Attributes: Roll 1D3 for each.

Skills: Roll 1D6 for the total number of points to distribute into all skills. Skills starts at 0 and can be no more than 3. If you need extra points, you can take them from other skills, leaving them at -1 for each point taken. No attribute/skill combination can be less than 1.

Wits: Roll 1D6. You may need to make a Guts check to keep your Wits.

Blood: Roll 2D6+5. When you have lost all your Blood, you are dead.

Guts: Roll 1D6. The more Guts you have, the easier it is to keep your Wits.

Popularity starts at 0. Roll 1D6 and get the same or under your Buffness and Looks attributes (but you may only try once for each, at the beginning of the game). Add 1 to your Popularity for each successful check. Use Popularity to reroll failed skill checks or call in favors.

Roll on the Status Table for more cool stuff.

Money: 2D6 x 100 credits.

GUTS CHECK: Any time you have a traumatic experience in the game, you must make a "Guts Check". Try to roll equal to or below your Guts. If you are not successful, your Wits goes down by 1. When Wits is reduced to 0, you must roll a 4 or less each time you wish to make a skill check or combat roll, or else your character is twitchy and shellshocked, unable to function properly.

SKILL ROLLS: When you want to do something, figure out what attribute/skill combo will get it done. Add your attribute and skill together to get your Target Number and roll 1D6 equal to or below it. **Rolling a 1 is always a success and rolling a 6 is always a failure.** If you are fighting, use the Whup-Ass skill for attack, and Gym for evasion. Although a 6 always fails, having a target of six gives you a higher potential margin of success than a target of five. Always add your Buffness to hand-to-hand weapon damage. **Ties always go to the defender.**

ARMOR: Certain items give you an Armor Value (AV). Denim gives you 1 AP, Leather gives you 2. A Football Helmet or Bicycle Helmet gives you 3 on your head, but any Looks-based target numbers are at -2. When you take damage, subtract your AP in the appropriate location from the damage you are dealt.
