PRINTING INSTRUCTIONS

The Dog House Gang has provided the maps and accessories needed for use in **TPSA!** The GM can print out and assemble the main flood water map, trailer roofs, debris and more – with or without a grid. For GMs that prefer a virtual tabletop game experience, we have included maps and accessories in jpg format.

Please refer to the TPSA_SW_Checklist.pdf for a full list of all the maps and map accessory documents.

UFO Crash Maps:

Designed for the **Alien Shark Attack!** scenario, the UFO Crash map is exactly what its name implies. The GM should bring it into play when the 'Parkers seek out the alien saucer after speaking to Dr. Burke.

- TPSA_UFO_Crash_GRID.pdf - Suitable for printing and assembling a 18" x 24" map for tabletop gaming, with a grid.

- TPSA_UFO_Crash_NO_GRID.pdf - Same as above, without a grid.

- TPSA_UFO_Crash_GRID.jpg – Suitable for use in VTT gaming environment, with a grid.

- TPSA_ UFO_Crash_NO_GRID.jpg – Suitable for use in VTT gaming environment, without a grid.

How to Print

The **TPSA!** maps and accessories pdfs are built in layers, allowing the GM to print the cards in different ways, with a simple toggle to include or remove elements on the page before clicking that alluring print button.

- Background layer – toggle off to remove page borders and background color

- Text layer – toggle off to remove all text from display

- Maps layer – toggle off to remove maps from the pages (*Ed. Note: maybe it's just me . . .*)

The tiled pdf UFO Crash maps are designed to be printed in sections and then assembled by hand. We recommend using a common card stock – any typical card stock used for scrapbooking will do (such as 65 lb cover weight) – but regular paper works fine, see below.

- Print out each tiled map section at 100%.

- Cut out the individual map segments, assemble them and connect them using either stick glue or tape. (We prefer to glue the sections of the maps on black poster board from the local general store, for extra stability at the table.)
