Horse Movement

Action	Cost	Effect*	Test
Crawl/Step	1	Move 2 yards	None
Walk	1	Move 12 yards	None
Canter	2	Move 48 yards	None
Run	2	Move 72 yards	Run (TN 5+)*
Gallop	Full-round	Move 160 yards	Run (TN 10+)*
Swim	1	Move 4 yards	Swim (TN 5+)
Jump	1	2 vertical/4 horizontal	Jump (TN 5+)*
Lie down	1	Become prone	None
Stand up	1	Stand from prone	Nimbleness (TN 5+)*

* If the horse pulls a chariot, wain, waggon, or the like, reduce its movement by half or more, as appropriate. Depending on the strength of the horses and the weight of the pulled load, a waggon may reduce movement much more severely or prevent it altogether. Swimming and jumping generally are not possible for a horse hitched to a vehicle. A character may be able to attempt a Teamster test to overcome some of these difficulties.

** Making a horse move more quickly requires a Ride test by the rider, or a Run test by an unriden horse. A test is required only if the character is engaged in combat or attempts to move farther than normally allowed by the action. If the moving character is involved in a combat situation, test TNs normally increase by +5. If the test is failed, the horse stumbles and moves only half its maximum intended move. With a disastrous failure, the horse trips and falls prone.

Complete Failure				No Parry Necessary			
Disastrous Failure					Narrator may deem the attacker is now at a disadvantage due to his disastrous attempt.		

Any result where a character must make a weapon save is resolved as follows – the weapon adds up the total effective damage of their weapon (not including any Strength Bonus) and then rolls 3d6. If the dice result in a number higher than the weapons total effective damage, the weapon breaks, if less, the weapon holds. On a result that requires a +3 or a +6 – add this number to the 3d6 dice result and compare to weapon strength.

See Core Rule Book page 231 for other ideas for Extra Successes in Combat.
