This d30 Random Plant Generator was created to come up with possible fantasy plants suitable for use with any RPG, but specifically to come up with base plants usable with FGM037l: d30 Natural Potions & Poisons Generator.

Using these tables: Roll 1d30 on Table 1 to select the general and specific type of plant (*same roll used on each table i.e. If the d30 roll for Table 1 is a "8" then the plant is an annual vegetable*). Table 1 has a size modifier that is applied to Table 2: Size, which is rolled once for height and once for width. For results over 30, just add the result for 30 (*i.e. 100' or 30.4 meters and the number needed to total your roll*). One roll on table 3a gives the main coloration of the plant (*usually leaves*) and the GM is encouraged to roll at least once on Table 3b to provide accent colors (*flowers, seeds, etc.*), but multiple accent colors can be used as well. A roll on Table 4 is not required, but can add a little extra "flavor" to your plants.
