# Random Complete Equipment Generator for Lamentations of the Flame Princess – Weird Fantasy Role-Playing and other fantasy OSR games

by Dismaster FraNe ~ http://dismastersden.blogspot.com

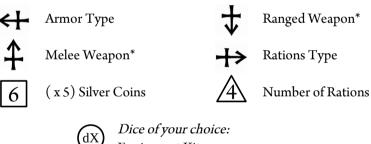

### DROP DIE RANDOM TABLE

Print the table, throw the dice over it and follow the instructions!

#### TO GENERATE A COMPLETE EQUIPMENT SET +

- Roll 1d6, 1d4 and a dice of your choice over the printed table.
- Look at where the d6 and the d4 have landed and refer to the table below: the arrows will point you whether to look up, down, right or left and the meaning of the dice result.

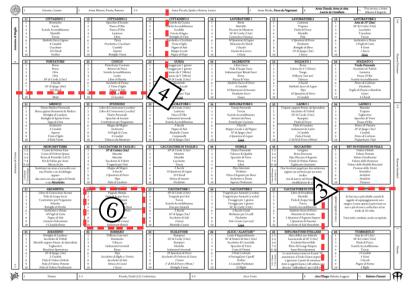

- The box where the third dice landed indicates the Equipment Kit. The meaning of the dice result is your choice! Is it the Health Points? The number of starting spells? Or a result on another random table?

9 Equipment Kit

#### TO GENERATE RANDOM ITEMS

- Throw on the table as many d10s as the number of items you want to randomly generate.
- On the boxes where the d10s landed look at the items corresponding to the results on the dice faces.
- + Magic-users and Elves start with their Spellbook, Clerics with a *Iron Holy Symbol*, Specialists with Specialists' Tools.
- \* Fighters, Dwarves, Halflings and Elves get the next higher result on the Weapons tables (e.g.: *if the result is Small Weapon, they get Medium*)

**d6**: Leather Armor; Small Weapon, Rapier or Spear (your choice); 20 Silver Coins.

d4: Longbow or Light Crossbow; 3 Standard Rations.

dX: Cultist Equipment Kit; the meaning of the dice result is your choice.

## CLASSIC RANDOM TABLE

Roll your dice and find the result on the table!

#### TO GENERATE A COMPLETE EQUIPMENT SET +

- Roll 1d6 for every type of equipment on the sides of the table (Armor, Melee Weapons\*, Ranged Weapons\*, Type of Rations); furthermore roll 1d6 x 5 for Silver Coins and 1d4 for the Number of Rations.
- Roll a d66 (i.e.: 2d6) for the Equipment Kit: the first d6 is for the tens digits (10-60), the second is for the units (1-6).
- If you want to generate a single item from the Kit, the result of 1d10 indicates which item you get.

Italicized items are considered non-encumbering, those listed in both italics and bold are considered oversized. Animals are underlined.

With this table, if printed, you can generate the complete starting equipment for a first level character with a single throw of three dice.

Furthermore, thanks to the numbers on the side of every item, this table can also be used in the same fashion of the classic random ones.

The table can also be easily used to generate different kinds of results, from the complete equipment set to random items.

Just follow the instructions on this page, or invent yourself the method you prefer!

How many guards are stationed in the manor, and how are they armed? How many items do you find on the corpse? What armor does it carries?
