# INTRODUCTION

## ADVANCED FANTASY

*Old-School Essentials Advanced Fantasy* consists of a heady mixture of the best of 1970s and 1980s fantasy gaming:

► Streamlined core rules, founded in the tradition of the 1980s Basic/Expert sets, beloved for their robustness, simplicity, and extensibility.

► Extra classes, options, monsters, and magic inspired by the wondrous flavour of the 1970s Advanced 1st edition game.

► The combination of these influences results in a fantasy gaming best of both worlds!

## IN THIS BOOK

This book is a complete referee's reference tome for running *Old-School Essentials Advanced Fantasy* games.

► **Referee's guidelines:** Advice on designing dungeons and wilderness areas, running adventures, handling PCs and NPCs, and awarding experience points.

► **Over 300 monsters:** Including the complete set of Basic/Expert monsters plus 120 monsters inspired by the Advanced 1st edition game.

► **Over 300 magic items:** Including the complete set of Basic/Expert magic items plus 150 items inspired by the Advanced 1st edition game.

## REQUIRED BOOKS

### Advanced Fantasy Player's Tome

This book is a companion to the *Advanced Fantasy Player's Tome*, which describes the core rules of the game, as well as the full complement of character classes, equipment, and spells.

# Running Adventures

## The Referee's Role

### Facilitator of Fun and Adventure

The referee should bring to life exciting adventures for the enjoyment of the group.

**Preparation:** Before the game begins, the adventure should be planned out and required maps drawn. Advice on adventure design is found later in this section.

**Improvisation:** In spite of the referee's preparation, it is impossible to predict every possible player action. Players will come up with ideas that the referee has not even considered. It is thus important for the referee to remain flexible and to roll with any unexpected turns the adventure might take!

**Procedures:** This book provides procedures for many common adventuring situations. These exist in order to aid the referee in running the game. However, the referee should feel free to adapt and add to these procedures during play, in order to keep the game moving.

**Balance:** The referee must maintain a fun balance of risk and reward.

### Neutral Judge

The referee must remain neutral in all things—neither on the side of the players nor against them.

**Non-competitive:** The game is not a competition, with the players attempting to defeat the referee, or vice versa.

**Fairness:** The rules of the game should be applied equally to player characters, monsters, and NPCs.

### Arbiter of Rules

The referee must decide when and how to apply the rules of the game.

**Rulings:** The rules of the game—including descriptions of magic items, spells, or monsters' special abilities—do not cover all possible scenarios, so the referee must be ready to apply judgement to resolve any unexpected situations which arise.

**Resolving actions:** When a player wishes to do something not covered by a standard rule, the referee must consider how to determine the outcome. Sometimes, the situation can be dealt with simply by deciding what would happen. Sometimes, the referee may require the player to make an ability check or a saving throw (see the *Advanced Fantasy Player's Tome*) to determine what happens. Other times, the referee may judge the likelihood of the action succeeding (e.g. expressed as a percentage or X-in-6 chance), tell the player the chances, and let them decide whether to take the risk or not.

**Disagreements:** The players may not always agree with the referee's application of the rules of the game. When this happens, the group should (briefly!) discuss the point of disagreement and come to a decision. The referee is always the final arbiter in such cases and should ensure that the game does not get bogged down in long discussions about the rules.

**Randomness:** The referee should make judicious use of die rolls, random tables, etc. While these can add an element of fun and unpredictability to the game, overuse of randomness can also spoil an adventure by derailing it too much.

# Handling PCs

## Rate of Advancement

Each group will have its own preferences as to how quickly player characters gain experience points and increase in level.

**Standard:** After three to four sessions, it is normal for at least one PC to have reached 2nd level. If this has not happened, the referee may wish to increase the amount of treasure. If, on the other hand, most PCs have reached 3rd level in this time-frame, the referee might place less treasure or make monsters tougher.

**Fast:** For groups who prefer a game where characters advance quickly, the referee should place large treasure hoards. These should, however, be guarded by appropriately challenging monsters.

**Slow:** For groups who prefer the game to focus on character development rather than high risk, the rate of advancement and the danger presented by monsters may be reduced.

## Character Knowledge

Attention must be paid to the distinction between what a player knows and what their PC knows. Players may at times act on information that their PC could not know. The referee may occasionally need to remind players of this and may even need to forbid certain actions.

## Grudges

Player characters may, through the course of play, naturally develop grudges or rivalries. This is especially a possibility when characters of opposite alignments adventure together. This is a natural and fun part of good role-playing. However, the referee should ensure that such grudges do not dominate play and spoil the adventure for others.
## Maintaining Challenge

It is important that the referee keep the game challenging, even when player characters have reached high levels and amassed great wealth and power.

**Magical research:** Spell-casting characters may attempt to create new spells and magic items. When this happens, the referee should pay very careful attention to game balance. Magic that is permanent, may be used without limit, does not allow a saving throw, or that increases in power with level can easily become imbalanced. If in doubt, one option is to allow a new spell or item to be tested for a period, under the proviso that it may need to be altered if it proves to imbalance play.

**Special abilities:** Players may sometimes try to find ways to gain special abilities and powers beyond their characters' normal class abilities. The referee should be very careful when allowing this, as it can lead to imbalance. The guidelines for magical research, above, should be used.

**Excess wealth:** If the level of PC wealth has gotten out of hand, the referee may wish to find ways to take excess money away from characters. This should always be done in such a way as to present the player with a choice, for example: pay a local tax or become an outlaw?

# Running the Game

## Describing the Unknown

When describing what player characters experience during an adventure, the referee should be careful to keep an air of mystery. The best way of achieving this is to only describe what characters see, hear, smell, and so on, without providing the players any additional information.

**Monsters:** Should be described, rather than referred to by name. Players will come to recognise different types of monsters by their descriptions and behaviours.

**Surprise attacks:** When characters are attacked by surprise, the referee should simply describe the attack itself, rather than giving players the complete description of the attacking monster. For example, a character may just see a clawed hand reaching out of the shadows. Only in subsequent combat rounds should a more detailed description of the monster be provided.

**Monster and NPC game stats:** The game statistics (e.g. hit points, level) of monsters and NPCs should never be revealed to players. In combat, the referee should describe the effects of damage on a monster, rather than telling the players how many hit points it has remaining.

**Magic items:** Should be described, rather than referred to by name. Only by experimentation can players find out what powers a magic item has (and indeed whether an item is magical at all!).

## Describing Explored Areas

The usual procedure is for the players to draw maps of areas being explored, based on the referee's descriptions.

**Squares:** One way to speed up mapping is to specify dimensions (e.g. the width and length of rooms in a dungeon) in terms of map squares, rather than in feet. Of course, the referee and the players must agree on the size of one map square.

**Known areas:** Sometimes, characters may already know the shape of an area being explored. In this case, the referee may draw the parts of the map which are already known.

**Complex areas:** In the case of extremely complicated areas, the referee may draw directly on the players' map. This is not generally to be encouraged, however, as this does not help the players to improve their own mapping skills.

## Using Miniatures

Some groups like to use miniatures along with a gridded tabletop surface to track exploration and combat.

**Play surface:** The most convenient type of surface is something on which maps can be drawn with erasable pens. The surface should be gridded for ease of tracking the movements of characters.

**Scale:** The typical scale used is 1" on the play surface = 5' in the game world (or 5 yards for outdoor encounters).

**Miniatures:** Miniature figures are available to purchase from many different companies. Alternatively, simple tokens like dice or beads can be used.

# Monsters and NPCs

The referee is responsible for deciding how monsters and NPCs react when encountered, but also what schemes and tactics they follow when the PCs are elsewhere.

## Intelligence and Tactics

When deciding how a monster or NPC acts, the referee should bear its level of intelligence in mind. Intelligent monsters might use any of the following tactics.

**Traps and stealth:** Monsters which are cunning but not physically powerful might lay traps or ambushes and may favour attacking PCs from a distance with missile weapons.

**Guards:** Monsters may make use of guards or pets to weaken PCs or to protect important escape routes.

**Magic items:** Monsters will use any magic items in their lair to thwart the PCs.

**Learning and preparation:** If PCs encounter but do not defeat monsters, the monsters will learn from the experience and prepare for a repeat attack. They may build defensive structures, call for reinforcements, relocate their base of operations, and so on.

**Adaptation:** Monsters may copy or adapt tactics successfully used by PCs and may plan specific counter-manoeuvres.

## Teamwork

When designing encounters, the referee should bear in mind that—like player characters—monsters and NPCs will join forces in order to increase their chance of survival.

**Combined forces:** Monsters skilled in melee, missile attacks, and magic may join forces.

**Leaders:** May have special abilities, maximum hit points, or additional Hit Dice.

## Motivation

The same as player characters, intelligent monsters and NPCs have their own interests and motivations.

**Role-playing:** The referee should consider the monster's reaction to negotiations with PCs, bearing in mind its alignment and personality. Monsters should not always cooperate with PCs' wishes!

**Allies:** Monsters and NPCs may be encountered with friends, minions, or retainers. These will come to the aid of the monster, or may avenge it, if it is defeated.

# Adventure Scenarios

The first step in designing an adventure of any kind is to decide on the type of scenario. This is the hook that draws the player characters to the adventure site, and provides a background theme that the referee can use to tie the location together. The scenario drives the referee's choices of specific traps, treasures, and monsters to be placed in the location. The following examples may be used for inspiration.

## 1. Banishing Ancient Evil

An evil presence (e.g. a monster or NPC) must be banished or destroyed. It may have been dormant for many years, and have only recently been awakened (perhaps as a result of another party's meddling).

## 2. Clearing Ruins

Settlers plan to move into an abandoned settlement or stronghold. Before they arrive, the PCs need to scout the area and clear out any monsters or other dangers that are present. The ruins need not be in a remote area—they could even be within (or beneath) a major settlement.

## 3. Contacting a Lost Civilisation

The PCs discover a long-lost race in a fantastic location. They may have once been human, but are now adapted to their strange environment. For example, they may have reverted to bestial behaviour or may be adapted to subterranean life, with pale skin and infravision.

## 4. Escaping from Captivity

The PCs have been taken prisoner by an enemy and begin the adventure in captivity, possibly with a grisly fate awaiting them in the near future. They must regain their freedom.

## 5. Exploring Unknown Territory

An NPC hires the party to explore and map an unknown region. This may be a previously uncharted area or may be a recent alteration to a familiar region (e.g. a magic castle appears in an empty plain).

## 6. Performing a Quest

A deity or powerful NPC (e.g. a king) sends the PCs on a quest. This may involve recovering holy or magical items.

## 7. Rescuing Captives

Important NPCs have been kidnapped by bandits, wicked monsters, or an evil wizard. The PCs attempt to rescue the prisoners, either seeking a reward or due to a personal connection with the unfortunate captives. It is also possible that the PCs may be hired as bodyguards to NPCs who are negotiating with the kidnappers.

## 8. Scouting an Enemy Outpost

An invasion is looming (or in progress)! The PCs must infiltrate an outpost of the enemy, gather intelligence as to their plans, strengths, and weaknesses, and (if possible) destroy them.

## 9. Seeking a Magical Doorway

A gateway exists that allows magical travel (either one-way or bidirectional) between distant locations or even other worlds. The PCs may be tasked with locating a lost portal or closing a portal used by enemies. The portal may also be the only means of travel to a fantastic destination that the PCs must visit.

## 10. Visiting a Sacred Site

In order to consult with an oracle, remove a curse, or find a holy relic, the PCs must journey to a sacred site (e.g. a shrine or temple). The exact location of the site is usually a matter of conjecture.
# Designing a Dungeon

## 1. Choose the Setting

Decide on the basic form and structure of the dungeon (the table below may be used) and begin to consider ideas for the main rooms or areas.

### Dungeon Setting

| d6 | Setting |
| --- | --- |
| 1 | Crypt or tomb complex |
| 2 | Natural caverns |
| 3 | Settlement (e.g. stronghold, city) |
| 4 | Subterranean delving (e.g. mine) |
| 5 | Temple |
| 6 | Tower or fortification |

## 2. Choose Monsters

Based on the selected adventure scenario and dungeon setting, decide what types of monsters inhabit the dungeon, choosing from any monster books that are available, creating new monsters specially for the dungeon, or tailoring standard monsters to the location.

## 3. Map the Dungeon

**Overall shape:** The structure of the rooms and connecting passages will be determined by the dungeon setting (e.g. rough cavern walls, carefully laid-out defensive structures, etc.).

**Mapping scale:** Typically, dungeon maps are drawn on graph paper with a scale of 10' per square. (Larger or smaller scales may be used as appropriate.)

**Numbering:** Give each area (e.g. room or cave) of the dungeon a number, so that the area on the map can easily be cross-referenced with the description of its contents (see step 4).

## 4. Stock the Dungeon

Make notes describing each area on the map that was given a number. Monsters or areas that play an important role in the adventure should be noted first. Areas of less importance may then be stocked (using the guidelines to the right if desired).

**Important details:** Monsters (including the possibility of patrols in the area), traps, tricks, treasures, or special magical effects that are present should be noted.

**Secondary details:** Additional descriptive details for each area may also be noted: furnishings, everyday items, smells, sounds, lights, etc.

### Dungeon Levels

Dungeons often consist of a series of deeper and deeper floors—known as *levels*—accessible by stairways, trap doors, chutes, pits, etc. PCs enter the 1st level of a dungeon initially and may discover entrances to deeper levels.

### Danger and Reward

Generally, the level of danger and the amount of treasure in a dungeon should be suitable to the level of the PCs.

It is usual for lower levels of the dungeon to have greater risks and rewards. Normally, 1 HD monsters live in the 1st level of a dungeon, 2 HD monsters in the 2nd level, and so on.

### Unguarded Treasure

Treasure is usually guarded by monsters or traps, but sometimes an unguarded cache of loot may be found.

**Experienced players:** When designing dungeons for experienced players, the referee should consider placing only very few completely unguarded treasures.

**Deep dungeon levels:** The referee may wish to not place any unguarded treasures in the 9th or deeper dungeon levels.

## Random Room Stocking

| Random Dungeon Room Contents | | |
| --- | --- | --- |
| **d6** | **Contents** | **Chance of Treasure** |
| 1–2 | Empty | 1-in-6 |
| 3–4 | Monster | 3-in-6 |
| 5 | Special | None |
| 6 | Trap | 2-in-6 |

**Monsters:** May be selected by hand or rolled on an encounter table.

**Specials:** Weird or magical features of an area, including tricks or puzzles.

**Traps:** If treasure is present, the trap may be set so that it is triggered when the treasure is tampered with (a *treasure trap*). Otherwise, the trap may be triggered by simply entering the room or a certain area of it (a *room trap*).

**Treasure:** If a monster is in the room, roll the treasure type indicated in its description. Otherwise, the treasure depends on the dungeon level (see right).

### Example Room Traps

1. **Falling block:** Inflicts 1d10 damage (save versus petrification to avoid).
2. **Gas:** Poisonous gas fills the room (save versus poison or die).
3. **Mist:** Harmless; looks like poison gas.
4. **Pit:** Opens up beneath characters' feet, inflicting falling damage on any who fall in (see *Falling* in the *Advanced Fantasy Player's Tome*).
5. **Scything blade:** Swings from the ceiling, attacking for 1d8 damage.
6. **Slide:** Opens up beneath characters' feet, sending them to a lower level.

### Example Treasure Traps

1. **Darts:** 1d6 spring-loaded darts fire at the character, doing 1d4 damage each.
2. **Flash of light:** Causes blindness for 1d8 turns (save versus spells).
3. **Hidden monster:** e.g. a snake. Released when the treasure is disturbed.
4. **Illusion:** Typically of a monster. The monster has AC 9 [10] and vanishes if hit in combat. Its attacks do not inflict real damage: a PC who appears to die just falls unconscious for 1d4 turns.
5. **Spray:** A mysterious liquid covers the character. Monsters are attracted to the smell: the chance of wandering monsters is doubled for 1d6 hours.
6. **Sprung needle:** A needle coated with poison jabs out (save vs poison or die).

### Example Specials

1. **Alarms:** Entry alarm that attracts nearby guardians.
2. **Animating objects:** Inanimate objects that attack if disturbed.
3. **Falling blocks:** Stone block falls to prevent passage.
4. **Illusions:** Illusionary passages, doors, or stairways.
5. **Shifting architecture:** Doors lock and the room rotates, rises, or falls.
6. **Strange waters:** Pool or fountain with weird, magical effects.
7. **Teleports:** Magical portal or teleporter to another area of the dungeon.
8. **Trapdoors:** Leading to a hidden area.
9. **Voices:** Walls or architectural features speak or moan (e.g. a talking statue).

### Treasure

**Level 1:** 1d6 × 100sp; 50%: 1d6 × 10gp; 5%: 1d6 gems; 2%: 1d6 pieces of jewellery; 2%: 1 magic item.

**Level 2–3:** 1d12 × 100sp; 50%: 1d6 × 100gp; 10%: 1d6 gems; 5%: 1d6 pieces of jewellery; 8%: 1 magic item.

**Level 4–5:** 1d6 × 1,000sp; 1d6 × 200gp; 20%: 1d6 gems; 10%: 1d6 pieces of jewellery; 10%: 1 magic item.

**Level 6–7:** 1d6 × 2,000sp; 1d6 × 500gp; 30%: 1d6 gems; 15%: 1d6 pieces of jewellery; 15%: 1 magic item.

**Level 8–9:** 1d6 × 5,000sp; 1d6 × 1,000gp; 40%: 1d12 gems; 20%: 1d12 pieces of jewellery; 20%: 1 magic item.

# DESIGNING A WILDERNESS

## 1. Choose the Setting

**Basic geography:** Decide on the basic geography and climate of the region to be described: whether it primarily consists of mountains, forest, desert, etc. The size of the region should also be determined.

**Milieu:** At this stage, the nature of the milieu being detailed should also be considered: the general level of technology, availability of magic, presence of different monsters and intelligent races, and so on.

**New campaigns:** When starting a new campaign, it is recommended to begin by detailing a small, self-contained area that can be expanded upon over time.

## 2. Map the Region

**Major terrain features:** Using graph or hex paper, create a map of the wilderness area, marking on the major terrain features such as mountain ranges, rivers, seas, lakes, islands, forests, swamps, and so on. Real world maps may serve as inspiration as to the natural structure and relationship of terrain features.

**Scale:** Typically, a large scale map (24 miles per hex) is drawn first, followed by smaller scale maps (6 miles per hex) of certain areas, adding more detail.

## 3. Locate Human Realms

Mark the areas that are controlled by humans, bearing in mind the needs of human civilisation (rivers, farmland, etc.).

**Government:** Also note the ruler of each human-controlled area: a petty lord, a mighty king, a league of merchants, etc.

**Base town (see step 5):** Is typically placed in one of these regions.

## 4. Locate Non-Human Realms

Mark regions that are controlled by other intelligent species that exist in the setting (e.g. demihumans, monstrous races, and so on), taking their preferred environment and way of life into account.

**Nomads:** Some intelligent species may keep domains with well-defined boundaries while others may move around—hunting or raiding—within a more vaguely defined area.

**Monsters:** The territories of significant, non-intelligent monsters may also be marked on the map at this stage.

## 5. Place the Base Town

Locate a base town for player characters on the map, typically close to a river or road near the centre of the map. This is where play will begin. The guidelines to the right may be used to help flesh out the base town.

## 6. Place Dungeons

Place one or more dungeons on the map, somewhere in the vicinity of the base town.

**Distance:** Dungeons are normally located around a day's journey from the base town—close enough that travel between the town and the dungeon is convenient, but not so close that the town is plagued by monsters from the dungeon.

## 7. Create Regional Encounter Tables

**Standard tables:** The standard encounter tables (see *p134*) may be suited to some areas of the campaign map.

**Custom tables:** For other areas, the referee may prefer to create new tables, with a selection of monsters customised to the area. Special encounter tables should take account of the intelligent and monstrous species marked on the map.

# Designing a Base Town

## 1. Determine Size

Decide how large the base town is and roughly how many inhabitants it has. The size of settlements generally depends on the level of technology available in the setting. For medieval or similar settings, the following may be used as a guide.

| Base Town Population | |
|---|---|
| **Town Size** | **Inhabitants** |
| Village | 50–999 |
| Small Town | 1,000–4,999 |
| Large Town | 5,000–14,999 |
| City | 15,000+ |

## 2. Note Services

Make some notes on the presence of the following services that adventurers may require:

► **Black market:** For selling treasure and contacting thieves or smugglers.

► **Guard:** A town militia or police force to keep the peace and protect the town. It may be useful to note whether the guards are open to bribery and how frequently they patrol various areas of the town.

► **Healing:** Some means for characters to cure their wounds (and possibly more advanced services such as curing diseases or even raising the dead). In settings where magical healing exists, such services may be available at a temple, church, or shrine.

► **Lodgings:** Rooms to rent, inns, etc.

► **Rumours:** Places where notices are posted and gossip spreads.

## 3. Detail Ruler

Decide how the town is ruled: whether by a local sheriff or mayor appointed by a lord, an elected council, a confederacy of merchants, etc. It is also possible that a high-level NPC adventurer (with attendant guards and magic) may rule the town.

## 4. Detail Other NPCs

Other important NPCs in the town should be noted, especially those associated with one of the services mentioned above or those who might wish to hire the PCs to undertake missions.

## 5. Create Rumours

A few local rumours may be noted, to provide hooks for the player characters to start exploring the local area and possibly find their way to one of the placed dungeons.

# Awarding XP

All characters who return from an adventure alive receive experience points (XP). XP is gained from two sources: treasure recovered and monsters defeated.

## Recovered Treasure

Treasure that PCs bring back from an adventure is the primary means by which they gain XP—usually accounting for ¾ or more of the total XP earned.

**Non-magical treasure:** Characters gain 1 XP per 1 gold piece (gp) value of the treasure.

**Magical treasure:** Does not grant XP.

## Defeated Monsters

All monsters defeated by the party (i.e. slain, outsmarted, captured, scared away, etc.) grant XP based on how powerful they are. See the table to the right.

**Base XP:** The XP value of a monster is determined by its Hit Dice. Monsters whose Hit Dice are notated as a number of dice plus a fixed hit point bonus (e.g. 4+2) are more powerful and are listed separately in the table. For example, a monster with 2 HD is worth 20 XP, but a monster with 2+2 HD is worth 25 XP.

**Bonus XP / ability:** A monster's XP value is increased for each special ability it has. Special abilities are indicated by asterisks following the monster's HD rating.

**Higher HD monsters:** For each HD above 21, add 250 XP to the Base and Bonus amounts.

**Extraordinary peril bonus:** A monster defeated under especially dangerous circumstances may be treated as one Hit Dice category higher on the table.

## XP Awards for Defeated Monsters

| Monster HD | Base XP | Bonus XP / Ability |
|---|---|---|
| Less than 1 | 5 | 1 |
| 1 | 10 | 3 |
| 1+ | 15 | 4 |
| 2 | 20 | 5 |
| 2+ | 25 | 10 |
| 3 | 35 | 15 |
| 3+ | 50 | 25 |
| 4 | 75 | 50 |
| 4+ | 125 | 75 |
| 5 | 175 | 125 |
| 5+ | 225 | 175 |
| 6 | 275 | 225 |
| 6+ | 350 | 300 |
| 7–7+ | 450 | 400 |
| 8–8+ | 650 | 550 |
| 9–10+ | 900 | 700 |
| 11–12+ | 1,100 | 800 |
| 13–16+ | 1,350 | 950 |
| 17–20+ | 2,000 | 1,150 |
| 21–21+ | 2,500 | 2,000 |

## Division of Experience

The XP awards for treasures recovered and monsters defeated are totalled and divided evenly between all characters who survived the adventure—this includes retainers.

Awarded XP is always divided evenly, irrespective of how the players decide to divide the treasure.

## Bonuses and Penalties

The referee may optionally grant XP bonuses to players who did particularly well. Likewise, players who did not do their share of the work may be penalised.

# MONSTERS

## GAME STATISTICS

Monsters are described by the following statistics.

### Armour Class (AC)
The monster's ability to avoid damage in combat.

**Ascending AC:** The optional AAC score is listed afterwards in square brackets.

### Hit Dice (HD)
The number of d8s rolled to determine an individual's hit points.

**Asterisks:** One or more asterisks after the HD number indicate the number of special abilities the monster has, for the purpose of XP calculation (see *p16*).

**Modifiers:** Modifiers to the HD (e.g. +3, –1) are applied to the hit point total after rolling the specified number of d8s.

**Fractional Hit Dice:** Some monsters are listed as having less than one HD, either as ½ (roll 1d4) or as a fixed number of hit points.

**Average hit points:** The average hit point value is listed in parentheses.

### Attacks Usable Per Round (Att)
The attacks that the monster can use each round, with the inflicted damage in parentheses. (Note that monsters' attack and damage rolls are not modified by STR or DEX, unless specified.)

**Alternative attack routines:** Square brackets are used to distinguish between alternative attack routines that a monster may choose from.

### Saving Throw Values (SV)
The monster's saving throw values:

- ► **D:** Death/poison.
- ► **W:** Wands.
- ► **P:** Paralysis/petrification.
- ► **B:** Breath attacks.
- ► **S:** Spells/rods/staves.

**Save as HD:** The HD at which the monster saves is listed in parentheses (with NH indicating that it saves as a normal human). This is not always equal to the monster's HD rating—unintelligent monsters typically save at half their HD rating; magical monsters may save at a higher HD rating.

Some monsters save as a character class (see the *Advanced Fantasy Player's Tome*). In this case, the class and level are listed in parentheses after the saving throw values.

### Attack Roll "to Hit AC 0" (THAC0)
The monster's ability to hit foes in combat, determined by its Hit Dice (see *Attack Matrix, p20*).

**Attack bonus:** The monster's attack bonus (required when using the optional rule for Ascending AC) is listed afterwards in square brackets.

### Movement Rate (MV)
The speed at which the monster can move. Every monster has a *base movement rate* and an *encounter movement rate* (noted in parentheses, one third of the base movement rate).

**Modes of movement:** If the monster has multiple modes of movement (e.g. walking, flying, climbing), they are listed individually, separated by slashes.

## Morale Rating (ML)

The monster's likelihood to persist in battle. See *Morale* in the *Advanced Fantasy Player's Tome.*

## Alignment (AL)

The monster's affiliation to Law, Neutrality, or Chaos. If "any" is listed, the referee may roll randomly or choose the creature's alignment.

## XP Award (XP)

Pre-calculated XP award for defeating the monster.

## Number Appearing (NA)

Listed as two values, the second in parentheses.

**Zeros:** If the first value is a zero, monsters of this type are not usually encountered in dungeons. If the second value is a zero, monsters of this type are not usually encountered in the wilderness and do not usually have lairs.

**Usage:** The use of these values depends on the situation in which monsters are encountered:

▶ **Wandering monsters in a dungeon:** The first value determines the number of monsters encountered roaming in a dungeon level equal to their HD. If the monster is encountered on a level greater than its HD, the number appearing may be increased; if encountered on a level less than its HD, the number appearing should be reduced.

▶ **Monster lair in a dungeon:** The second value lists the number of monsters found in a lair in a dungeon.

▶ **Wandering monsters in the wilderness:** The second value indicates the number of monsters encountered roaming in the wilderness.

▶ **Monster lair in the wilderness:** The second value multiplied by 5 indicates the number of monsters found in a lair in the wilderness.

## Treasure Type (TT)

The letter used to determine the amount and type of treasure possessed by the monster(s) (see *Treasure Types, p146*). The letters listed are used as follows:

▶ **A to O:** Indicate a hoard: the sum wealth of a large monster or a community of smaller monsters, usually hidden in the lair. For monsters with a lair encounter size (see *Number Appearing*) of greater than 1d4, the amount of treasure in the hoard may be reduced, if the number of monsters is below average.

▶ **P to V:** If listed for an intelligent monster, indicate treasure carried by individuals (P to T) or a group (U, V). If listed for an unintelligent monster, indicate treasure from the bodies of its victims.

# General Notes

## Infravision

All non-human monsters have infravision (see *Darkness* in the *Advanced Fantasy Player's Tome*). Unless specified in a monster's description, this allows monsters to see in the dark up to 60'.

## Languages

20% of intelligent monsters speak Common (see *Languages* in the *Advanced Fantasy Player's Tome*), unless the monster description states otherwise. Many intelligent monster species also have their own tongue.

## Persons

Some spells or magical effects only affect creatures classified as "persons". This includes all humans and demihumans, as well as human-like monsters of up to 4+1 HD. The referee should decide which monsters are affected (a suggested list is given overleaf).

# Combat Tables

These tables list the attack probabilities for all monsters and characters and the saving throw values used by monsters and normal humans.

## PC and NPC Saving Throws

PCs and classed NPCs use the saving throw tables for their character class, listed in the class description.

## Persons

The following monsters in this book are classified as "persons", for the sake of magical effects: acolyte, bandit, berserker, brigand, brownie, buccaneer, bugbear, dark creeper, deep one, dervish, drow, duergar, dwarf, elf, gnoll, gnome, goblin, gullygug, halfling, hobgoblin, homunculus, kobold, leprechaun, lizard man, medium, merchant, merman, mutoid, mycelian, neanderthal, nixie, noble, nomad, normal human, ogre, orc, pirate, pixie, sahuagin, sea hag, sprite, svirfneblin, trader, triton, troglodyte, veteran.

## Normal Humans (NH)

All humans who are not a member of an adventuring class are classified as *normal humans*. They are treated as having less than 1 Hit Die and have their own saving throw and attack probabilities.

## Attack Rolls Using THAC0 (Optional Rule)

Instead of referring to the attack matrix, attacks may be resolved using THAC0 directly. A THAC0 score denotes the attack roll required to hit AC 0. The attack roll required to hit opponents of other AC scores can be calculated by subtracting the target AC from the THAC0. For example, a character with a THAC0 of 19 could hit an opponent with AC 5 on a roll of 14 or greater (19 − 5 = 14).

**Note:** Using THAC0 to resolve attack rolls results in very slightly different attack probabilities than when using the traditional approach of referring to the attack matrix.

## Dragon

A proud, ancient race of gigantic, carnivorous, winged reptiles. There are many subspecies of dragon, many of which are distinguished by the colour of their scales. All dragons are egg-layers and hoard treasure in their lairs, far from areas of human civilisation.

▶ **Behaviour:** Chaotic dragons usually try to eat humans, but may sometimes capture them. Neutral dragons may attack or ignore humans. Lawful dragons may aid parties worthy of the honour.

▶ **Pride:** Dragons are immensely proud creatures and will always listen to flattery.

▶ **Attack pattern:** A dragon always attacks first with its breath weapon, then either breathes again or makes melee attacks (equal chance of either).

▶ **Breath weapon:** Can be used up to three times per day. Unless noted otherwise, all caught in the area suffer damage equal to the dragon's current hit points (**save versus breath** for half). Shapes:

    **a. Cloud:** 50' long, 40' wide, 20' high.
    **b. Cone:** 2' wide at the mouth, 30' wide at far end.
    **c. Line:** 5' wide along whole length.

▶ **Energy immunity:** Unharmed by their own breath weapon or lesser versions thereof. Automatically save versus similar attack forms. (For example, a red dragon is immune to flaming oil and suffers half damage from *fire ball* spells.)

▶ **Language and spells:** Some dragons are able to speak (their own tongue plus Common). The chance is listed by subspecies. Those that can speak can also cast randomly selected magic-user spells (the listed number and level of spells).

▶ **Sleeping:** The chance of a dragon being asleep when encountered on the ground is listed by subspecies. A sleeping dragon may be attacked for one round with a +2 bonus to hit. Dragons may sometimes pretend to be asleep!

▶ **Subduing:** Will surrender if reduced to 0hp by non-lethal attacks (see *Subduing*, under *Other Combat Issues* in the *Advanced Fantasy Player's Tome*), admitting that it has been defeated. (Subdual damage does not reduce the damage done by the breath weapon.) A subdued dragon will attempt to escape or attack its captors, if the opportunity presents itself or if given a suicidal command. A subdued dragon may be sold for up to 1,000gp per hp.

▶ **Age:** The following stats describe dragons of average size. Younger dragons may have up to 3 HD less and ¼ or ½ as much treasure. Older dragons may have up to 3 HD more and twice as much treasure.

▶ **Lairs:** A dragon's treasure is always kept in its well-hidden lair and is seldom unguarded.

# Encounter Tables

This section provides encounter tables by dungeon level and wilderness terrain type, using the monsters found in this book.

Special tables may also be created to reflect the different balance of monsters inhabiting a specific dungeon or wilderness region.

## Rolling a Dungeon Encounter

Roll 1d4 and 1d10 and look up the results on the column in the table overleaf that corresponds to the dungeon level being explored. The result indicates the monster encountered, with the number appearing in parentheses.

### Number Appearing

The values listed in the tables for some monsters do not match the values listed in the monster description. If desired, the referee may use the number appearing value listed in the monster description, for consistency.

## Rolling a Wilderness Encounter

1. **Roll 1d8:** Look up the result on the column in the table on *p134* that corresponds to the terrain being explored. The result indicates which sub-table to consult.
2. **Roll 1d20:** Look up the result in the sub-table indicated.

### Aerial Encounters

Always use the *Flyer* table, in sub-table 1 (see *p134*).

## NPC Adventurers

Encounters with NPC adventuring parties are listed in the tables as "Basic Adventurers", "Expert Adventurers", "High-Level Cleric", "High-Level Fighter", or "High-Level Magic-User". Guidelines for generating NPC adventurers can be found under *Adventuring Parties, p140*.

# NPC Encounters

## Adventuring Parties

This procedure generates parties of NPC adventurers. As the procedure is fairly involved, referees may wish to pre-generate some NPC parties for use in random encounters.

### General Details

The following general details apply to all types of NPC parties described:

► **Spells:** If spell casters are present, choose or roll their memorized spells.

► **Equipment:** Normal adventuring gear.

► **Treasure:** Treasure types U+V, shared among the group.

► **Marching order:** Decided by referee.

If the classes presented in the *Advanced Fantasy Player's Tome* are not in use, the referee should replace the listed classes by equivalents in use in the campaign.

### NPC Adventurer Class and Level

| d20 | Class | Level Basic | Expert |
|---|---|---|---|
| 1 | Acrobat | 1d3 | 1d6+4 |

* In campaigns where Underworld races are common, a duergar, drow, or svirfneblin may be encountered in place of a dwarf, elf, or gnome.

### NPC Adventurer Alignment

| d6 | Alignment |
|---|---|
| 1–2 | Lawful |
| 3–4 | Neutral |
| 5–6 | Chaotic |

## Basic Adventurers

► **Composition:** 1d4+4 characters of random class and level (see opposite).

► **Alignment:** Either roll the alignment of each NPC or roll once for the party.

## Expert Adventurers

► **Composition:** 1d6+3 characters of random class and level (see opposite).

► **Alignment:** Either roll the alignment of each NPC or roll once for the party.

► **Mounts:** 75% chance of being mounted, in the wilderness.

► **Magic items:** Per individual: there is a chance of the NPC having a magic item from each suitable magic item sub-table (see *Magic Items, p148*). The chance per sub-table is 5% per level of the NPC. Rolled items that cannot be used by the NPC should be ignored (no re-roll).

## High-Level Cleric

A high-level cleric and party. (Mounts and magic items as per *Expert Adventurers*.)

► **Composition:** Leader (cleric of level 1d6+6), 1d4 clerics (level 1d4+1), 1d3 fighters (level 1d6).

► **Alignment:** Roll for the whole party.

### Alternatives
The party may alternatively be led by a high-level bard, druid, or paladin.

## High-Level Fighter

A high-level fighter and a group of retainers, often on their way to or from war. (Mounts and magic items as per *Expert Adventurers*.)

► **Composition:** Leader (fighter of level 1d4+6), 2d4 retainers (level 1d4+2, any class).

► **Alignment:** Roll for the whole party.

### Alternatives
The party may alternatively be led by a high-level barbarian, knight, paladin, or ranger.

## High-Level Magic-User

A high-level magic-user, accompanied by their apprentices and a group of hired guards, often on a quest for arcane lore. (Mounts and magic items as per *Expert Adventurers*.)

► **Composition:** Leader (magic-user of level 1d4+6), 1d4 apprentices (magic-users of level 1d3), 1d4 mercenaries (fighters of level 1d4+1).

► **Alignment:** Roll the leader's alignment. The apprentices have the same alignment as the leader, but the mercenaries may be of different alignment.

### Alternatives
The party may alternatively be led by a high-level illusionist with apprentices of the same class.

# Strongholds

When PCs wander into the vicinity of the wilderness stronghold of a high-level NPC, a warm reception is not always guaranteed. These guidelines may be used if the referee does not have specific notes on a stronghold's ruler and guard patrols.

## Ruler

The referee should decide what class of NPC claims ownership of the stronghold and the surrounding lands:

▶ **Arcane spell caster:** Of level 1d4+10. (e.g. illusionist, magic-user.)

▶ **Divine spell caster:** Of level 1d8+6. (e.g. cleric, paladin.)

▶ **Martial character:** Of level 1d6+8. (e.g. fighter, knight.)

### Demihuman Rulers

Demihuman strongholds are unusual cases, and should be detailed in advance by the referee. Typically, they will attempt to avoid all contact with travellers.

## Patrols

Strangers in the lands around a stronghold will typically be spotted by mercenary groups hired to patrol the lands. The type of troops depends on the ruler's class:

▶ **Arcane spell caster:** 2d6 heavy footmen. Equipped with chainmail + shield (AC 4 [15]) and swords. Morale 8.

▶ **Divine spell caster:** 2d6 medium horsemen. Equipped with chainmail (AC 5 [14]) and lances. Morale 9.

▶ **Martial character:** 2d6 heavy horsemen. Equipped with plate mail (AC 3 [16]), lances, and swords. Morale 9.

## Garrison

Patrols such as those described are only a small part of the ruler's garrison. Further forces may include magical monsters or humans mounted on flying creatures.

## Reaction to Travellers

The reaction of the ruler to travellers in their domain depends on the class of the ruler and can be determined by rolling 1d6 and consulting this table:

| Ruler Reaction By Class | | | |
|---|---|---|---|
| d6 | Arcane | Divine | Martial |
| 1 | Chase | Chase | Chase |
| 2 | Ignore | Chase | Chase |
| 3 | Ignore | Ignore | Chase |
| 4 | Ignore | Ignore | Ignore |
| 5 | Ignore | Invite | Ignore |
| 6 | Invite | Invite | Invite |

**Chase:** The patrol is instructed to chase intruders out of the domain. Alternatively, they may demand a toll from travellers passing through. The exact price demanded depends on the ruler's character, the apparent wealth of the PCs, etc. If the PCs refuse to pay the toll, the patrol may attack them, drive them away, or attempt to take them prisoner.

**Ignore:** The patrol leaves the PCs to go about their business.

**Invite:** The patrol brings a message from the domain's ruler, inviting the PCs to stay in the stronghold. The ruler's exact motive for doing so will depend on their personality—it is not necessarily benign.

# Treasures

## Placing Treasure

There are two methods of deciding what treasure is in the possession of monsters: rolling randomly and referee choice.

### Rolling Randomly

Monster listings note which treasure type is present in the creature's lair and which it may carry on its person. Each treasure type (see overleaf) lists one or more types of coins or items that may be found in the hoard. For each item in the list:

1. If a percentage value is given, first roll d100 to see whether this item is present in the hoard.
2. If a range of values is given (e.g. 1d6 × 1,000cp, 6d6 gems), roll the specified dice to determine the quantity of this item that is present in the hoard.
3. For gems, jewellery, and magic items, the procedures for determining the value and properties of the items in the hoard are found in later sections.

#### Manual Adjustments

If the value of the randomly generated treasure is significantly above or below the average value of the treasure type, the referee may adjust the results manually.
### Referee Choice

The referee may wish to choose treasures appropriate to the monsters and the PC party. As treasure is the main source of XP (see *Awarding XP, p16*), the referee should carefully consider treasure placement. The following procedure is recommended:

1. Consider the size of the adventuring party, the levels of the characters, and the XP they need to go up in level.
2. Decide how many experience points the treasure hoard should provide if the party successfully acquires it.
3. Place treasures whose total value matches the determined XP total.

#### Balance of Reward Versus Danger

When using this approach, the referee should ensure that the treasure is guarded by sufficiently powerful monsters. Adventurers should have to earn this reward!

# Items of Value

## Common Treasures

The treasure tables (see overleaf) describe methods for generating hoards of coins, gems, jewellery, and magic items.

## Unusual Treasures

Adventures may also include valuable items of other kinds, whose worth may not always be obvious:

▶ **Artwork:** Paintings, statuary.

▶ **Books:** Rare tomes or scrolls.

▶ **Foodstuffs:** Spices, valuable wines.

▶ **Furnishings:** Rugs, tapestries.

▶ **Utensils:** Silver cutlery, unusual kitchen or laboratory implements.

▶ **Valuables:** Furs, ivory, ores, silks.

### Value and Weight

For each unusual item placed, the referee should note its value (in gold pieces) and (if using the optional rules for encumbrance) its weight.
# TREASURE TYPES

## Average Values

The average value of each treasure type is listed alongside the letter code. These values sum the average results of gems, jewellery, and all types of coins. Magic items that the treasure type may indicate are not counted toward the average value, as magic items do not have fixed sale values.

## Hoards: A–O

These treasure types indicate the sum wealth of a large monster or a community of smaller monsters. Such hoards are usually hidden in the monsters' lair.

**Small lairs:** Monster listings note the number of individuals found in a lair. If the number rolled is below average and the lair encounter size is at least 1d4, the amount of treasure in the hoard may be reduced accordingly.

# Magic Items

Magic items are usually classified according to one of the following categories:

▶ **Armour and shields:** Grant protective benefits to the user.

▶ **Miscellaneous items:** Enchanted items that do not fit into any other category.

▶ **Potions:** Magical liquids stored in glass vials.

▶ **Rings:** Plain or bejewelled rings that place an enchantment about the wearer.

▶ **Rods / staves / wands:** Magical lengths of wood, metal, crystal, etc. Used by spell casters to unleash magical effects.

▶ **Scrolls and maps:** Aged sheets of parchment or paper inscribed with either magical script or instructions leading to a treasure hoard. Note that treasure maps are rolled on the magic items table, although they are not usually magical.

▶ **Swords:** Grant bonuses to hit and damage in combat. May also be enchanted with additional powers.

▶ **Weapons:** All enchanted weapons other than swords. Grant bonuses to hit and damage in combat. May also be enchanted with additional powers.

## Rolling Magic Items

When a treasure type indicates that a magic item is present, the following procedure is used to determine its nature:

▶ **Specific type of item:** If the treasure type indicates a specific type of magic item (e.g. 3 potions), roll on the table for that type of item (found in the following pages).

▶ **Type of item not specified:** Otherwise, first roll on the table below to determine the type of the item, then roll on the table for that type (found in the following pages).

## Basic and Expert Magic Items

Separate probabilities are listed in the table for Basic and Expert level characters (i.e. characters of 1st to 3rd level and characters of 4th level or higher). The Basic probabilities are listed in the B column, and the Expert probabilities in the X column.

It is recommended that the probabilities appropriate to the group's experience level be used. Alternatively, if the referee prefers to have an even distribution of magic items, irrespective of player character level, the Expert probabilities may always be used.

### Magic Item Type

| B: d% | X: d% | Type of Item |
|-------|-------|--------------|
| 01–10 | 01–10 | Armour or Shield |
| 11–15 | 11–15 | Misc. Item |
| 16–40 | 16–35 | Potion |
| 41–45 | 36–40 | Ring |
| 46–50 | 41–45 | Rod / Staff / Wand |
| 51–70 | 46–75 | Scroll or Map |
| 71–90 | 76–95 | Sword |
| 91–00 | 96–00 | Weapon |

## Identifying Magic Items

**Testing:** The most common way of identifying magic items is by trial and error—sipping a potion, donning a suit of armour, using a weapon in battle, etc.

**Retainers:** Players may wish to use retainers as "guinea pigs" to test magic items of unknown properties. Retainers may agree to do this, but only if allowed to keep the item in question.

**By magic:** High-level NPC magic-users may also be able to identify magic items. They will always require payment or a service in kind. The process takes time: possibly several weeks.

## Using Magic Items

**Appropriate use:** To be effective, a magic item must be used, held, or worn after the normal fashion for that type of object.

**Concentration:** To activate an item's magic, the user must concentrate on its effect. When using a magic item in this way, the character cannot take any other actions.

**Items that are always active:** The following items do not require concentration, and are always active: magic swords, weapons, armour, and protective items (e.g. rings of protection).

**Actions per round:** Unless a magic item's description states otherwise, it can only be used once per round.

## Command Words

Some magic items are activated by the speaking of a *command word*, which must be known by the character in order to use the item. Discovering command words for a magic item may not be easy:

► **Guesswork:** Sometimes, characters may be able to guess a command word, perhaps using previous clues as to the nature of a magic item or its creator.

► **Inscribed on item:** A command word may simply be written on the item.

► **Recorded elsewhere:** A command word may be written on another object (e.g. in a book), which may be found together with the magic item or may be in an entirely different location.

► **Obfuscation:** Command words may be written in obscure (even dead) languages, in code, in the form of a riddle, as script that can only be read by magic, or in invisible script.

► **Lost command words:** Sometimes a command word has simply been lost. In this case, characters may need to hire the services of a sage or employ divination magic to discover the command word.

## Wishes

Some magic items grant *wishes*, the powerful ability for a character to change the nature of reality in any conceivable way that they desire. Wishes are generally regarded as the most powerful magic in the game and have the potential to greatly upset the balance of play if not handled carefully by the referee.

### Adjudication Guidelines

**Wording:** The player and referee must pay great attention to the precise wording of a wish.

**Fundamental changes:** A wish that would alter some fundamental aspect of the game or the campaign world will have no effect. For example, a wish that altered the abilities of all monsters of a particular type would fail.

**Greedy wishes:** A wish that the referee judges to be unreasonable or overly greedy may come to pass, but with its intent twisted in some way. For example, a wish for a very powerful magic item may cause the item to appear, but in the possession of a dangerous enemy.

**Wishing for more wishes:** This will result in an infinite time loop, putting the character out of play.

### Example Wishes

Some examples of reasonable wishes:

► Wishing for a weapon to help fight magical monsters. The wish may grant a +1 sword that vanishes when the combat ends.

► Wishing that a monster had not attacked. The wish may place the characters back in time and change the reaction of the monster.

► Wishing that a deadly blow had not occurred. The affected character may return to life, wounded but not dead.

# Gems and Jewellery

## Gems

The value of each gem in a treasure hoard is determined by the following table:

| Gem Values | |
| --- | --- |
| **d20** | **Gem Value** |
| 1–4 | 10gp |
| 5–9 | 50gp |
| 10–15 | 100gp |
| 16–19 | 500gp |
| 20 | 1,000gp |

## Jewellery

Each piece of jewellery indicated by a treasure type is worth 3d6 × 100gp (or more, if the referee wishes, for characters above 3rd level).

### Damaged Jewellery

Rough treatment of jewellery (e.g. crushing, intense heat or fire, lightning) can damage it, reducing its value by 50%.

## Combining Values

When a treasure type indicates the presence of multiple gems or pieces of jewellery, the referee may combine the values, as desired. For example, a roll of five 50gp value gems may be placed as a single 250gp gem, a 100gp gem and three 50gp gems, or any other combination.

# MAGIC ITEMS

## ARMOUR AND SHIELDS

| d% | Item |
|---|---|
| **Magic Armour and Shields** | |
| 01–15 | Armour +1 |
| 16–25 | Armour +1, Shield +1 |
| 26–27 | Armour +1, Shield +2 |
| 28 | Armour +1, Shield +3 |
| 29–33 | Armour +2 |
| 34–36 | Armour +2, Shield +1 |
| 37–41 | Armour +2, Shield +2 |
| 42 | Armour +2, Shield +3 |
| 43–45 | Armour +3 |
| 46 | Armour +3, Shield +1 |
| 47 | Armour +3, Shield +2 |
| 48 | Armour +3, Shield +3 |
| 49–51 | Cursed Armour –1 |
| 52–53 | Cursed Armour –2 |
| 54 | Cursed Armour –2, Shield +1 |
| 55–56 | Cursed Armour, AC 9 [10] |
| 57–62 | Cursed Shield –2 |
| 63–65 | Cursed Shield, AC 9 [10] |
| 66–85 | Shield +1 |
| 86–95 | Shield +2 |
| 96–00 | Shield +3 |

### Usage

Per normal class restrictions.

### Cursed Armour and Shields

**AC penalty:** Some types of cursed armour specify an Armour Class penalty. This modifier worsens the wearer's Armour Class score. For example, a cursed suit of chainmail –1 grants a base AC of 6 [13], one point worse than the AC 5 [14] of non-magical chainmail.

**AC 9 [10]:** Some types of cursed armour give the wearer a base Armour Class of 9 [10] (before modifiers due to Dexterity).

**Testing:** All types of tests indicate that a cursed shield or suit of armour is enchanted with a +1 bonus. It is only when the armour is used in deadly combat that the curse is revealed.

**Removing:** Once a cursed shield or suit of armour has been used, the character comes under the curse and is not able to discard the item. It can only be removed with magic.

### Enchanted Armour and Shields

**AC bonus:** Enchanted armour and shields specify a protective bonus that improves the wearer's Armour Class score. For example, a suit of chainmail +1 grants a base Armour Class of 4 [15], one point better than the AC 5 [14] of non-magical chainmail.

**Weight:** If using the optional rules for detailed encumbrance (see the *Advanced Fantasy Player's Tome*), the enchanted armour's encumbrance value is 50% less than that of normal armour.

## Type of Armour

The referee may choose the type of armour in a treasure hoard, or may roll on the following table:

| d8 | Type of Armour |
|-----|----------------|
| 1–2 | Leather |
| 3–6 | Chainmail |
| 7–8 | Plate mail |

1. **Propel:** A single sailing vessel is propelled by high winds, increasing its sailing speed by one half.
2. **Calm:** In a storm, gale, or near gale, can create an area of calm or lighter winds. (This does not affect wave size in a storm, however.)

(See *Waterborne Adventuring* in the *Advanced Fantasy Player's Tome* for details on sailing and wind.)

An enchanted carpet that can fly through the air, carrying up to three passengers (and their gear). The movement rate depends on the number of passengers:

► **1 passenger:** 300' (100').
► **2 passengers:** 240' (80').
► **3 passengers:** 180' (60').

## Folding Boat

A normal-seeming wooden box (about 1' cube) which magically unfolds into a boat or ship when the correct command word is spoken.

► **Boat:** One command word causes the box to unfold into a small river boat (length 10', beam 4', draft 2'), with oars, a sail, and an anchor. The boat can hold up to 4 human-sized characters and up to 5,000 coins of cargo. It has a movement rate of 150' (50') rowed and 240' (80') sailed, AC 8 [11], and 1d10 + 10 hull points.

► **Ship:** Another command word causes the box to unfold into a small sailing ship (length 24', beam 8', draft 6'), with 5 sets of oars, a sail, a cabin, and an anchor. The ship can hold up to 15 human-sized characters and up to 15,000 coins of cargo. It has a movement rate of 180' (60') rowed and 360' (180') sailed, AC 8 [11], and 1d20 + 20 hull points.

► **Folding down:** The boat or ship folds back down into a box when a third command word is uttered.

A character who wears these gauntlets has a Strength score of 18. This grants all the usual bonuses, including:

► **Melee attacks:** +3 bonus to attack and damage rolls, in melee.
► **Unarmed attacks:** Deal 1d2+3 damage.

**Encumbrance:** If using the optional rules for detailed encumbrance (see *Time, Weight, Movement* in the *Advanced Fantasy Player's Tome*):

► **Extra weight:** The character's ability to carry weight is increased by 1,000 coins. (i.e. the character can carry 1,400 coins without becoming encumbered.)

## Gem of Brightness

A crystal in the shape of a long, rough prism. Three command words cause the crystal to emit three different types of light.

► **Charges:** The gem has 50 charges.
► **Beam:** A beam of pale light, 10' long and 2' wide. Consumes no charges.
► **Ray:** A momentary ray of bright light, 50' long and 1' wide to be directed at the eyes of a creature. The target must **save versus spells** or be blinded for 1d4 rounds. Expends 1 charge.
► **Flash:** A momentary cone of blinding light, 30' long and 5' wide at the end. All creatures in the cone must **save versus spells** or be blinded for 1d4 rounds and suffer a permanent penalty to attack rolls equal to the number of rounds of blindness. The attack penalty can only be cured by powerful magic (e.g. *cure serious wounds* cast expressly for the purpose). Expends 5 charges.
► **Magical darkness:** Negates the effects of the gem.
## Gem of Monster Attraction

A shining, very valuable-looking gem. A character who takes the gem comes under a curse.

▶ **Wandering monsters:** Each time the referee checks for wandering monsters, the chance of an encounter is doubled.

▶ **Pursuit:** If the referee rolls to determine whether monsters pursue the character, the chance of pursuit is doubled.

▶ **Discarding the gem:** The jewel reappears, hidden somewhere on the character's person, unless the curse is removed by magic (e.g. *remove curse*).

## Gem of Pristine Faceting

A magical gem which has the power to increase the value of other gems.

▶ **Usage:** The gem must be placed with one or more other (non-magical) gems.

▶ **Effect:** There is a 20% chance of each of the other gems being magically polished, faceted, or otherwise perfected in form. Affected gems increase in value by 50%.

▶ **Charges:** The gem has 10d10 charges. One charge is used each time it transforms another gem.

▶ **Facets:** The gem has as many facets as it has charges. Each time a charge is spent, it loses one facet. When all charges have been spent, it becomes a worthless stone sphere.

## Gem of Seeing

A finely cut, clear gem. Gazing through the gem reveals hidden, enchanted, and invisible things.

▶ **Secret doors and traps:** Are revealed.

▶ **Invisibility:** Invisible objects and creatures are perceived.

▶ **Illusions:** Are seen through.

▶ **Enchantments:** Enchanted objects and creatures are made apparent.

▶ **Range:** Up to 30'.

▶ **Scanning speed:** An area of 100 square feet (e.g. ten × 10' squares) can be scanned in one round.

▶ **Chance of error:** Per usage, there is a 5% chance that the gem will provide false information—a hallucination of something which is not really there.

## Girdle of Giant Strength

A character who wears this girdle gains the strength of a hill giant.

▶ **Combat ability:** The wearer's ability in combat is augmented: the character attacks as an 8 Hit Dice monster. (If the character already has better attack probabilities, the girdle does not alter these.)

▶ **Damage:** The wearer inflicts 2d8 damage in combat, or twice normal damage, if using the optional variable weapon damage rules (see *Combat* in the *Advanced Fantasy Player's Tome*).

## Gloves of Dexterity

A pair of soft leather gloves which bestow remarkable manual dexterity.

▶ **DEX increase:** The wearer's DEX increases by a number of points, depending on their normal DEX: 6 or less: +4, 7–13: +2, 14–17: +1.

▶ **Pick pockets:** The wearer may pick pockets, with a 35% chance of success (or a +10% bonus if already able to pick pockets). If the victim is above 5th level, the roll is penalised by 5% for every level above 5th. There is always at least a 1% chance of failure. A roll of more than twice the percentage required for success means that the attempted theft is noticed. The referee should determine the reaction of the victim (possibly using the reaction table under **Encounters** in the *Advanced Fantasy Player's Tome*).

▶ **Open locks:** The wearer may pick locks, with a 30% chance of success (or a +10% bonus if already able to open locks). This requires thieves' tools. The character can only try this skill once per lock. If the roll fails, the character may not try the same lock again before gaining an experience level.

## Gloves of Swimming and Climbing

A pair of soft leather gloves which bestow remarkable swimming and climbing skill.

▶ **Swimming:** 180' (60') on the surface, 150' (50') underwater. (The ability to breath water is not conferred, however.)

▶ **Climbing sheer surfaces:** With a 95% chance of success (or 99% if the character can already climb sheer surfaces). A roll is required for each 100' to be climbed. If the roll fails, the character falls at the halfway point, suffering falling damage.

## Helm of Alignment Changing

A beautifully crafted but cursed helmet.

▶ **Putting on the helmet:** Instantly causes the wearer's alignment to change. The new alignment is determined at random.

▶ **Removing:** The curse is such that the wearer cannot remove the helmet, once in place, and will resist attempts to remove it.

▶ **Dispelling:** The curse can be removed by magic (e.g. *remove curse*), or (at the referee's option) by performing a special quest.

## Helm of Reading Languages and Magic

A fragile helmet that grants the wearer the ability to read writing of all kinds.

▶ **Normal text:** Text in any language can be understood.

▶ **Magical text:** Even magical writing is comprehensible. (This does not grant the ability to cast spells, however.)

▶ **Fragility:** Each time the wearer is hit, there is a 1-in-10 chance of the helm being destroyed. If the wearer is killed, the helm is destroyed.

## Helm of Telepathy

A beautifully crafted helmet that grants the magical ability of telepathy: reading and sending thoughts.

▶ **Range:** The range of the power is 90'.

▶ **Concentration:** To read a creature's thoughts, the wearer must remain still and concentrate on that creature.

▶ **Comprehension:** The creature's thoughts are made comprehensible to the wearer of the helm.

▶ **Bidirectional communication:** The wearer may initiate bidirectional, telepathic communication, though the creature is not compelled to respond.

## Helm of Teleportation

A magical helm that gives an arcane spell caster the ability to cast the *teleport* spell (see **Magic-User Spells** in the *Advanced Fantasy Player's Tome*).

▶ **Subject:** The wearer may teleport themselves, another creature, or an object.

▶ **Resisting:** If used on another creature or object, a **save versus spells** is allowed to resist being teleported.

▶ **When first found:** The helm's power is usable only once.

▶ **Recharging:** To be used again, a *teleport* spell must be cast upon the helm.

▶ **Once recharged:** The wearer may use the helm an unlimited number of times (at most once per round). If the helm is used on an unwilling subject, it once again loses its power and must be recharged, as above, to be used again.

## Horn of Blasting

A horn that can be blown to release a blast of destructive noise.

▶ **Creatures:** Within a 100' long cone (20' wide at the end) suffer 2d6 damage.

▶ **Deafness:** Affected creatures are also deafened for one turn (**save versus spells** to avoid).

▶ **Buildings:** At the referee's discretion, the horn may also be able to damage objects and buildings (e.g. a single blast might be enough to destroy a simple cottage; a 10' section of castle wall might require three blasts).

▶ **Frequency:** The horn may be used once per turn.

## Horn of Cave-Ins

A bugle or hunting horn with the power to cause cave-ins when sounded.

▶ **Without command word:** A cave-in occurs directly above the character.

▶ **With command word:** The character may aim at a section of roof within 60'. There is a 90% chance that a cave-in occurs in the desired area and a 10% chance that it occurs directly above the character.

▶ **Outdoors:** Only if blown without speaking the command word: a hail of 2d6 stones cascades onto the character. Each causes 1d6 damage.

▶ **Indoors / underground:** The ceiling collapses, causing 6d6 damage to all in a 10' radius. (**Save vs paralysis** for half.)

## Horn of Frothing

A normal-looking musical instrument which is cursed to hamper the owner if blown in perilous circumstances.

▶ **Under normal circumstances:** Blowing the horn has no special effect.

▶ **In perilous circumstances:** (e.g. in the presence of hostile monsters.) Blowing the horn causes a mass of bubbles to froth out and cover the character's head. This causes blindness for 2d10 rounds.

## Horn of the Tritons

A large conch shell which has power over marine animals and the seas. Each time it is sounded, one of the following effects may be invoked.

► **Calm rough seas:** In a 1-mile radius.

► **Summon mounts:** 6d6 hippocampi (*p59*) or giant sea horses (*p103*) arrive to obey the character's commands. (Only functions in waters where such animals live.)

► **Panic:** Causes marine animals within 240' to flee for 3d6 turns (**save versus spells**).

► **Usage frequency:** Once per day. (Tritons may blow the horn up to 3 times per day.)

► **Tritons alerted:** All tritons within 3 miles hear the sounding of the horn.

## Horn of Valhalla

An engraved metal hunting horn which summons berserkers to fight for the character.

► **Usage frequency:** Once per week.

► **Type of horn:** When found, roll d% on the table below to determine the exact powers of the horn.

► **Berserkers:** The number of berserkers summoned and their Hit Dice are shown in the table below.

► **Duration:** The berserkers remain until they are slain, have slain their opponents, or 1 hour has passed.

► **Class limitations:** Any character can use the silver horn, but only clerics, fighters, and thieves can use the other types, as indicated in the table below.

► **Characters of other classes:** If a character of a restricted class blows the horn, the summoned berserkers attack them.

### Horn of Valhalla: Type

## Horseshoes of a Zephyr

Iron shoes which, when affixed, allow a horse to float slightly above the ground.

► **Water:** The horse can move across water as if it were solid ground.

► **Tracks:** The horse leaves no tracks.

► **Missing shoes:** The magic of the shoes is only effective if all 4 are worn.

## Horseshoes of Speed

Iron horseshoes which, when affixed, double a horse's movement rate.

► **Missing shoes:** The magic of the shoes is only effective if all 4 are worn.

## Incense of Meditation

Small blocks of incense which grant boons to a divine spell caster when burned. 2d4 blocks are usually found together.

▶ **Burning:** When lit, a distinctive pearly-hued smoke and sweet fragrance are produced. A block burns for 8 hours.

▶ **Meditation:** If the divine spell caster who lit the block prays and meditates for 8 hours in the vicinity of the incense, they gain the following boons for 24 hours:

    a. **Maximised spells:** Any variable qualities of spells cast have their maximum value. (e.g. *cure light wounds* heals the maximum: 7hp).

    b. **Save penalty:** Saving throws against the character's spells are penalised by –1.

    c. **Raising the dead:** If using the optional rule for returning from death (see ***Damage, Healing, and Death*** in the *Advanced Fantasy Player's Tome*), resurrection magic used by the character has an increased chance of success. For the sake of the survival roll, the subject's CON is increased by 4.

▶ **Recognising:** The unique aroma and smoke can be recognised by divine spell casters of 5th level or higher.

## Incense of Obsession

Small rectangular blocks of sweet-smelling incense. 2d4 blocks are usually found together. Burning this incense causes a divine spell caster to suffer the delusion that their spell casting ability is greatly enhanced.

▶ **Burning:** When lit, the incense produces a distinctive pearly-hued smoke and fragrance, identical to that of *incense of meditation*. A block burns for 1 hour.

▶ **Meditation:** If the divine spell caster who lit the block prays and meditates in the vicinity of the incense, they become obsessed with spell casting.

▶ **Obsession:** The character is determined to use their spells at every opportunity, especially when not needed or when useless. The obsession remains until all spells have been cast or until 24 hours have elapsed.

## Instant Fortress

A small metal cube which can transform into a metal tower 30' tall and 20' square.

▶ **Command words:** One command word activates the tower and another returns it to the form of a small metal cube.

▶ **When activated:** The tower springs up in 1 round. Any (except the owner) within 20' must **save versus paralysis** or suffer 10d6 damage.

▶ **Exterior:** The fortress has 3 storeys, arrow slits on all 4 sides, a single entrance door at ground level, and a crenellated battlement atop it.

▶ **Entering:** The door only opens at the owner's command. *Knock* spells cannot open it.

▶ **Inside:** Stairs lead to each of the 2 upper storeys and the battlement.

▶ **Damaging:** The tower is treated as a vehicle (see *Vehicles* in the *Advanced Fantasy Player's Tome*) with AC 5 [14] and 40 hull points. Only a wish can repair it (2 hull points per wish).

▶ **Deactivating:** The fortress can only be deactivated when it is empty.

## Ioun Stones

Small, floating stones of different forms and hues. 1d10 are usually found together.

▶ **Type of stone:** When found, roll 1d20 on the table opposite to determine the type of each stone. Duplicate rolls in a single cache of stones indicate a burned out, dull grey stone.

▶ **Activating:** A stone's power is activated when held then released beside the character's head, whereupon it takes up a circling orbit 1d3 feet around the head.

▶ **Stealing:** Stones may be grasped or netted to separate them from their owner.

▶ **Attacking stones:** AC 0 [19] and 10hp.

▶ **Storing:** The character may grasp an orbiting stone to store it, deactivating its power temporarily.

## Iron Flask

A flask of iron, decorated with silver runes and sealed with a sigil-engraved brass plug. The flask—if the appropriate command word is used—has the power to trap an extra-planar being and force it into servitude.

▶ **When found:** There is a 50% chance that a creature (e.g. an elemental, djinni, efreeti, invisible stalker, or other creature of extra-planar origin) is already trapped in the flask.

▶ **Removing the plug:** Frees the trapped creature (if any). If the character speaks the command word, the creature is forced to serve for 1 turn. If the command word is not spoken, the creature's reaction should be determined randomly (see *Monster Reactions* under *Encounters* in the *Advanced Fantasy Player's Tome*).

▶ **Trapping creatures:** If the flask is empty, an extra-planar creature within 60' can be trapped by removing the plug and speaking the command word. The creature may **save versus spells** to resist. If the creature was previously trapped in the flask, it gains a +2 bonus to the save and becomes utterly hostile.

## Jug of Endless Liquids

A glass or ceramic jug which can pour forth different liquids on command.

► **Naming a liquid:** If the name of one of the following liquids is spoken out loud and the jug tipped, the liquid will pour forth up to the quantities listed:

► **Libram's alignment:** Determined by rolling 1d6: 1–2: Lawful, 3–4: Neutral, 5–6: Chaotic.

► **Vanishes after use:** Once the book's magical effect has occurred, it vanishes.

► **Arcane casters (same alignment):** May study the tome for 1 week to gain one experience level. A character can only gain this benefit once, even if another golden libram is discovered.

► **Arcane casters (other alignment):** Suffer 5d4 damage, fall unconscious for 5d4 turns, and become unable to gain experience points unless a quest of atonement is performed.

► **Other classes:** Must **save versus spells** or become permanently insane. This insanity can only be removed by magic.

## Loadstone

A polished, roughly hewn piece of decorative stone (e.g. agate) which afflicts the owner with a curse of slow movement.

► **Flight:** The curse takes effect when the character attempts to flee from an enemy (whether in combat or in pursuit).

▶ **Destroying:** The grimoire is impervious to physical harm, except if *remove curse* is cast upon it first.

## Well of Many Worlds

A 6' diameter circle of fine black cloth, often found folded down to the size of a handkerchief. The cloth can be placed upon a surface to conjure a gateway to another world.

▶ **Placing on a surface:** Creates a 6' diameter hole in the surface.

▶ **Anything placed in the hole:** Is transported to another world, plane, or dimension (as determined by the referee).

▶ **Returning:** An identical hole exists at the destination location in the other world, allowing transit back and forth.

▶ **Picking up:** When placed upon a surface, picking up the cloth causes the hole to disappear. The cloth can be picked up from either world.

▶ **Moving the hole:** Picking up the hole and placing it in a different location opens a gateway to a different world, plane, or dimension.

## Usage

**Usage:** All characters (unless noted).

**Identifying:** A potion may be identified by sipping a small amount. It is difficult to identify potions purely by smell or taste, as even potions with the same effect are not alike.

**Drinking:** Drinking a full dose of a potion takes one round.

**Duration:** The magical effect of a full dose of a potion lasts for 1d6+6 turns. The referee should roll for and track this duration, and not tell the player how long the potion will last for.

## Mixing Potions

Drinking a potion while already under the effects of another potion is dangerous:

► **Sickness:** The character is completely disabled for 3 turns, due to sickness.

► **Cancellation:** The effects of both potions are cancelled.

This rule does not apply to potions with instantaneous or permanent duration.

## Potion of Clairaudience

Enables the character to hear through the ears of another creature.

► **Range:** The other creature must be within 60'.

► **Obstructions:** Lead blocks the effect.

## Potion of Clairvoyance

Enables the character to see through the eyes of another creature.

► **Range:** The other creature must be within 60'.

▶ **Spell casting:** It is not possible to command a dragon to cast spells.

### Control Giant

▶ **Affects:** 1–4 giants of a specific type. (The referee should determine which type of giant the potion affects.)

### Control Human

▶ **Usage:** A charm may be placed upon a human within 60'. One target may be charmed per round.

▶ **Resisting:** The subject may **save versus spells** to resist the charm.

▶ **Maximum subjects:** Up to 6 Hit Dice of humans may be charmed in this way. Normal humans count as ½ HD.

▶ **Charmed individuals:** Regard the character as a trusted friend, and will come to their defence. They will obey the character's commands, as long as these are not obviously harmful and do not contradict the subject's alignment.

### Control Plant

▶ **Affects:** All plants (including plant monsters) in a 30' square area up to 60' distant.

▶ **Commands:** Affected plants may be commanded to move around as the character wishes, and may be used to entangle creatures in the area.

▶ **Affects:** Up to 3d6 Hit Dice of undead.

▶ **When the potion's effect ends:** Affected undead have a hostile reaction.

## Potion of Delusion

A character who drinks this potion believes is under the effects of another type of potion.

▶ **Type:** The other type of potion should be determined by the referee.

▶ **Describing:** The referee should try to trick the player into believing that the character is under the effects of the other potion, only revealing the truth at some vital juncture.

## Potion of Diminution

The character shrinks to 6" high.

▶ **Combat effectiveness:** While shrunk, the character is unable to harm creatures larger than 1' tall.

▶ **Narrow spaces:** The character can slip through narrow spaces.

▶ **Remaining motionless:** The character only has a 10% chance of being spotted.

The character doubles in size.

► **Melee attacks:** The character's increased strength means that their melee attacks deal double damage.

## Potion of Healing

Has one of two effects on the character who drinks it:

1. **Healing a living subject:** Restores 1d6+1 hit points of damage. This cannot grant more hit points than the subject's normal maximum.
2. **Curing paralysis:** Paralysing effects are negated.

## Potion of Heroism

Normal humans and characters of a combat-focused, non-magic using class (e.g. dwarf, fighter, halfling) who drink a *potion of heroism* temporarily gain additional levels. The number of levels gained depends on the character's normal experience level:

► **Normal human:** Gain the abilities of a 4th level fighter.

► **1st–3rd level:** Gain 3 levels.

► **4th–7th level:** Gain 2 levels.

► **8th–10th level:** Gain 1 level.

► **11th level+:** No effect.

**Effects:** All abilities of the additional levels are gained, including extra hit points.

**Damage:** Damage suffered while under the effects of this potion is first deducted from the pool of additional hit points granted.

▶ **Affects:** 1d6 normal animals or 1 giant animal (not magical or intelligent animals).

▶ **Resisting:** No saving throw is allowed.

▶ **Visual range:** The character can only control animals that they can see.

▶ **Maximum subjects:** Up to 6 Hit Dice of humans may be charmed in this way. Normal humans count as ½ HD.

▶ **Charmed individuals:** Regard the character as a trusted friend, and will come to their defence. They will obey the character's commands, as long as these are not obviously harmful and do not contradict the subject's alignment.

▶ **Duration:** The charm lasts until dispelled, until the ring is removed, or until the wearer cancels it.

## Ring of Controlling Plants

Grants the power to control plants.

▶ **Affects:** All plants (including plant monsters) in a 10' square area.

▶ **Range:** The area may be up to 60' distant.

## Ring of Delusion

The wearer believes is under the effects of another type of magic ring.

▶ **Type:** The other type of ring should be determined by the referee (e.g. a ring of protection or a ring of spell turning).

▶ **Describing:** The referee should try to trick the player into believing that the character is under the effects of the other ring, only revealing the truth at some vital juncture.

## Ring of Djinni Summoning

This ring grants the power to summon a lesser djinni (see *p38*).

▶ **Duration of service:** The djinni will serve the character who summoned it for up to 24 hours.

▶ **Commands:** The djinni only obeys the one who summoned it—another character who takes the ring has no power over the djinni.

▶ **Usage frequency:** The ring may be used up to once per day.

## Ring of Fire Resistance

Grants the wearer protection against fire.

▶ **Normal fire:** Unharmed by non-magical fire.

▶ **Save bonus:** Gain a +2 bonus to all saving throws versus fire-based magical or breath attacks.

▶ **Fire-based damage:** Is reduced by 1 point per damage die rolled. (Each die inflicts a minimum of 1 hit point damage.)

## Ring of Invisibility

The wearer of this ring becomes invisible.

► **Attacking:** If the character attacks or casts a spell, the invisibility is broken.

► **Usage frequency:** May be used up to once per turn.

## Ring of Protection

Grants a measure of protection from harm:

► **Armour Class:** A +1 AC bonus.

► **Saving throws:** A +1 bonus to all saves.

### Ring of Protection, 5' Radius

Allies within 5' of the wearer also benefit from the ring's protective power. For example, two characters fighting beside the wearer of the ring would gain the protective benefit.

## Ring of Regeneration

The wearer heals at an accelerated rate.

► **Rate:** The wearer regains 1 hit point per round.

► **Severed limbs:** Will also regrow. The rate depends on the size of the limb (e.g. a finger may regrow in one day, while a whole limb may take a week).

► **Fire or acid damage:** Cannot be regenerated.

► **Death:** The ring does not function if the wearer is reduced to 0 or less hit points.

## Ring of Spell Storing

► **Knowledge:** The wearer of the ring knows which spells it contains.

► **Triggering:** The wearer of the ring can trigger the spells at will (up to one spell per round).

► **Caster level:** For spells whose effects vary by the level of the caster, the wearer of the ring is treated as a caster of the lowest level required to cast the spell.

► **Recharging:** Once a spell is triggered, it may not be reused until it is recharged—the expired spell must be cast directly onto the ring.

## Ring of Spell Turning

Spells cast on the wearer of this ring are reflected back onto the caster.

► **Charges:** After 2d6 spells are reflected, the ring loses its power.

## Ring of Telekinesis

Grants the power to move objects or creatures within 120' by concentrating.

▶ **Weight:** Up to 2,000 coins of weight may be targeted.

▶ **Movement:** The target may be moved up to 20' per round, in whatever direction the wearer of the ring wishes (including vertically).

▶ **Resisting:** A targeted creature may **save versus spells** to resist.

▶ **Concentration:** If concentration is broken, the target falls.

## Ring of Water Walking

Grants the power to walk on the surface of water, without sinking.

## Ring of Weakness

A cursed ring that weakens the wearer.

▶ **Effect:** Within 6 rounds of putting the ring on, the wearer's STR is reduced to 3.

▶ **Removing:** The ring cannot be removed, once worn.

▶ **Dispelling:** The curse can be removed by magic (e.g. *remove curse*), or (at the referee's option) by performing a special quest.

## Ring of Wishes

Grants the wearer's wishes (see *p149*).

▶ **Charges:** The number of wishes granted is noted in the ***Rings*** table. Once all wishes have been used, the ring's magic is spent.

# Rods, Staves, Wands

## Charges

Rods, staves, and wands have a limited number of uses, called "charges".

**Number of charges:** The number of charges in an item when discovered is determined by the referee, and depends on the type of the item. It is not possible for characters to discover the number of charges in an item.

**Usage:** Each use of the item takes one round and consumes one charge.

**Consuming the last charge:** The item loses its magical potency.

**Recharging:** Is not possible.

## Rods

## Immovable Rod

A 4' length of metal which has the power to anchor itself to a point in space.

▶ **In combat:** The rod attacks as a +2 magic item, doing 1d6 damage. It can be hurled (range: 5'–20' / 21'–40' / 41'–60').

▶ **Anchoring:** A command word causes the rod to anchor itself to its current position in space. Once anchored, it can only be moved by a wish. (Even gravity does not move the rod.)

▶ **Releasing:** A second command word unanchors the rod.

▶ **Momentum:** If the rod is in motion when anchored, it continues its previous direction and speed of movement.

▶ **No charges:** Does not use charges; may be used an unlimited number of times.

## Rod of Absorption

Absorbs spells cast at the character and uses the absorbed energy to cast the character's own spells.

▶ **Usage restriction:** Only usable by spell casters (divine or arcane).

▶ **Spell absorption:** When a spell is cast at the character, the rod absorbs its energy, negating its effect. This uses one charge per level of the spell. The rod gains an equal number of stored energy levels.

▶ **Stored energy:** May be used to cast spells which the character has memorized. When doing so, a number of stored energy levels are expended equal to the level of the spell cast. Spells cast in this way are *not* lost from the character's memory.

▶ **Charges:** The rod has 50 charges.

## Rod of Cancellation

Drains the enchantment from a magic item that is touched.

▶ **In combat:** Usage requires an attack roll against AC 9 [10] (adjusted by the referee, if the target item is being actively used).

▶ **Effect:** The item that is touched becomes utterly non-magical.

▶ **One use only:** The rod may only be used once: it has but a single charge.

## Rod of Captivation

Beguiles creatures of all kinds.

▶ **Effect:** All intelligent creatures (including those of animal intelligence) within 20' are charmed.

▶ **Resisting:** Creatures of human-level intelligence may **save versus spells (with a –2 penalty)** to resist.

▶ **Charmed creatures:** Regard the character as their trusted friend and ally and will come to the character's defence.

▶ **Commands:** If they share a language, the character may give the charmed creatures commands, which they will obey.

▶ **Subject's nature:** Commands that contradict a charmed creature's nature or alignment may be ignored.

▶ **Suicidal commands:** An affected creature never obeys suicidal or obviously harmful orders.

▶ **Duration:** 1 turn.

## Rod of Lordly Might

A thick metal rod with a spherical head and a set of 8 studs along the shaft. Pressing the studs activates a variety of magical and mundane effects.

▶ **Usage restriction:** Only usable by non-spell casting martial characters (e.g. fighters).

▶ **In combat:** The rod may be wielded as a mace +2. If the wielder has a STR of less than 16, they suffer a –2 penalty to attack rolls, due to the rod's weight.

▶ **Studs:** Have the following effects:

a. **Paralysis:** A creature touched must **save vs spells** or be paralysed for 6 turns. This consumes one charge.

b. **Fear:** Creatures within a 60' cone (30' wide at the end) must **save versus spells** or flee in terror for 10 rounds. This consumes one charge.

c. **Life drain:** A creature hit with the rod in melee (requiring an attack roll) suffers 2d4 damage. The wielder gains the same number of hit points (up to their normal maximum). This consumes one charge.

d. **Flaming sword +1:** A flaming sword blade springs from the sphere, while the rod shortens to become the hilt. The sword casts light in a 30' radius and may be used to set things on fire (treat as a torch). Against fire-vulnerable foes, its attack bonuses increases: +2 vs bird-like creatures and creatures which cannot regenerate fire damage; +3 vs plant-creatures and undead.

e. **Battle axe +3:** An axe blade springs from the sphere, while the rod lengthens to become the handle.

f. **Spear +2:** A blade springs from the sphere, while the rod lengthens into a 6' long shaft.

g. **Ladder:** The rod lengthens to up to 50' long, with horizontal climbing bars along both sides and spikes at either end. Attached to a solid surface at each end, the rod can support up to 40,000 coins of weight.

h. **Orientation:** The wielder gains immediate knowledge of their elevation above/below ground and which direction is north.

▶ **When all charges are expended:** Studs a, b, c, d, and e no longer function.

## Rod of Parrying

A 5' metal rod which provides offensive and defensive capabilities in melee.

▶ **Attacking:** The rod attacks as a +2 magic item, doing 1d8 damage.

▶ **Parrying:** Instead of attacking, the character may use the rod to parry, gaining a +4 bonus to AC versus melee attacks for one round. It is not possible to parry with the rod when retreating from melee (see *Movement* under *Combat* in the *Advanced Fantasy Player's Tome*).

▶ **No charges:** Does not use charges; may be used an unlimited number of times.

## Rod of Resurrection

Has the power to return the dead to life.

▶ **Usage restriction:** Usable by divine spell casters only.

▶ **Effect:** A deceased person within 120' is restored to life with full hit points. A person who has been dead for up to 100 years may be resurrected. The number of charges expended depends on the race of the person (see table below).

▶ **Usage frequency:** The rod can be used at most once per day.

| Rod of Resurrection: Charges per Use | |
|---|---|
| **Subject's Race** | **Charges** |
| Dwarf (incl. duergar) | 3 |
| Elf (incl. drow) | 4 |
| Gnome (incl. svirfneblin) | 3 |
| Half-elf | 2 |
| Halfling | 2 |
| Half-orc | 4 |
| Human | 1 |
| Other | 4 |

## Rod of Striking

A rod which can be used as a weapon and is especially potent against constructs and chaotic extra-planar monsters.

▶ **Attacking:** The rod attacks as a +3 magic item, doing 1d8 damage.

▶ **Used against constructs:** (For example golems.) Each hit expends one charge and inflicts double damage. On a natural 20 attack roll, the construct is instantly destroyed.

▶ **Used against chaotic extra-planar monsters:** On a natural 20 attack roll, one charge is expended and triple damage is inflicted.

SBP

▶ **Resisting:** No saving throw is allowed.

▶ **Visual range:** The character can only control animals that they can see.

▶ **Concentration:** Control is broken if the user of the staff moves or attacks.

▶ **When concentration ends:** The referee should make a reaction roll with a –1 penalty (see *Monster Reactions* in the *Advanced Fantasy Player's Tome*) to determine the animals' behaviour.

▶ **Usage frequency:** This power of the staff may be used up to once per turn.

### Commanding Humans

▶ **Usage:** A charm may be placed upon a human within 60'. One target may be charmed per round.

▶ **Resisting:** The subject may **save versus spells (with a –2 penalty)** to resist.

▶ **Maximum subjects:** Up to 6 Hit Dice of humans may be charmed in this way. Normal humans count as ½ HD.

▶ **Spells:** If the caster of the spell effect to be dispelled is higher than 9th level, there is a 5% chance per level difference that the attempt to dispel will fail.

▶ **Magic items:** One-use magic items (e.g. potions, scrolls) are destroyed utterly. Permanent items (e.g. armour, weapons, wands) are rendered non-magical for 1d4 rounds.

## Staff of Healing

Has the power to heal those touched.

▶ **Divine magic:** Usable by divine spell casters only.

▶ **Effect:** Heals 1d6+1 hit points with each usage.

▶ **Usage limit:** Is effective on any individual at most once per day.

▶ **No charges:** Does not use charges; may be used an unlimited number of times.

## Staff of Power

An item of great wizardly power, this staff may be used as a weapon in melee, and may evoke five different magical effects.

► **Arcane magic:** Usable by arcane spell casters only.

► **Melee:** Expending one charge, inflicts 2d6 damage on a successful hit.

► **Divine magic:** Usable by divine spell casters only.

► **In melee:** Treated as a staff with a +1 magic bonus to attacks and damage.

► **Victims:** Must **save versus spells** or be immobilised in the coils of the snake. Victims are completely helpless while held by the snake (1d4 turns, or released as the wielder of the staff commands).

► **Snake:** Has AC 5 [14], HD 3 (20hp), and a movement rate of 60' (20').

► **When the victim is released:** The snake returns to the owner and transforms back into a staff. (At this point, it is healed of any damage it has suffered.)

► **If the snake is killed:** It does not return to its staff form, becoming non-magical.

► **No charges:** Does not use charges; may be used any number of times.

## Staff of Striking

Used as a magical melee weapon.

► **Expending one charge:** Inflicts 2d6 damage on a successful hit.

## Usage

Scrolls are aged sheets of parchment or paper on which magical words have been written by a high-level spell caster.

**One use only:** When a scroll is read, the words disappear.

**Light:** A scroll can only be used if there is enough light to read by.

## Cursed Scroll

**Usage:** All characters (unless noted).

**Activation:** Merely looking at the baneful script on the scroll curses the character. The referee should determine the nature of the curse (see examples below).

**Removing:** A curse can be removed by magic, or (at the referee's option) by performing a special quest.

### Example Curses

▶ **Transformation:** The reader changes into a harmless creature (e.g. a frog).

▶ **Summoning:** A wandering monster appears next to the reader and attacks (gaining surprise). The monster is of equal level to the reader.

▶ **Lost item:** A magic item in the reader's possession vanishes. The referee may select the item or choose it at random.

▶ **Energy drain:** The reader permanently loses one experience level (or Hit Die). This incurs a loss of one Hit Die of hit points, as well as all other benefits due to the lost level (e.g. spells, saving throws, etc.). A character's XP is reduced to halfway between the former and new levels. A person who loses all levels dies.

▶ **Ability score re-roll:** The player must re-roll the character's prime requisite.

▶ **Slow healing:** The reader's healing capacity is reduced. Natural healing takes double the normal amount of time, and healing spells only cure half the normal number of hit points.

## Protection Scroll

**Usage:** All characters (unless noted). (Written in non-magical languages—usually Common.)

**Activation:** Reading the script aloud conjures a circle of protection against a specific type of monster or energy.

**Area of protection:** When used, conjures a 10' radius circle of protection around the reader. If the reader moves, the circle of protection follows them.

**Protection against monsters:** For scrolls of protection against monsters, the circle does not prevent affected monsters from using magic or missile attacks against those within it. If anyone within the circle attacks an affected monster in melee, the circle is broken.

### Protection from Elementals

When used, conjures a 10' radius circle of protection around the reader.

▶ **Effect:** No elemental may enter the circle.

▶ **Moving:** If the reader moves, the circle of protection follows them.

▶ **Ranged attacks:** The circle does not prevent elementals from using magic or missile attacks against those within it.

▶ **Breaking:** If anyone within the circle attacks an affected elemental in melee, the circle is broken.

▶ **Duration:** 2 turns, unless broken.

### Protection from Lycanthropes

When used, conjures a 10' radius circle of protection around the reader.

▶ **Effect:** A number of lycanthropes are barred from entering the circle. The number depends on their Hit Dice: 1–3 HD: 1d10 lycanthropes affected, 4–5 HD: 1d8 affected, 6+ HD: 1d4 affected.

▶ **Moving:** If the reader moves, the circle of protection follows them.

▶ **Ranged attacks:** The circle does not prevent lycanthropes from using magic or missile attacks against those within it.

▶ **Breaking:** If anyone within the circle attacks an affected lycanthrope in melee, the circle is broken.

▶ **Duration:** 6 turns, unless broken.

### Protection from Magic

Conjures a barrier that spells and spell-like effects (e.g. from magic items) cannot cross.

▶ **Effect:** The barrier prevents magic from entering the circle, but also from leaving it.

▶ **Duration:** 1d4 turns.

▶ **Dispelling:** Only by a wish.

### Protection from Undead

When used, conjures a 10' radius circle of protection around the reader.

▶ **Effect:** A number of undead monsters are barred from entering the circle of protection. The number depends on their Hit Dice: 1–3 HD: 2d12 undead affected, 4–5 HD: 2d6 undead affected, 6+ HD: 1d6 undead affected.

▶ **Moving:** If the reader moves, the circle of protection follows them.

▶ **Ranged attacks:** The circle does not prevent undead from using magic or missile attacks against those within it.

▶ **Breaking:** If anyone within the circle attacks an affected undead monster in melee, the circle is broken.

▶ **Duration:** 6 turns, unless broken.
## Spell Scroll

**Usage:** Spell casters.

**Type of magic:** 1-in-4 scrolls contain divine spells; the rest contain arcane spells.

**Activation:** Reading the script aloud conjures the effect of a specific spell. Only arcane spell casters can use scrolls of arcane spells. Only divine spell casters can use scrolls of divine spells.

**Arcane spell scrolls:** Are written in magical script that can only be read by magic.

**Divine spell scrolls:** Are written in normal languages (usually Common), but can only be used by divine spell casters.

**Scrolls of multiple spells:** If a scroll contains multiple spells, only the spell cast disappears from the scroll.

## Spells on a Scroll

The referee may choose the spells or may roll for them randomly. The table below may be used to select the level of each spell on a scroll.

| Random Scroll Spell Level | | |
|---|---|---|
| | **Spell Level** | |
| **d%** | **Arcane** | **Divine** |
| 01–25 | 1st | 1st |
| 26–50 | 2nd | 2nd |

| 71–85 | 4th | 4th |
| 86–95 | 5th | 5th |
| 96–00 | 6th | 5th |

## Treasure Map

**Usage:** All characters (unless noted).

A map that indicates the route to a valuable treasure, located in a dungeon or wilderness.

**Interpreting:** Treasure maps may not always be easy to interpret: a map may be incomplete, worded in riddles, or written in an obscure language.

**Preparing in advance:** The referee should prepare treasure maps in advance.

### Treasures

The following list of treasure map types may be used to determine the nature of the treasure that a map leads to.

► **I:** 1 magic item.

► **IV:** 3 magic items (no swords).

► **X:** Hoard worth 5d6 × 1,000gp and 1 magic item.

► **XI:** Hoard worth 5d6 × 1,000gp and 5d6 gems.

► **XII:** Hoard worth 6d6 × 1,000gp.

### Hoard Value

For treasure hoards with a listed gold piece value, the referee may choose what type of treasure is in the hoard. (For example, it may be coins, but could also consist of valuable art objects or jewels.)

### Guardians

The treasure is normally guarded by enchantments, traps, or monsters (e.g. a monster from the dungeon encounter tables of levels 5–6, or higher).

## Type of Sword

Unless a rolled sword indicates that it is of a specific type (e.g. short sword, normal sword, or two-handed sword), the referee may choose its type or may roll on the following table:

## Cursed Weapons

**Penalty:** Cursed weapons specify a penalty that is applied to both attack rolls and damage rolls made with the weapon.

**Discarding:** Once the weapon has been used in combat, the character comes under the curse and is not able to discard the item. In fact, they will favour the weapon and use it whenever possible. The curse can only be removed with magic.

► **Type of foe:** Should be selected by the referee. (e.g. birds, spiders, dragons, magic-users, mammals, undead, etc.).

► **Fired against a foe creature:** Acts as a +3 arrow. If the attack hits, the foe is instantly slain.

## Crossbow +1, Distance

An enchanted crossbow which can fire up to double the normal range.

► **Ranges:** 5'–160' / 161'–320' / 321'–480'.

## Crossbow +1, Speed

An enchanted crossbow which can fire with great rapidity.

► **If using the optional reload rule:** (See *Weapons and Armour* in the *Advanced Fantasy Player's Tome*.) The crossbow can be reloaded so rapidly that it may fire every round in combat.

► **Otherwise:** The crossbow always attacks first in the round, as if the wielder had won initiative.

## Crossbow +2, Accuracy

An enchanted crossbow which can fire with precision, even at long range.

► **Attack rolls at long range:** The normal –1 range modifier does not apply.

► **Maximum range:** Is not increased by the enchantment.

## Dagger +1, Buckle

An ornamental belt buckle which can transform into a magical dagger.

► **Activating:** The owner must simply grasp the buckle and will it to become a dagger.

► **Returning:** After use, the blade may be returned to its buckle form by touching it to the belt and willing it to transform.

## Dagger +1, Throwing

A finely balanced dagger ideal for use as a missile weapon.

► **Range:** The dagger has double the normal throwing range: 5'–20' / 21'–40' / 41'–60'.

► **Damage:** When used as a missile weapon, the dagger inflicts double damage on a successful hit.

## Dagger +1, Venomous

A dagger that magically injects venom into the victim when it strikes true.

► **Natural 20:** If the wielder rolls an attack roll of natural 20, the dagger injects venom into the victim (**save versus death** or die instantly).

## Dagger +2, Biter

A broad-bladed dagger which has special properties in the hands of a demihuman of smaller than human size.

► **Length:** The blade lengthens to that of a short sword, inflicting 1d6+2 damage.

## Javelin of Lightning

A magical javelin which explodes in a stroke of lightning when it hits.

► **On a successful hit:** The javelin explodes in a stroke of lightning 5' wide and 30' long (leading from the target 30' back towards the character who hurled the javelin). All within the area (including the target who was hit) suffer electrical damage.

► **Electrical damage:** 20 points (**save versus spells** for half). The target hit by the javelin may not make a saving throw.

► **Javelin consumed:** When it explodes into lightning, the javelin is destroyed.

## Javelin of Seeking

► **Command word:** Speaking the correct command word causes the javelin to fly out of the character's hands to seek the indicated target (up to 90' distant).

► **Seeking:** The javelin can fly in any direction to reach its target, including around obstacles or corners. The character must make an attack roll with a +6 bonus to determine if the javelin hits.

## Sling Bullet +1, Impact

A cast metal sling bullet which inflicts additional damage on an accurate hit.

► **Examining:** The bullet is engraved with fine runes.

► **On a successful hit:** If the attack roll was higher than the minimum roll required to hit the target, the bullet inflicts additional damage. The additional damage is equal to the actual attack roll minus the minimum required to hit the target. For example, if an attack roll of 12 or more is required to hit a target and a 16 is rolled, the bullet inflicts 4 additional points of damage to the target.

► **Reach:** The wielder can attack foes at up to the staff's length distant.

## Trident −2, Yearning (Cursed)

A cursed trident which causes one who touches it to be overcome with a yearning to immerse themselves in deep water.

▶ **Curse:** The wielder is instantly compelled to seek out the nearest body of water sufficient to fully submerge themselves in.

▶ **Breathing:** The trident does not grant any special ability to breathe underwater.

## Trident +1, Fish Command

A trident enchanted with the power to empathically control fish.

▶ **Commanding fish:** Speaking a command word causes all fish within 60' to **save versus spells** or be charmed. This consumes one charge.

▶ **Failed save:** The fish obeys empathic commands from the wielder, who can control its movement and behavioural state (e.g. anger, fear, hunger, etc.). The charm lasts as long as the fish can see the trident and the one who wields it.

▶ **Successful save:** The fish is not charmed, but will not approach closer than 10' to the wielder of the trident.

▶ **Schools of fish:** May be treated as a single entity, rather than making a save for each individual fish.

▶ **Charges:** 1d4+16.

## Trident +1, Submission

A trident enchanted with the power to demoralise foes.

▶ **Successful hits:** The target must **save versus spells** or be demoralised. This consumes one charge.

▶ **Charges:** 1d4+16.

## Tridents

Tridents are treated as spears, for combat purposes (1d6 damage). They cannot be thrown.

## Trident +2, Warning

An enchanted trident which can warn the wielder of marine predators.

▶ **Detecting:** On command, the trident can detect all hostile marine predators within 240' (including those which are hunting). The scan takes one round and consumes one charge.

▶ **After being hurled:** The hammer returns to the wielder's hands.

▶ **Frequency of hurling:** The hammer may be hurled at most 3 times in the space of 1 turn (i.e. 3 times per combat).

# SENTIENT SWORDS

If a magic sword possesses sentience (see *Swords, p222* for the likelihood), the procedure on this page may be used to determine its powers. (Alternatively, the referee may select its qualities as desired.)

## Rolling a Sentient Sword

1. **Special purpose:** If the sword has a special purpose, see *Special Purpose, p239* to determine what it is.
2. **Intelligence and personality:** The sword's INT is 1d6+6. (Swords imbued with a special purpose always have INT 12.) The sword has its own personality and should be played as an NPC.
3. **Communication:** The sword's INT determines the means by which it can communicate. See the table to the right.
   a. **Empathy:** The sword cannot communicate directly, but empathically informs the wielder of its powers and how to use them.
   b. **Speech:** The sword speaks out loud. The number of languages it knows is indicated by rolling on the languages table, to the right. Languages should be selected by the referee.
   c. **Reading:** The sword can read all languages it can speak, as well as magical inscriptions.
4. **Alignment:** See the table to the right.
5. **Powers:** The sword's INT determines the number of powers it has. See the table to the right. Powers are described in the following pages.
6. **Ego:** Sentient swords have an *Ego* rating—a measure of their force of personality. This is rolled on 1d12. Swords imbued with a special purpose always have an Ego of 12.

### Sentient Sword Communication

| INT | Reading | Communication |
|-----|---------|---------------|
| 7 | No | Empathy |
| 8 | No | Empathy |
| 9 | No | Empathy |
| 10 | No | Speech |
| 11 | Yes | Speech |
| 12 | Yes | Speech |

### Sentient Sword Languages

| d100 | Languages |
|------|-----------|
| 01–50 | Alignment tongue + 1 |
| 51–70 | Alignment tongue + 2 |
| 71–85 | Alignment tongue + 3 |
| 86–95 | Alignment tongue + 4 |
| 96–99 | Alignment tongue + 5 |
| 00 | Roll twice again, adding results |

### Sentient Sword Alignment

| d20 | Alignment |
|-----|-----------|
| 1–13 | Lawful |
| 14–18 | Neutral |
| 19–20 | Chaotic |

### Sentient Sword Powers

| INT | Powers |
|-----|--------|
| 7 | 1 sensory power |
| 8 | 2 sensory powers |
| 9 | 3 sensory powers |
| 10 | 3 sensory powers |
| 11 | 3 sensory powers |
| 12 | 3 sensory + 1 extraordinary |

## Using a Sentient Sword

Sentient swords grant the wielder special powers beyond those of a normal magic sword, but using one also carries risks.

### Activating Powers

► **In hand:** To use a power, the sword must be in the wielder's hand.

► **Concentration:** The wielder must concentrate to activate a power.

### Alignment

The alignment of the sword can only be determined by touching it. Doing so may incur damage if the character is of a different alignment to the sword:

► **Lawful swords:** Inflict 1d6 damage per round to neutral characters and 2d6 per round to chaotic characters.

► **Neutral swords:** Inflict 1d6 damage per round to non-neutral characters.

► **Chaotic swords:** Inflict 1d6 damage per round to neutral characters and 2d6 per round to lawful characters.

## Control

A sentient sword has its own personality and can, at times, attempt to exercise control over the person who wields it. A control check (see below) is triggered in any of the following circumstances:

► **First contact:** Upon the character first touching the sword.

► **Wounded:** When the character is reduced to half hit points or less.

► **Jealousy:** When another magic weapon comes into the character's possession.

► **Alignment difference:** Upon every use, if the sword and the character are of different alignments.

► **Special purpose:** If the sword has a special purpose: every time the special purpose is applicable. (e.g. when encountering a character or creature of the type the sword is designed to slay.)

### Control Checks

When one of the aforementioned circumstances occurs, a control check is required:

1. Determine the sword's Will score:
   a. The sum of its INT and Ego.
   b. Add one for each extraordinary power the sword has.
   c. Add 1d10 if the sword and the wielder of are different alignments.

2. Determine the wielder's Will score:
   a. The sum of STR and WIS scores.
   b. If the character has less than full hit points, Will is reduced by 1d4 (or 2d4 if the character has less than half hit points).

3. Compare the Will scores. If the sword's Will score is higher, it takes control of the character's actions.

### When the Sword Takes Control

The referee determines the behaviour of the character, via the sword, for example:

► **Jealousy:** Discarding other weapons, or ignoring newly discovered magic weapons.

► **Glory:** Charging into battle, in order to gain glory for the sword.

► **Surrender:** To a foe whom the sword deems either more worthy of possessing it or more susceptible to being controlled.

► **Indulgence:** Making lavish expenditures for the sword. Purchasing expensive sheaths, having jewels fitted, having enchantments and wards applied, etc. The sword may force the character to spend most of their money on such things!

### Ending Control

Once in control, the sword will only release the character when the circumstance that triggered the control check is over or when the sword is otherwise satisfied.

Some sentient swords are also imbued with a special purpose. The purpose of such swords is typically to slay a certain type of character or creature. The purpose may be rolled on the table below, or the referee may invent others.

| Sentient Sword Special Purpose | |
|---|---|
| **d6** | **Type of Target to be Slain** |
| 1 | Arcane spell casters |

## Alignment Power

In addition to their sensory and extraordinary powers, swords of special purpose have an extra power when used to achieve their designated purpose (e.g. when attacking the enemy the sword was designed to slay). This power depends on the sword's alignment:

▶ **Lawful:** Chaotic foes hit by the sword must **save versus spells** or be paralysed.

▶ **Neutral:** The wielder gains a +1 bonus to all saving throws.

▶ **Chaotic:** Lawful foes hit by the sword must **save versus spells** or be turned to stone.
