Introduction

The *Fantasy Character Generation Toolkit* is designed to allow you, the player, to create a fully detailed hero, complete with family history and a backstory of deeds before he became an adventurer.

All you need to use the *Toolkit* is a d100, a pencil, some paper, and a bit of time.

Reading through, you'll quickly notice that the power range the tables produce is quite varied. Some characters end up far weaker than a regular Novice character, whereas other will be the equivalent of a Seasoned or Veteran character. We're not making any claims that the system produces perfectly balanced character, but on average you'll be roughly equivalent to a Novice character built using the regular rules.

So why would you want to make a random character? Well, one reason is the chance to end up with a hero more powerful than the standard system allows. You might end up as a demigod mercenary captain of an elite band of hardened veterans, and be loaded down with useful Edges but no Hindrances.

Of course, there is also a chance you might end up with a crippled character with only a handful of skills and no Edges, but that's part of the risk you're taking.

Another reason is that the tables provide a complete backstory. What did your parents do? Where were you born? What was my childhood like? Did your siblings bully you or admire you? How did I get my Fighting at d10? You'll have all these answers and more beside.

It is important to note that this book does not replace the standard character generation system. It is an optional extra, available if you (and your GM) want to use it. If you don't want to risk having a substandard character, use the standard generation system.

Using the Tables

Using the *Fantasy Character Generation Toolkit* couldn't be easier. Simply start at Table 1 and follow

the instructions. There are a few rules to bear in mind as you go, however.

Inspiration

You can use the tables here in conjunction with the standard system, but you don't gain any of the benefits from the table. For instance, you might wonder where your character was born, so you roll on the table. If the entry says, "Gain 1 die in Streetwise," for example, you only get a free die if you're using this toolkit to generate the character. If you want that die using the standard system, you'll have to buy it from your standard starting allotment.

Assigning Traits

All characters begin character generation with a d4 in their attributes and zero dice in all skills. Certain entries will instruct you to increase one or more traits by a certain of die. Die increases go d4, d6, d8, d10, d12 as normal.

Some entries apply to a specific trait. Others allow you to choose where the dice go. When instructed to do so, just add the number of dice to what you have already. Skills you don't have start at d4 when they gain their first die.

Linked Skills

Sometimes you'll find your skills go over the linked attribute. Don't worry about paying extra—just increase the skill by the number of dice indicated.

Trait Limits

Trait limits remain a d12. If you are told to increase a trait that is already at a d12, you gain no benefit but do not reroll that entry (see below). Each profession

has only a set number of common skills. If you find all your core skills are at a d12, you might want to consider changing career and learning some new skills rather than waste the benefits.

Total Points

Given the random nature of the tables, some characters will end up with more than the usual 5 attribute and 15 skill points, and some will have less. That's the risk you take of using this system.

Whatever your character ends up with, he keeps. Don't go assigning extra dice to bring you up to the standard starting levels or lowering your dice to meet the usual starting numbers.

Edge Requirements

Sometimes you'll be told to give your character an Edge he couldn't normally take. Most often you won't have the required traits, but in rare cases you won't meet an Edge or Rank requirement.

Don't worry about this. Just add the Edge to your character as if he met all the requirements. Again, it's part of the chance rolling on the tables gives you to make an above-average character.

Duplicate Entries

Due to the way the generator works, there are several types of duplicate entry: each explained below.

Trait Entry

Sometimes you'll roll the same result on the same table. If the entry tells you to increase a trait by a certain number of dice, or gives you the choice of spending dice among multiple skills, apply the result again. Do not reroll.

If the entry tells you to increase a trait that is already at a d12, you gain no benefit, but the roll still counts. In this case, it simply means you performed the same action but learned nothing new.

Fixed Edges & Hindrances

If the entry has only a fixed result, such as gaining a fixed Edge or Hindrance you already have, simply reroll on that table. If you roll an Edge or Hindrance that has an "improved" or Major variant, you don't automatically upgrade to the advanced version.

Variable Edges

Edges and Hindrances with a variant work differently, however. You can have more than one Ally

or Connection, even of the same type. The same goes for Enemies, as well as Vows and Phobias, although duplicate results of the latter two should be rolled.

For instance, a character can have Vow (Silence) and Vow (Poverty), but he can't have two vows of silence.

If a character has a Minor Hindrance, such as Vow (Silence), and rolls the Major version of the same type, he upgrades and loses the minor version.

If a character has a Major version of a Hindrance and rolls a Minor version of exactly the same Hindrance, reroll on the appropriate subtable.

For instance, if a character rolled an entry leading him to the Vow subtable for a Minor Hindrance and he rolled a duplicate of a major one he already had, he would roll for a new Minor Vow, not reroll the entry that led him to gain the Vow in the first place.

Just to note, we've left Delusions for you and your GM to decide between you, so you can have more than one of those as well.

Mixed Entry

You might roll an entry more than once which has both a variable and fixed result. For instance, you may be told to increase certain traits and gain a fixed Edge or Hindrance you already have. In this case, use the guidelines above to help decide what you gain from a mixed entry.

Starting Rank

Regardless of the number of trait points or Edges you end up with, and whatever the Rank requirement of Edges your character has, the character begins play as a Novice character. From there on, all the regular rules regarding rank requirements apply as usual.

If you rolled an Edge which has an "improved" Version, such as Block or Level Headed, you have to meet all the standard requirements of the improved Edge. So you can be a Novice with Block, but you can't buy Improved Block until you reach Veteran.

Final Step

Once you've finished rolling the die, you need to work the entries into a coherent backstory. At first some of the entries may seem at odds with each other, such as a priest of the goddess of healing have an undead or demonic ally, but with a little imagination you'll have a great tale to tell.

Give your backstory to your GM and, with any luck, he'll weave the elements into the campaign, giving you ample opportunities for great roleplaying.

Race & Physique

These first tables detail your character's race, his physical appearance, and also his state of mind. Start at Table 1 and follow the instructions.

1 Racial Origin

Every character belongs to a race. If you want to play a particular race, then just pick an entry. You still have to roll on the Racial Abilities table appropriate to your race. See the notes in section 1.1 for details.

Professions

5.1 Professions

Unless otherwise directed by an entry in previous table, roll on this table to see what profession your character undertook.

Choices: Previous entries, notably your Social Status, may allow you to start in a career without having to roll on this table. If you elect to roll on this table instead, you must take the result. You cannot roll first to see if the result is better than the career you have been offered.

Starting Package: Each profession grants the character a set of trait modifiers. On starting your first career, adjust your traits immediately.

Changing Profession: Some entries on the individual profession tables force you to switch career. You can also voluntarily change job, if you wish. To do so, roll once on the table below to see what job is available. You may do this once after each roll on the professional table. If you do not like the result, your character simply passed the offer by and stayed in his current career. If you like the result, you may switch careers at the cost of one roll on the profession tables.

Second Starting Packages: A character starting a second career does **not** gain a complete second starting package. If you are directed to a new career by a table entry, you normally gain a few dice to spend in skills. If you voluntarily change job, you get nothing, unless you switch to an arcane profession.

Arcane Professions: A character who voluntarily changes to an arcane profession (Apprentice Mage or Novitiate Priest) gains the appropriate Arcane Background Edge and rolls randomly for his starting powers (and deity for priests) normally, as if it were his first profession. He does not gain a free die in his arcane skill. That must be learned as normal.

5.1.13 *Noble*

Only characters of Noble or Royal birth may take this as a starting career. The character's noble title, if any, has already been determined by his Social Status. If the character is a noble with no specific title, such as the youngest child of a knight, he may still take this profession.

If a character is promoted, he moves the listed number of steps up the social ladder and gains the property and followers. Use Tables 2.2.1.4 and 2.2.1.5 to determine the character's new rank. A character beginning his career without a title becomes a knight in his own right on his first promotion. Subsequent promotions move him up the ladder normally.

Characters who hold the title of knight from their Social Status may roll on this table or the Knight table (5.1.10) for any profession roll. The decision must be made before the dice are rolled.

Nobles may not become royalty through standard promotion. Reroll if this occurs. There's a specific entry for promotion to royalty.

5.3.10 Property

Property does not come with any servants. If the character wants these, he'll have to hire them once the game begins.

It does not imply an actual townhouse, only something of comparative size and grandeur.

Non-ruined property has basic furnishings, such as chairs, tables, and beds, but does not include unusual items, such as a mage's laboratory, a shrine, or a finely mosaiced ballroom. As a base, these costs \$250 x the number of rooms in the building.

5.3.13 *Secret Society*

In addition to granting a small bonus, secret societies act like Connections. Some societies have active goals, whereas others are more like private clubs.

Roll on the table below to determine the society's aims, then on Table 5.3.5.1 to determine the size and power of the society. The character is an active member of the society and supports their beliefs.

d100	Result
1–6	The Black Daggers: More a cult than a secret society, the Daggers are mortal assassins for the major devils of Hell. Gain 1 die in Stealth.
7–13	Faithful: The faithful is a generic name for a sect of hard-core believers of a deity. Roll on Table 5.1.14.1 to determine the god. If the character is a priest and rolls a different deity, he is a secret turncoat to his faith (not the sect). The Faithful perform acts of intimidation against priests of rival gods and despoil their temples. Gain 1 die in Intimidation.
14–19	Republicans: The Republicans are anti-royalists, sworn to remove all nobility from power and give control of the land to the people. Its members are skilled orators. Gain 1 die in Persuasion.
20–27	Rumormongers: The Rumormongers are information brokers, gathering information from any source then selling it to interested parties. Gain 1 die in Streetwise.
28–35	The Cards: The Cards are a collection of gamblers who meet for games of cards (and dice) in privacy. Many "clubs" have strict rules on excessive noise, not discussing politics, and so on. Gain 1 die in Gambling.
36–43	The White Hand: This sect of healers and philanthropists prefer anonymity, especially in areas where they help those downtrodden by tyrannical overlords. Gain 1 die in Healing.
44–50	The Weak Link: The Link are opposed to slavery. They make raids on slaver caravans and compounds to free slaves. Gain 1 die in Fighting.
51–57	The Purists: Purists believe in the racial superiority of a single race, typically their own. All other races are considered inferior and are subject to threats and attacks. Gain 1 die in Intimidation.
58–84	Huntsmen: This club practises the immoral sport of sentient hunting. They single out a target, typically a beggar or other person no one will miss, then send him a warning that they are hunting him. Hunts are always to the death. Gain 1 die in Tracking.

- 65–71 **The Shroud:** The Shroud are a society interested in discovering the secrets of life after death. As well as seances, they engage in graverobbing and necromancy. Gain 1 die in Guts.
- 72–79 **Demolishers:** Demolishers believe that the races should live in tune with nature. They are opposed to urban settlements, going so far as to commit arson. Gain 1 die in Survival.
- 80–86 **Brotherhood:** The Brotherhood is a collection of individuals of different social ranks who have sworn to aid fellow members in any way they need. As a society, they have no goals other than to aid fellow members. Gain 1 die in Persuasion.
- 87–95 **Vigilantes:** The justice system is weak and corrupt in favor of the rich and powerful. When the law fails, the Vigilantes correct matters. Gain 1 die in Fighting.
- 96–97 **Plague Bearers:** The Corrupt are cultists of the god (or demon lord) of plague. Their goal is spread disease and sickness. Initiates undergo infection with a disease which they can pass on, but does not affect them. Anyone the character touches with his bare hand must make a Vigor roll or gain a level of Fatigue. This worsens by one level per week until Death. Victims can be saved with a Healing roll at –2. This may be attempted once per week.
- 98–100 **The Broken Staff:** Members of this society are opposed to all forms of arcane magic, including magic items, which they break at meetings. They believe it is the work of evil. They gain 1 die in Knowledge (Arcana) from their studies of what is and isn't arcane magic.

5.3.14 *Supernatural Ally*

Supernatural allies are individuals rather than organizations. While they can provide the same benefits as a Connection (see the Edge description), they are also willing to do more for the character than a regular contact. Supernatural allies are always Wild Cards, regardless of their usual status.

Persuasion rolls to secure aid are made at +2 due to the close bond, but aid is limited as the ally does not have the full resources of a Connection at this disposal.

Although called “supernatural,” they can also be monsters. If you have the *Fantasy Bestiary Toolkit*,

you'll find stats for creatures not found in the basic rules there. Otherwise, the GM should make them up as he sees fit.

Evil creatures, such as demons, may be allies because they owe the character a debt. The individual entry that led you here will give a good suggestion as to why they are your ally. An evil ally won't mistreat the character, but his adventuring comrades are not covered by any pact of “my friends are your friends.”

d100	Result

99–100	Werebear

5.3.15 *Supernatural Enemy*

Supernatural enemies are individuals rather than organizations. Allies are always Wild Cards, regardless of their normal status.

Although called “supernatural,” they can also be monsters. If you have the *Fantasy Bestiary Toolkit*, you'll find stats for creatures not found in the basic rules there. Otherwise, the GM should make them up as he sees fit.

Good creatures, such as dryads, may be enemies because the character somehow offended them or caused them harm. The individual entry that led you

here will give a good suggestion as to why they are your enemy.

Once you've determined your enemy, roll on Table 5.3.15.1 for their supporters and Table 5.3.13.2 to see how he intends to get revenge.

d100	Result
1-2	Dragon
3-4	Ancient vampire

99-100	Werebear

5.3.15.1 Support

Supporters are Extras. As with mundane enemies, the supporters' professions are directly linked to their master. For instance, a liche will have a group of zombie or skeleton guards, whereas a giant can call on orcs or goblins.

d100	Result

41-45	Minor Member, Small Group: The enemy is a minor member of a small band of 2d6 individuals.
