Mateba Model 207 Handgun

It is chambered for the 9mm Parabellum cartridge and it's six round cylinder is hinged at the top of the frame rather than the bottom. The M207's hexagonal barrel is lined up with the bottom-most chamber for greater accuracy and the weapon's strange design is counter balanced by a top mounted weight. It should be noted that the Mateba's greatest feature is its accuracy. Unfortunately, it is not as quick or as high powered as most automatics. Additionally, its design causes problems with loading, making it less than an ideal choice in situations

where a lot of ammo is being expended. Features ergonomic grips and interchangeable barrels.

Weight: 2.41 lbs. (1.088 kg)
Damage: 3D6 for a single round.
Penetration Value: 3.
