6

Flight, Focus Fire, Hands

With twice the armor of a Zentraedi Battlepod, the Nousjadeul-Ger powered armor suit is easily a match for the mecha of the UEDF. Such elite pilots are organized into special mechanized infantry squadrons, where they are used in covert ops, commando strikes and special forces missions in addition to select infantry operations. Their firepower, heavy armor and agility allow these troops to adapt well to most battlefield situations and use handheld weapons, explosives and other equipment.

NOUSJADEUL-GER
