrya has long possessed.

SPIRAL TACTICIAN PATH FEATURES

Second Step (11th level): When you spend an action point to take an extra action, you regain the use of your *fey step* racial power if you have used it during this encounter.

TWICEBORN LEADER

“My story will live on. Will yours?”

Prerequisite: Warlord

The folktale of Jarret the Twiceborn is told throughout the lands. Although humans and elves cherish this celebrated figure, many other peoples speak of him with reverence. Tales differ about his actual heritage, human or half-elf. It is known that he was born to common folk outside elf lands in a kingdom that would one day be part of the empire of Nerath.

Jarret’s natural charm won him friends above his station, including young nobles with little or no chance of inheritance. As a result, Jarret gained martial training and took to forming groups of do-gooders and fortune seekers. His ability to lead these small bands to success against all odds came to be well documented. He and his comrades traveled widely and are credited with making life safer in many places. Jarret’s companions seldom left the adventuring life for any reason other than significant wealth; certainly death was not the primary reason.

Jarret wasn’t so lucky. He fell in battle against the mind flayers of Thoon deep within the Underdark. No magic could bring him back.

The story doesn’t end there, however. Many believe Jarret was reborn as a lad of the same name who grew up in nearly the same place. This perhaps-reincarnated Jarret became an inspiring leader and hero like his namesake. He performed similar deeds, and never refuted claims that he was the same Jarret. Instead, he used the rumor to his advantage, renewing former ties of friendship and striking fear into old enemies. He became known for taking special interest in opposing aberrant creatures, such as mind flayers. Those who knew and loved him eventually dubbed him Jarret the Twiceborn. Yarns say he lives still in the heavens, alongside great generals from times past.

Jarret’s accomplishments and methods are recorded in story, history, and song. From these, many venturesome souls draw inspiration and try to duplicate Jarret’s feats. Some successful imitators even claim to teach his methods.

Maybe your natural talents led you on a road similar to Jarret’s. You’ve taken what you could from folktales and, perhaps, teachers. In your travels, you carry on Jarret’s folk-hero tradition. In doing so, perhaps you’ll become even greater than the Twiceborn.

TWICEBORN LEADER PATH FEATURES

Twiceborn Recovery (11th level): When you use *inspiring word*, you can choose two targets instead of one. Each target can spend a healing surge but doesn’t gain extra dice of healing normally granted by the power. When you use this path feature, you can’t choose yourself as a target.

Assault Action (11th level): When you spend an action point to take an extra action, each ally within 10 squares of you gains a +2 power bonus to attack rolls until the start of your next turn.

Twofold Defense (16th level): Each ally who can see and hear you when he or she uses *second wind* gains a +4 bonus to all defenses (instead of the usual +2) until the end of his or her next turn.

Target: One creature

Attack: Strength vs. AC

Hit: 2[W] + Strength modifier damage. If the target is an aberrant creature, you and your allies gain a +4 power bonus to attack rolls against the target until the end of your next turn. If this attack reduces the target to 0 hit points, you or one ally within 10 squares of you can make a basic attack as a free action.

Twining Ploy Twiceborn Leader Utility 12

You and a chosen ally engage in a complex maneuver that distracts your enemies enough to assure the success of your attacks.

Daily ♦ **Martial, Stance**

Minor Action **Personal**

Effect: Choose an ally within 5 squares of you. Both you and the ally, on your own turns, can roll an extra d20 and choose the higher result for one attack roll each turn. Until the stance ends, this effect applies only when you are both conscious and within 5 squares of each other.

Seconded Smite Twiceborn Leader Attack 20

When the going is rough, you are at your best, allowing an ally to mirror your ruinous attack.

Daily ♦ **Martial, Weapon**

Standard Action **Melee weapon**

Target: One creature

Attack: Strength vs. AC. You gain a bonus to the attack roll equal to the number of conscious allies within 10 squares of you who have already used *second wind* during this encounter (maximum bonus of +4).

Hit: 4[W] + Strength modifier damage.

Miss: Half damage.

Effect: One ally within 10 squares of you who has already used *second wind* during this encounter can shift a number of squares equal to your Charisma modifier and then make a melee basic attack as a free action.

MARTIAL OPTIONS

IN THE DUNGEONS & DRAGONS game, more options mean more fun. This chapter focuses on expanding the choices that allow you to customize your martial character. With few exceptions (such as the multiclass feats), the options here are solely for such PCs.

- ◆ **New Feats:** As in the *Player's Handbook*, this chapter presents feats by tier. Whether you're a warlord who wants to improve your *inspiring word*, a rogue who wants to complement the new Ruthless Ruffian tactic, or any martial character who wants a bit of flavor from your race, scores of new possibilities reside here.
- ◆ **Multiclass Feats:** If you have your eye on expanding your capabilities by dabbling in a martial class, this section of the chapter is for you. Even if your primary class isn't martial, you might find something of interest. In doing so, you also open access to the paragon paths elsewhere in this book.
- ◆ **Epic Destinies:** The mythic warrior takes many forms. These new epic destinies expand your (and your DM's) options for defining your ascent to legendary status.

GENASI AND DROW FEATS

A few of the feats in this chapter are designed for genasi or drow characters. (Those two races are described in the *FORGOTTEN REALMS® Player's Guide*.) If your campaign doesn't include characters of these races, you can disregard those feats.

JEREMY JARVIS

NEW FEATS

Feats offer a remarkable opportunity to customize your character. These feats focus on martial activity and providing interesting options for martial characters.

You must meet a feat's prerequisites, if any, to take the feat. If you ever lose a prerequisite for a feat (for example, if you use the retraining system to replace training in a prerequisite skill with training in a different skill), you can't use that feat thereafter. A feat that has a class as a prerequisite is available only to members of that class, including characters who have joined the class through a class-specific multiclass feat.

HEROIC TIER FEATS

Any feat in this section is available to a character of any level who meets the prerequisites. Heroic tier feats and multiclass feats are the only feats you can take if you are 10th level or lower.

MARTIAL MULTICLASSING

What might lead your character to take a multiclass feat to dabble in the abilities of a martial class? Whether you're a fighter looking to improve your abilities with a warlord's leadership or a rogue's high damage, or a paladin looking to broaden your defender's arsenal with a fighter feat, it's easy to imagine that, as part of the teamwork of your adventuring party, you pick up some tricks from another character in your group. You might even seek out specialized training when you're in town or figure out on your own how you can add something extra to the powers your class gives you.

EPIC DESTINIES

These epic destinies are forged with armor, sword, or claw. Pursue a path of martial excellence and gain acclaim as an unstoppable combat force.

ADAMANTINE SOLDIER

You are as solid as the foundations of the world. Nothing can break you—ever.

Prerequisites: 21st level, fighter or warlord

Throughout your career, you have been an unstoppable force in heavy armor. In your coat of metal, you have stood against the weapons and powers of creatures that could lay waste to cities. In the end, your armor might have been a little worse for wear, and maybe you were, too. But still you stood unbowed.

You know that armor is more than just a piece of equipment. It's a second skin, and it's the face you show the world. You've made it a hallmark of your legend. When your helmed silhouette appears on the horizon, your admirers take hope and your enemies

quail. Those same folk might fail to recognize your face, but they easily identify your superhuman shell.

IMMORTALITY?

The adamantine warrior must prove the hardest of fighters. Your saga might make you an eternal symbol, your armor's distinctive shape and markings burned into the world's iconography. Already, people hold you up as the exemplar of the soldier who is unbreakable in body and spirit.

Armored Icon: When you complete your final quest, you stand as an immaculate example of the knight in shining armor. All armored warriors throughout time recall your story. Your armored form is the ultimate gauge by which all other armored juggernauts measure themselves.

To become this icon of indestructibility, you must stand fast in your last battle. You cannot fall, give in to pain, or break in any way. Prove that your armor is like your skin, and your skin is like your armor. It can't slow you down; instead, it holds you up; Unbreakable, you carry each other into fable. Perhaps your armor even takes you to the side of a deity, such as Kord, who forever holds you up as an exarch of glorious and fearless battle. You then become the patron saint of all such warriors.

Your name becomes synonymous with toughness and resilience. It develops into a word with which fighters compliment one another for bold exploits in heavy armor. When you hear echoes of your name spoken in the world, you pound your gauntlet-clad fist to your breastplate. You know that those who aspire to be like you hear the ringing sound with spiritual ears and take heart.

ADAMANTINE SOLDIER FEATURES

Armor Supremacy (21st level): You gain a +2 bonus to AC while wearing heavy armor. You also ignore any check penalty or speed penalty normally imposed by heavy armor.

Unbreakable Skin (24th level): While wearing heavy armor, you gain resistance to all damage equal to your Constitution modifier.

Hard to Kill (30th level): Once per day, you can treat any saving throw you just rolled as if you had rolled a natural 20.

Effect: Until the stance ends, you can shift 1 square into an adjacent enemy's space and then push the enemy 1 square as a move action.

BEASTLORD

You and your beast companion are like twin aspects of one being, acting in perfect accord. Any separateness is an illusion of space and time—a seeming that might one day be erased.

Prerequisites: 21st level, ranger, Beast Mastery class feature

Your valiant allies fought alongside you and, in time, triumphed. In their midst, you have known friendship and an interdependence that few people can even imagine. With these treasures, you might have even saved the world you love. But even this seemingly perfect camaraderie, this example of flawless alliance, pales in comparison to your relationship with your beast companion.

You, like no other among your epic peers, know true companionship and trust. The beast at your side is more than a friend and ally. It forms an extension of your own soul.

IMMORTALITY?

Some Beastlords remain apart from their beast companions, and they wander the cosmos in service to a higher entity or ideals. Others pass into the mists of death, as is natural, believing that they'll one day be reborn when the world has need. A few go on to attain a form of unity, in body and consciousness, as described here.

Beastlord Apotheosis: When your final task is complete, you have proven that humanoid and beast are not separate. You and your companion act as a single being split into two bodies. Those who tell your story give an account of how the two of you illustrated this truth by becoming one. In fact, they whisper that what became apparent in the end was always so.

You manifest a spirit that encompasses the values your beast companion symbolizes, and you merge with the beast exemplified by your nature. In so doing, you take the shape of a great spirit of nature, pristine and immortal. Your shape is thereafter as you wish it to be—person, beast, two at one time, or an amalgam thereof. Forever, you endure in the wild places of the world as a guardian and an inspiration. Perhaps you'll be an exarch of Melora, or you'll remain distinct from any deity, an example of a creature unique to the world.

Those who follow your model hold you in mind when they travel and fight alongside their own beast companions. They, and others who revere nature and its creatures, look to you as an archetype and a guide.

BEASTLORD FEATURES

Ultimate Understanding (21st level): Once per round, you can take a minor action to command your beast companion to take a standard action, a move action, or a minor action.

Fused Fate (24th level): Whenever an effect targets you, you can choose for it to target your beast companion in addition to you or instead of you, as long as the beast is within 20 squares of you and you can see it.

Shared Life (30th level): As long as either you or your beast companion has at least 1 hit point, the other can't be killed, regardless of negative hit points or failed death saving throws. Keep track of negative hit points and failed death saving throws as normal; if you both are reduced to 0 hit points or fewer, the negative hit points and failed death saving throws immediately take effect.

DARK WANDERER

You stride the eerie paths of fate. Until destiny meets you on this road, you'll roam forever.

Prerequisites: 21st level, ranger or rogue

You left home ages ago, saying goodbye to the comforts that a simpler life might have held. Following an unspoken yearning, you took to the road with other vagabonds. Your way led along sinister paths and to fateful deeds. In time, perhaps you and your companions came to be called heroes. Still, dark strands of fortune draw you onward to an unknown end.

Until that end comes, you wander the world as a shadowy presence, turning up where you're least expected or most needed.

IMMORTALITY?

Providence saved you for the final struggle. When you reach that doom, who knows where it might carry you?

Roaming Wyrd: Your wandering days are not at an end just because you've caught up to your predestined future. From a young age, you have been a cat's-paw of fate, an unwitting agent of luck and ruin. You followed your calling where it led you and did what was required, and now you've finished what dark kismet has set before you. Those who know your story see you as fate personified.

The tapestry of your exploits in life follows you, colored by your final act. If, ultimately, you brought good to the world, your legend is one of how fortune favors the bold. However, your story might have a darker hue from the inescapable pull of grim destiny.

You wander the cosmos, held as a patron or intercessor by those seeking or avoiding fate. You could be the agent of a power related to luck or predestination, such as Avandra or the Raven Queen. More likely, though, you have cut the threads of the inevitable and transcended the snares of chance.

Now, you drift free, straying wherever you wish for once in your life. In so doing, you serve as an example to those who wish to make their own way free of the ensnaring strands of fate and destiny.

DARK WANDERER FEATURES

Not My Destiny (21st level): Any creature of your level or lower that hits you takes a -4 penalty to attack rolls against you until the end of the encounter.

Dark Road (24th level): You can walk to any destination you desire in a single, uninterrupted 24-hour period of walking. No matter how distant the location, or how many planes separate you from it, you reach the destination 24 hours after you begin, finding shortcuts, portals, or other modes of transport previously unknown to you. You do not require any rest, food, or water during this travel, except to

recharge powers and regain healing surges. During your journey, you are safe from hazards, attacks, and other dangers.

When choosing a destination, you must be specific. If your destination is within a structure, such as a particular room within a castle, the long walk leads you to the structure's main entrance, not inside the structure.

You can choose to be accompanied by a number of characters equal to 5 + your Wisdom modifier, all of whom share the benefit of this class feature.

Long Walk Back (30th level): If you die and are not returned to life within 12 hours, your body and possessions disappear. Twelve hours after that—24 hours after your death—you arrive, equipped as you were when you died, having just walked back from wherever it is you and your DM decided you awoke after you were slain. Your condition is the same as if you had been subject to a Raise Dead ritual, but without any death penalty.

You can choose to arrive at the place of your death, at the location of any of your allies, or at any location you consider home. There's a final purpose in your existence, and it's not random death.

WES LOUIE

ETERNAL DEFENDER

You stand in the path of those who would rend the defenseless world. That world is safe behind your ever-vigilant shield.

Prerequisites: 21st level, fighter

You have taken the defender ideal to heart. This devotion might have started at childhood, when you stood up for those weaker than you. Perhaps the ideal of the mighty protecting the weak was culturally instilled in you, as it is in all good-hearted dwarves. Whatever the case, rather than using your strength and power solely for personal gain, you willingly placed yourself in harm's way to make sure that others had a chance to survive and thrive.

At the core of your personal morals and beliefs is the certainty that it is your job to protect your allies. When among them, you stand in the forefront in times of danger, no matter how dire the foe. Your skill and courage ever prove an anchor for your companions during the tumult of battle.

IMMORTALITY?

Bravery and immovability define you as a champion to your friends and the people you have saved over the course of your chronicle. To many, you are the mountain holding back the onrush of a monstrous tide.

Everlasting Bulwark: You have laid low your final and greatest adversary. During the fight you, as always, formed the steady center around which your allies could operate, taking the brunt of the punishment without bending or complaining. Ever more will you be the supreme standard for those on the front line of any battle.

The world always needs someone of your strength and stature at the ready to come to its defense. Those wishing to take up sword or hammer to defend others refer to you as if you were a saint. Although your name might be spoken as a universally recognized synonym for the ultimate guardian, you're not ready to just lay down your shield and axe.

Perhaps, then, you take a place in divine dominions, next to or in service to a godly stalwart such as Moradin. Building a post somewhere in the cosmos, you might take it upon yourself to stand vigil over a primordial threat or against the machinations of evil deities. If something stirs or threatens, you herald the coming danger and stand the first to face it. Perhaps instead some power helps you eternally watch over a chosen people, infusing your watchful spirit into the land. Or you might make a pact to pass away but instill your defender's heart into your folk, awakening a new profusion of heroes.

ETERNAL DEFENDER FEATURES

Unending Strength (21st level): Increase your Strength score by 2. Your normal load, heavy load, and maximum drag load are twice their normal values (Strength × 20, Strength × 40, and Strength × 100 pounds, respectively). Once per day, you gain a +10 bonus to a Strength ability check or a Strength-based skill check of your choice.

Godlike Stature (24th level): Your size doesn't change, but your height and weight increase to 25 percent and 100 percent above the normal range for your race, respectively. You can wield weapons as if you were one size larger, and if you are normally Medium or larger, your melee reach increases by 1 square.

Great Power (30th level): Once per day, you can treat any successful melee attack roll you just made as if it were a natural 20, or you can treat any unsuccessful melee attack roll you just made as if it were a hit.

ETERNAL DEFENDER POWER

Implacable Destruction Eternal Defender Utility 26

You take on a defiant aspect that makes it impossible for your enemies to avoid your attacks completely.

Minor Action **Personal**

Effect: Until the stance ends, every time you miss with a melee or a close weapon attack, you deal damage to the target equal to your Strength modifier.

GODHUNTER

If it bleeds, you can kill it. If it doesn't bleed, you can make it bleed. Then you can kill it.

Prerequisites: 21st level, ranger or rogue

Face it—you're a killer. That doesn't necessarily make you a bad person. Some creatures need killing. It's better for everyone in the end, and you're especially good at endings.

Not only are you an ace slayer, but you have also developed a reputation for taking out the tough marks. No matter how formidable a foe, you always find a way—by blade or bow—to send it to its doom. Destiny chose you to be the one who has what it takes to kill those tougher than you.

Your allies rely on you for your deadly art. Wary opponents maneuver to avoid giving you an advantage. Common folk and planar denizens equate your name with quick death.

IMMORTALITY?

Already legendary, your name, along with accounts of your remorseless fighting style, shall live forever. Few of your opponents survive past their fateful meeting

with you, but you might just live on past your own meeting with fate.

Keen Motivation: You met your utmost challenge, and look who's dead and who isn't. The proof is in the grave. Among those that have a similar mortal origin, you are the greatest slayer in the universe. Maybe a god or two has skills that compare. Maybe.

Sticking around to stir up the cosmos isn't a bad idea. Powerful mortals, deities, demon lords, and primordial can get complacent or uppity. The worst rest in their own realms in smug satisfaction, and either cease doing what they should do or start doing something they shouldn't. No one rests easy with you nearby.

Mortal terror has a way of inspiring decisive change, and you have a pointed way of rousing just such a fear. It's not that you need to threaten anyone in particular. It could just be made known that you have a particular agenda. Working as a free agent, you leave no entity safe from the prospect of your lethal prompting.

Even a little prodding is bound to be a boon to progress. You could be just the wild card the world needs to keep power in the right balance and affairs moving along smoothly.

GODHUNTER FEATURES

Peerless Predator (21st level): Once per encounter, you can reroll an attack roll against a creature that is higher level than you.

Deific Agony (24th level): When you score a critical hit against a creature that is higher level than you, the creature takes a -5 penalty to saving throws and cannot regain hit points or recharge any powers until the end of your next turn.

Blasphemous Recovery (30th level): Once per day, when you are hit by an attack from a creature that is higher level than you, you can choose to treat that attack as a miss and then regain the use of second wind and the use of one encounter power you have used during this encounter.

GODHUNTER POWER

Deicidal Eye

Godhunter Utility 26

Your merciless perspective reveals every weakness, no matter how insignificant.

Daily ♦ **Martial**

Minor Action **Close burst 10**

Target: One creature in burst

Effect: Your attacks ignore any resistance or immunity possessed by the target, and the target gains vulnerable 5 to your attacks. This effect lasts until you are reduced to 0 hit points or until you use the power on a new target.

Special: Increase the vulnerability by 5 if the target is higher level than you or if the target is a solo monster. Increase the vulnerability by 10 if the target is both.

LEGENDARY GENERAL

You stand above the famous leaders of history, an inspiration to any being that follows your word.

Prerequisites: 21st level, warlord

Dhuryan Flamebrow, Malachi of Bael Turath, Ossandrya of the Spiral Tower, Jarret the Twiceborn, and Bergrom Earthfast—these names live on in the annals of time because names of mighty leaders always do. Few leaders are more respected than those who have proven themselves on the field of battle and in the nightmare of war. It's no surprise that history remembers those who lead others through mortal danger. These figures have influenced entire military traditions the world over.

Long have you stood among such illustrious company, a celebrated captain. You have led your fellows in battle against uncountable foes and emerged victorious. Your leadership and encouragement inspired your allies and brought them home safely again and again. Perhaps you're the best commander the world has ever known.

IMMORTALITY?

In taking responsibility for leading your comrades on the long and terrifying road you have traveled, you have displayed cunning, resolve, and courage. Now that you've arrived, you might receive an even higher calling.

Battle Everlasting: Upon the accomplishment of your last epic quest, your soul is tugged at by a call to duty. More than one creature of godlike power is bound to offer you immortality, along with a position of power. The only question is whose side you'll take.

The battle between the gods and the primordials ended eons ago. Strife among planar agencies is still common, and the balance could tip to spark war across the cosmos yet again. Deities, especially malevolent ones, plot against one another to the detriment of all. Elemental powers still look with vengeful eyes upon the world and the heavens. Fey entities, and those of shadow, occasionally raise armies to shake the pillars of the universe. Hordes of demons threaten the very roots of existence. Until an unforeseen age takes hold in which evil is quelled and want is subdued, peace and stability feel tenuous. The need for a leader of legendary skill remains constant.

Is it your greater destiny to stand at the fore of united angelic legions as they hold back the chaos? Will you lead the gods to victory over their ancient foes? Do you prefer the side of the primordials? Might you command archons and efreetes as they seize dominions in the Astral Sea, usurping the usurpers? Or will you choose a middle road, mercenary or enlightened, and pick your battles carefully as each situation calls you to war?

MARTIAL ARCHETYPE

You are a vehicle of destruction born from your perfection of the fighting forms. You embody martial power.

Prerequisites: 21st level, any martial class, paragon multiclassing in a martial class

From the moment you could raise a sword, you knew your destiny lay along its keen edge, your future in the hilt and pommel, and your legacy in the mastery of this single piece of steel. You spent your youth training. You honed your technique and studied the martial forms of combat. As you grew and set out from your humble beginning, your adventures exposed you to the exploits of countless combatants. In them, you became sure of a common connection, a link binding all who live and die by the sword.

Try as you might, this fundamental truth of martial power eluded you. For some reason, its perfect truth continued to slip beyond your reach, but remained just visible behind your mastery. You thought that through incomparable discipline, practice, and innovation, you'd find it once more and this time never let it go.

Driven by the vision of your potential, you redoubled your efforts, devoting your attention to the possibility of ultimate fighting prowess. You remain confident that one day you will perfect your maneuvers. When that day comes, you will stand among the greatest warriors who have ever lived.

IMMORTALITY?

Each step on the road to mastering the fighting arts, you draw closer to the realization of your full potential. The dawning understanding brought on with each new revelation impels you further, to seek out and learn more until you attain the heights of true mastery.

Legendary Master: With a practiced strike, you dispatch the last foe, the final obstacle standing between you and the fulfillment of your final quest. With this triumph, something stirs inside your consciousness. It is as if your last exploit unlocked a door in your mind, throwing it open to reveal the secrets you have long sought. The revelation strikes you to the soul, ripping away the last doubts, the last of your reluctance to push further and lay bare the true depth of martial mastery.

With full comprehension of these fundamental truths fixed in your mind and displayed in your incomparable techniques, you set out to teach others. Mysteries you have struggled to master you can now impart to those new to the sword. Through these scions you will live forever. As your fighting techniques are passed down, your memory will grow beyond your legendary exploits. Your martial mysticism shall transcend the mortal coil to become a living part of the power all warriors use.

MARTIAL ARCHETYPE FEATURES

Archetype's Edge (21st level): You gain a 17th-level encounter attack power from any martial class. Also, whenever you score a critical hit, you regain the use of a martial encounter attack power you have used during this encounter.

Reliable Warrior (24th level): Every martial encounter attack power you know gains the reliable keyword as long as the power has only one target and has no effect on a miss.

Warrior's Ascent (26th level): You gain one 22nd-level utility power from any martial class. Also, whenever you score a critical hit with a martial encounter or daily power, you can spend a healing surge as a free action.

Perfect Warrior (30th level): You gain an encounter attack power or a utility power of any level from any martial class. Also, whenever you score a critical hit with a martial encounter or daily power, you can make a melee basic attack against each adjacent enemy as a free action.

PERFECT ASSASSIN

You have become so good at butchery that it has become part of your very being. You are a shade of death.

Prerequisites: 21st level, rogue

Slaying quickly and efficiently is an art, like composing music or painting a masterpiece. Your

instruments are weapons, and your medium is enemy flesh. The hands are the true tools of any master. And your hands are sublime in their lethal skill.

You have worked this bloody trade for so long that they say death has suffused your body, spirit, and soul. Rumor has it that you see death hovering over your foes, showing you which one is next. Your enemies sense your connection with quietus, and it unnerves them. Your reputation as a killer has taken on supernatural proportions. Little do those know who hear your legend, but the tales about you are almost entirely true.

IMMORTALITY?

In focusing on your deadliness, you have all but become extinction incarnate. Can death die in turn?

Death Can't Die: By the time you have dealt death to your final adversary, you have perfected death-dealing beyond all mortal bounds. Any who have skill in your chosen art see you as an inspiration—a dark ideal. Some venerate you, and others hope to prove themselves superior to you by carving out their own sinister legends. No doubt you've attracted the attention of entities connected to the greatest forces of life's end.

You might choose to lead such creatures, guiding them along mortality's fickle paths. Instead, you could work as an operative of the Raven Queen, maybe even as a commander above cadres of the sorrowsworn. Perhaps to serve in shadow isn't good enough for you, and as other mortal beings have attempted before, you will challenge the beings of the cosmos that contend for authority over death. Could you be the one that determines who has that final authority?

Like the undying warrior, you might pass on your skills to those who seek you out, guiding them along the path you followed. If you tire of destruction, even the righteous kind, you can instead remove yourself from the cares of the world. You could live on quietly in a secluded part of existence, possibly in the company of your longtime allies.

The choice is yours. You are beyond the Raven Queen's grasp, unless one day you choose to surrender yourself to the final destination of most mortal souls. Perhaps you unravel death's remaining secrets for all mortals, dealing the fear of life's end a deathblow.

PERFECT ASSASSIN FEATURES

Death's Eye (21st level): Whenever you reduce an enemy to 0 hit points, choose another enemy you can see. Until the end of your next turn, you gain combat advantage against the second enemy, and it takes a -2 penalty to attack rolls against you.

Assassin's Advantage (24th level): When you miss with an attack against a target you have combat

advantage against, you deal damage to that target equal to your Dexterity modifier + 1 per die of Sneak Attack damage you normally deal.

Pierce the Weakness (30th level): Once per encounter, you can choose for an attack of yours to be against the target's lowest defense, rather than the defense normally targeted by the attack. You can add your Sneak Attack damage to this attack even if you don't have combat advantage. Doing so doesn't count against the normal limit on Sneak Attack use.

UNDYING WARRIOR

Your body and soul are one, not beyond the bite of steel but past the reach of death.

Prerequisites: 21st level, fighter

You are the ultimate survivor. Kobold spears, goblin arrows, orc axes, dragon fire, the necrotic touch of a wraith—you've seen it all in your adventures. And you're still alive to tell the tales.

Death has tried to claim you many times, but it failed. You have either survived your wounds or returned from beyond mortality's shroud. Each time you faced death, your soul quickened within your body, attaching itself more deeply to your physical shell.

As you grow in epic power, destiny conspires to keep you breathing. You recover from wounds that would take the life of any lesser mortal. Your reserves appear limitless. Whenever an enemy tries to take you down, your retaliation seems assured.

IMMORTALITY?

On the verge of your climactic confrontation, your body and soul become one. It seems you can't die.

To Live Forever: When you have reached your career's destined end point, your immortality is assured. Simultaneously a being of soul and body, you pass through death's final mystery only if you choose to do so. Until you decide to abandon your body, it is your vehicle to eternity.

You could retire peacefully, perhaps taking up residence with your preferred deity. Fame and skill could serve you well as you live in a remote place in

the world or among the planes, perhaps establishing a tradition to pass on your knowledge to younger would-be heroes. Alongside a Legendary General, you might fight the battle everlasting, or you could keep a vigil like that of the Eternal Defender. Perhaps you'll wander without end, or take up a wild card position in the cosmos. One day, you might ascend to literal godhood.

Your options are as limitless as your time now is. In the endless future, you might learn the method of your transfiguration into an undying being or some other form of wisdom the world needs. You choose whether to share this knowledge or to let it pass away if you finally give up everlasting life.

UNDYING WARRIOR FEATURES

Wounded Resurgence (21st level): If you are bloodied, you can spend a healing surge as a minor action to restore your current hit points to your bloodied value. Also, you don't take a death penalty when you are returned to life by the Raise Dead ritual.

Undying Stamina (24th level): Each time you reach a milestone, you regain 1d4 healing surges.

Spontaneous Resurrection (30th level): When you die, you can return to life at the start of your next turn. Doing this doesn't require an action. You appear in a space of your choice within 5 squares of where you died and have hit points equal to your bloodied value. You are freed of any temporary effects existing at the time of your death, but permanent conditions remain. Each additional time you are

slain during the same day increases the time until you can rise again.

Second Death: Return to life at the end of the encounter.

Third Death: Return to life 1 hour after the end of the encounter.

Fourth Death: Return to life 12 hours after the end of the encounter.

Fifth Death or More: Return to life 24 hours after the end of the encounter.

If you don't use this ability, you can still be raised from the dead normally.

WARMASTER

History is written by the victorious. Who now living can say how you got where you are, a legend among the military leaders of history?

Prerequisites: 21st level, warlord

Surviving countless battles, endless engagements, you carry memories of faces—foes you have dispatched over your career of waging war. You have won more victories than you can count, defeated more enemies than anyone could hope to remember. Some call you lucky, blessed, or cursed. Others say you're brilliant, possessed of a tactical mind unrivaled in the modern age. The truth is that while you have benefited from uncommon good luck and a superior strategic skill, your successes stand on your unwillingness to give up and to use whatever advantages you had in order to win.

Your victories drew the interest of the great and mighty, from kings to exarchs, angelic lords to demon princes. You have crossed swords and wits with legendary leaders whose talents are every bit as sharp as your own. Each time you have managed to survive. If you didn't emerge with decisive victory, you left all your adversaries with a battle to remember.

IMMORTALITY?

Is being clever in war enough? For a time, you thought so. You wore each victory as a badge of honor, and you used these triumphs as a means to validate the death

wrought at your order. Yet as each victory became more and more sure, you began to wonder if you would ever face a challenge worthy of your talents.

Eternal War: As you have done countless times before, you set your brilliant mind to the task of defeating your enemies, bringing to a close your final quest. Though you are victorious, a realization crashes upon you as you understand that with this last triumph no mortal mind can outmaneuver you, catch you unawares, or surprise you with some unexpected ploy. Your keen wit and pragmatism have secured your place in the annals of history, your name written in the blood of the vanquished. Who will stand against you now that you have defeated the undefeatable? Wins are wins, to be sure, but you want—you need—a challenge. There will be none here, for who will stand against you? No, you must leave this world to pass into the realm of legend, where you might find a worthy foe.

The legend you see is the Eternal War, the ultimate battlefield that draws the greatest commanders to test their brilliance and cunning against their equals, to fight onward until the end of days when the best of them are chosen to lead the armies of light in one final confrontation against the hordes of darkness. Such a locale might be nothing more than a myth, but if there's a chance that you could find a place among these great warlords, it's a chance worth the risk of failure.

WARMASTER FEATURES

Tactical Awareness (21st level): You and any ally who can see you can act during a surprise round even when surprised and do not grant combat advantage from being surprised. Also, each ally who can see you and is not surprised can take a standard action, a move action, and a minor action on his or her turn during a surprise round.

Shock and Awe (24th level): Whenever you spend an action point to take an extra action, one ally within 5 squares of you can also take an extra action on his or her next turn.

Tactical Genius (30th level): During an encounter, you can spend as many of your action points as you want.
