HIGH-SPACE

Starship Figure Flats

Thanks for grabbing a copy of the High-Space Figure Flats. These flats are designed for use with the *Fleet Manual*, which is one of the core rule books found in the [High-Space Core Rules Beta](#) bundle. They are intended for use as markers when running starship battles.

The ships have been classified by their *Displacement* dice, from tiny d4 craft up to super-massive d12 carriers. The starships shown on the *Ship Identification* page are all from the upcoming third core book in the High-Space series, *The Lantern*. This soon-to-be-released core rule book sets in motion an epic space opera, detailing events that will shape the destiny of the galaxy! The ships are also identified by their Home Worlds: the *Dupheris Oligarchy*, *Tor Theocracy*, and *Sturm Militocracy*. There are also *Independent*, unaligned ships.

Page 4 provides figure flats for all the ships from the *Ship Identification* page. Simply print out as many as you like, and cut out all the ships you need for your battles.

Page 5 provides additional, untitled ships that you can drop into your action. While these ships are not (yet) in *The Lantern* setting, they have been included to add even more variety.

Of course, all of these figure flats can be used with other sci-fi games.

Finally, we have included a printable hex grid for use with your new figure flats. We have even provided the grid in three different paper sizes to make printing a breeze. So now you have everything you need to start your very own galactic conquests... fire the torpedos!

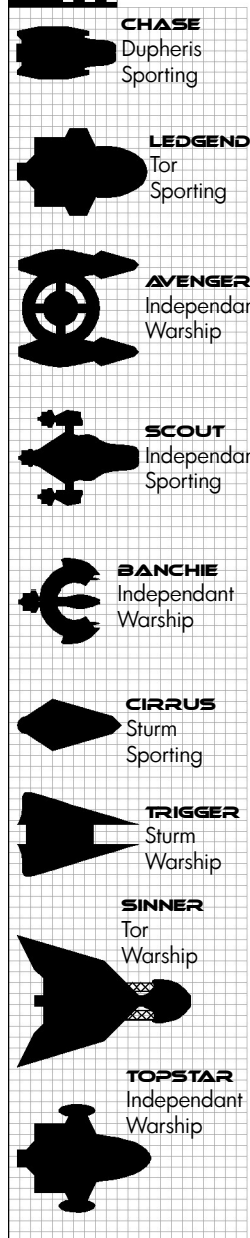

We would love to hear about your experiences with High-Space. Visit the [PEG Forums](#) for discussions on the *Fleet Manual* rules, or the [StoryWeaver Games FaceBook page](#) for general comments.

Happy gaming!

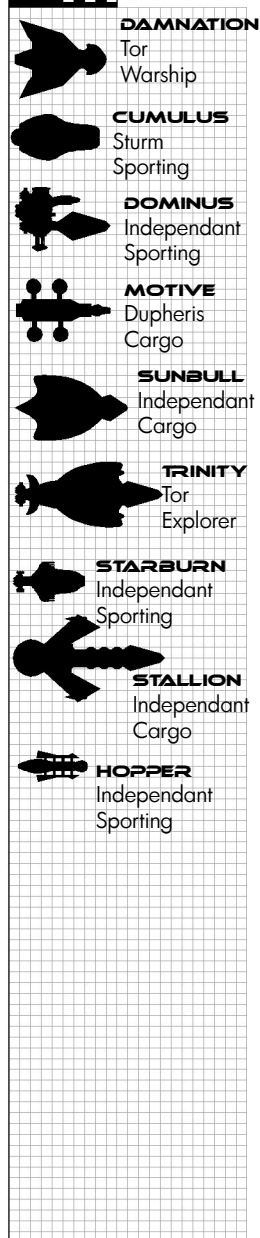

Joe Sweeney,
Grandmaster StoryWeaver
