

OGRES

Ogres are a huge warrior race from the mountains beyond Blackfire Pass. Most are keen to stay in their mountain home, enjoying their constant cycle of hunting and feasting, but a few with wanderlust have ventured north into the Empire. They are still a rare occurrence, and the sight of their giant hulking frames and pronounced fangs are often enough to cause fear and panic among the common folk. Consequently, most ogres find work as mercenaries, bodyguards or thugs - and there are many who say that this is all they are good for. They don't say it too loud, of course, lest the ogres rip their arms off.

Background

Despite what many people think, ogres are not related to the goblinoid races, although they still irritate dwarves with their insistence on employing the greenskins to work their war machines. Ogres seem to have appeared in the mountains around the same time as the Human tribes were settling the lower lands. Due to their southern location, far from chaos incursions and the empire, ogre culture has changed little over the centuries. Their tribal lifestyle revolves totally around battle and hunting, with increased status granted to those who fight the hardest, kill the most prey and eat the most at the feast afterwards. Ogres pride themselves on the size of their bellies (not to mention their ability to digest anything) and call all humans by the common ogre insult of "Slim".

Ogres have recently become more in contact with humans, as Border Princes have begun hiring bands of ogre warriors (known as "ravagers") in lieu of mercenaries, so as to get the upper hand in their neighbourly squabbles. These human encounters have caused an increasing number of ogres to journey into Tilea, Estalia and the Empire, and one can only wonder at the effect this will have on ogre culture in the long term.

In battle, ogres are terrifyingly ferocious, shunning missile weapons in preference of charging with their huge bulk until their enemies fall or rout. The standard ogre weapon is a club, and the only armour they

usually deign to wear is their familiar "gut-plate", a huge round piece of metal worn over the stomach to protect that most precious spot (providing two points of armour to the Body). The quality of one's club and gut-plate also measure one's status in ogre society.

Roleplaying Hints

Ogres come from a very primitive lifestyle, and tend to lack subtlety as a result. Everything can be seen as either something to fight or something to eat, and any time spent not doing one of these is, in ogre eyes, pointless and dull. They speak plainly, act boldly and live largely, for tomorrow, somebody might cut your head off, or the beer might run out.

| Toll Keeper | 99–00 |

New Talent: Acute Sense of Smell

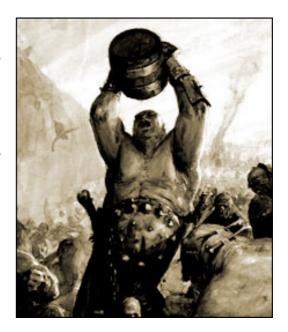

Decription: Your sense of smell is as sharp as a wolf's. You gain a +20% bonus on Perception Skill Tests that involve smell or taste.

New Career: Ravager

Description

In the wild regions of the Border Princes and the Badlands, soldiers and mercenaries are hard to come by, and why pay for two dozen men when five ogres can do the same job? Ravagers are typically employed not to simply kill but to rout and destroy. Local lords pay ravagers (usually in food) to storm down into a town or encampment, slaughter any resistance, terrify the populace, smash or upturn everything they can, run off the livestock and eat anything they decide looks tasty. Some Ravagers crave more of a challenge or more variety, however, and become mercenaries; others set off to seek adventure instead.

Kaal entered the arena for his love of the game, but soon lost his taste for it. Not because of the unending slaughter, but because of the cheating and fixing he witnessed. He saw too many worthy opponents poisoned or hobbled by the organisers, to allow some crime lord or burgher to fill their pockets. When his time came to take a fall, Kaal smelt the dope in his swill, threw it away and took his opponent apart. Knowing there would be reprisals from his owner and whichever rich man he had just made poorer, Kaal escaped the pits that night. He is now seeking adventure, fights that aren't fixed, and, perhaps, a way to pay back the rich who so cowardly trade others' lives for gold.

Trappings: Sling with ammunition, 4 rat traps, Pole with 4 dead rats

on it, Small but Vicious Dog (Dugger)

Although female and still young, Magrun had a belly-girth to rival any of her male tribesmen. But they snubbed her attempts to join them in battle so she set off to the Empire, in search of adventure and people who might treat her better. Arriving almost starving in Krugenheim, she was taken in by a Halfling farmer and his wife, who recognised a fellow outsider. They helped her find a job in town when the plague rolled in and nobody was willing to get down in the sewers and squish a few rats. Granted, Magrun's large frame stops her from getting into the nooks and crannies but with one blow of her fist she can kill a dozen rats, and she eats whatever she kills too, making cleanup quicker and cheaper.

Soon recognised as the best ratcatcher the town had ever had, and their saviour from the plague, Magrun became accepted, and grew to like humans and Halflings far more than her Ogre brethren. However, now that she has decided to head to Talabheim, seeking more adventure than just killing rats, she will encounter prejudice all anew.

Quote: "Ug, this ogre ale cheap and awful! Got any Halfling Peculiar?"

Spikes, 9 gold crowns

Although he began his mining career as a tunnel support, Daracc is clever for an ogre and soon proved to be a natural with gunpowder and explosives. While delivering some sulphur to an alchemist-cumgunsmith, they got talking, discovered their mutual passion and decided to team up. Daracc wanted to learn more about gunpowder, and the gunsmith needed someone to test his experiments.

The two had many adventures until the gunsmith was murdered in an alley by members of a cult devoted to halting the march of science and the so-called abominations it creates. Now Daracc is no longer searching for knowledge, but for bloody revenge on his friend's killers.

gold crowns (his severance pay)

Oh how people laughed when Hansup the Ogre was sworn into the Nuln City Watch. Oh how they snickered as he got his nickname, based on the first thing he always said. Oh how they chortled when they realised he was stupid even for an ogre.

Nobody is laughing any more. Especially not the city's criminals.

The simple fact is that Hansup is just too stupid to be tricked, cajoled or bargained with. He knows the law (he taught himself to read by reading the town charter) and if he sees anyone doing anything illegal, he catches them in his net and carries them straight to the Watch House, where his boss sorts them out. Methodical, implacable and scrupulously honest, Hansup is a rogue's worst nightmare. So much so that every crime lord in the city soon put a price on his head. Afraid this might lead to his fellow Watchmen being injured or killed as well, Hansup has left Nuln to try adventuring for a while, keeping the peace on a much larger and freer scale.

Quote: "HANSUP! You all unnarest! Put down weapons, or be thumped for resissing a watchman!"
