1. Attribute Scores

Roll 2d6-1 seven times, recording each die result. Then allocate the seven results as you see fit. Assign a default value of 6 to Education to represent a high school diploma or the equivalent. You may voluntarily remove up to 5 points from Education, applying each removed point to another attribute. You may not increase any attribute above 10 in this manner.

If the total of these seven values is less than 40, add points as you see fit to bring the total up to 40. You may not increase any attribute above 8 in this manner.

Alternatively, Start with a pool of 52 attribute points (we recommend 48 points for green characters, 56 points for experienced ones, 60 points for veterans, and 65 points as an elite) and distribute them as you see fit, with at least one point in each. At this stage of character creation, Education cannot have a value higher than 6 and no other attribute can exceed 10.

NOTE: Unless otherwise specified in the phase's Special Rules entry, each year of a life path phase provides 1 personal skill point (for example, a phase that lasts 4 years provides 4 personal skill points). You may not use personal skill points to raise any skill above a value of 15. You may spend personal skill points on any skill except Artillery, Gunnery, Special Equipment, Special Vehicle, and Support Weapons. Any restrictions on spending a phase's professional skill points do not apply to personal skill points.

In addition, you may spend 5 personal skill points to increase any attribute by 1. If necessary, you may "save up" personal skill points over multiple phases to make such a purchase. You may not raise Education above 7 in this manner, nor any other attribute above 9.

11. Nutritional Requirements

A character's base starvation threshold - the length of time he can go without food and avoid attribute reduction - depends on his age:

Age	Starvation Threshold
Under 20	6 days
20-29	7 days
30-34	8 days
35-39	9 days
40-44	10 days
45-49	9 days
50-59	8 days
60-64	7 days
65-69	6 days
70-74	5 days
75+	4 days

Reduce the threshold by 1 day for every physical attribute with a value between 8 and 11, and by 2 for every physical attribute with a value of 12 or greater. This cannot reduce the threshold below 3 days. Finally, for a female character, multiply the threshold by 1.2.

For Stage III, if a character has an athletic build, multiply the threshold by 0.75.

* Physique is a Stage III rule only. For Stage I and II character creation, you are free to choose your character's height and weight.

TWILIGHT: 2013

12. Contacts

94	10	10	10	9	10	10	10
95+	10	10	10	10	10	10	10

Whenever a character reaches or exceeds a threshold age during a phase, you must make one or more aging rolls against the possibility of attribute loss. The above table defines threshold ages. You must roll 1d10 for each attribute. Your character loses 1 point in each attribute for which the corresponding die result is less than or equal to the listed number.

Whenever a character reaches or exceeds a threshold age during a phase, you must make one or more aging rolls against the possibility of attribute loss. The above table defines threshold ages. You must roll 1d10 for each attribute. Your character loses 1 point in each attribute for which the corresponding die result is less than or equal to the listed number.

1. Attribute Scores

Roll 2d6-1 seven times, recording each die result. Then allocate the seven results as you see fit. Assign a default value of 6 to Education to represent a high school diploma or the equivalent. You may voluntarily remove up to 5 points from Education, applying each removed point to another attribute. You may not increase any attribute above 10 in this manner.

If the total of these seven values is less than 40, add points as you see fit to bring the total up to 40. You may not increase any attribute above 8 in this manner.

Alternatively, Start with a pool of 52 attribute points (we recommend 48 points for green characters, 56 points for experienced ones, 60 points for veterans, and 65 points as an elite) and distribute them as you see fit, with at least one point in each. At this stage of character creation, Education cannot have a value higher than 6 and no other attribute can exceed 10.

Attribute	Initial	Modifiers	Value
Awareness	_____	_____	_____
Cognition	_____	_____	_____
Coordination	_____	_____	_____
Fitness	_____	_____	_____
Muscle	_____	_____	_____
Personality	_____	_____	_____
Resolve	_____	_____	_____
Education	_____	_____	_____
CUF	_____	_____	_____
OODA	_____	_____	_____

Initial CUF value is equal to (Resolve / 2).

Initial OODA value is equal to (Awareness / 2).

2. Background Skills

Your character receives 6 points in the Language cascade for his native language. You also may distribute (6 + Cognition) skill points among the following skills, with no more than 3 points in any one skill:

Skill	Points	Final
Agriculture	_____	_____
Animal Husbandry	_____	_____

NOTE: Unless otherwise specified in the phase's Special Rules entry, each year of a life path phase provides 1 personal skill point (for example, a phase that lasts 4 years provides 4 personal skill points). You may not use personal skill points to raise any skill above a value of 15. You may spend personal skill points on any skill except Artillery, Gunnery, Special Equipment, Special Vehicle, and Support Weapons. Any restrictions on spending a phase's professional skill points do not apply to personal skill points.

In addition, you may spend 5 personal skill points to increase any attribute by 1. If necessary, you may "save up" personal skill points over multiple phases to make such a purchase. You may not raise Education above 7 in this manner, nor any other attribute above 9.

5. Advantages/Disadvantages

Name Value

At the end of every phase that grants Rank, you must determine whether your character earns a promotion. This requires an attribute check with a penalty equal to 2 plus your character's current Rank.

(Stage III - Weight x [26 + MUS+FIT]%)

Emergency Load

(Stage II - 21 + (2 x MUS) + FIT + RES)
(Stage III - Weight x [55 + MUS+FIT+RES]%)

Damaging Load

(Stage II - x 2 Emergency Load)
(Stage III -x 2 Emergency Load)

11. Nutritional Requirements

A character's base starvation threshold - the length of time he can go without food and avoid attribute reduction - depends on his age:

Age	Starvation Threshold
Under 20	6 days
20-29	7 days
30-34	8 days
35-39	9 days
40-44	10 days
45-49	9 days
50-59	8 days
60-64	7 days
65-69	6 days
70-74	5 days
75+	4 days

Reduce the threshold by 1 day for every physical attribute with a value between 8 and 11, and by 2 for every physical attribute with a value of 12 or greater. This cannot reduce the threshold below 3 days. Finally, for a female character, multiply the threshold by 1.2.

For Stage III, if a character has an athletic build, multiply the threshold by 0.75.

* Physique is a Stage III rule only. For Stage I and II character creation, you are free to choose your character's height and weight.

TWILIGHT: 2013

12. Contacts
