

EYES ONLY

CODENAME: Elmwood

OPERATION: BRIMSTONE LIBRARY

FOR ATTENTION OF: Director-General, Director ISC-9, Directorate ISC-19

Sirs, I trust this missive finds you well.

As requested, I have completed my assignment upon Venus and am currently convalescing in the somewhat dubious medical facilities as a result, but I digress.

Within this dossier, operational name BRIMSTONE LIBRARY, are my collated findings. BRIMSTONE LIBRARY regards the materiel in use in the field of engagement. Specifically, the 'entity' known collectively as the Dark Legion, and the various factions of humanity.

I have tried to be as comprehensive as I can in my researches and BRIMSTONE LIBRARY will inevitably have to be updated as new threats and response scenarios come into being.

I have not included the device designated WTGB in the dossier, as this relates to the second part of this missive. ISC-19 have often saved my life in the field with their various contraptions, devices, widgets, and gubbins. I am extremely grateful to them for these.

However, there is a significant design flaw in this device. A ten-second timer on a 'small', concealed, thermonuclear device is not ideal, especially when it takes the form of a pocket fob watch (and proscribed by the Cartel!). In fairness, I should point out that it was instrumental in removing an Algerothian Nephariite from the field of battle. Along with quite a bit of the field - I believe our counterparts at Capitol will invoice us shortly for the damage.

In closing, I'd like to thank ISC-19 for sending me the operational briefing for WTGB three weeks after my assignment; specifically the wag who sent me the 1,000-page Health and Safety briefing. Toilet paper is better than cigarettes in trade on the Venusian front.

As always, your faithful servant.

Sir W. Heron

Sir WH, Her Serenity's Agent
