How to use this Adventure

This adventure is written with the goal of being accessible to use at the table with minimal preparation time beforehand.

Each location has things that are immediately noticeable listed as bullets. Nested bullets below each item are details that require interaction to reveal. For example:

The Training Room

- Battered old desk
 - Some burning damage on top
 - Drawers have all been ripped out and smashed on the ground
 - Scraps of paper in the smashed up drawers show the name "Ratterly"
- Broken Mirror on the wall
 - Some of the damage was fierce enough to damage the wall behind it

Elements are painted largely in broad strokes, so fill the blanks and improvise around them.

Don't get hung up on finding the correct answer to any queries you have, your ideas are the new canon.

If in doubt, remember the fundamentals of making a call:

- **Be Honest** - Give enough information to allow for an interesting choice. Don't be afraid about giving too much away, there's enough mystery to go around.
- **Be Fair** - Give warnings but follow through on your word and make success and failure both viable outcomes.
- **Be Confident** - However you decide to run with a particular element of the adventure, be bold with it! Describe places as if you've been there yourself, embellish with details, and use silly voices.

The group start £10,000 in debt as usual, but have been given a solid lead that could pay off most of this in a single job!

Following this lead has led to **The Goragath**, a huge, strange vessel that's been anchored a few miles from Bastion for the past week. You were granted passage on a rickety boat, which came into trouble upon nearing the Goragath.

You wake up in the wreckage of your lifeboat, smashed on the slate hull of the Goragath.

PLAYING THE GAME

The Goal: You are treasure hunters. The **CONDUCTOR** gives you a tip-off to a piece of treasure somewhere dangerous. Your goal is to bring it back for sale.

The CONDUCTOR: They describe the world, act on behalf of any non-player beings, and adjudicate how to use the rules.

SAVES: A **SAVE** is a roll to avoid danger from a risky action or situation. Roll d20. If you roll equal or under the appropriate **ABILITY SCORE** you pass. A roll of 1 is always a success and 20 always a failure.

Turns: On their side's turn, each individual can move and perform one action. When it is unclear which combat side should act first, each character must pass a **DEX SAVE** to be able to act before the opponents.

Attacking: All players declare who they are attacking before any dice are rolled. Attackers roll the **DAMAGE** die dictated by their weapon, causing this much **DAMAGE** to the target.

Attackers wielding two weapons roll **DAMAGE** for both and keep the highest single die.

Multiple attackers targeting the same opponent roll their **DAMAGE** together and keep only the highest single die.

ATTACK EXAMPLE

Three urchins are shooting their potato guns (d4) at a passer-by. They roll together, scoring 2, 2, and 4. As 4 is the highest roll, their combined attack causes 4 **DAMAGE**.

Bonuses: Under certain circumstances an attack receives a **BONUS**, noted as +d6, +d8 etc. This is rolled as an extra attack against the same target. Remember that only the highest single die causes **DAMAGE**. Attacks against a completely helpless target always receive +d12.

BONUS EXAMPLE

Morrish the Thug is swinging a snooker cue (d6) against an informant while two heavies hold him up defenceless. This grants a +d12 **BONUS**, so Morrish rolls d6 and d12, scoring a 5 and an 8. As 8 is the highest roll, 8 **DAMAGE** is caused to the informant.

ARMOUR: **ARMOUR** subtracts its score from the result of any **DAMAGE** rolls against the wearer. It can never be higher than 3.

IMPAIRED: Attacks that are **IMPAIRED**, such as firing through cover, or fighting in handcuffs, roll d4 **DAMAGE** only, and cannot receive **BONUS DAMAGE**.

DAMAGE: When an individual takes **DAMAGE**, they lose that much **HP**. If they take more **DAMAGE** than their remaining **HP** they are wounded, and any remaining **DAMAGE** is removed from their **STR** score. They must then pass a **STR SAVE** to avoid **CRITICAL DAMAGE**.

COMBAT TIPS

- Before you roll any dice, check for any extra combatants that are attacking the same target, then roll the dice together, otherwise they miss their chance to attack that target.
- **DAMAGE** that occurs outside of the normal turn sequence of combat, such as stepping on a trap on your own turn, causes **DAMAGE** independently.
- Ranged attacks cannot be used if you are engaged in melee.

CRITICAL DAMAGE: A character that takes **CRITICAL DAMAGE** is unable to do anything but crawl until they are tended to by an ally and have a **REST**. They die of their injuries if left untended for an hour.

BLAST DAMAGE: Attacks marked with **BLAST** affect all targets in the appropriate area, rolling separately for each target. They range from explosive or automatic weapons to giant sweeping limbs. If in doubt as to how many targets can be affected, roll the weapon's die.

Resting: A few minutes of **REST** and a drink restores a character's **HP**, but risks a wandering encounter.

Restoration: **ABILITY LOSS** and other serious ailments require the aid of a **Specialist Service** to recover. Free services exist, but quick fixes cost money.

ABILITY LOSS: If a character has their **STR** score reduced to zero they are dead. If their **DEX** or **CHA** are reduced to zero the character is paralysed or catatonic respectively, and cannot act until their **ABILITY** is restored. They must be carried to safety.

Combat Manoeuvres: If the players want to do something like disarm or trip someone in combat, the side most at risk makes a **SAVE** to avoid consequences

Death: When a character dies, the player creates a new character. Find a way to have them join the group as soon as possible. Here, quickness is required over realism. Remember, a new character replacing a dead one results in a £1k Debt for the group as an administrative fee.

BULKY Items: Generally, items that need two hands to carry, or are otherwise awkward, count as **BULKY**. Anyone carrying more than two **BULKY** items is reduced to **0HP**.

Deprivation: Someone **DEPRIVED** of a crucial need (e.g. food, water or warmth) cannot benefit from **RESTS**.

Oddities: Characters acquire devices with unusual abilities as they explore the world. These **Oddities** do not require a roll to use, but generally they have a very specific power, limited number of uses, or carry some other disadvantage.

Reaction: When a social reaction to a character is uncertain, the character must pass a **CHA SAVE** to avoid a negative reaction.

Morale: The leader of a group must pass a **CHA SAVE** to avoid their followers being routed when they take their first casualty, or lose half of their total numbers. This applies to opponents and allies but not player characters.

Retreat: Fleeing to safety under pursuit requires a **DEX SAVE** and somewhere to run to.

Assumed ABILITY SCORES: Any **ABILITY SCORE** not listed is treated as 10.

DETACHMENTS: Large groups of combatants fighting together are treated as a **DETACHMENT**.

- When they take **CRITICAL DAMAGE** they are routed.
- When they reach **STR 0** they are wiped out.
- Individual attacks against **DETACHMENTS** are **IMPAIRED**, unless they cause **BLAST DAMAGE**.
- **DETACHMENT** attacks against individuals receive +d12 and cause **BLAST DAMAGE**.

Structures and Vehicles: Structures and Vehicles reduced to **0HP** are wrecked, and all within suffer d6 **DAMAGE**. Weapons unsuitable for causing structural **DAMAGE** have their attack **IMPAIRED**.

HP is restored by minor repairs, but **Wrecked** vehicles and structures require lengthy **Specialist** repair.

Colliding vehicles both take d6 **DAMAGE**. If there is a major weight difference, the heavier gets a +d12 **Bonus**.

Vehicles take no **DAMAGE** for running over soft targets like people.

SCARS: If an attack takes you to exactly **0HP**, take a permanent **SCAR**. Look up the amount of **DAMAGE** caused on the **Scars Table** below.

Specialists can mostly cover up a **SCAR**, but something always remains.

SCARS TABLE DAMAGE CAUSED

- 1 Battlescar** – A part of you is violently marked. Roll 1d6:
1: Eye 2: Cheek 3: Neck
4: Chest 5: Stomach 6: Hands

Reroll your **Maximum HP** on d6 and keep the result if higher.
- 2 Shaken Nerves** – You stammer and shake.

After you take something to calm your nerves, reroll your **Maximum HP** on d6 and keep the result if higher.
- 3 Hobbled** – Reduced to a limp until fixed.
- 4 Smashed Mouth** – You spit teeth and blood. You look a mess until you see a dentist.
- 5 Bloody Mess** – You need stitches. You are **DEPRIVED** until it's done by a **Specialist**.

Reroll your **Maximum HP** on 2d6 and keep the result if higher.
- 6 Punctured Organ** – A vital organ is in a critical state. If you take **CRITICAL DAMAGE** before seeing a **Specialist** you die.

If you get it seen to, reroll your **Maximum HP** on 2d6 and keep the result if higher.
- 7 Maimed** – A part of you is torn off. Roll 1d6:
1: Nose 2: Ear 3: Finger
4: Thumb 5: Eye 6: Chunk of Scalp
- 8 Torn Limb** – A random limb is torn off or in need of amputation.
- 9 Splintered Mind** – You are **DEPRIVED** until you spend a whole evening emotionally unloading.
- 10 Shattered Ego** – You are dealt a humiliating blow.

If you achieve revenge, reroll your **Maximum HP** on 3d6 and keep the result if higher.
- 11 Fractured Skull** – You feel like a slightly different person. Reroll your **CHA** on 2d6.
- 12 Doomed to Die** – You shouldn't have survived that. You have nightmares of your own death.

If you fail your next **SAVE** against **CRITICAL DAMAGE** you die horribly. If you pass, remove this effect and reroll your **Maximum HP** on 3d6 and keep the result if higher.

THE GORAGATH

IRONCHILD - BRAIN OF THE GORAGATH

- Talks through a series of pipes winding through the ship.
- Tries to help but only really knows trivia, not much current info on the ship. Rigid in his thinking, with a boring but soothing voice.
- Fuelled by live sacrifice. When you make a sacrifice to him he returns a tiny Tinned Essence that works as a bomb of that creature type.

GENERAL LAYOUT

Unless noted the ship is clanging metal, bolted together and freezing cold. High ceilings with hanging glow-lamps. No doors, just dim light.

MODULES

Ironchild no longer controls the modules, but they can be reconfigured to him by spiking a living sacrifice, the mechanism is complicated. The Fixers don't want him to get control back because they say he's inept.

PASSENGERS

They all come from the Distant Stars and don't know about Bastion. They've been here for weeks and have no idea why the ship is anchored.

LIFE ABOARD

Roll d6 each morning/afternoon/night for conditions:

1: Blackout: No light, freezing cold. You're Deprived if you don't find a way to keep warm.

2.3: Cold: Water sprays in from scattered hull breaches. Mainly just an annoyance.

4-6 Dim: The light just about light up the rooms, and it's warm enough I guess.

- Act like majestic giants right before doing something disgusting.

FIXERS - CARETAKERS OF GORAGATH

Froggy nerds with semi-mechanical extra-limbs. Technically organic. Not originally from the ship.

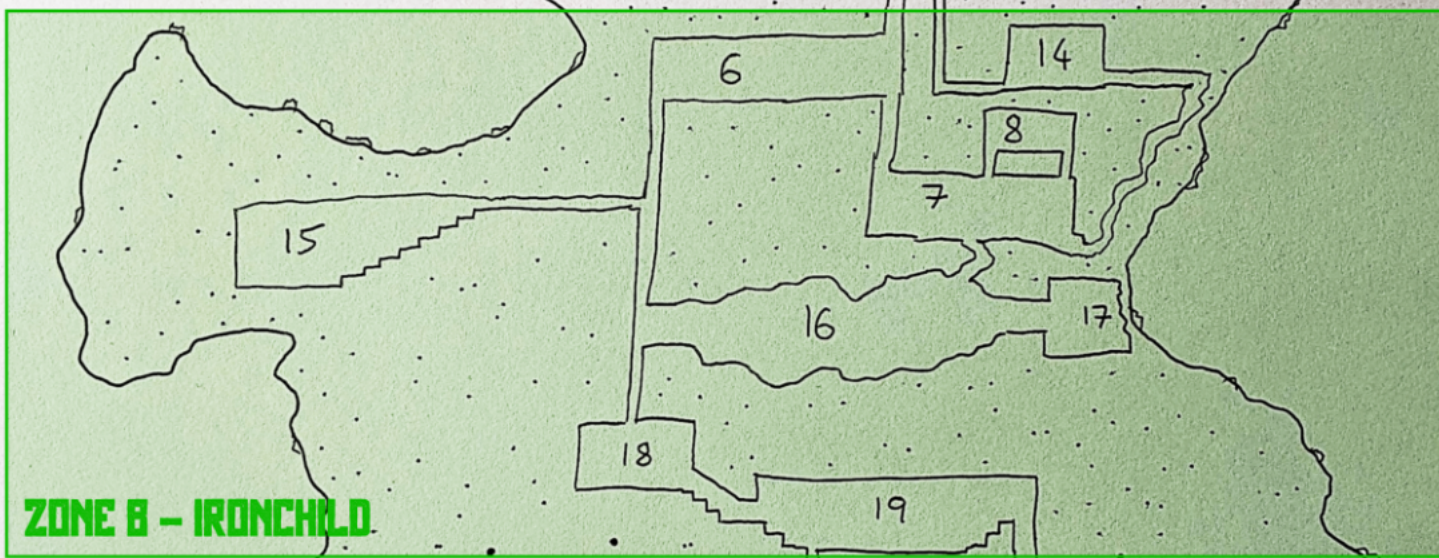

- Want to keep things running, but think Ironchild is an idiot, so will block him getting the modules back.
