

How to Shoot your P90

Each P90 holds 50 bullets. You have 3 ways to fire it:

Single Shot

If you only fire one shot, you roll your Shooting die normally. Damage is normal.

Full Auto against one or more targets

You can fire up to 3 attacks per round. You can roll a separate Shooting die for each bullet at -2 each. You only get one Wild die. Each attack that hits will do normal damage. Firing all 3 will expend 10 bullets.

Three-Round Burst

You can fire all three shots as a three-round burst at one target. You will make one Shooting roll at +1. The damage roll will be at +1 as well. You will expend 3 bullets.

Damage

Damage will be 2d8 per successful hit. Each attack will ignore 2 points of target's toughness.
